THE important task of deciding whether the subject of a patent is new or old is often exceedingly difficult, and severely tests the acumen of judges and learned counsel when a patent is on its trial. This vexed question is not left to the absolute discretion of the Comptroller or Examiner at the Patent Office. In the only case in which the Comptroller is legally empowered to refuse an application for a patent for want of "novelty," it is necessary for him to show that the invention has been wholly and specifically *claimed* in a prior patent within the past fifty years. The number of such refusals since January 1, 1908 (when the Act came into force), has probably been less than 1 per cent.

The "working" section of the Act (Sec. 27) has been commented upon by the press and public as if it were the whole Act, the remaining ninety-eight sections (fifty-one of them new) being ignored. This important 27th Section, however, introduced "compulsory working" for the first time into English patent law, and was heralded by the promoters of the new Act as a sure panacea for unemployment and trade depression, supplying the necessary weapon wherewith the foreign patentee who sends goods to this country under the protection of his English patent shall in future be compelled to manufacture here. The President of the Board of Trade in asking leave to introduce the bill, said: "The main object of this bill, after all, is to prevent the patent law from being used for the hindrance and suppression of British industrial development. The object of the Patent laws is to reward ingenuity, and by so doing to encourage invention and to promote British industry. Unfortunately, however, they have been used in many respects to discourage the British inventor, and to destroy many British industries." Mr. Lloyd George obviously was referring to German-made aniline dyes (originally invented by William Perkins, an Englishman, who late in life received tardy recognition in the shape of a knighthood), and American boot machinery, these being the two greatest foreign monopolies in England. One remedy for this abuse is now comprised in the following words:—

Sec. 27.—(1) At any time not less than four years after the date of a patent and not less than one year after the passing of this Act,* any person may apply to the Comptroller for the revocation of the patent on the ground that the patented article or process is manufactured or carried on exclusively or mainly outside the United Kingdom.

(2) The Comptroller shall consider the application, and, if after enquiry he is satisfied that the allegations contained therein are correct, then, subject to the provisions of this section, and unless the patentee proves that the patented article or process is manufactured or carried on to an adequate extent in the United Kingdom, or gives satisfactory reasons why the article or process is not so manufactured or carried on, the Comptroller may make an order revoking the patent either—

(*a*) forthwith; or

(*b*) after such reasonable interval as may be specified in the order, unless in the meantime it is shown to his satisfaction that the patented article or process is manufactured or carried on within the United Kingdom to an adequate extent:

Provided that no such order shall be made which is at variance with any treaty, convention, arrangement, or engagement with any foreign country or British possession.

(3) If within the time limit in the order the patented article or process is not manufactured or carried on within the United Kingdom to an adequate extent, but the patentee gives satisfactory reasons why it is not so manufactured or carried on, the Comptroller may extend the period mentioned in the previous order for such period not exceeding twelve months as may be specified in the subsequent order.

(4) Any decision of the Comptroller under this section shall be subject to appeal to the court, and on any such appeal the law officer or such other counsel as he may appoint shall be entitled to appear and be heard.

An official circular setting forth the above provisions has been sent out to 60,000 British and foreign holders of English patents, and the fact cannot be gainsaid that this new legal requirement has already stimulated trade in certain branches in this country. The following establishments are reported to have been created or to be in contemplation as a direct result:—Elberfelder Farbenfabriken; Sanatogen Food Co., Cornwall; Turner & Co.; Alfred Johnson & Co., Pottery, Kent; Eagle Pencil Co.; British Glanstoff Co.; Stolz Electrophone Co.; Mills Novelty Co.; The Hoschlist Farbewerke, indigo dye factory, Ellesmere Port; Deutsche Waffen und Munitions Fabriken—makers of the famous Mauser rifles; Gillette Safety Razor Co., Leicester; F. Bayer Co., 24 acres for aniline dye works, Port Sunlight; National Cash Register Co., London; Pintsch Suction Gas Plant Co., Enfield; Buffalo Speciality Co., London; United Shoe Machinery Co., London; Clinton Wire Cloth Co.

Tariff reformers regard the Act as an instance of protection, though its Free Trade sponsor stated that "he had compiled a list of hundreds of patents taken out in this country and worked abroad. They covered every branch of industry. The old system meant that every one of those patents registered here and worked abroad was excluding a valuable, profitable industry which would afford employment for a good many people in this country. To call that free trade was to libel a good cause." Already (up to the end of October), nine petitions for revocation under Section 27 have been presented. One of these petitions was withdrawn, and at the time of writing none of the others has been decided. There are altogether 70,000 English patents now in force, of which some 30,000 are held by foreigners.

* The Act was passed on August 28, 1907.

STANLEY, POPPLEWELL & CO.

AFTER having been considered by the Royal Commission on the Aged Poor (1893-95), and by several Parliamentary and Departmental Committees, the proposal to give State pensions to aged persons with limited means took the form of a definite scheme of legislation in the Session of 1908, and after the Chancellor of the Exchequer had announced his intention of making provision for the funds that would be required, a Bill was introduced into the House of Commons, and in due course received the Royal Assent on August 1, under the title of the Old Age Pension Act, 1908.

The Act provides that every man or woman who has attained the age of 70 years, who has been a British subject and has had his residence in the United Kingdom for 20 years, and whose means do not exceed £31 10s., shall be entitled to receive a pension of an amount which varies according to his or her means of from 1s. to 5s. a week. The scale is as follows: Where the yearly means of the Pensioner as calculated under the Act do not exceed £21, the rate of pension per week is 5s.; exceed £21. but do not exceed £23 12s. 6d., the rate is 4s.; exceed £23 12s. 6d., but do not exceed £26 5s., the rate is 3s.; exceed £26 5s., but do not exceed £28 17s. 6d., the rate is 2s.; exceed £28 17s. 6d., but do not exceed £31 10s., the rate is 1s.; exceed £31 10s., no pension is payable. The claimant for a pension must have resided as a British subject for 20 years in the manner provided by Regulations, and under these Regulations residence is so defined as to allow a claimant who has been absent to be treated as having resided in the United Kingdom, if, before the absence, he was living in the United Kingdom and throughout the absence he was employed in the service of the Crown as a soldier, sailor, or otherwise, or was in the service of anyone so employed; if before the absence he was living in the United Kingdom and throughout the absence he was serving on board a vessel registered in the United Kingdom; or if throughout the absence his home was in the United Kingdom. But a person is not to be deemed to have had his home in the United Kingdom during any absences if the aggregate of those absences since the beginning of the earliest of them exceeds eight years. Every person, however, who complies with the statutory conditions as to qualifications is not entitled to receive a pension, as there are certain statutory disqualifications which have to be taken into account. Thus, a person is disqualified for receiving or continuing to receive an Old Age Pension notwithstanding the fulfilment of the statutory conditions, if he has at any time since the 1st day of January, 1908, received any poor relief but medical or surgical assistance (including food or comforts) supplied by or on the recommendation of a medical officer; or any relief given to any person by means of the maintenance of any dependant of that person in any lunatic asylum, infirmary, or hospital, or the payment of any expenses of the burial of a dependant; or any relief (other than medical or surgical assistance, or relief hereinbefore specifically exempted) which by law is expressly declared not to be a disqualification for registration as a parliamentary elector, or a reason for depriving any person of any franchise, right, or privilege will not disqualify. If before a claimant becomes entitled to a pension he has habitually failed to work according to his ability, opportunity, and need, for the maintenance or benefit of himself and those legally dependent upon him, he is disqualified. A person is disqualified while he is detained in any asylum or maintained in any place as a pauper or criminal lunatic; and also during the continuance of any period of disqualification arising or imposed in consequence of conviction for an offence. The Act provides that in calculating the means of a person account shall be taken of the income which that person may reasonably expect to receive during the succeeding year in cash, excluding any sums receivable on account of an Old Age Pension; of the yearly value of any advantage accruing to that person from the use or enjoyment of any property belonging to him which is personally used or enjoyed by him; and of the yearly income which might be expected to be derived from any property belonging to that person which, though capable of investment or profitable use, is not so invested or profitably used by him; and of the yearly value of any benefit or privilege enjoyed by that person. In calculating the means of a person being one of a married couple living together in the same house, the means in any case are not to be taken to be a less amount than half the total means of the couple. If any person has deprived himself of any income or property in order to qualify himself for the receipt of an Old Age Pension, or for the receipt of an Old Age Pension at a higher rate than that to which he would otherwise be entitled, that income or the yearly value of that property must be taken to be part of the means of that person.

Any person over 70 on the first of January, 1909, and who is otherwise eligible, will be entitled to make a claim, and persons who will become 70 subsequently, and who are otherwise eligible, may make their claims within four months before reaching the age of 70. Each pension will be payable only at one particular post-office, to be selected at the time the claim is made. On application at the post-office, a claimant will be able to procure a form of claim without payment, and, if he wishes it, assistance will be given at the post-office to enable him to fill it up properly. He will have to sign the form, or, if he cannot write, make his mark, and his signature or mark will have to be witnessed by some other person, who will also sign his name. When the form is filled up, it should be handed in at the post-office at which the claimant wishes the pension to be paid.

In due course the claimant will be visited by the pension officer of the district in which he resides, who will ask various questions for the purpose of ascertaining accurately whether all the conditions for a pension are fulfilled, and whether the claimant is or is not subject to any disqualification, and what the yearly means of the claimant are. Both in filling up the form and in supplying information to the pension officer the claimant must be careful to give complete and true answers. Any false statement or false representation knowingly made will render the claimant liable to six months imprisonment with hard labour. When the pension officer has obtained all such information as he can about any claim, he will make a report upon it to the local pension committee.

Local Pension Committees are to be appointed as follows:—in England for every County by the County Council, and for every Municipal Borough and Urban District with a population of 20 000

and over by the Council of the Borough or District; in Scotland for every County by the County Council, and for every Royal, Parliamentary or Police Burgh by the Council of the Burgh; and in Ireland for every County by the County Council, and for every Borough and Urban District with a population of 10,000 and over by the Council of the Borough or District.

The Isles of Scilly have a Council of their own, by whom the Pension Committee is appointed, but the Act does not apply to the Channel Islands or to the Isle of Man. The claimant will have to produce evidence of age, and he will have to do this at his own expense. The cost of a certificate of birth in England is 3s. 7d., and many applicants may be unable to bear this. In any such case the claimant may give the exact date and place of birth, and the pension officer will, himself, endeavour to verify it by application to the Registrar-General. Such applications can only be made in respect of births in England and Wales which may have been registered as having occurred on or after July 1, 1837, as that is the earliest date on which births were registered in England and Wales. No births that occurred prior to July 1, 1837, were registered on that date, and no certificate of such births can therefore be obtained. Pension officers and pension committees are not empowered to make any payment to clergymen or parish clerks or others for information supplied as to the birth or baptism of claimants, and where applications from pension officers for information are met with demands for fees no such fees can be paid. In Scotland, where for some time to come certificates of birth of persons 70 years of age or over will not be available, the old Parochial Registers of births and baptisms in the custody of the Registrar-General in Edinburgh may be searched for information where necessary. In Ireland, where also certificates of birth will not be available, the Baptismal Registers will probably afford the necessary evidence of age, and claimants should have no difficulty in obtaining certificates if proper application is made. According to the instructions in the Second Schedule to the Regulations dated October 15, 1908, in determining the age of any person "regard may be had to any of the following documents, viz.:—Certificate of birth, certificate of baptism, certificate of service in any of the forces of the Crown, certificate of membership of any friendly or provident society or trade unions, certificate of marriage; any other evidence which appears sufficient for the purpose." The committee on receiving the report from the pension officer will consider the claim, together with the report of the pension officer, and a notice will in due course be sent to the claimant by the clerk of the committee, informing him of the decision of the committee upon the claim. Cases in which the pension officer considers that the claimant is entitled to receive a pension, and the committee agree with him, will present little or no difficulty. In all cases, however, in which the committee, on the information before them, think that the matter ought to be decided adversely to the claimant, they are required by the regulations to give the claimant an opportunity of being heard. If the claimant, or someone on his behalf, is not in attendance at the meeting, the consideration of the matter must be adjourned and notice must be sent to the claimant acquainting him with the fact, and stating that he is entitled to attend and be heard, if he so desire, at the meeting at which the matter will again come up for consideration. When the committee have allowed a claim for a pension, it is open to the pension officer, if he considers that the claimant is not eligible for a pension or that the decision is otherwise wrong, to appeal to the Local Government Board. If the committee disallow a claim, it is open to the claimant to appeal from their decision to the Local Government Board of England, Scotland, or Ireland, as the case may be, if he can produce evidence to show that the decision of the committee was wrong. There is no power in the committee or in the Local Government Board to dispense with any of the requirements of the Act of Parliament, or to exempt anyone from disqualification, or to remove any of the conditions which Parliament has imposed. If, therefore, a claim has been disallowed on the ground that the claimant does not fulfil one of the statutory conditions or is disqualified — for example, through having received poor relief since *January* 1, 1908—there is no use in his making an appeal unless he is in a position to show that the condition is fulfilled, or that he is not disqualified. The committee, on receiving the notice of appeal, will send all the documents relating to the claim to the Local Government Board of England, Scotland, or Ireland, as the case may be, who will have to decide the appeal. The notice of appeal must be filled up with particulars which will be obtainable from the notice of decision of the committee, and must be signed by the appellant, or, if he cannot write, he must affix his mark in the presence of a witness, whose signature will be appended. The date on which it is sent to the Local Government Board must not be later than seven days after the day on which the notice of decision of the committee was received by the claimant, or, if the appellant is a person who has not received a notice (that is to say, a person other than the claimant or the pension officer), within seven days of the date of the decision. Thus, if the claimant received the notice of decision on the seventh day of the month, the appeal must be sent off not later than the 14th. When the form has been duly filled up, signed, and dated, it should be folded up and posted to the Local Government Board, whose address in London, Edinburgh, or Dublin will be on the back of the form. After a claim has been finally allowed, the pension officer will deliver to the pensioner a book of pension orders, which will be payable week by week at the post office named in the claim. Claimants who are too infirm or ill to attend at the post office for the purpose of obtaining a form of claim or to attend when summoned before the committee, may send someone else to get the form or to represent them. The whole of the expenses both of working the scheme and of paying the pensions will be defrayed by Imperial funds out of moneys provided by Parliament. There is some doubt as to the ultimate cost of the scheme, but the statistical tables on which the scheme was based, as well as all the available information as to the probable number of pensioners at various ages, will be found in a Parliamentary paper (Cd. 3618) issued in 1907.

WM. A. CASSON.

The Yield of the New Death Duties.

In Whitaker's Almanack for 1908 it was pointed out that although the new scale of Death Duties under the Finance Act of 1907 was not in full effect during part of the half-year April to September 1907, there seemed to be, at the time when the Almanack was issued towards the close of 1907, reasonable expectation of a fair surplus from the Death Duties in the year which would end on March 31st, 1908. This expectation was not fully realized. During part of the last quarter of the financial year the receipt of duty was disappointing, and a deficit appeared probable. Fortunately for the Exchequer, one very rich estate yielded nearly half a million in duty just before the end of the year, and there was a surplus, but it was only £373.000. The amount paid into the Exchequer from the Death Duties in the year ended March 31st, 1908, was £19,070,000 as compared with the Budget estimate of £18,697,000, but the accounts of the Inland Revenue Commissioners do not show how much of the total receipt was derived from the increased rate of duties and the super-tax imposed by the Finance Act of 1907. They show, however, that the receipt of duty on the estates of persons who died after April 18th, 1907, in respect of which new rates of duty became operative, was as follows :—

Estates.		New (1907) Rate of Duty.	Former (1894) Rate of Duty.	Duty Received.
Exceeding	Not Exceeding			
£	£			£
150,000	250,000	7% instead of	6¼%	821,114
250,000	500,000	8% ,,	7%	988,300
500,000	750,000	9% ,,	7½%	344.198
750.000	1,000,000	10% ,,	7½%	383,555
1.000,000	1,500,000	10½ & 11% ,,	8%	45,253
2,000,000	2,500,000	10½ & 13% ,,	8%	226,626
3,000,000		10½ & 15% ,,	8%	469,003
				£3,278,051

The estate over £3 000,000 which yielded to the Exchequer the large sum of £469,003, as shown above, was valued at £3,448,692, and was charged on the new scale with duty at the rate of 10½ on £1,000,000 and super-tax at the rate of 15% on £2,448,692. The charge under the scale of the Finance Act of 1894 would have been 8% on the whole sum of £3.448,692, and the gain to the revenue from this one estate by the difference between the old and the new rates of charge was thus about £194 000. The Budget Estimate was that altogether £600,000 would be gained in the year ended 31st March, 1908, from the difference between the old and the new rates, and this estimate appears to have been nearly, if not quite, realized. It was also estimated that when the new charges became fully operative in the financial year 1908-1909, the gain would be £1,200,000.

Some Anomalies in the Inland Revenue Accounts.

It may be noticed that in the table given above the duty at the rate of 10½ and 11% on an estate between £1,000,000 and £1,500,000, which duty would, of course, amount to between £100,000 and £155,000. is stated at only £45,253. Similar anomalies occur elsewhere in the Inland Revenue Reports on the Death Duties, as, for instance, where the capital value of an estate of the class between £2,500,000 and £3,000,000 is stated to be £19,500, and the capital value of an estate between £1,500,000 and £2,000,000 is given as only £2,208. The explanation is said to be that "the capital is classified according to the total value of each estate," and that these figures represent only the capital value of a small part of an estate of the class in which it is included. The explanation is not, however, easily to be understood, and the accounts might more conveniently be rendered in a form in which such anomalies would not occur.

Seven Years' Results.

During the past seven years the receipt of duty and the capital assessed have been as follows :—

	Duty Received.	Capital Assessed.
1901-1902	£18,513,714	£288.869.885
1902-1903	17,913,177	270.473.307
1903-1904	17,326,137	264.118.116
1904-1905	17,258,431	265,103,196
1905-1906	17,344.925	272.172,947
1906-1907	18,958,763	298,460,180
1907-1908	19,108,256	282,294.164
	£126,423,403	£1,941,491,795

The yield of the Death Duties in the year 1894-95, when the Finance Act of 1894 had been effective for about six months, was £10,895,000, and the Budget estimate for the year which will end on the 31st March, 1909, when the increased rates of duty and the super-tax imposed by the Finance Act of 1907 will have been fully effective during the whole of the year, is £19,500.000. This estimate, at the rate of £375.000 per week, seems moderate, but the receipt in the half-year ended 30th September last was only £8,650.000, as compared with £9.700,000 in the corresponding six months of 1907, showing a decline of £1,050,000 for the period, although during the first half of 1907 the higher rates of duty were not fully effective. There is thus a large deficiency to be covered in the second half of the current financial year 1908-1909; but the last quarter—the winter quarter—has sometimes been the heaviest of the year, and as under the new scale of charges the yield from the richest estates is very large, two or three of these may before the end of the year bring up the total more nearly to the estimate.

Proportions of Personalty and Realty.

The gross capital value of *all* property subject to Estate Dtuy (including settled property) of

which the Inland Revenue Department had notice during the past seven years is as follows, but this includes all property liable to contribute to the duty, whether in lump sums or in yearly or half-yearly instalments : –

	No. of Estates.	Personalty.	Realty.
1901-1902 ...	61,393	£214,392,811	£105,996,426
1902-1903 ...	62,310	213,594,553	84,869,413
1903-1904 ...	62,108	212,473,239	80,707,614

1907-1908 ...	67,533	228,704,720	85,193,864
	446,187	£1,543,609,116	£617,611,947

Estates over £250,000 each charged with duty, which were 99 in number in 1905-1906, and 86 in 1906-1907, were only 75 in 1907-1908, although the number of estates then brought into account was the largest for seven years. The number of insolvent estates in 1907-1908 was 1,663, with a gross capital of £3,946,565, debts £5,326,034, and a net deficiency of £1,379,469 ; and the number of estates not exceeding £100 each in net value was 16,475, with a gross capital value of £1,798,595 and a net capital of £922,329.

LARGE AND SMALL ESTATES COMPARED.

Estate Duty was levied in 1907-1908 from estates over £1,000 each in the following proportions :—

	No. of Estates.	Capital Value.	Estate Duty.
Over £250,000 each.....	75	£52,500,000	£4,520,000
Between £100,000 and £250,000 each	199	35,250,000	2,200,000
	274	£87,750,000	£6,720,000
Between £25,000 and £100,000 each)	1,330	69,250,000	4,150,000
Between £1,000 and £25,000 each.	19,697	105,670,000	3,450,000
	21,301	£262,670,000	£14,320,000
Under £1,000 each.....	46,232	19,687,000	357,500
	67,533	£282,357,000	£14,677,500

Legacy Duty yielded in addition £3,908,600, and Succession Duty £732,437. It seems probable that in the course of two or three years the Death Duties, which in 1894-1895 yielded less than 11 millions, may, under the existing scale of charges, unless there should be a decided set-back, yield over 20 millions. It will be seen from the figures given above that 52½ millions of capital from 75 estates over £250,000 each were charged with a million more in duty than 105½ millions of capital derived from 19,697 estates under £25,000 each and 274 estates over £100,000 each, with a total capital of 87¾ millions, paid within 10 per cent. as much duty as 21,027 estates under £100,000 each with a total capital of 175 millions. One estate of nearly 3½ millions yielded £469,000 in duty and 46,232 estates under £1,000 each, with an aggregate capital of more than 19½ millions, paid only £357,500 in duty. The effect of the increased duties and super-tax on very large estates, which are few in number, is, of course, to make this source of revenue, which is now of great importance, more uncertain in its yield. Hitherto when the maximum rate of estate duty was 8 per cent. on estates over a million each, it has been noteworthy that there was apparently but little disposition to avoid the Death Duties by the transfer of property by the owner during his life to his intended heirs. Very rich people especially have seemed indisposed to make such transfer. Whether the new duties, which with super-tax may amount to 15 per cent., with sometimes 10 per cent. more for Legacy Duty, will lead to a change in the practice of wealthy testators, cannot, of course, be determined for some time to come, but the question is one of much interest, not only in this country, where the Death Duties are becoming of increasing importance, but in other countries also where new sources of revenue or increased revenue from present sources are under consideration.

DEATH DUTIES IN OTHER COUNTRIES.

In most countries a duty is imposed on property which passes on the death of the owner, but in almost all other countries the duty is charged on the amount of each individual inheritance according to the relationship of the inheritor to the testator, and not, as in this country, by the Estate Duty on the whole amount of the estate. The charges vary widely in different countries, and at present the highest charge appears to be made in France, where an inheritor, if not of kin to the testator, is charged on an estate exceeding 50,000,000 francs (£2,000,000) at the rate of 20½ per cent. on part of his inheritance ; and in Italy, where in certain cases an inheritor not of kin may have to pay at the rate of 22 per cent. on such part of his inheritance as exceeds 1,000,000 lire. The rates of charge are graduated. The charge in Italy to a stranger in blood or to a relation beyond the sixth degree is at the rate of 15 per cent. on the first 50,000 lire and 16·50 per cent. on the next 50,000 lire, then 17·60 per cent. on the next 150,000 lire, 19 per cent. on the next 250,000 lire, and 20½ per cent. on the next 500,000 lire, and the highest rate of 22 per cent. falls only on the portion above 1,000,000 lire. In France there are twelve of such graduations, and the inheritor who is not of kin or is a relation beyond the sixth degree pays 15 per cent. on the first 2,000 francs, 15½ per cent. on the next 8,000, then 16 per cent. on 40,000, and 16½ per cent. on 50,000 francs, and so on with graduations of one-half of 1 per cent. each up to 18½ per cent. on a sum of a million francs, 19 per cent. on 3 millions, 19½ per cent. on 5 millions, 20 per cent. on 40 millions, and 20½ per cent. on so much of the inheritance as exceeds 50 millions of francs. Estates of more than £2,000,000 (50,000,000 francs) are, however, few in number in any country, and it is very seldom that an estate of this amount becomes the sole inheritance of a relation beyond the sixth degree or of a stranger in blood. The duties payable by inheritors in the direct line and by spouses in France and Italy are generally lower than in this country, but the charges to brothers and sisters and other relations up to the sixth degree are higher. Thus in France the charge on estates inherited in the direct line ranges from 1 per cent. on 2,000 francs up to 5 per cent. on any portion of the estate over 50 million francs, and on estates passing between spouses from 3¾ to 9 per cent., but brothers and sisters pay 8½ per cent. on the first 2,000 francs up to a maximum rate of 14 per cent., and nephews and nieces, uncles and aunts from

a minimum rate of 10 per cent. to a maximum of 15½ per cent. In Italy the rates are from 1·60 to 3·60 per cent. on inheritance in the direct line, from 3 to 6·60 per cent. between spouses, from 7 to 10 per cent. to brothers and sisters, and from 8½ to 13 per cent. to uncles and nephews, but the maximum rate in each case applies to any amount over one million lire, whereas the French maximum does not apply under 50,000,000 francs.

THE EFFECT OF DEATH DUTIES ON THRIFT.

In Denmark, where duties on succession were first introduced in 1792, an interesting official report has lately been issued on the operation of the laws governing such duties, and it is noted, with reference to the question whether high succession duties tend to discourage thrift, that "as the rates of duty are somewhat low in Denmark (from 1 to 7 per cent.) there is nothing to prove this theory, which is controverted by the fact that the population of France is most industrious and thrifty despite of the Succession Tax being higher there than in any other country."

DEATH DUTIES IN THE COLONIES, IN JAPAN AND THE UNITED STATES.

In Japan the tax on succession to a house is at lower rates than apply to other property. The duties on such other property are: To a descendant, from 15 per mille on 1,000 yen to 50 per mille up to 100,000 yen. To a spouse or an ascendant, from 17 per mille to 55 per mille. To any other person, from 25 per mille to 65 per mille; and to all three classes, 5 per mille additional for every 50,000 yen in excess of 100,000 up to 1,000,000 yen. In the United States of America a tax on inheritance of personal estate was imposed in 1757 by an Act which was repealed in 1802, and a National Legacy Tax, imposed in 1862 and amended in 1864 and 1866, was repealed in 1870. Such taxation had been denounced by Thomas Jefferson (President 1801–1809) as opposed to the first principles of association, and was described by leaders of the Democratic party in 1894 as un-American, unjust and un-Democratic, but a Legacy Tax was again imposed in 1898; and although there is still difference of opinion on the subject, death duties in some form or other seem likely to remain a source of revenue in the United States. In the Australian Colonies and the Dominion of New Zealand the rates of Succession Duty show considerable variation, but the maximum rates are relatively high. In Tasmania and New South Wales the maximum is 10 per cent. on estates over £100,000 each, in Western Australia over £50,000 each, in Victoria and Queensland over £20,000 each, and in New Zealand 10 per cent. on estates over £20,000 each, but with a super-tax of 3 per cent. to a stranger in blood other than an adopted child. In the Dominion of Canada the rates vary in the respective Provinces, with maximums from 5 to 10 per cent.

SPANISH, DUTCH AND GERMAN TARIFFS.

In Spain the charges range from 1·40 per cent. between ascendants and descendants, legitimate or legitimised by subsequent marriage, up to 12·60 per cent. to relations above the sixth degree and to persons having no relationship.

In Spain there is also a duty of 1·40 per cent. on bequests in favour of the soul of the testator, but if there are legacies in favour of the souls of other persons, duty must be paid according to the degree of their relationship to the testator.

In Holland the succession duty payable by husband or wife is 1 per cent. if there be children or their descendants, but 4 per cent. if there be no children or their descendants. Brothers and sisters pay 4 per cent., and nephews and nieces 6 per cent.

In Germany spouses and children are exempt from death duties, but parents and brothers and sisters are charged 4 per cent. on their inheritance, and grandparents or remoter ancestors, parents-in-law and children-in-law, acknowledged natural children and adopted children pay 6 per cent., uncles and aunts and relatives by marriage in the second degree of the collateral line pay 8 per cent., and more remote relations, or persons not of kin, pay 10 per cent., but if the value of the inheritance exceeds 20,000 marks the duty is increased by graduations of 10 per cent. each of the minimum rate of duty added thereto, until the charge on an inheritance of 1,000,000 marks is two and a half times the rate of charge on 20,000 marks.

YIELD OF FOREIGN DEATH DUTIES.

The yield of the Death Duties in France in 1907 appears to have been nearly 240 millions of francs; in Germany, 26½ million marks; in Italy, £1,680,550; in Spain, 21½ millions of pesetas; in Denmark, 450,000 dollars; in New South Wales, £290,730; in Western Australia, £41,688; in Tasmania, £26,600. In Natal there are no death duties. In the Cape Colony, where the Succession Duty is about to be increased, the revenue for the year to 30th June, 1908, was £28,373.

EXEMPTIONS.

Bequests to charitable and educational institutions are exempt from duty in Queensland. Legacies to charities of a general character in the German Empire, if under 5,000 marks, pay no duty, but if over 5,000 marks pay 5 per cent. In New York State no person may devise more than one-half of his net estate to any charitable institution, and in Georgia and California not more than one-third. In England it is lawful for the Treasury to remit the Estate Duty, or any other duty leviable on or with reference to death, in respect to any such pictures, prints, books, manuscripts, works of art, or scientific collections as appear to be of national scientific or historic interest, and to be given or bequeathed for national purposes, or to any university, county council, or municipal corporation. The declared value of such legacies in the year ended 31st March, 1908, was only £7,557.

WORKS OF ART.

These legacies included books to Cambridge and to Owens College, Manchester, a Japanese collection to the South Kensington Museum, china to Birmingham, sculptures to Manchester and Salford, and a picture to Norwich, but no picture was left during the year to the nation, although several collections of important works of art were disposed of by auction under wills proved during the year. The trustees of the National Gallery were, however, able to acquire by purchase for £25,000 a painting of a family group, believed to be the work of Franz Hals, of Haarlem, although it is said that it was not known previously to experts nor mentioned in any known document. The largest sum obtained by auction during the year was 12,600 guineas

for a picture by Turner, valued in 1895 at 5,200 guineas, and two small pictures given by Turner to his housekeeper were knocked down at 13,200 guineas, having been bought by the late owner, Mr. Holland, for 3,000 guineas. A picture by Gainsborough, from the Loder collection, sold for 4,550 guineas, and one by Raeburn for 4,500 guineas. The Stephen Holland sale brought in altogether £138,000, and the Humphrey Roberts sale £65,677.

In the classification in detail of the value of personalty which passed under wills in 1907–1908, household goods and works of art were valued at £6,860,000, or about £100 for each house, of which perhaps about £10 represents the average value in each house of the pictures and works of art. But a very low valuation for such items is usually accepted when a will is proved, although it is, of course, expected that if on sale they realise a larger sum the difference in duty will afterwards be paid.

Amount Exceeding	And not Exceeding	No. of Persons assessed.	Gross amount of Income assessed.	No. of Firms assessed.	Gross amount of Income assessed.
£	£		£		£
50,000	—	20	1,789,723	92	8,338,991
10,000	50,000	241	4,458,625	950	17,747,332
5,000	10,000	517	3,665,245	1,644	11,556,939
3,000	4,000	322	1,474,757	946	4,309,073
2,000	3,000	581	1,990,879	1,478	5,219,661
1,000	2,000	1,539	3,819,069	2,820	7,100,366
		6,155	8,997,288	7,194	11,018,148
Gross Incomes under £1,000 each		9,375	26,195,586	15,124	65,290,510
Total		365,685	80,686,214	42,925	16,231,715
		375,060	106,881,800	58,049	81,522,225

The valuation of personalty situated abroad and subject to Estate Duty in this country was as follows:—

1899–1900	£15,715,000
1901–1902	8,693,000
1906–1907	6,660,000
1907–1908	4,170,000

There are obvious difficulties in the way of the Exchequer in obtaining precise valuations of this description of property.

Shares or debentures of public companies were valued last year at £96,670,000, as compared with £100,173,000 in the previous year, but the shares of deceased persons in real and personal estate as partners in firms were valued last year at £13,173,000, as compared with £7,820,000 in 1906–1907. A large part of this remarkable increase was probably derived from the estates of two very rich partners in firms.

INCOME TAX.

Growth of Foreign Investments.

The gross income for the United Kingdom of which the Inland Revenue Department had notice was for 1906–7 (the latest date as yet available) £943,702,000, reduced by deductions to £640,000,000, upon which income tax was received. The income taxed in 1905–6 was £632,000,000. The net receipt of the income tax in 1906–7 was £31,892,000, and in 1907–8 £31,860,000, as compared with a Budget estimate of £31,500,000 in the former year and £30,500,000 in 1907–8. The expected loss in the latter year did not occur. The income is derived as to 25 per cent. from profits of ownership or occupation of land, as to 59 per cent. from businesses and professions, as to 8 per cent. from salaries of public officials, and as to 6 per cent. from British and Foreign Government Securities. The income derived from abroad increased from 44½ millions in 1886–7 to 79½ millions in 1906–7, but whereas Colonial and Foreign Government Securities and Indian Government Stocks and Guaranteed Railways contributed 24 millions of the total in 1886–7 and 31 millions in 1906–7, Colonial and Foreign Securities (*other* than Government), which were only 20½ millions in 1886–7, had increased to 36½ millions in 1905, to 43 millions in 1905–6, and to 48½ millions in 1906–7. Thus the increase in foreign investments (*other* than Government), which had been at the rate of less than a million a year for 16 years, was 6½ millions in 1905–6 and 5½ millions in 1906–7.

The following are particulars of the assessments for 1906–7 of the profits from businesses and professions:—

The total number of assessments on employés in the United Kingdom in 1906–7 was 519,189, with a total income of £120,882,000, including 417,845 Government, corporation and public company officials, with an income of £97,131,000.

CHARITABLE BEQUESTS.

Under 150 of the wills proved in 1908 there were bequests for religious, educational, and charitable purposes to the amount of four millions of pounds sterling, and a schedule of eighty of these estates, disposing of more than 3½ millions for public uses, will be found on page 433. The value of the eighty estates is £12,535,000, and the charitable bequests, varying from £9,000 to £600,000, amount approximately to £3,548,000. The total is below the great figures of 1906 and 1907, which included the bequests of more than a million each of Mr. Beit, Mr. Whiteley, and Mr. George Herring, but it is much above the annual average of the past twenty-one years. Two of the bequests of 1908, however, make up more than a million, and the bequests exceeding £100,000, in each case under the first five of the wills scheduled on page 433, make up more than 1¾ millions out of the total of 3½ millions from the eighty scheduled estates. The proportion of charitable bequests to amount of estate scheduled was in 1908 about 28½ per cent., and has in former years been higher. The number of people who leave money for public uses in this country is now very small indeed in proportion to the number of wills proved, and most of those who leave considerable sums for such purposes are childless persons.

Large Sums for Universities and Colleges.

The largest individual bequest of the year is that of Sir William George Pearce, 2nd Bart., shipbuilder, who died at the age of 46, and who left his residuary estate upon trust for his wife for life and, subject to her life interest, for their children, if any, or in default of issue, then to Trinity College, Cambridge, of which he was a graduate. Lady Pearce died within a few weeks after her husband's death, and as there were no children, Trinity College succeeded. About £250,000 will be available for Roman Catholic institutions under the will of Lady Brampton, widow of Lord Brampton (Sir Henry Hawkins), and over £50,000 from Mr. Basil M'Crea's estate to the Magee Presbyterian College in Londonderry. Mr. Charles Henry Monro, formerly Lecturer-in-Law at Gonville and Caius College, Cambridge, left £5,000 to that college, £1,000 to a hospital in Dublin, and the residue of his estate, about £30,000, also to his college. Professor Barker's bequest of about £40,000 was for scholarships in the Victoria University, Manchester, in which he held a chair; and Dr. Jacks, of Glasgow, left £20,000 for a Modern Language Professorship in Glasgow, and the residue of his estate for Edinburgh and Glasgow institutions. Mrs. Fulton, of Penarth, Cardiff, devoted £45,000 for the benefit of the University of South Wales and hospitals in Cardiff and Congregational chapels, and Dr. Clifton Sorby left about £21,500 for the endowment of professorships in Sheffield University and other benefits to his native city of Sheffield. Mr. Turle bequeathed £8,400 each to the Bedford College for Women and the New Hospital for Women, and the residue of his estate, altogether about £40,000, to these two objects. Mrs. Rylands, who had given largely for public uses during her life, left £200,000, her library and manuscripts to the John Rylands Library in Manchester, £50,000 to the Victoria University at Manchester, £25,000 to Owens College, £20,000 to the Manchester Warehousemen's Schools, £25,000 for a Congregational chapel, and large sums, making up altogether more than £600,000, for other Manchester institutions. Mr. John Charles Walker, a Manchester solicitor, left £3,000 to the Life-Boat Institution, £5,600 for scholarships in Retford and Ingleton, and the residue of his estate, about £32,000, for charitable institutions in Retford, Ingleton and Manchester.

Charitable Trusts.

About £293,000 of the estate of Mr. Robert Wilkinson Smith, of Nottingham, is to be in trust for almshouses and annuities for widows and spinsters in the county. Alderman Sanderson, a maltster, in Wakefield, bequeathed £60,000 for a trust fund for Church of England purposes in the diocese, £10,000 for pensions for women, and £40,000 for augmentation of the income of poor clergy. Alderman Charles Cameron Walker left about £23,000 for religious institutions (other than Roman Catholic), hospitals and almshouses near York; and Mr. Deputy R. W. Edwards, a stationer in the City of London, founded a trust with £50,000 for various purposes for the benefit of the necessitous poor of the United Kingdom.

Legacies for Religious Institutions.

Mr. Edward Aston, a Manchester merchant, left £25,000 to the Manchester and Salford Wesleyan Mission, and about £70,000 to the Wesleyan Methodist General Chapel Fund. Lord Overtoun's bequest of about £61,000 was for the U.F. Church of Scotland and its missions, and for Glasgow hospitals; Mrs. Ogilvie's residuary estate of about £50,000 is for the Church Missionary Society, London City Mission and other religious institutions; under the will of the Rev. William Peace, of Brighton, his residuary estate of more than £12,000 is for Dr. Barnardo's Homes and the Bishop of London's Fund. Mr. G. J. Nicholls left £20,000 for poor clergy and other purposes in the Cape Colony, "because he had prospered there"; Mr. Richard Badger, a retired wine merchant of Leamington, left about £50,000 for Church purposes, chiefly in the Midlands; and under the will of Mr. Layton, a stationer in London, there is a bequest of £10,000 to the Church Missionary Society, and among other objects to which he left altogether over £60,000 is the Church Pastoral Aid Society.

Hospitals and Marriage Portions.

Religious institutions have, as in former years, been well supported by bequest, but the legacies to hospitals appear to have been fewer than in some years. There has been no one very large bequest to any hospital. Mr. Stewart Clark's bequest of £29,500 was for hospitals around Paisley and the United Free Church of Scotland; Miss Stewart Forbes left £10,000 each to the Brompton Hospitals for Consumption and Cancer; and Mrs. Waldo Sibthorp's legacies of £80,000 included £20,000 to the Putney Hospital for Incurables, £10,000 to endow ten beds in Charing Cross Hospital, and £4,000 to provide each year marriage portions for two girls of Sleaford, her desire being "that two young girls may each year be thereby made very happy." Mrs. Sabina Fleetwood, of Southend, left the residue of her estate, probably between £12,000 and £15,000, for such purposes as the trustees may determine, but they are not to give anything to anybody who directly or indirectly asks them for it.

J. H. SMEE.

ELEMENTARY EDUCATION IN ENGLAND AND WALES.

ADELPHI.—(1907) *Dec.* 26. The pantomime *Aladdin* (Mr. Malcolm Scott, Mesdames Millie Legarde and Happy Fanny Fields). (1908) *April* 20. *The College Widow*, by George Ade (Miss Frances Ring). *Aug.* 10. *The Girls of Gottenberg* revived (Mr. Edmund Payne and Happy Fanny Fields). *Sept.* 9. Mr. Martin Harvey opened his season with a revival of *The Corsican Brothers*, preceded by *The Conspiracy*, by Robert Barr and Sidney Lewis-Ransom. *Oct.* 5. *The Last Heir*, an adaptation by Stephen Phillips of "The Bride of Lammermoor" (Mr. Martin Harvey, Miss N. de Silva). 26. *The Only Way* (Mr. Martin Harvey).

ALDWYCH.—(1908) *April* 23. *Way Down East*, a new play by Lottie Blair Parker. *June* 8. *The Two Pins*, a new romantic comedy by Frank Stayton (Messrs. Courtice Pounds and Oscar Asche, Miss Lily Brayton). 22. *The Taming of the Shrew* revived (Mr. Oscar Asche and Miss Lily Brayton). *Sept.* 8. *Paid in Full*, by Eugene Walter (Messrs. Robert Loraine and Louis Calvert, Miss Hilda Antony). *Oct.* 14. *Fanny and the Servant Problem*, by Jerome K. Jerome (Miss Fannie Ward). 29. *The Flag Station*, a new curtain-raiser, by Eugene Walter (Miss Fannie Ward).

APOLLO.—(1907) *Nov.* 27. *The New York Idea*, by Langdon Mitchell (Miss Ellis Jeffreys, Messrs. Edmund Maurice and Fred Kerr). *Dec.* 23. *The Night of the Party* revived (Mr. Weedon Grossmith in the chief part). *Alice in Wonderland* revived for a series of matinées. (1908) *Jan.* 27. *The Education of Elizabeth* transferred from the Haymarket. *Feb.* 18. "The Follies" opened a season of burlesque. *May* 12. *Butterflies*, a new musical play by W. J. Locke, composed by J. A. Robertson (Miss Ada Reeve, Messrs. Lauri de Frece, Louis Bradfield, Hayden Coffin).

COMEDY.—(1907) *Dec.* 4. *Angela*, a new comedy by George Duval and Cosmo Gordon-Lennox (Miss Marie Tempest, Messrs. Eric Lewis and Allan Aynesworth). (1908) *Feb.* 27. *Lady Barbarity*, a new romantic play adapted by R. C. Carton from J. C. Snaith's novel (Miss Marie Tempest, Messrs. Graham Browne and Allan Aynesworth). *April* 27. *Mrs. Dot*, a new comedy by Somerset Maugham (Mesdames Marie Illington and Marie Tempest, Messrs. Kenneth Douglas, Fred Kerr and Graham Browne).

COURT.—(1907), *Nov.* 26. *Barry Doyle's Rest Cure* revived (Mr. Grahame Browne). *Dec.* 31. *The House*, a new play by John Gloriel, produced for a series of matinées (Mr. Albert Chevalier). (1908) *Jan.* 7. *The Subjection of Kezia*, a new play by Mr. Havelock Ellis (Mr. Graham Browne and Miss Beryl Faber). *Mar.* 9. *Mrs. Bill*, a new comedy by Capt. John Kendall (Miss Marie Illington), preceded by *The House*.

CRITERION.—(1908) *April* 27. *Lady Frederick* transferred from the Garrick. *June* 8. *The Mollusc* revived (Charles Wyndham and Miss Mary Moore). *Oct.* 12. *Lady Epping's Lawsuit*, a new comedy by Hubert Henry Davies (Mesdames Grace Lane and Mary Moore, Messrs. Sam Sothern and Eric Lewis). 27. A new curtain-raiser, *The Burglar that Failed*, by St. John Hankin.

DALY'S.—*The Merry Widow* (put on *June* 8, 1907) ran during the whole year.

DRURY LANE.—(1907) *Dec.* 26. The pantomime *The Babes in the Wood*, by J. Hickory Wood and Arthur Collins. (1908) *Sept.* 21. *The Marriages of Mayfair* by Cecil Raleigh and Henry Hamilton (Messrs. Basil Gill, Lyn Harding and Albert Chevalier, Mesdames Marie George and Eva Moore).

DUKE OF YORK'S.—(1907) *Dec.* 16. *Peter Pan* revived. (1908) *Mar.* 2. *The Admirable Crichton*, by J. M. Barrie, revived (Mesdames Hilda Trevelyan, Sybil Carlisle, Muriel Beaumont and Miriam Clements, Messrs. Lyn Harding, Eric Lewis, and Gerald du Maurier). *Sept.* 3. *What Every Woman Knows*, a comedy by J. M. Barrie (Messrs. Sydney Valentine, Norman Forbes, Edmund Gwenn, Henry Vibart, Gerald du Maurier, Mesdames Tree, Lillah McCarthy and Hilda Trevelyan).

GAIETY.—(1908) *April* 25. *Havana*, a new musical play by Geo. Grossmith, jun., and Graham Hill, lyrics by Adrian Ross and G. Arthurs, composed by Leslie Stuart (Mesdames Evie Greene and Jean Aylwin, Messrs. Leonard Mackay, W. H. Berry and Fred Lester).

GARRICK.—(1907) *Nov.* 13. *Simple Simon*, by Murray Carson and Norah Keith (Miss Violet Vanbrugh and Mr. Arthur Bourchier). (1908) *Jan.* 11. A new curtain-raiser, *Page* 97 (Henri de Vries). *Feb.* 8. *The Woman of Kronstadt*, by Max Pemberton (Mrs. Russ Whytal, Messrs. O. B. Clarence, Charles Bryant, and G. S. Titheradge). *March* 10. *Lady Frederick* transferred from the Court. *April* 20. *The Gay Lord Quex* revived (Miss Nancy Price and John Hare in the chief parts). *June* 15. *A Pair of Spectacles* revived (John Hare and Mr. Charles Groves). *Sept.* 2. *Idols*, adapted from W. J. Locke's novel by Roy Horniman (Messrs. Herbert Waring and Allan Aynesworth, Mesdames Edyth Latimer and Evelyn Millard).

HAYMARKET.—(1907) *Nov.* 25. *The Education of Elizabeth* transferred from the Apollo. (1908) *Jan.* 28. *Her Father*, a new play by Michael Morton (Mr. Arthur Bourchier, Mesdames Henrietta Watson and Marie Löhr). *Feb.* 28. A new curtain-raiser by F. D. Bone, entitled *The Pride of the Regiment*. *April* 18. *A Fearful Joy*, a farce adapted from the French by Sydney Grundy (Mrs. Langtry, Messrs. Allan Aynesworth, Edmund Maurice and Arthur Bourchier). *May* 12. *Getting Married*, a "conversation" by Bernard Shaw, produced for a series of matinées (Messrs. Henry Ainley and Robert Loraine, Mesdames Fanny Brough, Auriol Lee, Beryl Faber, Mary Rorke, Marie Löhr). *June* 1. *Getting Married* put into the evening bill. 2. *Nan*, a new play by John Masefield, produced for a series of matinées (Miss Lillah McCarthy). It was followed by *Feed the Brute*, by Geo. Paston. 16. *The Chinese Lantern*, a new fairy play by Laurence Housman, with music by Joseph Mouat, produced for a series of matinées (Mr. Henry Ainley and Miss Irene Clarke). *Aug.* 1. *Lady Frederick* transferred from the New.

HICKS. (1907) *Dec.* 9. *The Agitator*, a new play by Mr. Oscar Beringer, produced as a curtain-raiser. (1908) *March* 7. *A Waltz Dream*, a new operetta by Doerman and Jacobson, composed by Oscar Strauss (Miss Gertie Millar, Mr. Geo. Grossmith, jun., and Mr. Robert Evett). *Oct.* 3. *The Honble Phil*, a new musical play by G. P. Huntley and Herbert Clayton, composed by Harold Samuel, lyrics by Harold Lawson (Messrs. Herbert Clayton and G. P. Huntley, Mesdames Denise Orme and Julia Sanderson).

HIS MAJESTY'S.—(1907) *Nov.* 7. *Othello* revived for a series of matinées (Miss Lily Brayton, Mr. Oscar Asche). (1908) *Jan.* 4. *Edwin Drood*, an adaptation of Dickens's novel by Comyns Carr (Mr. Tree). *Feb.* 4. *The Beloved Vagabond*, a new play by W. J Locke (Mr. Tree and Miss Evelyn Millard). 11. A scene from Humpernick's opera, *Hansel und Gretel*, produced as a

curtain-raiser (Miss Viola Tree). *April* 4. *The Merchant of Venice* revived, with Mr. Tree and Miss Alexandra Carlisle in the chief parts. 19. First night of Shakespearean Festival, during which Mr. Tree appeared in *The Merry Wives of Windsor*, *Twelfth Night*, *The Merchant of Venice*, and *Hamlet*. *May* 30. *The Merry Wives of Windsor* revived (Mr. Tree and Miss Ellen Terry). *June* 15. Mons. Coquelin opened his season with Sardou's *L'Affaire des Poisons*. *Sept.* 5. *Faust*, by J. Comyns Carr and Stephen Phillips (Mr. Tree, Messrs. Godfrey Tearle and Henry Ainley, Mesdames Rosina Filippi and Marie Löhr).

KINGSWAY. (1907) *Nov.* 18. *A Stroke of Business*, by Arthur Morrison, produced as curtain-raiser (Mr. Norman McKinnel). (1908) *Feb.* 12. *Diana of Dobson's*, a new comedy by Cicely Hamilton (Miss Lena Ashwell, Messrs. C. M. Hallard, Dennis Eadie, and Norman McKinnel). *May* 19. A programme consisting of four new one-act plays—*Charlotte on Bigamy*, by Edward A. Parry; *A Nocturne*, by Anthony P. Wharton; *The Latch*, by Mrs. W. K. Clifford; and *The Whirligig*, by Eva Anstruther—produced for a series of matinées. *Oct.* 9. *The Swanboat*, a new play by Wilfred T. Colcby (Miss Lena Ashwell, Messrs. C. M. Hallard, Dennis Eadie, and Norman McKinnel).

LYCEUM.—(1907) *Dec.* 24. The pantomime *Robinson Crusoe* produced. (1908) *March* 14. *Romeo and Juliet* revived (Miss Norah Kerin, Mr. Matheson Lang). *June* 6. *The Prince and the Beggar Maid*, a new drama by Walter Howard (Miss Norah Kerin, Messrs. Eric Mayne and Lauderdale Maitland). *Aug.* 29. *Pete*, by Hall Caine and Louis N. Parker (Mr. Matheson Lang and Miss Hutin Britton).

LYRIC.—(1907) *Dec.* 2. *Monsieur Beaucaire* revived (Miss Evelyn Millard, Mr. Lewis Waller). 23. *Robin Hood* revived (Miss Evelyn Millard, Mr. Lewis Waller). (1908) *Jan.* 11. *A White Man*, a new play by Edward Milton Royle (Mr. Lewis Waller). *June* 14. *The Explorer*, a new play by Somerset Maughan (Mr. Lewis Waller, Mesdames Eva Moore and Evelyn Millard). *Aug.* 17. Moody-Manners Opera Company opened their season with *Lohengrin*. *Sept.* 8. *The Duke's Motto*, adapted from the French by Justin Huntly McCarthy (Mr. Lewis Waller, Miss Valli Valli).

NEW.—(1907) *Nov.* 5. *Mrs. Ellison's Answer*, a new play by Rowan Orme (Miss Granville). 28. *The New Boy* revived (Miss Gladys Homphrey, Messrs. John Beauchamp and Leon M. Leon). *Dec.* 16. *The Tenth of August*, a new play by Alexandra von Herder, produced for a series of matinées (Miss Nina Boucicault), preceded by *Memories*, a new play by George Wilding. 30. *The Scarlet Pimpernel* revived (Mr. Fred Terry). (1908) *Feb.* 20. *Matt of Merrymount*, a new romantic play by B. M. Dix and E. G. Sutherland (Miss Alice Crawford, Mr. Fred Terry). *April* 20. *The Scarlet Pimpernel* revived. *June* 8. *Lady Frederick* transferred from the Criterion. *Oct.* 6. *Bellamy the Magnificent*, a new comedy by Roy Horniman (Charles Wyndham, Mr. Robert Loraine, Mesdames Kate Cutler, Sarah Brooke, Alice Beet and Fortescue).

THE PLAYHOUSE.—(1907) *Nov.* 26. *Fido*, adapted from the French of M. Malin by Eva Anstruther, produced for a series of matinées (Miss Winifred Emery and Mr. Cyril Maude), preceded by *A Lesson in Shakespeare*, by Eric Lewis. (1908) *Jan.* 20. *The Orchingtles*, a new play by H. E. Esmond (Messrs. Cyril Maude, Kenneth Douglas, and Mesdames Alexandra Carlisle and Winifred Emery. *Feb.* 22. *Fido* put into the evening bill. *March* 19. *Marjorie Strode*, a new play by A. E. W. Mason (Miss Nina Sevening, Mr. Cyril Maude). *April* 29. *Pro Tem.*, a farce adapted from the French by Cosmo Hamilton (Mr. Cyril Maude). *May* 20. *Toddles* revived (Mr. Cyril Maude). *June* 16. *The Flag-Lieutenant*, a new comedy by Major W. P. Drury and Leo Trevor (Messrs. Aubrey Smith and Cyril Maude, Mesdames Lilian Braithwaite and Winifred Emery).

PRINCE OF WALES'S. (1907) *Dec.* 19. *Little Miss Hook of Holland*, a children's version of *Miss Hook of Holland*, played entirely by children, produced for a series of matinées. *April* 20. *My Mimosa Maid*, a musical incident by Paul Reubens and Austen Burgon, composed by Paul Reubens (Mesdames Isabel Jay and Gracie Leigh, Messrs. Maurice Farkoa, George Barrett and G. P. Huntley). *Sept.* 3. *The King of Cadonia*, a musical play by Frederick Lonsdale and Adrian Ross, music by Sidney Jones (Messrs. Bertram Wallis, George Barrett, Roland Cunningham and Huntley Wright, Mesdames Gracie Leigh and Isabel Jay).

THE QUEEN'S.—(1907) *Nov.* 23. *The Devil's Piscipte* transferred from the Savoy, Mr. Granville Barker replacing Mr. Matheson Lang in the part of Dick Dudgeon. *Dec.* 30. *The New York Idea* transferred from the Apollo. (1908) *Feb.* 1. *Stingaree*, a new play by E. W. Hornung (Mr. Henry Ainley and Miss Hilda Anthony). *May* 5. *The Dairymaids* revived (Miss Phyllis Dare and Mr. Dan Rolyat). *Sept.* 4. *The Old Firm*, a farce by Harry and Edward Paulton (Mr. Richard Golden). *Oct.* 24. *The Belle of Brittany*, a new musical play by Leedham Bantock and P. J. Barrow, composed by Howard Talbot and Marie Horne, with lyrics by Percy Greenbank (Messrs. Walter Passmore, Lawrence Rea and George Graves, Mesdames Maudi Darrell and Ruth Vincent).

ROYALTY.—(1907) *Nov.* 4. M. de Feraudy opened a week's season in *Chacun Sa Vie*. *Nov.* 11. Mlle. Jeanne Thomassin, M. Cooper and company opened a week's season in *Margot*. *Dec.* 26. *Charley's Aunt* revived. (1908) *Jan.* 22. *Susannah—and some Others*, a new comedy by Mme. Albanesi (Mr. Dawson Milward, Miss Gertrude Kingston and Miss Nina Sevening). *Feb.* 5. *Rip Van Winkle* (Mr. Fred Storey). *Feb.* 10. *The Merchant of Venice* (Miss Cameron, Mr. Fred Storey). *Feb.* 13. *Romeo and Juliet* (Miss Cameron, Mr. Paul Lovett). *April* 27. Herr Hans Andresen opened a season of German plays with Gustave Kandelberg's *Der Weg zur Hölle*.

ST. JAMES'S.—(1907) *Nov.* 12. *The Thief*, a new play adapted from the French of Henry Bernstein by Cosmo Gordon Lennox (Miss Irene Vanbrugh, Mr. George Alexander). *May* 9. *The Thunderbolt*, a new play by A. W. Pinero (Mesdames Mabel Hackney and Stella Campbell, Mr. George Alexander). *Sept.* 1. *The Passing of the Third Floor Back*, an idle fancy by Jerome K. Jerome (Messrs. Marsh Allen and Forbes-Robertson, Mesdames Alice Crawford, Haidee Wright and Gertrude Elliott).

SAVOY.—(1907) *Nov.* 25. *Cæsar and Cleopatra*, a history by G. Bernard Shaw, produced (Miss Gertrude Elliott and Mr. Forbes Robertson). *Dec.* 30. *Arms and the Man* revived (Messrs. Granville Barker and Robert Loraine, and Miss Lillah McCarthy). (1908) *April* 28. *The Mikado* revived (Messrs. Workman, Lytton and Rutland

Barrington). *July* 14. *H.M.S. Pinafore* (Messrs. Workman, Lytton and Rutland Barrington, Mesdames Jessie Rose and Elsie Spain). *Oct.* 19. *Iolanthe* (Messrs. Workman, Lytton and Rutland Barrington, Mesdames Jessie Rose and Louie René).

SHAFTESBURY.—(1907) *Dec.* 12. *The Christian* transferred from the Lyceum. (1908) *Feb.* 3. A company of Sicilian players, including Signora Mimì Aguglia and Signors Grasso and Turco, opened a season with *Malia*, a drama by Luigi Capuana. *March* 21. *Le Grand Guignol* company opened a season of short French plays. *May* 5. Suzanne Despres opened a season of French plays in *La Rafale*. *June* 1. A season of French opera-bouffe opened with a revival of Offenbach's *La Fille du Tambour-Major*. *Oct.* 15. *The Lyons Mail* revived (Mr. H. B. Irving, Miss Dorothea Baird).

TERRY'S. — (1907) *Dec.* 23. *Is Marriage a Failure?* a new farce by Russel Vann and Alban Atwood. (1908) *Jan.* 23. *The Orange Blossom*, a new farce by Victor Widnell (Miss Granville, Mr. Chas. V. France). *Feb.* 10. Ibsen's *Rosmersholm* revived (Miss Florence Kahn, Messrs. Edmund Gwenn, Charles Fulton and Eille Norwood). *Feb.* 26. *The Lord of Latimer Street*, a new play by Oliver Madox Hueffer (Miss Nina Boucicault). *April* 22. *The Marriage of William Ashe*, a new play by Mrs. Humphry Ward and Miss Margaret Mayo, with Miss Fannie Ward and Mr. Cyril Keightley in the chief parts. *June* 10. *The Three of Us*, a new play by Rachel Crothers (Miss Fannie Ward).

VAUDEVILLE.—(1907) *Nov.* 26. *The Cuckoo*, by Chas. H. Brookfield, revived (Miss Sarah Brooke, Mr. Charles Hawtrey). (1908) *Jan.* 2. *Dear Old Charlie*, a new comedy by Charles H. Brookfield (Mr. Charles Hawtrey). *March* 26. *Jack Straw*, a new comedy by Somerset Maughan (Miss Lottie Venne, Mr. Charles Hawtrey).

WYNDHAM'S.—(1908) *Sept.* 7. *The Early Worm*, a farce by Frederick Lonsdale (Messrs. A. E. Matthews, Alfred Bishop, and Weedon Grossmith, Mesdames Muriel Beaumont and Fanny Brough).

THE STAGE SOCIETY produced: (1907) *Nov.* 24. *Waste*, a tragedy by Granville Barker, at the Imperial; (1908) *Jan.* 26. *Cupid and Commonsense*, by Arnold Bennett; *Mar.* 1. *The Gates of the Morning*, by Margaret M. Mack, at the Shaftesbury; *April* 5. *The Breaking Point*, by Edward Garnett; *May* 31. *Links*, by Herman Heyermans.

The Drama in 1908.

WHILE reviewing the record of 1908 one is forcibly struck by the fact that, although the plays worth remembering are not numerous when compared with the plays produced, there has reigned great activity in the dramatic camp. Even the Sabbath has become a working-day to the actor, and these Sunday performances of the Stage Society, the Play Actors, the Pioneers, now defunct, and sometimes of single-handed adventures, are not the least interesting features of the year's activity. It is not merely conjecture now that the so-called Irregular Theatre will leave its mark upon our dramatic literature, it is already a patent fact; many names already familiar to the public, such as John Masefield, St. John Hankin, Arnold Bennett, and latterly F. D. Bone, have emerged from obscurity without the aid of the commercial manager. It is true that in most instances the novices have made their début with one-act plays, which are not an absolute criterion of continuous histrionic ability, since in the words of a well-known French dramatist: "It is not the first act that makes reputations, but that confounded last one." Yet the one-act play, since it has drawn many men and women to the stage who hitherto devoted their attentions to books, is a manifestation of a happy augury, and one which should be encouraged by the playgoer and the critic alike.

Reverting now in rapidity of detail to such works as form the quintessence of a year's labour on the critic's part, it is in the fitness of things that a compliment should here be paid to those of our playwrights who by their record, if not by their age or agedness, are honoured by us as veterans. I refer to Mr. Pinero, whose "Thunderbolt" had all the qualities of construction, dialogue, and felicitous humour to which our premier dramatist has accustomed us; but the play somehow failed to attract the crowd because its tone was sombre and its drift mainly financial. It is a strange but true experience that although it cannot be gainsaid that money is a cult of the nation, whenever a play has Mammon for its theme, the masses hold aloof. Mr. Henry Arthur Jones, after a spell of ill-luck and a pause in silence, has once more reminded us that there is life in the old craftsman yet. His "Dolly Reforming Herself," an agreeable comedy though it be, is certainly not a great play; in fact it is a play written for the sake of one scene, and that scene is not germane to the main plot. But it is an excellent scene of its kind, and as frocks and frills form its substance, it is sure to appeal to the fair sex, and thereby naturally to the weaker one. Mr. R. C. Carton, who is a general favourite, and whose work is renowned for its refinement of style, set this time his hearers wondering. He adapted from a novel by Mr. J. C. Snaith a play entitled "Lady Barbarity," of eighteenth century localisation, which was neither in his usual vein nor very entertaining or distinguished by craft. It had, indeed, the advantage of Miss Marie Tempest's invaluable services, but, seeing what Mr. Carton can do, this work impels the question: "*Que diable faisait-il dans cette galère?*" Mr. Grundy has not appeared on the playbills with any new work, nor has Mr. Haddon Chambers, of whom, however, an adaptation from the Danish under the title of "Sir Anthony" will have been produced while this volume is in the press. Rounding off the circle of our veteran playwrights it should not be forgotten to mention the triumphant career of the Gilbert-Sullivan operettas at the Savoy. Like Ninon de l'Enclos the comic muse of Sir William Gilbert seems never to age; he is still our national humorist. Reference to humour naturally brings us toward that other master of smiles, Mr. J. M. Barrie, who in "What Every Woman Knows" has given us a comedy of exquisite refinement, wonderful characterisation and great originality; Barrie's humour, like Gilbert's, is beyond imitation—it is a personal possession; if any other man but Barrie would have attempted to write in his vein, or to piece together a story which if it be very familiar is

really entirely fantastic, he would have failed, but Barrie at his best knows how to blend the romance with life, and thanks to him, as well as to his interpreters Hilda Trevelyan and Gerald du Maurier, the two leading characters will live as vital types in our modern community. Another writer who by great daring has obtained a great success and distinctly advanced his career is Mr. Jerome K. Jerome, whose attempt to waft the ethereal into an episode of modern life disarmed the scoffers. Analysed in detail "The Passing of the Third Floor Back" may not pass muster as a good play in the technical sense, but it is full of thumb-nails typical of the middle class, it is humorous in that specific manner which made Mr. Jerome famous when he wrote "Three Men in a Boat"; above all, it introduces the spirit supernatural in a manner so reverent that it can hurt no one yet will edify many. A young playwright of promise, yet lacking in discipline and all too prone to reintroduce the epigrammatic style of Oscar Wilde without possessing that great author's aristocracy of wit, has scored some success with two plays off his own bat—"The Education of Elizabeth" and "Bellamy the Magnificent"—and an adaptation of Mr. Locke's novel "Idols," of which the court scene, being the almost accurate representation of the real thing, redeemed the melodramatic possibilities to some extent. Mr. H. H. Davies, for once in a very frolicsome mood, produced a wildly extravagant court scene in "Lady Epping's Lawsuit," which we should not so much consider as a play conceived in earnest, but as the pleasantry in leisure hours of a clever and versatile man. Of younger playwrights already known, yet not yet known to fame until the current year, Mr. W. S. Maugham has come to the front like a meteor. At one time no less than four comedies of his were played in London theatres, namely, "Lady Frederick," "Jack Straw," "Mrs. Dot," and "The Explorer." Of these, "The Explorer" was of the least consideration, but the other three afford admirable proof that an Englishman who has carefully studied the French drama is not only able to graft these facile methods on our stage, but to be as flexible and as tersely witty in our stately language as in the less prolix and more graceful idiom of our neighbours. Referring to French methods, Mr. Alfred Sutro's latest effort, "The Builder of Bridges," should here be mentioned. It is by no means one of Mr. Sutro's best plays, and by its strict adherence to the formula of Sardou it strikes us as somewhat mechanical and stagey; but it contains many scenes and some characterisation which indicate that if Mr. Sutro would only emancipate himself there is no reason to fear that his source of inspiration is failing. One of the London theatres which seems destined to prove a blessing to budding talent is the little Kingsway Theatre, under the management of Miss Lena Ashwell. So far her career has been an unbroken record of success, and during the present season she introduced two novices to us, Miss Cicely Hamilton, who wrote "Diana of Dobson's," and Mr. Wilfrid Coleby, the author of "The Swayboat." The play of Miss Hamilton is especially remarkable in these days of the woman's movement, since it deals with a phase of female life which has hitherto escaped the eye of the dramatist. What Mr. Russell has done in his well-known book "Of Necessity," wherein the hardships of the shop-girl are graphically described, Miss Hamilton has done on the stage. The first act of "Diana," which is also its best, may be looked upon as a human document. There have been several plays of what the German calls "tendency" during the past season. Mrs. W. K. Clifford gave us in "Hamilton's Second Marriage" a matrimonial problem, which she argued cleverly if one-sidedly from the woman's point of view. Mr. John Gloriel in "The House" dealt satirically yet poignantly with pauperism as it is pampered in some of the boroughs of London and provincial centres. Mr. Arnold Bennett gave in "Cupid and Commonsense" a remarkable and racial study of the pusillanimous ideas of country folk. Mr. John Masefield, still inclined to mar the vigour of his talent by needless brutality, painted in "Nan" an interesting figure of the eighteenth century, and at the same time revealed to us the wanton legal cruelty of those days in this most Christian country. Lastly, Major Drury and Mr. Leo Trevor succeeded in "The Flag Lieutenant" in rousing our enthusiasm for the national cause of the Navy. The story of this play is perhaps the least valuable part, but the evident accuracy with which life in the Navy is depicted has justly rendered this charming entertainment popular. We have had in 1908 two efforts at tragedy—the one a mediæval drama entitled "Lanval," by T. E. Ellis, which was majestic in form if not very dramatic in substance; the other a remarkable adaptation of "Don Quixote" by G. E. Morrison and R. P. Stewart. The world is full of stage versions of Cervantes' classic, but having seen many I can testify to the adroitness and the dramatic intensity of Mr. Morrison's work. It was well produced by Mr. F. R. Benson, but it is worthy of perfect representation at such a theatre as His Majesty's, where it should commend itself to the attention as well as to the talent of Mr. Tree. This indefatigable manager, who in conjunction with Mr. Frederick Whelen, the creator of the Stage Society, and Mr. Henry Dana is about to revive the glories of the Vedrenne-Barker performances by the Afternoon Theatre, which will commence operations at His Majesty's in December, produced in 1908 an interesting adaptation by Mr. William Locke of his novel, "The Beloved Vagabond," a somewhat tame version of "The Mystery of Edwin Drood," by Mr. Comyns Carr, a splendid revival of "The Merchant of Venice," in which Mr. Tree distinguished himself by his peculiar and original reading of the Jew's character, and a spectacular adaptation of Goethe's "Faust" by Messrs. Comyns Carr and Stephen Phillips. The latter is said to have brought grist to the mill of His Majesty's Theatre, but I for one should like to tear the page of "Faust" from the life-book of Mr. Tree. Great poets should be sacred like the gods, and as Goethe was one of the greatest poets of all times, to try and better him is tantamount to blasphemy. Like its predecessor, the past year has been marked by the continued revival of melodrama; in fact, that which I said in our last issue in my peroration has become true. At some periods no less than six London theatres were devoted to melodrama, and among the notable revivals "The Corsican Brothers," by Mr. Martin Harvey, "The Duke's Motto," by Mr. Lewis Waller, and "The Lyons Mail," by H. B. Irving, proved that, despite the drift of the times, melodrama, however old, when penned by a crafty hand rarely becomes obsolete. The ap-

pearance of Mr. H. B. Irving at the Shaftesbury Theatre in the inheritance of his father should be particularly chronicled as an event of some importance, since the spirit of the father's genius finds some reflection in the talent of his son. Another feature of the year 1908 is the gradual decline of adaptation. True we have had at the St. James's a fair version of Bernstein's pyrotechnical Parisian *comédie* "The Thief." True Mr. Michael Morton obtained some success with Guinon's play, "Her Father," and the smaller fry of the boulevard has also trodden some of the London boards, but gradually our public seems to become educated to the enjoyment of foreign plays in faithful translation, and to accept the doctrine that since naturalisation does not alter birthright, it is equally impossible to infuse into foreign plays the spirit Britannic. I have left two authors, who occupy Castor and Pollux-like a pedestal of their own, to the last because their talent is as unique as their *modus operandi*. These authors are George Bernard Shaw and Granville Barker. The revival of "Arms and The Man" needs no comment, but the comparative failure of "Cæsar and Cleopatra," and the chequered career of "Getting Married," which after a somewhat lukewarm beginning settled down to success, evoked a great diversity of opinion. Between covers "Cæsar and Cleopatra" proved one of the cleverest, wittiest, and most interesting plays of Mr. Bernard Shaw; on the stage these qualities were somewhat discounted; the truth is that as a play of the theatre this burlesque of Shakespeare fails to strike home. As I said at the time: "When the story is illustrated with grand scenery and plasticised by living beings; when no longer G. B. S. speaks within covers but living, breathing, thinking individuals are the joint interpreters of a several mind, we begin to feel that moments of interest and amusement are sandwiched between long waits of torrential loquacity and incongruity of incident." Curiously enough much the same applies to "Getting Married"; it is so full of thought that to read it means reflection and infinite delectation, but on the stage Mr. Shaw's wonderful eloquence, his whimsicality, his inclination towards topsy-turvydom are apt to bewilder the hearer, and it must be added that the neglect of form and the absence of palpitation, sends us hence in mute wonderment, if not in mute admiration. The truth is that now that George Bernard Shaw, a man of destiny always, has become a ruler of men, he is inclined to disregard the desire of the normal playgoer to find in the theatre something more than mere intellectual stimulation. Knowing the man, and knowing his work, we know full well that it is absurd to deny that George Bernard Shaw possesses what is commonly called "heart," but latterly he seems to be inclined to sacrifice his every feeling to the indulgence of shedding the lustre of his genius, and that undoubtedly will in the long run hamper the vitality of his plays as dramatic work. Mr. Granville Barker's "Waste" reveals great affinity to Mr. Shaw; in fact, it is not sufficient to call Mr. Granville Barker Shaw's disciple—he is his *alter ego*. Some of the qualities of Shaw have matured in Barker, and some of his faults have become magnified in him, for Shaw talks by intuition and Barker—at least so it strikes me—pours forth long tirades for effect. Not for a moment do I deny that the discussion of abstruse politics in "Waste" is ingenious, but it is not cohesive with the play; it is introduced in the wake of the master with some of his acumen, but not the same lightness of touch. Some have called "Waste" a great play, whereas I would feel inclined to reserve this attributive adjective, with which nowadays we are all too lavish, for "The Voysey Inheritance." "Waste" is certainly head and shoulders above most of the plays of our time, but in its reading of human nature it rather betrays the thinker than the observer. The scene in the second act, in which the hero argues with his mistress, who came to him in her distress concerning coming events, is neither good art nor good reading of human nature. There is no life blood in it. It is the description of one whose imagination is greater than his knowledge of life.

It would be ungenerous on the part of the chronicler to conclude this survey without a word of homage to a great foreigner who, during his vogue, exercised a dominating influence on the British stage. Victorien Sardou may not be so familiar to the playgoer of to-day as he was to the playgoer of the nineteenth century, but for all that, the germ of his doctrines is still latent in our modern drama. Sardou, if he has wrought some havoc by tempting the young to incompetent imitation which is not always the sincerest form of flattery, has left us heavily in his debt, not only morally, but also materially, for during many years the British adaptor has picked his brains without offering compensation. His plays, however they may be judged by posterity, have given pleasure to millions of playgoers, and some of our best actors have made their name under the guidance of his wonderful gift of characterisation.

Union Jack Club.

Patrons, H.R.H. THE PRINCE OF WALES, K.G. H.R.H. THE DUKE OF CONNAUGHT, K.G.
Patronesses, H.R.H. THE PRINCESS OF WALES. H.R.H. THE DUCHESS OF CONNAUGHT.

THE Union Jack Club was founded by Miss Ethel McCaul, R.R.C., and the foundation-stone was laid on 21st July, 1904, by H.R.H. the Prince of Wales, the Club buildings in the Waterloo Road being opened by H.M. the King on 1st July, 1907. Its objects are to promote the welfare and ameliorate the condition of sailors in the British Navy and soldiers in the British Army and Royal Marines, and with this object in view to provide a club-house and all conveniences in connection therewith. The accommodation provided includes 200 bedrooms; lounge hall, with music, games, &c.; dining-room; library and reading-room; billiard room, 6 tables; lavatory and toilet rooms; barber's shop, foot-baths and "kit-room." *President of Council and Chairman of Committee*, Sir Edward W. D. Ward, K.C.B., K.C.V.O. *Vice-President*, F. C. Wallis, F.R.C.S. *Comptroller and Secretary*, Major E. F. O. Gascoigne, D.S.O. *Offices*, 91A, Waterloo Road, S.E. *Telegrams*, "Anchorable, London." *Telephone*, 14,298 Central.

ATHLETICS.

THE Olympic Games of 1908 brought about an unprecedented interest in athletics. It was the first time the Games had been played in England, and the modern revival of the ancient Greek trials of strength and skill showed that Great Britain maintained a general standard of excellence. The total wins standing to the credit of Great Britain were 46 (not counting the football and hockey games won by England, and the lacrosse match won by Canada), the next best being the United States, who secured 22 events. In point of number other countries were far behind, the order being: Sweden 7, France 4, Hungary 3, Norway 2, Germany 2, Canada 2, Italy 2, Belgium 1, South Africa 1, Finland 1. By virtue of international agreement the Games will not be held in England again for 24 years.

The majority of the competitions were fought out in the great Stadium, specially erected at Shepherd's Bush, which was formally opened by His Majesty King Edward VII. on July 13. Over 2,000 took part in the athletic events, which were under the control of the British Olympic Council, with Lord Desborough as president. In the track events all but one of the previous Olympic records were broken, and fresh figures were set up in several of the field events. The 100 Metres Race was generally considered to be a certainty for the United States, who were represented by six sprinters reputed to be able to beat even time; but the final was won by R. E. Walker, of South Africa, who beat J. A. Rector, United States, by a good yard in 10⅘ secs., which tied the Olympic record put up by F. W. Jarvis, of New York, at Paris in 1900. J. P. George was Great Britain's hope for the 200 Metres Flat Race, but his leg gave out in the second round, and the event fell to R. Kerr, Canada, who won the final in 22⅖ secs., which was one second slower than the Olympic record set up by A. Hahn at St. Louis in 1904. There was little doubt about Great Britain's superiority in the 400 Metres Race. Lieut. W. Halswelle (whose running a few weeks previously had marked him as the best quarter-miler since the days of the British record-holders Tindall and Bredin) put up the best times in the preliminary heats, and on the watch the three Americans, who qualified for the final, had no chance. A regrettable incident occurred in the final. J. C. Carpenter, United States, ran wide, elbowing Halswelle on to the outer side of the track. The judges broke the worsted and declared it to be no race. J. B. Taylor and W. C. Robbins, United States, who were entitled to compete in the re-run, were not permitted by the American committee to turn out, and Halswelle ran over in 50 secs. At a committee meeting of the Amateur Athletic Association in October, J. C. Carpenter was permanently suspended from taking any part in amateur events under the rules of the A.A.A.

Britain's defeat in the 800 Metres was unquestionable, representatives of the United States, Italy, Germany, and Hungary finishing in front of the first Britisher. The event went to Melvin W. Sheppard, a fine runner, who had been credited with 1 min. 53⅗ secs. for 880 yards, only ⅕ sec. outside the record made by C. J. Kilpatrick at New York on Sept. 21, 1895. Sheppard won his race in 52⅕ secs. Sheppard created a surprise by winning the 1,500 Metres Race, which was regarded as a certainty for Great Britain. H. A. Wilson in the trial games made the Olympic record of 3 mins. 59⅕ secs., but yet he was beaten by Sheppard by a couple of yards in 4 mins. 3⅗ secs.

In the Ten Miles Walk G. E. Larner (Great Britain) lowered records at nine and ten miles, the previous best standing to the credit of W. J. Sturgess since 1896. E. J. Webb (Great Britain) was also inside Sturgess's times at those distances.

None of the events claimed the public attention to the same extent as the Marathon Race. Italy, the United States, Canada, Sweden, Holland, Denmark, Australasia, Bohemia, Russia, Greece, Belgium, Finland, South Africa, and Austria were all represented by the pick of their long-distance runners. The race was run over a course from Windsor Castle to the Stadium at Shepherd's Bush; distance, 26 miles 385 yards. It was a supreme test of endurance, in which Great Britain was badly beaten. The finish was most sensational. Dorando Pietri (Italy) was the first to enter the Stadium, where close upon 80,000 voices shouted his name. The reception was too much for him, and he collapsed on the track. Well-meaning attendants picked him up and assisted him past the winning post when Hayes (United States) was only about 100 yards behind. Immediately after the finish a protest was lodged against Dorando on behalf of Hayes, and the little Italian was disqualified. On hearing of Dorando's disqualification Queen Alexandra expressed her wish to present the Italian with a cup in recognition of his heroic struggle. The order of finishing was:—Dorando Pietri, Italy (disq.), 2 hrs. 54 mins. 46⅖ secs.; J. J. Hayes, United States, 2 hrs. 55 mins. 18⅗ secs. (winner); C. Hefferon, South Africa, 2 hrs. 56 mins. 6 secs. (second); J. Forshaw, United States, 2 hrs. 57 mins. 10⅗ secs. (third); A. R. Welton, United States, 2 hrs. 59 mins. 44⅘ secs. (fourth); W. Wood, Canada, 3 hrs. 1 min. 44 secs. (fifth); F. Simpson, Canada, 3 hrs. 4 mins. 28⅕ secs. (sixth); H. Lawson, Canada, 3 hrs. 6 mins. 47½ secs. (seventh).

WORLD'S AMATEUR RECORDS AT OLYMPIC DISTANCES.

100 Metres (109·3 yards).—10⅘ secs., F. W. Jarvis, U.S.A., Paris Games, 1900; R. E. Walker, London Games, 1908; J. A. Rector, London Games, 1908.

200 Metres (218·7 yards).—21⅖ secs., A. Hahn, St. Louis Games, 1904.

400 Metres (437·4 yards).—48⅕ secs., W. Halswelle, London Games, 1908.

800 Metres (874·9 yards).—1 min. 52⅘ secs., M. W. Sheppard, London Games, 1908.

1,500 Metres (1,640·4 yards).—3 mins. 59⅘ secs., H. A. Wilson, Trial Games, at Stadium, London, May 30, 1908.

Three Miles (4·828 kilometres).—14 mins. 17⅗ secs., A. Shrubb, Stamford Bridge, London, May 21, 1903.

Five Miles (8·047 kilometres).—24 mins. 32⅗ secs., A. Shrubb, Stamford Bridge, London, May 12, 1904.

110 Metres Hurdles (120·3 yards).—15 secs., F. C. Smithson, London Games, 1908.

400 Metres Hurdles (437·4 yards).—55 secs., C. J. Bacon, London Games, 1908.

3,500 Metres (3,827 yards).—14 mins. 55 secs., G. E. Larner, London Games, 1908.

Ten Miles (16·093 kilometres).—75 mins. 57⅗ secs., G. E. Larner, London Games, 1908.

Standing Broad Jump.—11 ft. 4⅖ ins. (3·48 metres), Ray Ewry, St. Louis Games, 1904.

Standing High Jump.—5 ft. 5⅓ ins. (1·66 metres), Ray Ewry, Stadium, Buffalo, Sept. 7, 1901.

Running Broad Jump.—24 ft. 11¾ ins. (7·62 metres), P. O'Connor, Dublin, August 5, 1901.

Running High Jump.—6 ft. 5⅘ ins. (1·97 metres),

M. F. Sweeney, Travers Island, New York, Sept. 21, 1895.

Pole Jump.—12 ft. 9⅝ ins. (3·9 metres), W. R. Dray, Danbury, Connecticut, June 15, 1908.

Hop, Step, and Jump.—50 ft. 0¼ ins. (15·25 metres), D. Shanahan, Ireland.

Throwing the Hammer (16 lb. from 7 ft. circle). —173 ft. 7 ins. (52·91 metres), M. J. McGrath, Montreal, Canada, Sept. 21, 1907.

Putting the Weight (16 lb. from 7 ft. circle).—49 ft. 7¼ ins. (14·97 metres), R. Rose, Montreal, Canada, Sept. 21, 1907.

Throwing the Discus (Free Style).—143 ft. 4 ins. (44·3 metres), W. Jarvinen, Finland.

Throwing the Discus (as at Athens).—124 ft. 8 ins. (37·99 metres), M. J. Sheridan, London Games, 1908.

Throwing the Javelin (either Style).—188 ft. (57·33 metres), E. V. Lemming, Stockholm, June, 1908.

The athletic season opened on Saturday, Feb. 1, at Wembley Park, with the North of the Thames Cross-Country Association's Championship, which was won by the Polytechnic Harriers by 89 points, United Harriers and Southend Harriers tying for second place. The first three men were A. E. Wood (Essex Beagles), 41 mins. 56⅘ secs. ; W. H. Watson (Slough Harriers), 42 mins. 1 sec. ; J. W. Howard (Slough Harriers), 42 mins. 29 secs. At Hook Farm, Bromley, Kent, on Feb. 8, the annual seven miles race for the South of the Thames Cross-Country Association's Championship was won by the Cambridge Harriers by 7 points from Surrey A. C. ("A" team). The first three men were R. H. Backshall (Eastbourne A.C.), 43 mins. 1 sec. ; F. C. Neaves (Surrey A.C.), 43 mins. 10 secs. ; A. W. Macgregor (Redhill and Reigate Harriers), 43 mins. 25 secs. On Feb. 15 the Hallamshire Harriers repeated their success of twelve months previously by winning the Senior Northern Counties Cross-Country Championship. Bradford came second, 12 points behind. W. T. Clarke (Sefton), 61 mins. 14 secs., finished first ; J. Murphy (Hallamshire), 62 mins. 1 sec., second ; and H. S. Perkins (Salford), 62 mins. 29 secs., third. On the same afternoon Swinton won the Junior Championship of the Northern Counties, F. Melville (Elswick) being first man home ; and the Midland Counties Senior Cross-Country Championship was won by the Birchfield Harriers on the Derby Racecourse, W. Coales (Thrapston) finishing first in 59 mins. 45 secs.

A record entry was received for the National Cross-Country Championship, which was run for over ten miles on the Newbury Racecourse on Saturday, March 7. It was a great day for Yorkshire clubs, who occupied first and third positions, this being the first time they had secured premier honours in the history of the event. There were 252 starters. It was a splendid race won by A. J. Robertson (Birchfield Harriers) in 59 mins. 47⅕ secs. ; W. Coales (Thrapston A.C.), 59 mins. 58⅗ secs., being second, and A. E. Wood (Essex Beagles), 60 mins. 10 secs., third. With a total of 146 points, Hallamshire Harriers secured the Championship, Birchfield Harriers being second with 158 points, and Bradford A.C. third with 187 points. On the same afternoon the Scottish 10 Miles Championship was decided at the Agricultural Society Show Grounds at Scotstoun, near Glasgow. The Motherwell Y.M.C.A. Harriers took first prize, beating Clydesdale Harriers by 3 points. T. Jack (Edinburgh Southern Harriers) was first man home, his time being 63 mins. 37 secs.

The sixth International Cross-Country Championship, on March 26, over a distance of ten miles, at Colombes, just outside Paris, was won by England with 24 points ; France, 81 points, was second ; Ireland, 104 points, third ; Scotland, 136 points, fourth ; Wales, 237 points, fifth. A. J. Robertson (England) finished first in 50 mins. 26 secs. ; F. C. Neaves (England), 50 mins. 31 secs., was second ; and G. Pearce (England), 50 mins. 42 secs., third.

A Twenty Miles Championship Walking Race, promoted by the newly formed Southern Counties Road Walking Association, took place over a 5½ mile course around Ruislip on Saturday, March 21. The club championship, decided on points, was won by the Surrey Walking Club, Polytechnic Harriers being second, and Middlesex Walking Club third. The individual championship was won by H. V. Ross (Tooting Athletic Club), who covered the distance in 2 hours 56 mins. 32 secs. ; B. C. Brown (Surrey Walking Club) was second, his time being 2 hours 56 mins. 50 secs.

The annual encounter between Oxford and Cambridge took place at Queen's Club, West Kensington, on Saturday, March 28. Cambridge won by 6 events to 4. It was not an afternoon for record breaking, yet there were many good performances, notably that of T. H. Just (Cambridge) in the half mile race, and the long-distance run by N. F. Hallowes (Oxford), who was credited with his third win. The winners were :—Hundred Yards Flat Race, K. G. Macleod (Cambridge), 10⅖ secs. Half Mile, T. H. Just (Cambridge), 1 min. 55⅘ secs. High Jump, A. C. B. Bellerby (Cambridge), 5 ft. 8 ins. 120 Yards Hurdles, K. Powell (Cambridge), 16 secs. Long Jump, W. H. Bleaden (Oxford), 22 ft. 3 ins. Throwing the Hammer, A. M. Stevens (Oxford), 139 ft. 8 ins. Quarter Mile, E. H. Ryle (Cambridge), 51 secs. Mile, S. P. Lloyd (Oxford), 4 mins. 29⅗ secs. Putting the Weight, J. L. Michie (Cambridge), 37 ft. 2½ ins. Three Miles, N. F. Hallowes (Oxford), 14 mins. 53⅖ secs.

The Amateur Athletic Association's Long-Distance Running and Walking Championships took place at Stamford Bridge on April 18. In the Seven Miles Walk, G. E. Larner (winner in 1904 and 1905) was disqualified before he had covered a mile and a half, and E. J. Webb (Herne Hill Harriers) won by a couple of hundred yards from F. T. Carter (Queen's Park Harriers) in 53 mins. 2⅗ secs.—16 secs. slower than Thompson's winning time at Manchester the previous year. A. Duncan, jun. (Salford Harriers), won the Ten Miles Running Race in 53 mins. 40⅖ secs., his time being 22⅖ secs. faster than Underwood's the previous year. It was a magnificent race, the first six men finishing inside 54 mins. J. E. Deakin (Herne Hill Harriers), 53 mins. 41⅖ secs., was second ; T. Jack (Edinburgh), 53 mins. 42 secs., third ; M. Conway (Middlesbrough Harriers), 53 mins. 43 secs., fourth ; A. J. Robertson (Birchfield Harriers), 53 mins. 46 secs., fifth ; and W. Coales (Thrapston Athletic Club), 53 mins. 54 secs., sixth.

On July 4 the Amateur Athletic Association's Championship Meeting took place at the Stadium, Shepherd's Bush. The Canadian, New Zealand, South African, and Swedish Olympic teams were all represented, and the championships were generally considered to be a full-dress

rehearsal of the Olympic Games. A.A.A. records were broken in the running, jumping, and hammer-throwing competitions; but standing out more prominently was perhaps the fact that there was a wholesale defeat of the previous year's winners. A remarkable performer in the person of S. P. Gillis, of the New York Athletic Club, competed in the hammer-throwing event, and by throwing 164 ft. 5⅜ ins. he eclipsed the British amateur record by 1 ft. 1⅜ ins. E. R. Voigt (Manchester Athletic Club) set up new championship figures in the four miles race, his time being 19 mins. 47⅘ secs., which beat Bacon's long-standing record by 1⅗ secs. The best pole-jumping display seen in this country was given by E. B. Archibald (Canada), who cleared 12 feet. His nearest opponent was B. Söderström (Sweden), who jumped 11 ft. 10 ins. Both these performances were better than the world's professional record, but are well behind the American amateur record—12 ft. 5½ in.—held by W. R. Dray, New Haven, Connecticut. Results: 100 Yards Flat, R. Kerr (Canada), 10 secs.; Putting the Weight, Denis Horgan (Irish Amateur Athletic Association), 44 ft. 7 ins.; One Mile Flat Race, H. A. Wilson (Hallamshire Harriers), 4 mins. 20½ secs.; 120 Yards Hurdles, V. Duncker (South Africa), 16½ secs.; High Jump, Con Leahy (holder) (Dublin), 5 ft. 11 in.; 220 Yards Flat, R. Kerr (Canada), 22⅖ secs.; Half Mile Flat, J. H. Just (Cambridge and London Athletic Clubs), 1 min. 58½ secs.; Four Miles Flat, E. R. Voigt (Manchester Athletic Club), 19 mins. 47⅖ secs.; Two Miles Walk, G. E. Larner (Brighton and County Harriers), 13 mins. 58⅖ secs.; Quarter Mile Flat, W. Halswelle (Edinburgh), 49⅖ secs.; Pole Jump, E. B. Archibald (Canada), 12 ft.; Two Miles Steeplechase, R. Noakes (Sparkhill Harriers), 10 mins. 35 secs.; Long Jump, W. H. Bleaden (Oxford), 22 ft. 3½ ins.; Throwing the Hammer, S. P. Gillis (New York), 164 ft. 5⅜ in.

A remarkable test of endurance and courage was shown by T. E. Hammond, who, on Sept. 12, at the Stadium, won the 24 Hours Walking Race promoted by the Middlesex Walking Club. J. Butler, the London to Brighton walker, set the pace; but he retired at the twenty-seventh mile, and Hammond took the lead. With a long, swinging stride Hammond began to battle with the records, and at 51 miles his time was 8 hrs. 47 mins. 12⅖ secs. Each succeeding hour fresh records were created, and shortly after the eighteenth hour Hammond had covered 100 miles in 18 hrs. 4 mins. 10⅘ secs., which beat all amateur and professional records up to that distance. Continuing to walk at racing pace, he broke all world's records from 97 miles to the finish of his task, and completed 131 miles 580 yards in 24 hours. At 97 miles his time was 17 hrs. 28 mins. 47⅖ secs.; at 110 miles, 19 hrs. 58 mins. 40½ secs.; at 120 miles, 21 hrs. 52 mins. 58½ secs.

BILLIARDS.

A MORE uninteresting season than that of 1907–8 cannot be found in the history of the game. The absence of Stevenson and Inman had a deterrent effect on the match play, and it is doubtful if one genuine game for money took place. Bastard games of billiards on oval and octagonal tables were invented by the makers, but failed to attract the public, despite the fact that all the professionals except C. Dawson and T. Reece attempted to exploit them. As a result these two retained their form at true billiards, and shared first and second prizes in Messrs. Burroughes & Watts's Tournament, Dawson in addition winning the snooker pool competition run in conjunction with the same event.

Despite these victories Dawson was by no means giving of his best, and after several overwhelming defeats at the hands of the Scottish champion, T. Aiken, early in the season, he upon many occasions later found the task of giving 2,250 points start in 9,000 up to Reece an impossible one. E. Diggle, after a good start, broke down in health at the end of the season, and in addition to cancelling several engagements was compelled to give Dawson a walk-over in their Tournament heat. With the season practically over in May, W. Cook found a new stroke, the "rocking cannon"—a distant relation to the "anchor," but without the pocket shoulder assistance—and made a break of 490 by its use, which the Billiard Association passed. Later the same player, in an exhibition match with Charles Roberts, compiled a 1,000 break; so there appear to be great possibilities in the new stroke.

The most interesting event of the season was the Amateur Championship Competition, taken for the first time to the North, the holder, Mr. Harry C. Virr, being a Bradford man. The final round was decided in Leeds, and proved a great success, attracting large crowds to the County Hall. A strenuous struggle was witnessed in the final between Mr. Virr and Mr. G. C. Heginbottom, of Ashton-under-Lyne, the holder retaining the title after a splendid game. Earlier in the week Mr. Heginbottom beat the Amateur Championship record by making a break of 188 against the Southern representative, Mr. C. E. Jenkins.

If the 1907–8 season was without distinction, a different story has to be told of the opening of the season 1908–9. Stevenson and Inman were back, and challenges were plentiful. A bombshell was cast on the eve of the opening match. This was an announcement that a combine of billiard table makers, professional players, and amateurs had been formed to oust the Billiard Association and take over the management of the game. The Billiard Association declined to give up their control, and threatened to "warn off" any amateurs who played in public under other rules. Now that the hands of the governing body have been forced there is little doubt but that future billiard legislation will be for amateurs only, the professionals being left to shift for themselves.

In the autumn Melbourne Inman challenged for the Billiard Association Championship. There were no other challenges, and consequently Inman claimed the title, and it was very properly awarded to him. Thus ended the year 1908 with M. Inman champion of England.

BOXING, GYMNASTICS, AND FENCING.

THE twelfth annual boxing and fencing competitions between Oxford and Cambridge Universities took place at Oxford on March 10. Of the eleven previous meetings Oxford had won six, Cambridge three, the other two being left drawn. Both Universities were well represented, although a broken wrist prevented the Oxford president, A. S. Hoernle, from taking part, and W. R. Reynell represented the Dark Blues in the heavy weights. The results were:—Boxing—Bantam Weights: J. C. Surtees (Clare, Cambridge) beat E. G. S. Gordon (Exeter College, Oxford); Feather Weights: C. H. Fisher (Clare,

Cambridge) beat E. D. M. Barlas (Exeter College, Oxford ; Light Weights : J. M. H. Thornewill (New College, Oxford) beat E. C. Storrs (Pembroke, Cambridge) ; Middle Weights : D. Portway (Downing, Cambridge) beat A. Mains (Brasenose, Oxford) ; Heavy Weights : W. R. Reynell (Balliol, Oxford) beat G. A. Lilly (Caius, Cambridge). Fencing—Foils : First Strings, P. G. Doyne (Winchester and Trinity, Oxford) beat V. C. M. Reeves (Magdalene, Cambridge) ; Second Strings, M. F. Namek (Queen's, Oxford) beat M. C. Kaehorn (Trinity, Cambridge). Sabres : Count Esterhazy (Queen's, Oxford) beat J. Greenwood (Peterhouse, Cambridge). Oxford thus won five events to three.

Three new boxing champions were found at the Annual Public Schools Gymnastic, Boxing and Fencing Championships, which took place at Aldershot on April **2** and **3**. The finals of the boxing resulted :—Feather Weights : G. A. Taylor (St. Paul's) beat B. O. Smyth (Bedford) ; Light Weights : N. A. R. Anderson (Bedford) beat W. G. Gabain (Charterhouse) ; Middle Weights : C. O. Lilley (St. Paul's) beat H. J. Davis (Westminster) ; Heavy Weights : C. A. C. Darley (Dulwich) beat P. T. Mansfield (Charterhouse). The Gymnastic Challenge Shield was gained once more by Blundell's School, Tiverton, with **191** points, the representatives being C. E. Dickson and L. E. S. Farley. Dickson also gained the medal for highest individual score. Then came in order : Cheltenham **190**, Dean Close **187**, and Harrow **185**. The results of the fencing events were :—Foil *v.* Foil : B. C. Newton (Wellington), **1** ; E. D. Adrian (Westminster), **2**. Sabre *v.* Sabre : F. W. W. Baynes (Harrow), **1** ; O. St. J. Saunderson (Bedford G.S.), **2**.

The Amateur Boxing Association's Championships took place at the Alexandra Palace on April **15**. Provincial exponents were to the fore, and there were many spirited bouts, though the quality of the boxing was below the average. The winners were : Bantam, H. Thomas (Birmingham) ; Feather, T. Ringer (Lynn A.C.) ; Light, H. Holmes (Polytechnic B.C.) ; Middle, W. Child (Cambridge) ; and Heavy, S. C. H. Evans (Reading).

Without doubt the most successful boxing tournament of the year was the Championship Meeting in connection with the Olympic Games, which took place at the Northampton Institute, Clerkenwell, on Tuesday, October **27**. It was quite an international gathering—France, Denmark, Holland, Scotland, Wales, and England being represented by the best men available. There were **8** entries in the Bantams, **14** in the Feathers, **16** in the Lights, **12** in the Middles, and **9** in the Heavies. The reappearance of R. K. Gunn in the feather-weight competition was a revelation to many. Fourteen years previously he first became Amateur Feather-weight Champion of England—an honour which he held for the two succeeding years. It was generally considered that the veteran would be too old and slow to do much good with the younger generation, but Gunn was easily the best boxer in the weight, and won the competition comfortably from C. Morris (Polytechnic B.C.) in the final bout. Reginald L. Baker (Australia) went very near winning the middle-weight event, but in the final he lost to J. W. H. T. Douglas, the Essex cricketer, who is undoubtedly the best middle weight seen in this country since the renowned Joe Steers, who carried all before him a few years back. As in the professional ranks, there was a remarkable falling off in the quality of heavy-weight boxing. The bantam weights were well up to the average standard, but none of the light-weight boxers compared favourably with such champions as E. Dettmar, Walter Campbell, and E. Mann—all boxers of a superior class, who did not earn their championship honours so easily in their respective years. The winners of the various events were :—Light : F. Grace (Eton Mission B.C.) ; Feather : R. K. Gunn (Gainsford A.C.) ; Middles : J. W. H. T. Douglas (Belsize) ; Bantams : H. Thomas (Birmingham A.B.C.) ; Heavies : A. L. Oldman (City Police A.C.).

The winners of the Navy and Army Boxing Championships, which took place at Aldershot on October **27**, **28**, and **29**, were :—Officers' Class—Feather Weights : Lieut. J. A Shuter (R.N.) beat Lieut. H. M. Powell (South Staffordshires) ; Light Weights : Lieut. P. Newcombe (R.N.) beat Surg. E. L. Atkinson (R.N.) ; Middle Weights : Lieut. R. B. Campbell (Gordon Highlanders) beat Lieut. K. Hart (R.N.) ; Heavy Weights : Lieut. G. M. Ellison (Lincolns) beat Capt. G. N. Bentley (Middlesex Regiment). Men's Class—Feather Weights : Corpl. Darley (West Kent) beat Driver Windebank (A.S.C.) ; Light Weights : Corpl. Baker (West Kent) beat Petty Officer Dunne (R.N.) ; Middle Weights : Private Murray (Scots Guards) beat Private Harris (Coldstream Guards) ; Heavy Weights : Gunner Hewitt (R.M.A.) beat Sergeant O'Connor (6th Dragoons).

At Caxton Hall, Westminster, on March **26**, the final pool of the Amateur Fencing Association's Foils Championship was decided. Mr. Seligmann, the holder, was abroad, and consequently did not defend his title. The winner was Mr. R. Montgomerie (W. McPherson's School of Arms), with no assaults lost ; Mr. G. R. Alexander (Morel's School of Arms), Mr. E. M. Amphlett (Graves' School of Arms), and P. M. Dawson (F. McPherson's School of Arms) came next, each with two assaults lost ; Lieut. Seilmann, R.N. (Magrini School of Arms) was fifth, with four lost, and F. C. Reynolds (Volland's School of Arms) sixth, with five lost.

The Annual Epée and Sabre Championships of the A.F.A. were decided in the Palace of Music at the Franco-British Exhibition. The result of the sabres competition was a win for Mr. W. W. March (Vollemol's School of Arms), who won all his bouts ; Mr. C. A. Wilson (Leeds Fencing Club), who was second, lost two bouts ; Lieut. Leckhart Leith (R. N. Maguire's School of Arms), A. Keene (Artists' R.V. School of Arms), and A. C. Murray (Artists'), who each lost three bouts, tied for third honours. The Epée Championship was won by C. Leaf Daniell (Sword Club) ; M. V. Hoit, of the same club, being second, and R. Montgomerie (McPherson's School of Arms) third.

CRICKET.

WITH the exception of a visit by a team of Philadelphian amateurs, the programme of the cricket season of **1908** was of the usual order. Both the start and the finish of the season was wet, but on the whole the weather was favourable, June being especially fine. The County Championship was naturally the most important feature. The number of matches in the programme was **186**, being an increase of six over **1907**. Of the **186**, three which should have started on Thursday, July **16**, had to be abandoned on account of rain, without a ball having

been bowled. One was, unfortunately for Ernest Hayes, his benefit match at the Oval between Surrey and Lancashire, and consequently a supplementary game was arranged for in September between the champion county (Yorkshire) and the Rest of England. This, too, was interfered with by rain, but it is understood that Hayes was not allowed to suffer financially. There were some slight changes in the county fixture list, Northamptonshire meeting Yorkshire instead of Hampshire, and matches were renewed between Surrey and Somerset, Gloucestershire and Warwickshire, and Sussex and Lancashire. Kent and Notts were still estranged.

The Championship was won by Yorkshire, last held by that county in 1905, and, as in 1900, their record was an unbeaten one. They played 28 matches, lost none, won 16, and drew 12. Kent, who finished second, were beaten in the first month of the season, as also were Surrey, who are third, whilst Middlesex were defeated at Lord's in June in a match in which a sensational collapse took place in the fourth innings. There was a large proportion of unfinished games, especially in the North, and Yorkshire were on more than one occasion in danger of defeat; but so consistent was the team as a whole that they triumphed over all difficulties, and after the second overthrow of Surrey at the Oval, on Aug. 15, the way was made clear for them. Both of Yorkshire's matches at Taunton and Brighton were unfinished, and their final record of 16 wins and 12 drawn games is exactly the same as when they won the championship in 1900. In that year their chief rivals were Lancashire, but in 1908 both Lancashire and Notts were soon out of the race for premier honours. The following table shows at a glance the result of every match in the Championship series. The top line gives the outcome of the home fixtures, the bottom line the result of those played away:—

County.	Derbyshire.	Essex.	Gloucester.	Hampshire.	Kent.	Lancashire.	Leicester.	Middlesex.	N'thmpt'n.	Notts.	Somerset.	Surrey.	Sussex.	Warwick.	Worcester.	Yorkshire.

W Won. L Lost. D Drawn. A Abandoned.

Of the 119 matches which were finished, 70 were won by the home county and 49 by the visitors. The increase of drawn games from 49 to 64 is attributable to the fast pitches on the one hand, and to rain on the other. Rain was responsible in 35 instances, and heavy scoring in 20 cases. Bad light was responsible for one, and slow scoring for five draws. The chief features of the competition were the retrogression of Notts and Essex, and the advance of Kent and Sussex. The bottom three counties remain as before—Somerset, Northamptonshire, and Derbyshire. The following table shows the final record:—

Position.	County.	Played.	Won.	Drawn.	Lost.	Points.	Per-centage
1	Yorkshire	28	16	12	0	16	100·00
2	Kent	25	17	5	3	14	70·00
3	Surrey	29	13	12	4	9	52·94
4	Middlesex	19	6	10	3	3	33·33
5	Sussex	28	6	18	4	2	20·00
6	Worcestersh.	18	6	7	5	1	9·09

16	Somerset	20	2	5	13	– 11	– 73·33

The Surrey *v.* Lancashire, Kent *v.* Middlesex, and Warwickshire *v.* Leicestershire matches (July 16, &c.) were abandoned without a ball being bowled, and are not included in the above list.

According to the rule laid down by the M.C.C., "One point shall be reckoned for each win; one deducted for each loss; unfinished games shall not be reckoned. The county which during the season shall have, in finished matches, obtained the greatest proportionate number of points shall be reckoned champion county."

YORKSHIRE owed their success principally to the bowling of Hirst, Haigh, Rhodes, and Newstead, the latter a newcomer on an emergency in August, 1907, but since a regular member of the team. The team was not so brilliant in batting as in previous years, Hirst being at the head with an average in county matches of 40·36. Hirst was the most prolific in taking wickets, his record being 156 for an average of 12·44 runs apiece. KENT had the assistance of Mr. J. R. Mason in very few matches, and Mr. K. L. Hutchings was often out of form. Hardinge was a success, and James Seymour batted consistently. Blythe was the most deadly bowler, having taken 167 wickets for 16·48; but Fielder broke down several times, and consequently his bowling suffered. SURREY had a good side, and had Mr. N. A. Knox been at his best in bowling, they might have been nearer the top of the list. As it was they discovered a valuable substitute in Mr. E. C. Kirk, an amateur from the Spencer Club, who bowls left-hand fast. Hayward was the mainstay of the side, and headed the batting with an average of 46·85 runs an innings. Mr. J. N. Crawford also batted brilliantly, and had an average of 40·40, whilst Marshal showed improvement with an average of 40·36. For MIDDLESEX the captain (Mr. P. F. Warner) and Mr. B. J. T. Bosanquet topped the averages with 54·08 and 50·84 respectively, Tarrant being close up with 48·24. The latter also took 93 wickets at a cost of 19·56. The feature of the SUSSEX season was the reappearance of K. S. Ranjitsinhji, now the

Jam Sahib of Nawanagar, but Mr. C. B. Fry could only assist on a few occasions. These two were in excellent form, and had batting averages of 65·00 and 59·80, the Jam's best innings being 200 against Surrey. Killick and the two Relfs also did well, A. E. Relf having the best bowling average of 109 wickets for 19·11. The highest score of the season was 615 by Kent *v.* Derbyshire, Kent also compiling 601 for 8 wickets against Somerset. In low scoring, Northamptonshire were dismissed by Yorkshire for 27 and 15, the last innings being the smallest of the year. The heaviest scoring game was Worcestershire *v.* Warwickshire, at Worcester, when 1,351 runs were made for the loss of 28 wickets. In all there were 153 centuries scored in the County Championship, a large increase on the 91 of 1907. G. L. Jessop, Needham, Hardinge, and P. R. Johnson are credited with securing a century in each innings of a match; and there were 12 individual scores of over 200, against 5 in 1907, all except one being made by amateurs. The exception was J. T. Tyldesley, who made the highest score of the season, 243 for Lancashire against Leicestershire. In seven counties there were changes of captaincy, viz., Derbyshire, Middlesex, Lancashire, Surrey, Somerset, Northamptonshire, and Warwickshire.

Taking first-class cricket as a whole, the leading batsmen were B. J. T. Bosanquet, innings 22, runs 1,081, highest 214, average 54·05; C. B. Fry, innings 20, runs exactly 1,000, highest 214, average 52·63. Following these came H. K. Foster, average 48·04; Hayward, 45·82; P. F. Warner, 45·55; the Jam Sahib, 45·52; Tyldesley, 43·97; G. L. Jessop, 41·88; and Marshal, 40·22. Hayward was the only batsman to score more than two thousand runs, viz., 2,337. In bowling the averages were headed by Mr. J. B. King, one of the Philadelphians, with 87 wickets for 11·01. The Yorkshiremen, Haigh and Hirst, came next with 103 for 13·39 and 174 for 14·05 respectively. No bowler captured 200 wickets, Blythe coming nearest with 197 for 16·88. The man who came most to the front was Newstead, of Yorkshire, who took 140 wickets for 16·50. Other youngsters who have done well are E. C. Kirk, Newman, Astill, and Hitch. Huish stumped more batsmen than any other wicket-keeper, Board coming next.

Earlier in the year the M.C.C. team which went out to Australia failed to regain the "ashes," but was unfortunate in that Mr. A. O. Jones, their captain, was taken ill; but they received valuable assistance from the younger Gunn, whilst the other Notts man, Hardstaff, also proved a tower of strength.

The inter-University match produced a fine struggle and a close finish, Oxford defeating Cambridge by the narrow margin of two wickets. This was the first triumph of the Dark Blues since 1903. Cambridge scored 188 and 201; Oxford, 207 and 183 for 8 wickets. At the close of the second day's play Oxford required 58 to win, with 4 wickets to fall. Another wicket was down with no addition, but Hatfeild and Teesdale added 22 before rain stopped play till late in the afternoon. The eighth wicket fell when the scores were level, and then Hatfeild, having scored the winning hit, carried out his bat for 35, and to him Oxford undoubtedly owed their victory. During the season Cambridge played 11 matches, won 2, drew 1, and lost 8; Oxford played 8, won 2, drew 2, and lost 4. Both teams were moderate. R. A. Young, the Light Blue captain, headed the batting averages for Cambridge with 37·71, and E. Olivier and Hon. C. F. Lyttelton were their best bowlers, having taken 54 and 43 wickets respectively. For Oxford the Hon. C. N. Bruce and T. Bowring did best in batting with averages of 38·87 and 37·07, whilst H. A. Gilbert, C. E. Hatfeild, and J. C. M. Lowe rendered effective service in bowling.

The Eton and Harrow match provided an easy triumph for the Harrovians, who won by ten wickets. Batting first, Harrow scored 210, in response to which Eton could only total 71, and, having to follow on, were all out in their second innings for 153. Harrow scored 14 without loss. For Harrow C. E. V. Crutchley and T. E. Lawson batted best, and Crutchley also took 8 wickets for 46. The Gentlemen and Players matches resulted in a victory for the Players at Lord's by seven wickets, and for the Gentlemen at the Oval by six wickets.

CROQUET.

CROQUET enjoyed a very successful year, the entries for the various tournaments being large, and the play up to the usual standard. The Open Championship, at Roehampton, fell to Mr. C. Corbally, the Ladies' Championship to Miss E. M. Bramwell, and the United Doubles Championship to Mr. T. J. Considine and Miss N. E. Coote. The Open Gold Medal was won by Miss N. E. Coote, and the Ladies' Gold Medal by Mrs. Madge. The Champion Cup, competed for by the best ten players on the American tournament system, went to Mr. E. A. S. Fawcett; and Mr. and Mrs. R. C. J. Beaton tied for second place. Mr. R. C. J. Beaton won the Irish Championship and Miss Johnson Houghton the Irish Ladies' Championship. The Championship entry was a little below the average, noteworthy absentees being Sir William Bruce, Mr. Herbert Corbally, Mr. Austin, Mr. Locock, Mr. A. Law, and Mr. Leslie Callaghan. The lists included players from Ireland, Scotland, Wales, and Australia. A feature was the utilisation of 3¼-inch hoops for the first time since 1882, and it was generally agreed that they added interest to the play. By his success in the Gentlemen's Singles Mr. Corbally won the Championship for the fourth time, thus equalling the record of Mr. Spong, who achieved the honour in 1878, 1880, 1881, and 1882. Miss Bramwell, in winning the Ladies' Singles for the second consecutive year, did not lose a game in her five matches. Miss N. E. Coote, the holder of the Gold Medal, was unable to take part in the Championship competition. Amongst the competitors was the Open champion of the year, Mr. Cyril Corbally, who finished fifth, with 9 games against 14 by Mr. Fawcett, the winner. Mr. and Mrs. Beaton, who were bracketed second, secured thirteen games each.

FOOTBALL.

THE ASSOCIATION GAME.

THE season of 1907–8 was full of interesting features, and no falling off was shown in the public appreciation of the game. All the League championships changed hands; the F.A. Cup was unexpectedly won by a Second Division club (Wolverhampton Wanderers); and a new record for attendance was made in the International match between Scotland and England at Hampden Park, Glasgow, 121,000 persons present contributing £7,735 to the "gate." The schism between the Amateur F.A. and the

F.A. was accentuated, but the Army F.A. resolved to adhere to the older body. As a result of the schism the annual match for the Sheriffs of London's Shield between the Corinthians and the champion professional club fell through. The A.F.A., however, successfully got through the rest of its programme, and its Cup final was won by the Casuals, who defeated Old Carthusians by 3–0.

England and Scotland tied for honours in the International tournament; both countries having beaten Wales and Ireland, then drew in the match at Hampden Park. Scotland had six players from English League clubs in their team. The following were the results of the matches played:—On Feb. 15, at Belfast, England beat Ireland by 3 goals to 1; on March 7, at Dundee, Scotland beat Wales 2–1; on March 14, at Dublin, Scotland beat Ireland 5–0; at Wrexham, on Mar. 16, England beat Wales 7–1; on April 4, at Glasgow, Scotland drew with England 1–1; and on April 11, at Aberdare, Ireland beat Wales 1–0. The following table shows the positions of the four countries:—

		Pld.	W.	D.	L.	Goals. F.	A.	Pts.
1	Scotland	3	2	1	0	8	2	5
1	England	3	2	1	0	11	3	5
3	Ireland ...	3	1	0	2	2	8	2
4	Wales	3	0	0	3	2	10	0

England won both its League Internationals, beating the Irish League 6–3 at Sunderland, and the Scottish League 2–0 at Villa Park. A programme of Amateur Internationals was carried out by the F.A., and England won them all, as follows:—

Dec. 7	*v.* Ireland, at Tottenham	won	6–1
Dec. 21	*v.* Holland, at Darlington	,,	12–2
Feb. 22	*v.* Wales, at Stockport	,,	1–0
Mar. 23	*v.* France, at Park Royal	,,	12–0
April 18	*v.* Belgium, at Brussels	,,	8–2
April 20	*v.* Germany, at Berlin	,,	5–1
			44–6

The contest for the English Cup was full of interest, and there were many surprising results. The holders (Sheffield Wednesday) were beaten in the first round by Norwich City; and the other clubs knocked out were Woolwich Arsenal, Birmingham, Preston North End, Bristol City, Sunderland, Sheffield United, Blackburn Rovers, Notts Forest, and Middlesbrough. In the second round Chelsea, Bury, Notts County, and Queen's Park Rangers were defeated. In the third round Manchester City was beaten by Fulham after a replay; the other defeated clubs being Liverpool, Aston Villa, and Bolton Wanderers. In the fourth round Fulham knocked out Manchester United at Craven Cottage by 2–1, and Southampton defeated Everton after a draw at Goodison Park. Thus two southern teams reached the semi-final round, in which the draw was Newcastle *v.* Fulham at Liverpool, and Southampton *v.* Wolverhampton Wanderers at Chelsea. Fulham was beaten 6–0, and Southampton lost 2–0. For the third time in four years Newcastle United were in the final, but they failed at the Crystal Palace, Wolverhampton Wanderers winning by 3–1. The "Wolves," a purely English team, thus gained the Cup for the second time, their previous win—also with an English team—having been recorded in 1893. The attendance at the Crystal Palace, 77,000, was below the average.

Owing to the long lead gained by Manchester United in the First League competition, the contest for the championship lost some of its interest. Manchester United finished at the top with 52 points out of a possible 76. Of 38 matches they won 23, lost 9, drew 6, scoring 81 goals against 48. Aston Villa were second with 43 points, just beating Manchester City, 43 points, on goal average. Bolton Wanderers and Birmingham were relegated to the Second Division, their places being taken by Bradford City and Leicester Fosse, the two clubs at the head of the Second Division. In the Southern League, Queen's Park Rangers won the championship with 51 points, Plymouth Argyle being next with 49 points.

Since the close of the season of 1907-8, the Southern League has been re-arranged. Tottenham Hotspur have been elected to the Second Division owing to the decease of the Stoke club. The constitution of the Southern League has been increased to 21 clubs; and Bradford having resigned, Coventry City, Exeter, and Southend United make up the number. The re-arrangement was not carried out without some unpleasantness.

In the Western League, Millwall, winners in Section B, beat Southampton, winners of Section A, by 1–0 at Tottenham, in the deciding match. Bradford carried off premier honours in the United League, Bromley were first in the Spartan League, Woolwich Arsenal finished just in front of Tottenham Hotspur in the South-Eastern League, London Caledonians took the Isthmian League, and Fulham won the London League on goal average from West Ham United.

The F.A. Amateur Cup was won by the Depôt R.E., who beat Stockport at Darlington 2–1. Other Cup winners were:—Army Cup, 4th King's Royal Rifles (Colchester); Scottish Cup, Celtic; Welsh Cup, Chester; Irish Cup, Bohemians; F.A. Charity Shield, Manchester United (replayed on August 31); Household Brigade Cup, 1st Scots Guards; Cavalry Cup, 3rd Dragoon Guards; London Senior Cup, London Caledonians; London Charity Cup, Shepherd's Bush; Middlesex Cup, Southall; Surrey Cup, Nunhead; Essex Cup, Ilford; Kent Cup, Tunbridge Wells Rangers; Inter-Hospital Cup, Guy's.

In the Olympic competition at the Stadium, England won, defeating Denmark in the final by 2 goals to 0.

The Secretary of the Football Association is Mr. F. J. Wall, 104, High Holborn. The Secretary of the Amateur Football Association is Mr. H. Hughes-Onslow, 60, Lincoln's Inn Fields, W.C.

Rugby Union.

As far as the Rugby Union was concerned, there was no strong counter attraction last year in the way of a team from abroad. It was left to the Northern Union to entertain a professional side from New Zealand, and that only in the limited sphere of their operations. An endeavour to make inroads on the Rugby Union preserves, by playing exhibition Northern Union matches in the metropolis, resulted merely in a passing wave of curiosity, and has apparently left no permanent mark, the project for the establishment of a Northern Union club in London having hung fire through lack of support. In the legislative chamber, however, the Rugby Union had their troubles, notably

the heated controversy over the question of veiled professionalism, and the attitude of Scotland and Ireland, who withheld support from the tour of a British team in Australia. In the International Championship Wales ousted Scotland from the premier position, the meeting at Swansea producing a desperate struggle, which ended in favour of Wales by 6 points to 5—a result possibly influenced by the absence of K. G. Macleod. In beating Ireland at Richmond, England claimed her first success since the conquest of Scotland at Edinburgh in 1906. The complete International results were as follows:—Wales beat England, at Bristol, by 28 points to 18; Wales beat Scotland, at Swansea, by 6 points to 5; Wales beat Ireland, at Belfast, by 11 points to 5; England beat Ireland, at Richmond, by 13 points to 3; Ireland beat Scotland, at Dublin, by 16 points to 11; Scotland beat England, at Edinburgh, by 16 points to 10. Appended are the final positions of the countries:—

					For.	Agst.
	W.	D.	L.	Pts.	G.T.Pts.	G.T.Pts.
Wales	3	0	0	6	6 6=45	5 1=28
Scotland	1	0	2	2	6 2=32	4 4=32
England	1	0	2	2	7 2=41	9 3=47
Ireland	1	0	2	2	4 2=24	5 4=35

The Rugby Union programme also embraced a match in Paris against France, which the visitors won by 19 points to *nil*. Wales also met France and beat them at Cardiff by 36 points to 4. The Inter-University match resulted in Oxford's favour by a goal and 4 tries (17 points) to *nil*, the Dark Blues evincing marked superiority in the back division, after Cambridge had stubbornly fought the early stages. For the first time Cornwall won the Rugby County Championship, jointly held the previous year by Devon and Durham. Cornwall won six of their seven matches, and lost only to Devon in the first series of South-Western group matches. The Inter-Hospital Cup was won by London Hospital, who beat Guy's Hospital by 11 points to 3; and an interesting match at Queen's Club between the Royal Navy and the Army resulted in the former's favour by 15 points to *nil*. In the final of the Army Cup, 1st Leicestershire Regiment beat 1st Welsh Regiment by 5 points to 4. The French Championship was won by the Stade Française with a victory over Stade Bordelaise by 14 points to 3.

During the winter of 1908–9 an Australian amateur combination toured through this country.

The New Zealand professionals attracted good "gates" in Northern Union circles. They won 2 and lost 1 of the "Test" matches, were beaten in their 2 other Internationals, won 1 and lost 2 county games, and won 15, lost 9 and drew 2 club games; making a total of 18 wins, 14 defeats, and 2 drawn matches. The Northern Union County Championship was won by Cumberland.

The Australian team visiting England won the Olympic competition, beating a Cornish team by 32 points to 3.

GOLF.

So great has become the popularity of golf that it now boasts a Press of its own; important events are of weekly occurrence, and in a review such as this only the greatest of the many competitions of the year can be touched on.

The season of 1908 had a good send-off when, at Sunningdale, on March 25, Cambridge defeated Oxford by one game. The weather was wretched, but play was capital; the event was the best of eight matches. They resulted in Messrs. B. Hammond-Chambers, Eton and King's (5 and 4), C. B. Barry, St. Andrew's and Pembroke (2 and 1), C. L. Macdonald, Westminster and Trinity (2 up), and E. L. Ulyat, Felsted and Trinity, scoring for Cambridge; whilst Messrs. J. A. Robertson-Durham, Edinburgh Academy and University (4 and 2), D. E. Laudale, Winchester and Magdalen (2 and 1), and C. H. Gidney, Hailcybury and Hertford (2 up), won matches for Oxford. The last match was between the Hon. C. T. Mills, Eton and Magdalen, Oxford, and Mr. M. Hemmant, Tonbridge and Pembroke, Cambridge. Five holes from home the Oxonian was 1 up, and by winning he would have brought about a draw; Mr. Hemmant, however, halved the match, with the result stated. Had the old system of scoring by holes obtained, Cambridge would have won by 14 to 8.

The Amateur Championship concluded at Sandwich on May 29, victory (for the first time in the history of the competition) resting with a Yorkshireman, Mr. E. A. Lassen, who defeated Mr. H. E. Taylor in the final by 3 up and 2 to play. Mr. John Graham and Mr. C. E. Dick reached the semi-finals, so that all the honours went to players who had not previously played a very prominent part in the Championship.

Prestwich was the venue of the Open Championship. Two days' qualifying play reduced the competitors in the competition proper from 180 to 65, and the final was decided on June 19, when Jas. Braid, Walton Heath, won with an aggregate for the four rounds of 291. Tom Ball, West Lancashire, was second, 299; E. Ray, Ganton, third, 301; A. Herd, Huddersfield, fourth, 230; and H. Vardon, Totteridge, fifth, 306. Braid did not compete in 1893 and 1895, but has a wonderful record for the Championship, as the following figures prove:—

1894. Tenth	341	1902. Tie for second	308
1896. Sixth.....	323	1903. Fifth.....	310
1897. Second	315	1904. Tie for second	297
1898. Tie for tenth	321	1905. Champion ..	318
1899. Tie for fifth..	322	1906. Champion ..	300
1900. Third	322	1907. Tie for fifth..	318
1901. Champion ..	309	1908. Champion ..	291

Of other important events the most notable were the Irish Open Championship and *The News of the World* contest. The first named was decided at Newcastle (Ireland) during the first week in September, and resulted in the success of Mr. J. F. Mitchell. The latter event attracted an enormous entry, and after Northern, Southern, and Midland qualifying stages had been worked through, the competition proper was decided at Richmond during the early part of October; 32 of the leading professionals attached to clubs in England, Ireland, Scotland, and Wales participated. When the third round was reached the results were:—C. H. Mayo, Burhill, beat Harry Vardon, South Herts, by 4 up and 3 to play; F. Robson, Bromborough, beat Ben Sayers, North Berwick, by 1 up; J. G. Sherlock, Oxford University, beat T. G. Renouf, Manchester, by 1 up; J. H. Taylor, Mid-Surrey, beat Ernest Gray, Littlehampton, by 3 up and 1 to play. In the semi-final round Robson beat Mayo by 3 up and 1 to play; Taylor beat Sherlock by 3 up and 2 to play. The final of 36 holes between Robson

and Taylor was decided on October 8, when Robson, an unknown man, was only beaten, after a great struggle, by 2 up.

HOCKEY.

UNTRAMMELLED by convention, and happily immune from anything in the way of cup and medal competitions, hockey enjoyed a prosperous year. The rapid uprising of new associations and clubs was a prominent feature, and specially important was the formation of an Army Association, which should be a valuable supporter of the parent body in its maintenance of the high amateur status of the game. An Eastern Counties Association also came into being during 1908, in addition to which several new County Associations were formed. Of paramount importance, however, was the recognition the game received at Cambridge by the awarding of a "Full Blue," and with good reason this is regarded as an incentive to the public schools to take up hockey with greater zest. The keenest interest was displayed in the International campaign, a striking feature of which was the proof that the game is making headway in Scotland. The best hockey, however, was again to be found in the South of England, one reason being the general superiority of southern grounds, and another the fact of so many past and present University players confining their attentions mainly to southern hockey. Now, however, Cambridge University will be included in the new Eastern Counties group.

Without sustaining defeat England headed the International records, the full results being: England 4 goals, Wales 2; England 4, Ireland 0; England 3, Scotland 1; Scotland 2, Wales 1; Ireland 6, Scotland 0; Ireland 4, Wales 2. England also played France in Paris, and the result was a draw. The surprise of the inter-divisional matches was the defeat of the South by the West, but the frozen ground undoubtedly militated against the usually scientific game of the former. The inter-divisional results were: West 4, South 3; Midlands 3, West 2; Midlands 4, North 3; North 8, West 2; South 1, Midlands 0; South 4, North 1. Cambridge University had one of the finest teams of recent years, and beat Oxford by 3 goals to 1; and in club hockey Hampstead were the premier side. Generally speaking, forward play was not up to former high standard, but there was a noticeable advance in tactics amongst half-backs.

The resignation of the old Oxonian, Mr. H. M. Tennent, from the secretaryship of the Hockey Association was accepted with regret. His successor is Mr. Philip Collins, 6 Bedford Row, W.C.

The Olympic hockey final at the Stadium was won by England, who defeated Ireland by 8 goals to 1.

LAWN TENNIS.

THE forward tendency of lawn tennis in 1908, as indicated by the large increase in the number of players, did not bring in its train any appreciable advance in skill, and it was probably this fact that influenced the Lawn Tennis Association in instituting a Junior Championship. This competition, played at Ventnor, although won in good style by C. G. Eames, jun., aged 18, revealed all too clearly that the very young players at home do not begin at the beginning, in so far as elementary tactics are concerned; and the opinion prevails that the defect will not be properly remedied until the public schools adopt a favourable attitude towards the game, or, as an alternative, professional coaching be freely employed. To the general regret, Messrs. H. L. and R. F. Doherty did not figure prominently in serious lawn tennis; whilst the Championship meeting at Wimbledon provided further evidence of deterioration of form, the honours being practically monopolised by the players of the older school. In the absence of the holder, Mr. Norman Brookes, the Singles went to Mr. A. W. Gore, who repeated his success of 1901, and it is significant that he is the oldest player ever to attain the honour. The runner-up was Mr. H. Roper Barrett, who can scarcely be claimed amongst the younger generation, and whose form in the Singles was a revelation to the enthusiastic Wimbledon crowd. Mrs. Sterry, who first won the Championship in 1895, carried off the Ladies' Singles for the fifth time, and was much the superior of the younger competitors, both in variety and tactics. Miss May Sutton did not defend, and the runner-up was Miss A. M. Morton. The Gentlemen's Doubles enabled Mr. M. J. G. Ritchie (in his thirty-ninth year) to claim an All-England Championship for the first time, he and Mr. A. F. Wilding (who won the event in 1907 with Mr. N. E. Brookes) achieving a noteworthy success in the final over Messrs. Gore and Roper Barrett. The Mixed Doubles Championship was decided at Liverpool, and went to Mrs. Sterry and the Manchester player, Mr. X. Casdagli; and the Ladies' Doubles, played at Buxton, was won by Mrs. Sterry and Miss Garfit. Mrs. Sterry, who had a remarkable year, thus claimed all three ladies' championships—a record equalled only by Mrs. Lambert Chambers.

As demonstrating the rapid advance of young players on the Continent, the Olympic Games tournament at Wimbledon was instructive. Grace of style was associated with nearly all the visiting players, and Herr Otto Fritzheim, of Germany, evinced exceptional skill in reaching the final of the Gentlemen's Singles before he was beaten by the gold medalist Mr. M. J. G. Ritchie. Mrs. Lambert Chambers, improving considerably on her championship form, won the Ladies' gold medal; and the gold medals for the Gentlemen's Doubles fell to Messrs. R. F. Doherty and G. W. Hillyard, the polished ease of the former's methods being generally admired. The Gentlemen's Covered Court Singles Championship was won by Mr. A. W. Gore, the Doubles by Messrs. Ritchie and Wilding, the Ladies' Singles by Mrs. Lambert Chambers, and the Mixed Doubles by Messrs. Wilding and Miss Eastlake Smith (now Mrs. Lamplough). The Olympic Covered Court gold medalists were Mr. A. W. Gore (Gentlemen's Singles), Messrs. Gore and Roper Barrett (Gentlemen's Doubles), and Miss Eastlake Smith (Ladies' Singles).

The Hon. Sec. of the Lawn Tennis Association is Mr. G. R. Mewburn, 33, Old Broad Street, E.C.

ROWING.

UNDOUBTEDLY the feature of the rowing year of 1908 was the renewal of interest in professional sculling—a renewal there is some reason to hope is permanent. This interest culminated, on Monday, October 12, in a race over the Putney to Mortlake course—four miles and a quarter—for the Championship of England, the *Sportsman* Challenge Cup, and £200 a side. The competitors were Geo. Towns, of Australia, the retired Champion of the World, a man thirty-

nine years of age, and Ernest Barry, of Billingsgate. The latter was twenty-six years old, and although for seasons he had been declared by his friends to be a good man he had never competed in a really big race until the one under notice. A striking and satisfactory feature of the engagement was the part played in it by amateurs. Members of leading clubs, such as the Thames, London, and Vesta, were financially and other ways associated with the men; and Mr. Harry T. Blackstaffe, the World's Amateur Champion, was mainly responsible for bringing about the match. It was conducted throughout on the most sportsmanlike lines, the race being a splendid one. Towns, who started favourite at 11 to 10 on (earlier, odds of 6 to 4 were laid), led at the start. He went through Hammersmith Bridge about half a length ahead. At Chiswick Ait Barry caught and passed him. The Englishman gradually increased his lead until, at Barnes Bridge, it amounted to two lengths. Then Towns, shortly before reaching Mortlake Brewery, spurted grandly, and got to within about half a length, but it was the last game effort of a brave man and could not be maintained. Barry came away again and won by two lengths in 21 mins. 12¾ secs., the fastest time on record for the course. The race was the first for the English Championship since G. Towns beat Jas. Wray in 1900.

The Oxford University Torpids finished on February 26. Throughout the weather was bad, and the form was not good. Christ Church finished head of the river, New College heading the second division, and University II. the third. At Cambridge, Jesus College retained premier position in the "Lents."

The University Boat Race, decided on April 4, was won by Cambridge. Both crews had very bad weather for their practice, and both deserted home waters somewhat earlier than usual in consequence. The Oxonians were handicapped by illness overtaking several members of the crew in the earlier stages of the practice, and it was not till the middle of March that Mr. Harcourt-Gold finally got his men well settled. The Cantabs started warm favourites, and in the race Stuart, their stroke, proved that he had the knack of keeping men—on a tideway—better together than Gladstone, the Oxford stroke. The Cantabs' strong point was their splendid leg drive, following a quick beginning of the stroke. Gladstone clipped his stroke, and thereby prevented the heavy men behind him making the best use of their weight and strength. The Cantabs led from start to finish, and won by 2½ lengths in 19 mins. 19 secs. The crews were:—

Cambridge: F. H. Jerwood (Oakham and Jesus), bow, 11 st. 10 lb.; G. E. Fairbairn (Eton and Jesus), 11 st. 13 lb.; O. A. Carver (Charterhouse and First Trinity), 12 st. 10 lb.; H. E. Kitching (Uppingham and Trinity Hall), 13 st. 2 lb.; *J. S. Burn (Harrow and First Trinity), 12 st. 10½ lb.; E. G. Williams (Eton and Third Trinity), 13 st. 0½ lb.; *†E. W. Powell (Eton and Third Trinity), 11 st. 6 lb.; *†D. C. R. Stuart (Cheltenham and Trinity Hall), stroke, 11 st. 2 lb.; *R. Boyle (Bradfield and Trinity Hall), cox., 8 st. 10 lb.

Oxford: Hon. R. Stanhope (Eton and Magdalen), bow, 9 st. 10 lb.; C. R. Cudmore (Adelaide and Magdalen), 12 st.; *E. H. L. Southwell (Eton and Magdalen), 12 st. 3 lb.; A. E. Kitching (Tonbridge and St. John's), 12 st. 7 lb.; *†A. G. Kirby (Eton and Magdalen), 13 st. 7 lb.; A. McCulloch (Winchester and University), 12 st. 9½ lb.; H. R. Barker (Eton and Christ Church), 12 st. 0½ lb.; *†A. C. Gladstone (Eton and Christ Church), stroke, 11 st. 3½ lb.; *A. W. Donkin (Eton and Magdalen), cox., 8 st. 8 lb.

At Cambridge, on May 16, G. E. Fairbairn and N. E. Hawdon, Jesus College, won the Lowe Double Sculls. At Oxford, in the Summer Eights, Christ Church retained their position at head of the river almost without effort; and on June 12 A. C. Gladstone and C. A. Gladstone (Christ Church) secured the Oxford University Pairs. On the following evening, at Cambridge, Trinity Hall won the Cambridge "Mays." A. C. Gladstone won the Oxford University Sculls on June 19.

Henley Regatta was held from June 30 to July 3, and was favoured with grand weather and ideal rowing conditions. Owing to the Olympic Regatta at the end of the month, there were no foreign entries, and the Cambridge University crew and the Leander eight (with several good Oxford oars) did not race. Oxford crews won six events, and Cambridge one. Eton won a heat in the Ladies' Plate, and the Grand Challenge Cup on the same day—a performance they had not hitherto accomplished. Several records were beaten, St. Catherine's, Cambridge, defeating London in a heat for the Thames Cup in 7 mins. 10 secs.; whilst against Jesus College, Cambridge, in the Visitors', Magdalen, Oxford, got home in 7 mins. 30 secs.; in the Stewards', Magdalen put up 7 mins. 28 secs. against Thames—all the times being "bests." The winners of the eight trophies were:—Grand Challenge Cup (for eights): Christ Church College, Oxford—A. G. B. Cherry-Garrard (bow), 10 st. 8 lb.; W. A. Alcers, 10 st. 10 lb.; F. E. Villiers, 11 st. 4 lb.; A. C. Gladstone, 11 st. 4 lb.; G. E. Hope, 12 st. 8 lb.; E. Majolier, 12 st. 10 lb.; H. R. Barker, 11 st. 12 lb.; C. A. Gladstone (stroke), 10 st. 6 lb.; A. St. J. M. Kekewich (cox.), 9 st. 10 lb. Time, 7 mins. 10 secs. Eton were in the final for the third time. Stewards' Cup (for fours): Magdalen College, Oxford—C. R. Cudmore (bow), 11 st. 11 lb.; J. A. Gillan, 12 st. 13 lb.; D. Mackinnon, 12 st. 12 lb.; J. R. Somers-Smith (stroke, steers), 11 st. Time, 7 mins. 40 secs. London R.C. were beaten a length and a half in the final. Ladies' Plate (for eights): Jesus College, Cambridge, beat New College, Oxford, by three-quarters of a length in 7 mins. 5 secs. Wyfold Cup (for fours): Thames R.C. beat London R.C. by two lengths; time, 7 mins. 55 secs. Diamond Sculls: A. McCulloch, Leander, beat A. A. Stuart, Kingston R.C., easily in 8 mins. 25 secs. Stuart had defeated H. T. Blackstaffe in a preliminary heat, on a foul. Thames Cup (for eights): Wadham College, Oxford, beat Christ Church, Oxford, by a length in 7 mins. 15 secs. Silver Goblets (for pairs): H. R. Barker and A. C. Gladstone, Christ Church, Oxford, beat J. Beresford and K. Vernon, Thames R.C., easily in 8 mins. 26 secs. Visitors' Cup: Magdalen College, Oxford, beat Jesus College, Cambridge, easily in 7 mins. 20 secs.

The Olympic Regatta was held at Henley on July 28, 29, 30, and 31. The programme consisted of sculls, pairs, fours, and eights, and all the events were won by Great Britain. Amongst the competitors were Germans, Hollanders,

* Competed in 1907. † in 1906.

Belgians, Norwegians, Canadians, and Hungarians. The conditions were nearly perfect throughout, and the times for sculls, fours, and eights in the finals were very fast, but could not be compared with Henley Regatta times, as the courses differed. That for the Olympic races was 1 mile 880 yds. long, the start being 270 yds. lower down and he finish 60 yds. higher up stream than the usual Henley course. In the eights Cambridge University showed signs of having been overtrained, and were beaten in a preliminary heat by the Belgians. The winners were :—Pairs: J. R. K. Fenning and G. L. Thomson, Leander R.C., who beat G. E. Fairbairn and P. Verdon, Leander, in the final by 2½ lengths in 9 mins. 41 secs. Sculls: H. T. Blackstaffe, Vesta R.C., who beat A. McCulloch, Leander R.C., by 1½ lengths in 9 mins. 26 secs. Eights: Leander R.C.—A. C. Gladstone (bow), 11 st. 6 lb.; F. S. Kelly, 12 st. 1 lb.; B. C. Johnstone, 12 st. 11 lb.; Guy Nickalls, 12 st. 6 lb.; C. D. Burnell, 14 st. 2 lb., R. H. Sanderson, 13 st. 6 lb.; R. B. Etherington-Smith, 12 st. 7 lb.; H. C. Bucknall (stroke), 11 st. 6 lb.; G. S. Maclagan (cox.), 8 st. 8 lb.—who beat the Belgians by two lengths in 7 mins. 52 secs. Fours: Magdalen College, Oxford, who beat Leander R.C. by 1¼ lengths in 8 mins. 34 secs. The Leander crew which won the eights was probably the fastest crew seen on these waters.

On July 17, H. T. Blackstaffe, Vesta R.C., won the Wingfield Sculls—emblematic of the Amateur Championship of the Thames—from G.C. Bourne, Oxford University, and J. de G. Edye, Auriol R.C., covering the course in 25 mins. 53 secs. It was his tenth race, and his fifth win. As Blackstaffe also won the London Cup at the Metropolitan Regatta he had a most successful season. At the close he formally announced his retirement.

Early in the year, Tom Tims, boatman to Oxford University for many years, died; and in the autumn, J. H. Clasper, at one time a great oarsman, and latterly a boat builder at Putney, passed away.

The Hon. Sec. of the Amateur Rowing Association is Mr. R. G. M. Gridley, Leander Club, Putney, or Henley-on-Thames.

SWIMMING.

DURING the past season the sport of swimming has had greatly increased attention bestowed upon it, principally by reason of the remarkable performances at the Olympic Games, held in the great open bath at the Stadium, Shepherd's Bush, which was constructed specially for the games, and is 100 metres (109·3 yards) long. The best men from all parts of the world were competing. As expected, the majority of the events were won by Englishmen; but the 100 Metres and the 100 Metres Back Stroke races were both won by foreigners, the former by G. C. M. Daniels, of America, in the record time of 1 min. 5⅘ secs., and the latter by G. A. Bieberstein, of Germany (1 min. 24⅘ secs.). The 200 Metres Back Stroke race saw the victory of F. Holman, of Exeter, in 3 mins. 9⅕ secs.; the second man being another Britisher, and the third a Swede. It was in the distance races that Great Britain shone conspicuously. H. Taylor, of Chadderton, defeated F. E. Beaurepaire, of Australia, in the 400 Metres race in 5 mins. 36⅘ secs.; with Otto Schiff, of Austria, who had beaten Taylor at Athens two years before, placed third. Taylor also won the 1,500 Metres in the record time of 22 mins. 48⅘ secs.; with T. S. Battersby, Great Britain, second, and F. E. Beaurepaire, Australia, third. It had been arranged that the men should go on for mile record, but Taylor refused after finishing the actual race. Battersby did, however, swim on, and succeeded in establishing a new record of 24 mins. 33 secs. The 800 Metres Team race was one of the most memorable events of the meeting, the final heat perhaps being the most exciting race ever witnessed in this class of competition. The teams engaged in it represented Great Britain, Hungary, United States, and Australasia. At the last turn the Hungarians had a good lead, their fastest man, Zoltan de Halmay, being the last to swim. Fifty metres from home it seemed almost certain that Hungary would win, but Halmay suddenly went all to pieces, and Taylor, the last of the Britishers to start, coming with a rush, was able to place the credit of the victory to England, the full time of the team—four men swimming 200 metres each—being 10 mins. 55⅗ secs. The British team had very little difficulty in winning the Water Polo Competition, defeating Belgium in the final by 9 goals to 2. The diving was the best ever seen in this country, and was very closely watched by English swimmers and divers, to whom it was an object-lesson. Foreigners gained all the awards, first in Fancy Diving going to A. Zurner, of Germany, and that for High Diving to H. Johansson, of Sweden.

Naturally this gigantic meeting of world's swimmers overshadowed the ordinary English Championship races and competitions, but, nevertheless, some good performances were accomplished. Owing to the necessity of leaving the Olympic dates vacant, the season was greatly prolonged, and it was late in the year when the Championship competitions were finished. The first to be decided was the Long-Distance Championship, in the Thames, from Kew to Putney Bridge, on July 4. In this F. W. Springfield, of Queensland, easily defeated P. Radmilovic, of Weston-super-Mare, the holder, in 1 hr. 10 mins. 57 secs. The 220 Yards Breast Stroke Championship was decided at Manchester four days later, and was secured by P. Courtman in 2 mins. 47⅖ secs. Beaurepaire, of Australia, scored his first big win in this country on July 11, when, at Bradford, he defeated H. Taylor, of Chadderton, in the Half Mile Championship in 12 mins. 44 secs. This was only two days before the commencement of the Olympic Games, and Beaurepaire's defeats in them were therefore all the more surprising, but it is said that Taylor swam a bad course in the last lap. As soon as the Olympic Games were over a move was made to Nottingham, where Beaurepaire won the 220 Yards Championship in 2 mins. 37⅕ secs.; and the next night, at Bradford, H. N. Smyrk, of the Cygnus Club, won the Bath Diving Championship. A day later, at Manchester, H. Taylor defeated T. S. Battersby and F. E. Beaurepaire in the 500 Yards Championship in 6 mins. 14 secs.; and then the swimmers came south again for the King's Cup race, National Diving Competition, and Back Swimming Challenge Cup race at the gala of the Royal Life Saving Society at the Stadium, on August Bank Holiday. The King's Cup race ended in a tie between Oscar Schiele, of Germany, and S. Blatherwick; while F. Unwin, of Sheffield, retained possession of the Back Stroke Cup. On August 4, at Leicester, Beaurepaire created astonishment by beating T. S. Battersby and

H. Taylor in the Mile Championship in 25 mins. 15⅘ secs.; and on August 10 the Australian again beat Battersby, this time in the Quarter Mile Salt Water Championship, at Weston-super-Mare. In this race P. Radmilovic, and F. W. Springfield, of Australia, dead-heated for third place. On September 3 Miss J. Fletcher, of Leicester, won the 100 Yards Ladies' Amateur Championship, at the Hackney Baths, in 1 min. 18 secs.; and on September 10, at Burslem, Hyde Seal beat the London Polytechnic Club in the final of the English Water Polo Championship by 5 goals to 3. The next contest of importance was the race for the 150 Yards Back Stroke Championship, decided at Nottingham on September 17, and won by F. Unwin, of Sheffield, in 2 mins. 1 sec. The final of the Schoolboy Team Swimming Championship was decided at Salisbury on September 23, and was won by a team from the Beverley Council Schools, Hull; the Abbott Street School, Manchester, being second, and the Sutton County School, Surrey, third. The 100 Yards Championship was not decided until September 24, and thus C. M. Daniels, of America, the holder, was unable to be present. Z. de Halmay, of Hungary, was entered, but did not compete, and in the absence of these smart swimmers the race was won by H. Meyboon, a Dutchman, in 1 min. 0⅘ sec. The final of the County Water Polo Championship was played on September 26 at Weston-super-Mare, Middlesex then creating a surprise by beating Lancashire by 7 goals to 5, after extra time. The Championship season closed on September 28 with the Plunging Contest at Newcastle-on-Tyne, which was won by G. W. Allason, of the Otter Club, who beat his brother, the holder, with a plunge of 78 ft. 7 ins.

Among other important contests during the year was the second long-distance swim in the Thames, from Richmond Lock to H.M.S. *Buzzard*, moored off Blackfriars, a distance of 14 miles 963 yards. It was organised by the *Weekly Dispatch* Swimming Club, and was again won by J. A. Jarvis, of Leicester, who completed the distance in 3 hrs. 36 mins. 24 secs.; F. Kearsley, of St. Helens, Lancashire, was second; and P. L. Ooms, Holland, third. Jarvis won very easily. This race took place on June 27, and two days after the annual matches between Oxford and Cambridge took place at the Bath Club, Dover Street, Piccadilly, London. Cambridge won the Team race, but this does not count in the scoring. The swimming events were drawn level, Cambridge winning the 50 Yards and Oxford the Quarter Mile, while the 100 Yards resulted in a tie; the Water Polo match was also drawn, each side scoring 3 goals.

Among record-breaking performances of the year the principal were 150 yards by C. M. Daniels, of America, in 1 min. 32⅖ secs., at High Street Baths, Manchester, on July 8; 150 yards on the back by G. F. Unwin, 1 min. 59 secs., at Victoria Baths, Nottingham, on September 17; 200 yards on the breast by F. Holman in 2 mins. 45 secs., at Exeter, July 30; 440 yards by H. Taylor in 5 mins. 27⅗ secs., at Shoreditch Baths, on September 21; and Battersby's performances at the Olympic Games, previously referred to. It is, however, doubtful whether Battersby's record will be passed, as the Stadium Bath is only 109·3 yards long, whereas the regulation is that records of half a mile and upwards must be made over a course 110 yards in length.

There were several attempts made to swim the Channel, but none resulted in success. The best performance appears to have been that of Jabez Wolffe, who on Sept. 19 swam from Shakespeare Cliff, near Dover, to within a quarter of a mile of the French coast in 14 hrs. 55 mins. When taken out of the water he was to the west of and inside Calais Pier. He was thoroughly exhausted when picked up, and had, it is reported, been kept going with oxygen for some time.

The Amateur Swimming Association, of which Mr. J. C. Hurd, of 24, Cautley Avenue, Clapham, S.W., is the Honorary Secretary, accomplished much good work during the season, notably the settling of an agreement with the representatives of France, Germany, Sweden, Belgium, and Hungary as to the amateur definition and the rules and laws of racing. It also gave an historic banquet to the swimmers of the world at the Olympic Games.

Swimming Records.

100 Yards, C. M. Daniels, at Victoria Baths, Manchester, Sept. 7, 1907, time 55⅖ secs.; 100 Yards (Ladies), Miss J. Fletcher, at Victoria Baths, Manchester, Sept. 27, 1907, time 1 min. 17 secs.; *150 Yards, C. M. Daniels, at High Street Baths, Manchester, July 8, 1908, time 1 min. 32⅖ secs.; *150 Yards (Back), F. A. Unwin, at Victoria Baths, Nottingham, Sept. 17, 1908, time 1 min. 59 secs.; *200 Yards (Breast), F. Holman, at Exeter, July 30, 1908, time 2 mins. 45 secs.; 220 Yards, F. C. V. Lane, at Weston-super-Mare, Aug. 18, 1902, time 2 mins. 28⅗ secs.; 300 Yards, R. Cavill, at Liverpool, Sept. 25, 1902, time 3 mins. 34⅖ secs.; *440 Yards, T. S. Battersby, at Guinea Gap, Seacombe, Oct. 26, 1908, time 5 mins. 26⅗ secs.; 500 Yards, B. B. Kieran, at Leeds, Aug. 28, 1905, time 6 mins. 7½ secs.; Half-Mile, H. Taylor, at Runcorn, July 21, 1906, time 11 mins. 25⅗ secs.; 1,000 Yards, D. Billington, at Liverpool, July 23, 1905, time 13 mins. 34⅖ secs.; Mile, D. Billington, in London, July 1, 1905, time 24 mins. 42⅘ secs.; †Plunging, W. Taylor, at Bootle, Sept. 5, 1906, 82 ft. 7½ ins.

Tennis and Rackets.

More than ordinary interest was taken in tennis in 1908, for the reason that there was a match for the Professional Championship, in addition to the presence of the American, Mr. Jay Gould, to play in the amateur events. The title of "professional champion," resigned by Peter Latham, was claimed by C. ("Punch") Fairs, who was challenged by E. J. Johnson. In the match at Brighton, Fairs outplayed his opponent, and won with the loss of two sets. Mr. Jay Gould, who had strengthened his game since his previous visit of 1907, won both the Amateur Championship and the Olympic Games Gold Medal. In the final of each event he beat Mr. Eustace H. Miles. Mr. Miles, by virtue of being runner-up, took the Olympic Silver Medal. Opportunity was taken of Mr. Jay Gould's visit to play an International match, the champion being partnered by Mr. C. E. Sands, another American, and opposed to Messrs. Eustace Miles and V. Pennell. The English pair were seen to advantage, and obtained a creditable victory. Mr. Eustace Miles won the M.C.C. Gold Prize by beating the holder, Mr. V. Pennell; and the latter was also beaten for the Silver

* Made in 1908, and subject to confirmation by the A.S.A.

† Made under Championship conditions; time limit, 60 secs.

Prize, the winner in this instance being Mr. E. B. Noel. The Inter-University Doubles fell to Oxford, who were represented by the Hon. C. N. Bruce and Mr. H. A. Walker, against Messrs. J. N. Buchanan and A. de Rothschild (Cambridge). In the Singles Mr. Bruce beat Mr. Buchanan.

The most attractive event of the year in rackets was, as usual, the Public Schools Championship, compared with which the Olympic Games Tournament fell flat. The schools event was noteworthy for the further success of the famous Foster family of Worcestershire, the final being won on behalf of Malvern by M. K. and N. J. A. Foster, who beat the Rugby pair, C. C. Watson and C. F. B. Simpson. The Amateur Championship Singles resulted in the defeat of the holder, Mr. E. M. Baerlein, by Mr. E. B. Noel; and the latter, with Capt. A. C. G. Luther as his partner, was also beaten in the final of the Doubles, the winning pair being Mr. V. Pennell and Mr. F. Dames-Longworth. The Doubles were not defended by the previous holders, Captain W. L. Foster, D.S.O., and Mr. B. S. Foster. As for the Olympic Games tourney, the entries were small, and the scratchings numerous. The Singles fell to Mr. E. B. Noel, a bad arm preventing Mr. H. M. Leaf from opposing him in the final; and the Doubles were won by Messrs. V. Pennell and J. J. Astor, the runners-up being Messrs. E. W. Bury and C. Browning. Representing the First Life Guards, Lord Somers and Mr. J. J. Astor secured the Army Championship Doubles, the holders, the 2nd Highland Light Infantry, not defending; whilst the beaten pair in the final were Captain S. E. Holland and the Hon. H. C. O. Prittie. Mr. J. J. Astor, who has rapidly improved his game, beat Captain A. C. G. Luther (1st King's Own Yorkshire Regiment) in the final of the Singles; and here again the holder, Captain H. Balfour Bryant (2nd Highland Light Infantry), did not defend his title. The Oxford and Cambridge Singles went to the Hon. C. N. Bruce (Oxford) with a victory over Mr. G. T. C. Watt (Cambridge); and the Hon. C. N. Bruce and Mr. H. Brougham (Oxford) beat Messrs. G. T. C. Watt and L. C. Crockford (Cambridge) in the doubles. During the year a Tennis and Rackets Association was formed, under influential auspices.

THE TURF.

THE outstanding features of the racing season of 1908 were the in-and-out running of the three-year-olds, the want of success attending the Royal colours, the great good fortune which followed efforts of horses from Morton's stable at Wantage, the splendid tussle for jockey premiership between D. Maher and W. Higgs, and—general mediocrity. It is possible that F. Wootton, a lad who only completed his fifteenth year in December, might have ridden more winners than any other jockey—and thus have set up a record—but he incurred the displeasure of the Jockey Club at the end of September, and, being suspended for a month, lost his chance.

The first important handicap of the season—the Lincolnshire—was decided on Tuesday, March 24, when in a field of 20 Kaffir Chief, 6 yrs., 7 st. 1 lb., ridden by J. H. Martin, and starting at 100 to 7 against, won by 1½ lengths from Longcroft, 5 yrs., 7 st. (Howard), with Snatch, 5 yrs., 6 st. 12 lb. (F. Fox), third. The race was worth £1,430 to the winner, who covered the mile in 1 min. 47⅘ secs. For the Liverpool Grand National Steeplechase (£2,400), decided at Aintree on March 27, there was a field of 24 horses, and Rubio, 10 yrs., 10 st. 5 lb., won in 10 min 3⅗ secs. The Great Metropolitan Stakes (£935) at Epsom, on April 28, excited small interest, and was won by a very moderate animal in Father Blind; but the City and Suburban Handicap (£1,675) the following afternoon was, in a way, remarkable, for it was won by the aged Dean Swift (8 st. 12 lb.), ridden by Randall, who, in a field of 15, started second favourite at 6½ to 1. Dean Swift won the race in 1906, was third in 1905, and second in 1904.

The classic races furnished some very curious contradictions of form. The list opened with the Two Thousand Guineas (£5,600), distance one mile, at Newmarket, on Wednesday, May 6. Much was expected of a colt belonging to H.M. the King—Perrier—who was favourite of the 17 starters at 5 to 4. He cut up badly, however, and subsequent running proved that he was not even in the "useful" class. Norman III., ridden by Madden, won from Sir Archibald and White Eagle in 1 min. 44⅘ secs. In the Derby (£6,450), decided at Epsom on Wednesday, June 3, however, this form was utterly confounded, as Norman III., Sir Archibald, and White Eagle were beaten out of sight by Signor Ginistrelli's filly Signorinetta (W. Bullock up), of whom practically nothing was known, and who started at 100 to 1 against, thus recalling the victory of Jeddah in 1898. Primer, who in the Two Thousand Guineas had been left at the post, was second, and Llangwm, who did not run for the Newmarket race, third. On the following Friday Signorinetta, again ridden by Bullock, easily won the Oaks (£4,950), Courtesy being second, and Santeve third. Rhodora, who on Friday, May 8, had won the One Thousand Guineas (£5,550) from 18 opponents, including Signorinetta (who was not in the first eight), started a hot favourite for the Oaks, but in the race rolled over French Partridge, who fell.

The glories of Ascot, which opened on Tuesday, June 16, and where the going was extremely hard, were considerably dimmed by the death of Lord Derby just previously. Some promising two-year-olds turned out for the Coventry Stakes (£1,725), won by Louviers; but later in the year the form was proved only moderate by the running of The Jabberwock, who finished third. The Gold Vase (£900), over two miles, went to the three-year-old Pillo. A well-tried performer in the five-year-old Turbine took the Ascot Stakes (£1,690); but the Derby form was somewhat discounted when Primer, second at Epsom, was beaten two lengths by Santo Strato in the Prince of Wales' Stakes (£1,925) of 1 mile 5 fur. White Eagle won the Fiftieth Biennial (£1,423) of a mile on the Wednesday, amongst the unplaced lot being Rhodora, on whom odds of 6 to 4 were laid. The handicaps here, as well as the principal ones elsewhere, are dealt with in the list of records appearing on another page. The Coronation Stakes (£3,100), over one mile, was won by Lesbia (Madden), who had previously not been in the first eight for the One Thousand Guineas. On Thursday The White Knight accounted for the Gold Cup (£3,380), over 2½ miles; and the St. James's Palace Stakes (£2,350) of a mile went to Your Majesty, a Persimmon colt, who started at 8 to 1 in a field of eight. The three-year-old form became further "mixed" on the Friday, when Bembo, a colt by

Marco, who had run three times previously without obtaining a place, beat the Prince of Wales' Stakes winner, Santo Strato, in the Hardwicke Stakes (£2,582) of a mile and a half. Rhodora had nothing to beat in the Fifty-fifth Triennial (£847), and won in a canter. By this time it had become evident either that the season boasted an unusually large number of first-class three-year-olds, or else that the animals of that age were extremely moderate. As they continued to beat each other with unfailing regularity the latter deduction was most likely the correct one.

Probably the best three-year-old was Your Majesty, who, after winning at Ascot, secured the Eclipse Stakes at Sandown (£8,870), over a mile and a quarter, beating, amongst others, Santo Strato, White Eagle, Siberia, and Lesbia; the St. George's Stakes at Liverpool (£1,716), over a mile and three furlongs (here Rhodora was amongst the beaten lot); and the Doncaster St. Leger, on Sept. 9 (£6,450), over a mile and six furlongs. In all these races he was ridden by Wal Griggs. In the St. Leger he beat White Eagle, Santo Strato, Pom, Primer, Signorinetta, Bembo, and others. Up to that date the son of Persimmon and Yours had won £19,280 in stakes, and how he came to be unplaced in the Two Thousand Guineas in May is mystifying.

Of the so-called "ten thousand pounders" reference has already been made to the Eclipse Stakes. The Princess of Wales' Stakes (£4,844), decided over a mile and a half at Newmarket on July 2, brought out a very moderate field indeed, of 10 runners. Victory rested with the four-year-old Queen's Advocate, a Diamond Jubilee colt, who had not been out earlier in the season, and whose succeeding essays proved abortive. The Jockey Club Stakes (£7,440) was decided at Newmarket on October 1, over a mile and three-quarters. The 10 runners were, perhaps, a better all-round lot. Siberia won from the favourite, Primer, in most decisive fashion. The winner is a St. Simon filly, and had previously won the Nassau Stakes (£720) at Goodwood, the Yorkshire Oaks (£382) at York, and the Park Hill Stakes (£1,149), over a mile and six furlongs, at Doncaster. She was trained by Mr. Gilpin, and it is quite likely that she was—at the end of the season, anyhow—as good a three-year-old as any.

Casting back to Goodwood, which commenced on Tuesday, July 30, the Richmond Stakes (£852), was won by Bayardo, a colt by Bay Ronald—Galicia. This youngster was about the best two-year-old of the season. He had previously won the New Stakes (£1,817) at Ascot from 12 opponents, including winners in Perola, by Persimmon, and Blankney, by Flying Fox. Perola was undoubtedly smart, as she won the Woodcote Stakes (£930) at Epsom in June, the Exeter Stakes (£671) at Newmarket in July, the Rous Memorial Stakes (£1,185) at Goodwood, and the Hardwicke Stakes (£467) at Stockton in August. Afterwards Bayardo won the National Breeders' Produce Stakes (£4,357) at Sandown, on July 18, having 12 others behind him. The Gratwicke Stakes at Goodwood (£750) went to Courtesy, the Lavant Stakes (£1,000) to Sunflower, the Sussex Stakes (£657) of one mile to White Eagle, and the Prince of Wales' Stakes (£1,800), for two-year-olds, to Attic Salt, a filly by Sir Visto. The second in the latter race was Princesse de Galles, a filly by Gallinule, who carried the Royal colours. The King's filly had won the Ham Stakes (£950) on the first day of the Goodwood meeting, but her subsequent performances discouraged the idea that she is more than useful. The Goodwood Cup (£800) fell to Radium. The only events at York that demand reference are the Great York-shire Stakes (£1,133), over a mile and a half, which went to Pom (who beat only three poor three-year-olds), and the Gimcrack Stakes (£960), for two-year-olds, on the same day. The "tip-toppers" were absent from the latter event, which resulted in a victory for Blankney, a colt by Flying Fox, who had ran five times previously and scored one success—a maiden two-year-old plate, at Newmarket, in May. At Doncaster, which commenced on Tuesday, September 8, the King's filly Princesse de Galles ran second to Duke Michael, a Dinna Forget colt, for the Champagne Stakes (£1,720); the Doncaster Cup (£990), over two miles, fell to Radium. Reference to the St. Leger has been previously made.

Turf statistics up to and including the last day of October gave the first four winning jockeys as D. Maher, 426 mounts, 122 wins; W. Higgs, 616 mounts, 114 wins; F. Wootton, 490 mounts, 98 wins; Otto Madden, 492 mounts, 87 wins. Amongst winning owners, up to the date given, His Majesty the King has only secured nine races (with five horses), the value of the stakes won being only a little over £5,490. Mr. J. B. Joel was easily first, eleven of his horses winning 19 races of the aggregate value of £26,246. Mr. L. Neumann came second with 4 horses, 10 races, £13,617; Mr. Fairie third, with 13 horses, 28 races, £13,058; Messrs. William Clark and L. Robinson fourth, with 13 horses, 28 races, £11,909; Chevalier Ginistrelli fifth, 1 horse, 2 races, £11,400; Mr. W. H. Walker sixth, 4 horses, 12 races, £11,158. The principal winning horses were Your Majesty (3 races) £19,286; Bayardo (7 races), £13,038; Signorinetta (2 races), £11,400; Siberia (4 races), £9,682; Llangwm (8 races), £7,801; and Rhodora (2 races), £6,397. Persimmon, who died during the year, and St. Frusquin, both descendants of the great St. Simon, easily headed the winning stallion list, the former's 13 representatives winning 27 races of the aggregate value of £28,384, whilst St. Frus-quin's 23 winners secured 34 races, value £23,280. The defunct Bay Ronald, a descendant of Hampton, was third with 14 winners, 15 races, £17,920; Gallinule, who traces from Isonomy, fourth, with 22 winners, 36 races, £14,540; and the dead St. Simon, son of Galopin, fifth, with five winners of 11 races, value £13,698.

YACHTING.

THE racing during the season of 1908 proved far more interesting than it had been in any more recent years. With the exception of a few days during the latter part of August, the weather conditions were most favourable for the sport. There was a decided falling off in the number of cruising yachts taking part in handicap racing, but pure class racing was in a healthier condition than for some few years back. For the first time during the present century there was a class of big cutters, consisting of four vessels, which competed at all the principal regattas around our coasts. This class is known as the 23-metre class, under the rules of the Inter-national Yacht Racing Union, and the yachts comprising it are *White Heather II.*, Mr. Myles B. Kennedy, *Brynhild*, Sir James Pender, Bart.,

Nyria, Mr R. W. N. Young, and *Shamrock*, Sir Thomas J. Lipton, Bart. The last-named was a new yacht, designed and built by Fife, of Fairlie, and her advent in the racing fleet was responsible for an enormous increase of interest in the performances of the most important class. Yachtsmen, in particular, were anxious to see if any improvement had been made upon the vessels built in 1907, the year in which the international rating rule first came into operation. *Shamrock* proved herself superior to all her competitors in light and moderate breezes, and came out at the top of the class. *Brynhild*, the unlucky boat of 1907, had been much improved, and showed to advantage in hard weather. *Shamrock* won the King's Cup in the river matches of the Royal Thames Yacht Club, and also won Lord Wandsworth's Challenge Cup at the Royal Yacht Squadron regatta, and the Albert Cup at Southsea. *Brynhild* won the King's Cup at Cowes, competed for by yachts belonging to the Royal Yacht Squadron. One of the most important trophies competed for during the year was the Victoria Gold Cup, sailed for at Ryde under the burgee of the Royal Victoria Yacht Club, by whom—on its return by His Majesty, who won it with *Britannia*—it was offered as a Challenge Cup for the 23-metre class. It was won by *White Heather II.*, whose opponents were *Brynhild* and *Nyria*, *Shamrock* being an absentee owing to an accident. The records for the class were :—*Shamrock*, 19 first prizes, 1 sail over and 11 second; *White Heather II.*, 8 first and 10 second; *Brynhild*, 8 first and 7 second; *Nyria*, 3 first and 5 second.

The 15-metre class was the one next in importance to that mentioned above. The racing in this class proved as interesting as in any former year. There were four regular competitors — *Britomart*, *Ma'oona*, *Shimna*, and *Mariska*. The last-named was a new vessel, built by Fife to the order of Mr. A. K. Stothert. She was specially designed as a light-weather craft, and, favoured with light breezes during the greater part of the summer, she came out at the top of the class, notwithstanding indifferent performances at the earlier regattas, and the loss of some races at the end of the season, owing to being dismasted at Plymouth. The Prince of Wales's Challenge Cup, at Dover, was not sailed for, the regatta at which it should have been competed for being abandoned owing to rough weather. The Bainbridge Challenge Cup, at Plymouth, was won by *Britomart*. The records for the class were :—*Mariska*, 16 first prizes and 6 second; *Britomart*, 12 first and 6 second; *Ma'oona*, 8 first and 9 second; *Shimna*, 8 first and 6 second.

The most frequent competitors in the limited handicap matches were *Maymon*, *Camellia*, *Lucida*, and the eighteen-year-old *Creole* sometimes started with them. *Lucida* had the misfortune to be so badly damaged at Ostend that she was condemned after survey. Other competitors in cruiser handicap races included *Carina*, *White Heather I.*, *L'Esperance*, *Cicely*, *Clara*, *Bloodhound*, and *Rendezvous*. *Bloodhound* was built in 1874 for the Marquis of Ailsa, who re-purchased her during the winter of 1907-8, and fitted her out for racing. She did remarkably well in heavy weather, when there was plenty of reaching. She sank in Cowes harbour after being in collision with *L'Esperance* at the start of a race, during the Royal Yacht Squadron regatta. The German Emperor's schooner, *Meteor*, and Herr Krupp von Bohlen's schooner, *Germania*, as well as *Susanne*, also German-owned, were present at Cowes.

An interesting private match was sailed round the Isle of Wight between *Germania* and *Cicely*. It was won by the British vessel, *Cicely*, which finished exactly one minute ahead of her rival, which is of German design and construction, and manned by Germans. *Germania* won the Emperor's Cup at Cowes.

There was some keen racing at the various yachting centres amongst local classes, which are likewise being built in accordance with the international rating rule. Of these, the most important was the 12-metre class, on the Clyde, which consisted of five vessels, four being new craft.

In connection with the Olympic Games, races were arranged for the various classes from 15 metres downwards. There were no entrants from the biggest class. In the 12-metre class *Hera* and *Mouchette* were selected, and the series of races resulted in a win for *Hera*. The 8, 7, and 6-metre classes sailed at Ryde. Mr. B. O. Cochrane's *Cobweb* won in the 8-metre class, and *Mignonette* sailed over in the 7-metre class. For the 6-metre class there were competitors from Belgium, Sweden, Norway, and France. Victory in this class rested with the British boat *Dorny*, owned by Mr. T. D. McMeekin, second prize going to *Zut*, a Belgian boat.

There was a certain amount of confusion, owing to the dates of some of the principal regattas clashing, and a partial re-arrangement was made during the season. To avoid a repetition of such in future a meeting of club delegates was convened in November by the Yacht Racing Association, at which the fixtures for 1909 were arranged.

A challenge was sent by Sir Thomas Lipton for the America Cup, offering to build under whichever rule the New York Yacht Club desired, and asking at the same time to be permitted to build two vessels from which to select. At the time of writing nothing definite has been heard from the New York Yacht Club.

ELEMENTARY EDUCATION IN ENGLAND AND WALES.

Local Education Expenditure.—A return issued by the Board of Education on 25 November, 1908, gives the following particulars of expenditure by the Local Education Authorities on *Maintenance* (as distinct from Administration and Loan Charges) of Public Elementary Schools in England and Wales for the year ended 31 March, 1907 :—

Expenditure per Child—London, 94*s.* 3*d.*; Counties, 57*s.* 4*d.*; County Boroughs, 64*s.* 7*d.*; Boroughs, 66*s.* 4*d.*; Urban Districts, 64*s.* 9*d.* The Average for England and Wales is 64*s.* 10*d.*

CLOSE SEASON FOR GAME, WILD BIRDS, &c.

THE following Table gives the "close" time for different kinds of Game for England, Scotland, and Ireland, during which it is illegal to pursue the game mentioned, all dates inclusive :—

GAME.	ENGLAND.	SCOTLAND.	IRELAND.
Black Game or Heath Fowl.	11th Dec. to 19th Aug. and to 31st Aug., in Somerset, Devon, and New Forest.	11th Dec. to 19th Aug.	11th Dec. to 19th Aug.
Bustard	2nd Mar. to 31st Aug.	None.	11th Jan. to 31st Aug.
Deer, Male .	None.	None.	1st Jan. to 9th June.
,, Fallow Male	None.	None.	Michaels. to 9th Jne.
Grouse or Red Game	11th Dec. to 11th Aug.	11th Dec. to 11th Aug.	11th Dec. to 11th Aug.
Hare	None.	None.	21st Apr. to 11th Aug.
Heath or MoorGame	None.	As "Muirfowl."	11th Dec. to 11th Aug.
Landrail ...	As "Wild Birds."	As "Wild Birds."	11th Jan. to 19th Sept.
Muirfowl, or Ptarmigan	None.	11th Dec. to 11th Aug.	11th Dec. to 19th Aug.
Partridge ...	2nd Feb. to 31st Aug.	2nd Feb. to 31st Aug.	2nd Feb. to 31st Aug.
Pheasant ...	2nd Feb. to 30th Sept.	2nd Feb. to 30th Sept.	2nd Feb. to 30th Sept.
Quail	As "Wild Birds."	As "Wild Birds."	11th Jan. to 19th Sept.

It is also unlawful to kill pheasants, partridges, grouse, moor game, or hares on a Sunday or Christmas Day.

In England hares, rabbits, woodcock, snipe, quail, landrail, and heath or moor game (and the eggs of swan, wild duck, teal, and widgeon) are protected under the Game Laws, though no close-time is fixed for them by those laws. In Scotland the same remarks apply to deer and hares, to the first four birds, and to wild duck; in Ireland to all these five birds, with the further addition of widgeon, teal, and plover. The close-time for all these birds (except quail and landrail in Ireland, for whose close-time see above) is, under the Wild Birds Protection Acts, 1880 to 1908, from 2nd March to 31st July, both inclusive. Otherwise this close-time applies to all wild birds throughout the United Kingdom. The penalty for killing any wild bird in such close-time, or for selling or having in possession between the 16th March and the 31st of July, both inclusive (unless the killing can be proved to have occurred at a time and place to which the Act does not apply), is a reprimand and costs for the first offence, and 5s. and costs for each bird for every subsequent offence, or, in the case of the undermentioned birds, £1 for each bird for each offence. In any case the Court may also order the forfeiture of any bird (or egg, where protected—*see* next column) in respect of which the offence was committed. In the Island of St. Kilda the fork-tailed petrel and St. Kilda wren are deemed to be included in the following list, and the birds marked * to be omitted therefrom.

American quail.	Kittiwake.	Scout.
Auk.	Lapwing.	Sealark.
Avocet.	Lark.	Seanew.
Bee-eater.	Loon.	Sea parrot.
Bittern.	Mallard.	Sea swallow.
Bonxie.	Marrot.	Shearwater.
Colin.	Merganser.	Sheldrake.
Cornish chough.	Murre.	Shoveller.
Coulternich.	Night-hawk.	Skua.
Cuckoo.	Night-jar.	Smew.
Curlew.	Nightingale.	Snipe.
Diver.	Oriole.	Solan goose.
Dotterel.	Owl.	Spoonbill.
Dunbird.	Ox-bird.	Stint.
Dunlin.	Oyster-catcher.	Stone curlew.
Eider-duck.	Peewit.	Stonehatch.
Fern-owl.	Petrel.	Summer snipe.
*Fulmar.	Phalarope.	Tarrock.
*Gannet.	Plover.	Teal.
Goatsucker.	Ploverspage.	Tern.
Godwit.	Pochard.	Thicknee.
Goldfinch.	*Puffin.	Tystey.
Grebe.	Purre.	Whaup.
Greenshank.	*Razorbill.	Widgeon.
*Guillemot.	Redshank.	Wild duck.
Gull (except black-backed)	Reeve or Ruff.	Willock.
	Roller.	Wimbrel.
Hoopoe.	Sanderling.	Woodcock.
Kingfisher.	Sandpiper.	Woodpecker.

Offenders refusing their names and addresses are liable to a further penalty of 10s., but the Acts do not apply to any person shooting on his own land, or authorizing anyone so to shoot, any wild bird not included in the above list.

On the application of the local authorities, the Secretary of State in England and Wales, the Secretary for Scotland in Scotland, or the Lord Lieutenant in Ireland, has power to vary or abolish the close-time for any bird or birds in any county by order to be published in the *Gazette*. They may also direct that the above enactments shall apply to any wild bird not specified in the list, and may further prohibit the taking of the eggs of any wild bird in any county or part thereof. The Secretary of State in England and Wales, or the Secretary for Scotland, may also on the application of the local authorities make an order providing that in any specified area the taking or killing of any particular kinds of wild birds shall be illegal during any period specified in the order. These various powers have been exercised in many cases—too numerous to recapitulate here.

By the Wild Birds Protection Act, 1904, penalties are imposed on persons setting springs, gins, &c., on poles, trees, mounds, &c., so as to injure wild birds. Persons permitting such acts are equally liable. By an Act of 1908 the use of a hook or like instrument for taking wild birds is forbidden.

HUNTING AND GROUND GAME

There is no statutory close-time for fox-hunting or rabbit-shooting, nor is there, except in Ireland, for deer or hares; but there is an "unwritten law" which the sportsman respects as much as he does the enactments of Parliament. November 1st is the recognised date for the opening of the fox-hunting season, which continues till the following April. Otter-hunting lasts from mid-April to mid-September. The period for deer-hunting or stalking varies from about Aug. 12 to October 12 for stags, and from Nov. 10 to the end of March for hinds. By an Act passed in 1892 the sale of hares or leverets in Great Britain is prohibited from March to July inclusive under a penalty of a pound. This does not apply to foreign hares. The statutory close season for

hares in Ireland has been varied for some counties by order of the Lord Lieutenant, and it is now mostly from April 1st to August 12th.

CLOSE-TIME FOR SALMON.

I. ENGLAND AND WALES.

Under the Salmon Fishery Acts, salmon (including all migratory fish of the *genus* salmon) are protected, and a close-time is fixed for England and Wales, including the Esk in Dumfries, during which fishing for any of such fish is prohibited. The close-time for nets begins on 1st September, and for rods on 2nd November; for both nets and rods it ends on 1st February. By an Act of 1907 the Board of Agriculture and Fisheries may make provisional orders varying the law on these and other points. The close-time may also be varied by a bye-law by local boards of conservators, provided it does not begin for nets later than 1st November, with a minimum of 154 days, or for rods not later than 1st December, with a minimum of 92 days. For putts and putchers the annual close season is from 1st September to 1st May, which cannot be altered by bye-law. The following are the cases in which the other dates have been varied :—

Close-time for	Nets.	Rods.
Adur	1 Sept. to 2 Feb.	1 Oct. to 2 Feb.
Hampshire‡‡	31 July to 1 Feb.	2 Oct. to 1 Feb.

Camel	21 Sept. to 4 Apr.	1 Dec. to 30 Apr.
Fowey	§§ 1 Nov. to „	„ „ §§

No fresh salmon may be sold between 3rd September and 1st Feb., except such as come from parts beyond the seas, or as have been taken, if in the United Kingdom, in legal netting season and in legal manner. During that period all packages containing salmon consigned by any common or other carrier must be clearly marked with the word "Salmon." Salmon, dried, pickled, or cured abroad, or, if within the United Kingdom, between 1st February and 3rd November, may be sold after that date. The onus of proof that the fish were caught out of the United Kingdom, or, if within the kingdom, that they were caught during the legal netting season by legal means, or that, if pickled, they were pickled between 1st Feb. and 3rd Nov., lies with the person selling or exposing for sale. The exportation of salmon from any part of the United Kingdom is prohibited between 3rd September and 30th April, unless caught at a time at which its sale in the place where it was caught would be legal, if in the United Kingdom: the *onus probandi* lies on the person exporting. The capture and sale of "unclean" salmon, *i.e.*, salmon recently spawned or full of spawn, are prohibited under heavy penalties. Roe may not be used as a bait in salmon angling.

A weekly close season, during which net-fishing for salmon is prohibited, is fixed in England from noon on Saturday to 6 a.m. on Monday. This close-time may be varied by the local conservancy boards, provided it is not less than 42 hours, nor more than 48 hours, and that it is fixed between Friday at midnight and noon on Monday.

* Except above Woodbury Road Station, 1 Sep. to 15 Apr.
† Above S. Biddick. †† These dates for net close season above Bullo Pool only.
‡ Below Old Sandgate-ld. § Below Lostwithiel only.
‖ Except R. Erme, 30 Sept., rods 30 Nov. to 4 April.
** 16 Aug. to 1 Feb. below Bigsweir Bridge.
§§ Above Lostwithiel, 1 Dec. to 1 April.
¶¶ West of Needles Lighthouse.
¶ Above Lancaster Aqueduct, 12 Aug. to 25 July.

II. SCOTLAND.

In Scotland the annual close time must not be less than 168 days. It is, for nets, from 27th August to 10th February, and, for rods, from 1st November to 10th February, except as follows :—

Close-time for	Nets.	Rods.
Tay	21 Aug. to 4 Feb.	16 Oct. to 14 Jan.
Forth	—	ditto.
Add, Aray, Eckaig, N. & S. Esk, Fyne, Ruel, Shira.	1 Sept. to 15 Feb.	1 Nov. to 15 Feb.
Beauly, Dunbeath, Lossie, Ness, Spey.	—	16 Oct. to 10 Feb.
Halladale, Strathy, Naver, Borgie, Helmsdale.	—	1 Oct. to 10 Jan.
Earn	—	1 Nov. to 31 Jan.
Bervie, Carradale, Fleet, Garnock, Girvan, Howmore, Inner, Iorsa, Irvine, Laggan, Luce, Sorn, Ugie, Ythan, and rivers of Orkney, Harris, & Uist.	10 Sept. to 24 Feb.	1 Nov. to 24 Feb.
Nith	ditto	5 Nov. to 24 Feb.
Annan, Stinchar	ditto.	16 Nov. to 24 Feb.
Rivers of Shetland.	ditto.	15 Nov. to 31 Jan.
Urr	ditto.	1 Dec. to 24 Feb.
Rivers of Bute	1 Sept. to 15 Feb.	16 Oct. to 15 Feb.
Thurso	—	15 Sept. to 10 Jan.
Hope, Polla	—	11 Sept. to 10 Jan.
Tweed	15 Sept. to 14 Feb.	1 Dec. to 31 Jan.

The weekly close-time for nets is between 6 p.m. Saturday and 6 a.m. Monday; and, for rods, on Sundays. The Esk, in Dumfries, is included under the English Salmon Acts.

In Scotland the law as to the sale of salmon differs somewhat from that in force in England.

III. Ireland.

In Ireland the close-time for salmon applies also to trout. The netting close-time must never be less than 168 days. Many variations of the close season have been made, of which it is impossible to specify all the details here; the following list, however, shows the general close-time in force in the different districts, in parts of some of which, however, it is different (all dates inclusive). The second column gives the point of delimitation on the coast between the various districts, which include all rivers, &c., within their respective coast-limits.

District.	Coast Limits.	Cl.-T. Net.	Cl. T. Rod.
Dublin	Skerries to	16 Aug. to 1 Feb.	1 Nov. to 31 Jan.
Wexford	Wicklow to	16 Sept. to 19 Apr.	1 Oct. to 14 Mar.
Waterford	Kiln Bay to	16 Aug. to 31 Jan.	1 Oct. to 31 Jan.
Lismore	Helvick Head to	31 July to 1 Feb.	30 Sept. to 1 Feb.
Cork	Ballycotton H. to	16 Aug. to 14 Feb.	13 Oct. to 14 Feb.
Skibbereen	Galley Head to	30 Sept. to 30 Apr.	1 Nov. to 1 Feb.
Bantry	Mizen Head to	1 Oct. to 30 Apr.	1 Nov. to 16 Mar.
Kenmare	Crow Head to	16 Sept. to 31 Mar.	1 Nov. to 31 Mar.
Killarney	Lamb Head to	1 Sept. to 30 Apr.	Do.
Limerick	Dunmore Head to	1 Aug. to 11 Feb.	1 Oct. to 31 Jan.
Galway	Hags Head to	1 Sept. to 15 Feb.	16 Oct. to 31 Jan.
Connemara	Cashla Coast-Guard Stn. to	6 Aug. to 31 Jan.	Do.
Ballinakill	Slyne Head to	1 Sept. to 15 Feb.	1 Nov. to 31 Jan.
Bangor	Pigeon Point to	Do.	1 Oct. to 30 Apr.
Ballina	Benwee Head to	13 Aug. to 15 Mar.	16 Sept. to 31 Jan.
Sligo	Coonamore to	16 July to 31 Dec.	1 Oct. to 31 Jan.
Ballyshannon	Mullaghmore to	19 Aug. to 28 Feb.	10 Oct. to 28 Feb.
Letterkenny	Rossan Point to	20 Aug. to 3 Feb.	2 Nov. to 31 Jan.
Londonderry	Malin Head to	1 Sept. to 14 Apr.	11 Oct. to 2 Apr.
Coleraine	Downhill to	20 Aug. to 3 Feb.	1 Oct. to 28 Feb.
Ballycastle	Portrush to	20 Sept. to 16 Mar.	1 Nov. to 31 Jan.
Dundalk	Donaghadee to	16 Sept. to 31 Mar.	1 Oct. to 2 Feb.
Drogheda	Clogher Head to Skerries	5 Aug. to 11 Feb.	16 Sept. to 11 Feb.

In Ireland the weekly close-time is fixed at 48 hours, from 6 a.m. Saturday till 6 a.m. Monday. Salmon and trout must not be sold in Ireland in the close season.

CLOSE-TIME FOR TROUT AND CHAR.

The capture of trout and char in England and Wales is prohibited between 2nd October and 1st February, except (1) in parts of Norfolk and Suffolk where, under a local Act (the Norfolk and Suffolk Fisheries Act, 1877), the conservators have fixed the close-time for trout, for nets only, at from 10th Sept. to 25th Jan.; (2) in the Thames, where the close season is from 11th Sept. to 31st March; and (3) in the cases noted below, where, under an Act passed in 1876, the trout and char close-time (for rods and nets, except where specified) has been varied by bye-law by local boards of conservators. In the districts marked* the close-time, as altered, applies only to trout. The *sale* of trout and char is absolutely prohibited throughout England and Wales from 2nd Oct. to 1st Feb.:—

*Eden	2 Sept. (rods 2 Oct.) to 28 Feb.
*Usk	2 Sept. to 14 Feb.
Tyne	1 Oct. to 31 Mar.
Wye	2 Oct. to 14 Feb.
*Taff & Ely	20 Sept. to 1 Feb.
*Cleddy	29 Sept. to 1 Mar.
*Ogmore	30 Sept. to 28 Feb.
*Teign	1 Oct. to 2 Mar.
*Exe	15 Sept. to 28 Feb.
*Seiont‡	15 Sept. to 1 Mar. (except Anglesey, 13 Feb.)
Derwent (Cumb.)	15 Sept. to 10 Mar. Except Char in Crummock and Buttermere, 1 Nov. to 30 June.
W. Cumberland	2 Sept. to 10 Mar.
Teify, *Avon (Devon), Conway	1 Oct. to 28 Feb.
Adur, Cuckm're, Rother	1 Oct. to 31 Mar.
*Hampshire†	
Clwyd and Elwy, *Dart	2 Oct. to 28 Feb.
Camel, Fowey §§	
*Esk, *Tees, *Ayron	1 Oct. to 15 Mar.
*Severn, Towy, ‖	
*Lune, Ribble, Wear, Rumney, Tamar & Plym	2 Oct. to 1 Mar.
Kent§	2 Oct. to 3 Mar.
*Ouse and Nene	2 Oct. to 31 Mar.
Yorks	2 Oct. to 15 Mar.
*Suffolk & Essex	2 Oct. to 10 Apr.
*Dee	14 Oct. to 14 Feb. (rods only).
*Coquet	1 Nov. to 3 Mar. (ditto).

In Scotland there is a close-time for trout from 15 Oct. to 28 Feb. In Ireland the close-time for trout is the same as for salmon. For pollen the close-time is from 14 Nov. to 31 Jan.

Between Sept. 3 and Feb. 1 all packages in England and Wales consigned by any common or other carrier and containing trout or char must be distinctly marked with the word "Trout" or "Char," as the case may be.

CLOSE-TIME FOR FRESHWATER FISH.

By the Freshwater Fisheries Act, 1878, a close-time for "freshwater fish" (which are defined for this purpose to include all kinds of fish, other than pollen, trout, and char, which live in fresh water, except those kinds which migrate to or from the open sea) is fixed from 15 March to 15

† River Avon between Amesbury and Bickton only: above Amesbury 25 Oct. to 31 Mar.

‡ Char close time throughout district 22 Oct. to 1 Mar.

§ 2 Oct. to 1 April for R. Duddon; and 16 Sept. to 15 Feb for R. Bela.

§§ April 30 between Lost withiel and St. Winnow

‖ 2 Oct. to 30 June from R. Gwili to G.W.R. Bridge.

June, both inclusive, for all parts of England and Wales except parts of Norfolk and Suffolk. The penalty for taking or selling freshwater fish in that period is £2 for a first and £5 for a subsequent conviction. The close-season, however, does not apply to eels taken otherwise than by angling or to fish taken in private waters by leave of the owner, in public waters by leave of a Board of Conservators, or taken (with the leave of the owner if in private waters) for bait or for scientific purposes. Fishery districts may be wholly or partially exempted from this close-time with the sanction of the Board of Agriculture and Fisheries. The Axe, Avon and Stour, Avon (Devon), Wye, Eden, and Towy fishery districts have been so exempted; also the Kent and Leven and Severn districts, as regards pike; the Usk as regards eels; and certain parts of the Severn as regards other fish than grayling. In the navigable rivers of Norfolk and Suffolk and the broads connected therewith, close-times have been fixed for various fish under the Norfolk and Suffolk Fisheries Act, 1877, from March 1 to June 30. For eels a separate close-time exists (so far as fixed engines in salmon rivers are concerned) in England from 1 Jan. to 24 June; in Ireland, with one or two exceptions, from 11 Jan. to 30 June. In the Severn, elvers, or the fry of eels, are protected between 1 Jan. and the last day of Feb., and between 26 April and 24 June.

PROTECTION OF CRABS AND LOBSTERS.

Under the Fisheries (Oyster, Crab, and Lobster) Act, 1877, it is prohibited to buy or sell crabs under 4¼ inches, measured across the largest diameter of the back, or lobsters under 8 inches, measured from tip of beak to end of tail when spread out flat. The capture of "soft" crabs and crabs with spawn is also prohibited. By local bye-laws of Sea Fisheries Committees (*vide infra*), the minimum size of lobsters and crabs that may be lawfully taken in different parts of the territorial seas has been increased, and in some cases the taking of lobsters with spawn is prohibited, or a close season fixed.

CLOSE-TIME FOR OYSTERS.

There are also local regulations for the protection of oysters; and by the Fisheries (Oyster, Crab, and Lobster) Act, 1877, a general close-time for the capture and sale of "Deep-Sea Oysters" is fixed from the 15th June to 4th August; and for all other kinds of oysters—except oysters taken in the waters of a foreign state—from 14th May to 4th August. This Act applies to England and Scotland, but not to Ireland. By the Sea Fisheries Act, 1868, fishing for oysters is prohibited from the 16th June to 31st August inclusive, in that part of the English Channel comprised between a line drawn from the North Foreland Light to Dunkirk, and a line drawn from the Land's End to Ushant—the territorial seas of England and France alone being excepted. This close-time, however, cannot be enforced till the Convention between England and France, included in the Act, is ratified; and, until that is done, the Convention concluded in 1839, which prohibits oyster-fishing in those limits from 1st May to 31st August, is to remain in force so far as French fishermen are concerned. It is customary, however, for both Powers to agree to suspend the operation of this close season till June 16 in each year. In Ireland, the Act 5 & 6 Vict. cap. 106, prescribes that no oysters may be taken between 1st May and 1st September, though this close season has been varied in the following cases:—

Tralee Bay	11th Mar. to 31st Oct.
Galway Bay	1st Jan. to 30th Nov.
Strangford Lough	1st Mar. to 31st Aug.
Achil Sound, Clew Bay Sligo, Ballisodare and Drumcliffe Bays ...	2nd April to 30th Sept. 30th April to 1st June.

Taking oysters from licensed beds is made larceny.

Licences for Shooting and Fishing.

GAME AND GUN LICENCES.—A licence is required by every person who hunts, shoots, or takes game, except persons (in Great Britain) taking woodcock and snipe with nets or springes; rabbit-warren proprietors, or others, on enclosed land, killing rabbits; persons hunting deer, or hares, with hounds; owners or occupiers, or their servants, killing deer on their own land; beaters and others, not holding guns, attending holders of game licences. Occupiers of enclosed land, or owners, having the right to kill game, may themselves kill hares, or authorize others to do so, without a licence, but such authority must be limited to one person at a time in any one parish, and must be registered with the clerk of the Justices of the Petty Sessional Division in which the land is situate. Even when the quarry is not what is legally known as "game," a "gun" licence is necessary. A game licence, however, covers a gun licence. Soldiers, sailors, volunteers, or constables, on duty, or at practice, need not take out a gun licence, nor need occupiers of land scaring birds or killing vermin on such land, or persons so acting under the orders of occupiers holding a licence. Unless, however, the occupier is himself licensed, he cannot authorize any unlicensed person to carry a gun. "Scaring" birds is not to be regarded as including killing of any birds, and "vermin" does not include rabbits. The rates of duty are given at p. 458.

SALMON, TROUT AND CHAR LICENCES.—In all salmon fishery districts in England and Wales, and in Ireland, a licence to fish for salmon is necessary, and in most English and Welsh rivers a similar licence is necessary for trout or char, except that a salmon licence includes the latter. In Scotland no licence is needed. A licence is available only in the district, and for the season, in which it is issued, except that in Ireland rod licences are available in all parts of that country. The rates on salmon nets and other like instruments range from £20 downwards in England and Wales, and from £30 downwards in Ireland. In the latter country the rate on draft-nets, the kind most commonly used, is £3; in England and Wales it varies from £5 to £2. The licence duty on a salmon rod and line is £1 in Ireland. In England and Wales different rates are charged in different districts as follows (an asterisk signifies that lower rates of duty are chargeable for short periods, or for certain parts of the district):

*Eden, *Derwent, *Exe, Hampshire, *Wye, *Usk, 30/-; Taw and Torridge, 24/-; *Lune, *Ribble, *Dee, Clwyd & Elwy, *Conway, *Dovey, *Teifv, Avon (Devon), *Dart, *Teign, Frome, Stour (Kent), Yorkshire, Tees, *Tyne, 20/-; *Seiont, *Dwyfach, Towy, 21/-; Avon, Blue & Parret, *Camel, *Fowey, 15/-; Cleddy, Taff & Ely, Ogmore, W. Cumberland, 10/6; *Kent & Leven, Rhymney, *Ayron, Severn, Axe, Trent, Tamar & Plym, 10/-; *Esk (Yorkshire), 7/6; Onse (Sussex), Wear, Coquet, Cuckmere, Rother, Adur, 5/-.

ENGLAND AND WALES.—The administration of the laws of close season, &c., for salmon and trout is placed by the Salmon and Freshwater Fisheries Acts, 1861 to 1907, and the Board of Agriculture and Fisheries Act, 1903, in the hands of local boards, with the Board of Agriculture and Fisheries as the central authority. Districts may be formed and Boards of Conservators appointed for waters containing salmon or freshwater fish. Such Boards have been appointed for 53 Districts. [The districts generally include all rivers running into the sea between the points named, and in the cases marked † also include the sea for a distance of three miles from the shore, or to the mid-channel in estuaries.]

These Boards of Conservators consist of three classes of members—those appointed annually by the County Councils of the various counties through which the rivers flow; *ex-officio* members, or those qualified by ownership of lands or fisheries of a certain value; and representative members, elected annually by the persons who have paid licence duty on instruments other than rod and line, used for salmon fishing in public waters.

There are also certain bodies created by local statutes, having authority over the fisheries, *e.g.*, the Thames Conservancy Board, Lee Conservancy Board, and Conservators of the Medway.

These Boards have power to make bye-laws, not only for the regulation of the fisheries for salmon and freshwater fish, but also, in certain

cases for the regulation of other kinds of fishing which are prejudicial to such Fisheries. They are also empowered to issue licences for fishing for salmon, trout, &c.

SCOTLAND.—In Scotland there are 105 Fishery Districts, nearly each separate river forming a district of itself but only 37 Boards of Conservators. The powers of these Boards are limited to the Salmon Fisheries.

IRELAND.—In Ireland there are 23 districts, embracing between them the whole country, each with a separate Board of Conservators.

SEA FISHERIES DISTRICTS.—Under the Sea Fisheries Regulation Acts, 1888 to 1894, the Board of Agriculture and Fisheries has power to form sea fisheries districts within the territorial waters of England and Wales, and to appoint local Fisheries Committees, either for a single county or borough, or for several jointly. They have power to make bye-laws, to be confirmed by the Board of Agriculture and Fisheries, regulating or prohibiting the use of instruments for the capture of sea fish (including shell fish and crustaceans, but excluding salmon), the deposit of rubbish on fishing grounds, &c. The following districts have been created, including in each case the coast and territorial seas adjoining between the points respectively mentioned:—1. Northumberland (coterminous with that county). 2. North Eastern, from Northumberland to Donna Nook in Lincolnshire. 3. Eastern, from Donna Nook to Happisburgh. 4. Kent and Essex, from Dovercourt to Dungeness, and including the Thames estuary to London Stone near Yantlet Creek. 5. Sussex (coterminous with that county). 6. Southern, from the western boundary of Dorset to Hayling Island. 7. Devon. 8. Cornwall (each coterminous with the respective counties). 9. Glamorgan, from Nash Point to Worms Head. 10. Milford Haven, from Worms Head to Cemmaes Head. 11. Lancashire and Western, from Cemmaes Head to Haverigg Point. 12. Cumberland, from Haverigg Point to Sark Foot.

Similar districts may be formed in Scotland under the Sea Fisheries Regulation (Scotland) Act, 1895.

Seasonable and Unseasonable Fish.

THE following table shows the periods when the different kinds of edible fish mostly in use are "in season" and "out of season."

The asterisk (*) signifies that the fish are then in their prime; the dagger (†) signifies that the fish may be obtained, but are not at their best; the double dagger (‡) signifies that it is "close-time" as fixed by statute.

(*a*) This is for sea crayfish. River crayfish can be obtained in the summer and autumn. It is illegal to take fresh-water crayfish from March to June.

(*b*) Foreign oysters can be sold in the close season, and are to be had almost all through the year, even though they have been laid down in English beds for temporary storage.

(*c*) In the close season salmon from Holland, and also from certain British rivers where net fishing is permitted later in the year than usual, are largely sold.

(*d*) For the first six months the bulk of our London supply of shrimps comes from Holland, but Dutch shrimps are far inferior to the English, which are plentiful from July to December.

Automobilism, 1907-8.

ALTHOUGH automobilism cannot be said to have progressed in leaps and bounds during the period about to be reviewed, nevertheless substantial progress has been made, both from a mechanical and even from a commercial point of view. With regard to the latter aspect progress can be claimed, although the industry has suffered from the universal set-back which has assailed trade generally for the past twelve months. The attendance of the public at the great show of automobiles and their accessories, which was opened by H.R.H. the Duke of Connaught on 11th November, 1907, showed no slackening of interest in the latest form of road locomotion, although the exhibition could not be said to present many novelties as an excitation to the curious. The total number of chassis shown was 560, as compared to 576 at the previous exhibition, the main feature being the decline of side chain drive as compared with the now ever-increasing propeller shaft live axle drive. Although the show was a trifle smaller than its predecessor, it was admitted on all hands to be the most interesting and assuredly the most international show ever held. In this respect it greatly surpassed the French Salon.

The general tendencies observable from a close examination of the exhibits were the increase of the various types of six-cylinder engines, a testimony to the foresight shown by Mr. Montague Napier in insisting upon the superior drive of six cylinders over four. In addition to a great increase in numbers, six-cylinder engines were found made in much lower powers than heretofore. There was a distinct inclination also to get away from casting single cylinders, and to mass them in pairs for four and threes for six-cylinder engines. The latter practice is greatly to be admired for the opportunity it affords of a large central crank shaft bearing. In the matter of ignition, high-tension magnetos were found in considerable numbers, and the tendency to drop low-tension magnets and the accumulator high-tension system in their favour has become still more pronounced since the show.

Governors were few and far between, the practical driver's requirements, as opposed to the shop designers' weakness, having prevailed in favour of throttle valve control by interconnected pedal and hand lever. Mechanical lubrication was more a feature than last year, the oil being circulated to the engine bearings by direct-acting force pumps or rotary pumps of one kind or another. It is to be regretted that some firms, however, stopped at the half-way house; that is to say, they made use of pumps to lift the oil to drop sight feeds upon the dashboard, and depended upon gravity to conduct the lubricant thence to the bearings. But these half-and-half measures are gradually being dropped; and the forced delivery of oil at pressures of from 5 to 7 lb. per sq. in. through suitable leads and oil conduits drilled in the crank shaft is being substituted. Of the carburetters, the spirit and soul of the automobile engine, and with the perfecting of which many brilliant minds are still earnestly concerned, there is little real progress to be chronicled. Some fresh and hitherto unexplored avenue must, it would seem, open to the inventive mind before we are likely to witness and experience a fresh departure and a signal improvement in carburetters. So far as the carburetters at Olympia in 1907 went, there was some tendency to drop the use of springs for the control of the additional air valve, and depend entirely upon the weight of that part and gravitation, but admission of the absence of perfect automatic action was evident in many cases in the provision of means by which the driver could admit additional air when required. Several of the throttle valves shown were so designed that after complete cut off a passage of cold pure air could be afforded to the cylinders.

Multi-disc clutches, more or less on the lines of Professor Hele-Shaw's well-known device, were greatly in evidence, but later experiences and reports appear to suggest the relinquishment of this form of communicating drive, and a return to the earlier leather-faced cone clutches or the adoption of single discs. The leather-faced cone clutches were found to be improved in many particulars, chiefly with regard to first intention devices of springs or cushions beneath the leather at several points in the periphery of the cone. Direct drives on top speeds were almost universal, though there was a lamentable tendency in some quarters to fit three speeds when there should be four. Four speeds, with direct drive on the third, would seem to be almost ideal, and there was a distinct tendency to provide this arrangement. Few, if any, striking and locking devices were to be found outside the gear boxes, while the latter were more often than not cast in box shape and merely covered by a whole top inspection lid. This was admirable as making specially for staunchness against oil leakage and the access of dirt.

In the matter of transmission, as already stated, propelled shaft drive greatly preponderated, and this in connection with bevel gearing. Worm drive had not recruited any fresh disciples, but ball bearings were much more general throughout the back axle than was the case at the show of 1906. Torque rod and propeller shaft casing were unified in many cases, the torque rod becoming a torque column and made to serve as the propeller shaft casing. Here and there torque rods or tubes were altogether dispensed with, and the drive from the road wheels was delivered to the chassis entirely through the springs—a very undesirable feature. A few more spring drives obtained, but the more remarkable innovation in back axle design was the provision of means by which the driving wheels might be canted or inclined in manner similar to the steering wheels. As this required additional complication either in the shape of a double bevel drive or the introduction of universal joints in the driving shafts, the advantages to be derived are doubtful. There were indications of an increased use of ball-bearings in connection with crank shafts and connecting-rod ends, but English designers appear still very loth to abandon the well-tried long plain white-metal lined bearing. It was gratifying to find the double block or locomotive type of brake increasing in use in connection with the pedal applied brake in rear of the gear box, although in all but a few cases internally expanding brakes were the order for rear wheels. Steering mechanism remained very much where it was. Indeed there is a great opportunity for improvement in the adjustment and safeguarding of steering devices.

The pressed steel channel section cambered

frame obtained almost entirely, but frames generally were considerably narrowed, and there were indications of a return to that excellent practice the provision of an underframe for the carriage of the engine and gear box. An increase in the uses of cycle-built wire wheels was distinctly noticeable, and with a mechanical vehicle like the automobile the employment of a properly mechanically built wheel is certain to grow, the prejudice notwithstanding.

During the Show week it was announced that no race on a fuel consumption basis would take place in the Isle of Man in 1908, but that, given the sanction of the Island authorities, a race of about 350 miles would be held which would be based on maximum bore and minimum weight. Cars would be eligible the D²N of whose cylinders did not exceed 64, and which in the case of petrol engines must not have less than four cylinders. The minimum weight was to be 1,800 lb., excluding driver, mechanic, spare parts, tools, but including fuel, oil, and water. The formula worked out at a four-cylinder engine of four inches bore, with the result that the event soon came to be generally known as the "Four Inch Race."

About the time and immediately after the Exhibition, rumours of a split between the Royal Automobile Club and the Motor Union were rife in automobile circles, and at the annual dinner of the latter body held, on Nov. 13, 1907, Mr. C. D. Rose, M.P., announced from the chair the present position of the two bodies. The Motor Union is a body which was brought into existence by the Royal Automobile Club with a view of affording motorists, who could not avail themselves of the advantages of this club, an opportunity to form a strong body for their mutual protection under the auspices of the Club. This position, but for certain ambitions, might still obtain, but the reverse has happened, and automobilism as a whole is likely to suffer by the schism. Up to the present moment considerable overlapping has taken place, and those who wish well to automobilism desire that some *modus vivendi* should obtain between the bodies.

Just before Christmas the Royal Automobile Club dropped a bombshell into the camps of automobile clubs all over the country. In deference to much hysterical prejudice on the part of a portion of the public, a resolution practically prohibiting the holding of open hill-climbing competitions went down on the rule book. The clubs were both incensed and annoyed at this until they found that the dictum did not apply to hill climbs confined to club members only, and this way the worst was averted and the armists appeased.

Before the end of the year the acquisition of the site of the old War Office premises in Pall Mall by the Royal Automobile Club, as the rich for their new club-house, was announced.

On Jan. 1 of the present year the much-delayed Lights on Vehicles Act, an Act rendering it compulsory to carry lights on all vehicles at night, came into force. All existing by-laws are repealed, but county councils have power to impose additional obligations, such as the compulsory carrying of two lights, or the exhibition of a red light to the rear from the off-side lamp. In January the Associate Scheme of the Royal Automobile Club became known, but although apparently attractive enough, motorists generally have not been drawn to it.

The first important intimation of the presence in this country of what is now generally known as the "Silent Knight" or valveless engine was made early in the above month, but at that time no mention was made of its wholesale adoption by one of our leading automobile firms. Later on in the year this particular motor became the subject of public discussion, and also the subject of a descriptive paper read before the Royal Automobile Club. The engine as adopted by the firm referred to was fully described in the technical press, and was submitted to a non-stop test run of 24 hours just prior to the reading of the above-mentioned paper. In the design of this engine the inventor has essayed and has apparently succeeded in eliminating the tappets and poppet or mushroom-headed valves of the present-day engine, and has substituted therefor two cast-iron sleeves moving and sliding one within the other and both within the cylinder proper, the inner sleeve forming a liner in which the piston is caused to perform its usual functions.

Early in February details of the imports and exports of motor cars, as extracted from the Board of Trade returns for the year 1907, were made public. The value of the gross imports of motor cars and parts for the year 1907 was £4,552,686, as compared with £4,371,660 in 1906 and £3,367,123 in 1905. The number of cars in 1905 was 5,622, in 1906 5,776, and in 1907 4,819, the value of whole cars having decreased while the value of parts had gone up. Cars and parts were re-exported in 1907 to the value of £382,665, which left a net import value for 1907 of £4,170,021. This huge sum of money was spent out of this country by reason of the repressive motor legislation in the early part of the nineteenth century. An analysis of the figures shows that though the imports still exceed the exports by a considerable amount the difference during the past three years has been a declining one; also the exports show a much larger rate of increase than the net imports, although there is still much leeway to be made up.

On Tuesday, February 18, two deputations, one representing the R.A.C. and the other the Motor Union, waited upon the Chancellor of the Exchequer to represent the views of motorists upon the proposals for the increased taxation of motor cars which it was understood would be included in the forthcoming Budget.

It was suggested that while the R.A.C. favoured imposition in proportion to the power of cars calculated upon a standard engine formula, the Motor Union favoured taxation by weight. Both bodies were in agreement as to the allocation of moneys so obtained to the cost of making and the upkeep of roads, but the R.A.C. expressed an opinion later that there was no sort of justification whatever for any additional taxation on motor cars. Subsequently a general conference of anti-mobilists was called on March 25 last by the Motor Union, to emphasize the facts that additional taxation would retard the development of the industry, that financial assistance should be rendered by the State to local authorities for road expenditure, and that the basis of the taxation of motor vehicles should be the subject of a public enquiry by a departmental committee. As a matter of fact, no reference was made by the Chancellor of the Exchequer in his Budget speech to any alteration or addition to motor taxation.

British motor productions so seldom triumph abroad, either on land or sea, that the successes

of the Wolseley-Seddeley motor-boat at Monaco in April 1908, should not pass unnoticed. These wins on the Riviera included the 50 kilometres race, the contest for the Cinzano Cup at Nice, the open 100 kilometres, the race for Pearl of the Sea, in addition to making fastest time of all the craft concerned in the Racers' Handicap at Monaco. This craft was built for the purpose of bringing back the International Cup from America, which trophy was won in 1907 by the American boat *Dixie*. Unfortunately, the Wolseley-Seddeley failed in her mission, a new *Dixie* boat beating her by a few seconds only.

An announcement of more than usual importance was made on Thursday, 21st inst., to the effect that H.S.H. Prince Francis of Teck, K.C.V.O., D.S.O., had accepted the chairmanship of the Royal Automobile Club, *vice* Mr. C. D. Rose, M.P., resigned by reason of his health necessitating a sea voyage.

The first of the Reliability Trials of the year were those so successfully carried out by the Irish Automobile Club, no less than 62 cars leaving Dublin for the appointed trip on Thursday, May 21. The daily objectives were Cork, Killarney, Dublin, Belfast and Dublin. A timed climb up Holywood Hill was a feature of the last day's run. The awards were issued immediately upon the close of the trials—a despatch in such matters quite unusual, but, nevertheless, convenient and gratifying to all concerned.

On June 11, commenced the most severe test to which self-propelled road vehicles have ever been subjected in this country. Forty-six cars, divided into eleven classes, left London for Nottingham, Newcastle-on-Tyne, and Glasgow, where this particular batch of cars entered with others upon the route of the trials promoted by the Scottish Automobile Club. The course selected for the Scottish trials was more than strenuous. Of the 46 cars that entered Scotland but 37 emerged, and after some severe hill-climbing in England—two timed hill climbs per day—the cars arrived at Brooklands, where they were driven all out for 200 miles. The system of marking adopted in the English trials was based upon a time debit for each and every kind of failure, with the result that time lost by any car from the moment of starting until arrival at Brooklands formed that car's handicap in the 200 miles race with the other surviving cars in its class. Very bad weather conditions obtained during the Scottish portion of the trial, but both going and returning the English part of the journey was blessed with fine weather.

The Class Winners in the 2,000 miles were as follows:—Class A: 8-h.p. De Dion; Class B: 9-h.p. Adler; Class C: 10-h.p. Cadillac; Class D: 12.14-h.p. Singer; Class E: 12.16-h.p. Vauxhall; Class F: 20-h.p. Talbot; Class G: 30-h.p. Adler; Class H: 40-h.p. Armstrong-Whitworth; Class J: 30.40-h.p. Ariel; Class K: 40.50-h.p. Rolls-Royce; Class L: 40.50-h.p. Ariel. The awards in the Scottish Trials (gold medals) were as follows:—Class A: 12-h.p. Swift; Class B: 12.14-h.p. Argyll; Class C: 16-h.p. Bell; Class D: 12.16-h.p. Vauxhall; Class E: 25.35-h.p. Darracq; Class F: 35-h.p. Deasy; Class G: 40-h.p. Armstrong-Whitworth. Although 2,000 miles over give-and-take country cannot to-day be regarded as a very searching test of a modern motor car, it should be borne in mind that in the case of this particular trial it meant 2,000 miles of neglect, for the reason that everything done to a car, from filling with petrol upwards, meant loss of marks in minutes.

Hard upon the completion of the 2,000 Miles and Scottish Trials came the two Grand Prix races over the Dieppe Circuit, organised by the Automobile Club of France. On Monday, July 6, 47 voiturettes started for the Grand Prix des Voiturettes. None of these cars exceeded 19.24 theoretical horse-power, and most of them were propelled by single-cylinder engines. The multi cylinder cars, however, made no show worth chronicling, for no less than five single-cylindered vehicles followed Guyot's Delage home. The positions and average speeds of the first four were as follows: (1) Delage (Guyot), 49·8 m.p.h.; (2) Sizaire (Naudin), 48·9 m.p.h.; (3) Leon-Peugeot (Goux), 28·2 m.p.h.; (4) Leon-Peugeot (Boillot), 47 m.p.h.

On the next day, Tuesday, was contested the race for the Grand Prix, in which 49 cars were despatched. Of these, six were of English make, three Austins and three Weigels, the three Napiers originally entered having very properly been scratched by Mr. S. F. Edge upon the refusal of the French club to allow the use of detachable wheels. The course of 48 miles had to be covered ten times, and a most interesting and exciting race ensued. The result was very uncertain until quite late in the day; indeed, the French chance had not altogether disappeared before the close of the penultimate circuit. In this lap the only fatal accident occurred, Cissac and his mechanic turning over at Eu, with fatal effects to both. The race was an absolute triumph for Germany, which country finished six in the first seven cars. The order was (1) Mercedes (Lautenschlager), 68·9 m.p.h.; (2) Benz (Hemery), 67·4 m.p.h.; (3) Benz. (Hauriot), 67·4 m.p.h.; (4) Bayard-Clement (Regal), 63·6 m.p.h.; (5) Mercedes (Poege), 63·4 m.p.h.; (6) Opel (Jorus), 62·4 m.p.h. Great ill-luck assailed the three Weigel cars, but two Austins finished seventeenth and eighteenth, accomplishing 54·5 and 54·4 m.p.h. respectively. This race was cruelly destructive of tyres, the French laying their non-success chiefly at the door of unsatisfactory detachable rims.

On July 20–21 the Royal Automobile Club held a series of interesting dust trials at Brooklands, in which over thirty cars of various makes took part. The actual results have yet to be made known, but the fact that it is the wheels of a car, and the wheels of a car only, which left the dust in the first instance was very clearly demonstrated.

In the week ending September 5, 1908, Prince Francis of Teck, as Chairman of the Royal Automobile Club, issued an appeal to all motorists throughout the country that at all times and places they should, with the object of diminishing the outcry against motors, spare no pains in their consideration of other users of the road.

On September 6 the contest for the Florio Cup was decided over the Bologna Circuit. The first to score was that remarkable driver Nazzaro, who drove his F.I.A.T. right through at an average speed of 74·3 miles per hour.

In the week ending September 19, the actual details of the now much-discussed Knight engine, as the engine is constructed by the Daimler Co., were made public. Subsequently the inventor read a paper descriptive of his invention before the Royal Automobile Club, which was subjected to the criticism of all the leading

critics of the industry. An impression that the Knight engine was after all not such a peril to the industry as at first imagined was a comforting result of the meeting. Just prior to the date set down for the decision of the "Four Inch Race" in the Isle of Man, strenuous endeavours were made through the agency of several leading daily papers—the *Times* voicing the demand—to force the Royal Automobile Club to abandon the race altogether. This importunate request was made on four considerations—first, that the race was dangerous; secondly, that the club by manifesto had set its face sternly against inconsiderate driving; thirdly, that public opinion was opposed to the event; and, fourthly that nothing was to be learned from racing. The club did not treat this clamour with disdain, but called a meeting to consider the suggestions, with the result that it was unanimously resolved to hold the race as arranged. As events turned out, the race did not prove more dangerous than any other form of strenuous competition, and it in no way provoked an increase of inconsiderate driving. The public evinced great interest in it, and so far from teaching manufacturers nothing at all, it is now admitted on all hands that by no other event have British engineers learnt so much as by the construction and proving of cars for the "Four Inch Race." The race took place on Thursday, September 24, and was very hotly contested by the three cars which finished first, second and third. Thirty-five cars started in perfect weather, which obtained throughout the day, a very large concourse of people watching the event with the keenest interest from start to finish. The car that started first, Watson's Hutton-Napier, retained its pride of place, covering the 337½ miles in 6 hrs. 43 mins. 5 secs., an average speed of 50·25 m.p.h. A. Lee Guinness, driving a Darracq, did 6 hrs. 45 mins. 21 secs.=50 m.p.h.; and A. E. George, also on a Darracq, 6 hrs. 48 mins. 36 secs. =49·6 m.p.h.

PRINCIPAL HILL CLIMBS.

Aston Hill.—Hertfordshire A.C.—Aston Cup: 24-h.p. Minerva, E. Edwards. Best handicap performance: 15-h.p. Talbot, Lord Ingestre.

Shelsley Walsh.—Midland A.C.—Fastest time, Silver Cup: 60-h.p. Napier, H. C. Tryon. President's Cup, best on formula: 20-h.p. Vauxhall, T. C. Kedner.

Rivington Pike.—Lancashire A.C.—Fastest Time: 60-h.p. Napier, W. Watson. President's Cup, Open Handicap: 35-h.p. Deasy, E. W. Lewis.

Newtown, Mount Kennedy.—Irish A.C., Open Section Fastest time after deduction of handicap allowance: 15-h.p. Clement-Talbot, S. T. Robinson. Amateur Section: 16.20-h.p. Calthorpe, J. B. Dunlop.

Motor Marks.

IRELAND.

COUNTY COUNCILS.—Antrim, I.A.; Armagh, I.B.; Carlow, I.C.; Cavan, I.D.; Clare, I.E.; Cork, I.F.; Donegal, I.H; Down, I.J.; Dublin, I.K.; Fermanagh, I.L.; Galway, I.M.; Kerry, I.N.; Kildare, I.O.; Kilkenny, I.P.; King's County, I.R.; Leitrim, I.T.; Limerick, I.U.; Londonderry, I.W.; Longford, I.X.; Louth, I.Y.; Mayo, I.Z.; Meath, A.I.; Monaghan, B.I.; Queen's County, C.I.; Roscommon, D.I.; Sligo, E.I.; Tipperary (N. Riding), F.I.; Tipperary (S. Riding), H.I.; Tyrone, J.I.; Waterford, K.I.

COUNTY BOROUGHS.—Belfast, O.I.; Cork, P.I.; Dublin, R.I.; Limerick, T.I.; Londonderry, U.I.; Waterford, W.I.; West Meath, L.I.; Wexford, M.I.; Wicklow, N.I.

Asteroids.—The total number of these bodies has now reached some 700, and they are being gradually added to year by year. One of them, No. 622, which had been lost since 1906, has been recovered by Dr. J. H. Metcalf, at Taunton, Mass. It has been known for some time that several of the asteroids shewed variations in brightness, probably due to phase angle; in the case of Eros this has been recently confirmed. The new asteroid, BM, has been named Zelinda.

The Sun.—Only partial success attended the observers who went to Flint Island to observe the total solar eclipse of January 3, 1908. The morning broke fine, but heavy rain came on afterwards and continued until totality. At the first minute of totality the sky was clouded—afterwards it was clear enough to allow of four pictures of the corona being taken; but none could be obtained of the spectrum. The form of the corona resembled that of the eclipse in 1898. In the month of September the Sun exhibited signs of great disturbance; and, on the 2nd of the month, a great cloud of incandescent hydrogen was observed above the chromosphere. A short rapid magnetic storm was observed at Greenwich on the 11th. From the 11th to the 30th a helium flocculus was observed, and another magnetic storm was recorded at Greenwich on the 28th which continued till the 30th.

Jupiter.—Whilst measuring the photographs taken at Greenwich of the sixth and seventh satellites, Mr. Melotte, one of the assistants, noticed an extremely faint object near to the planet, on a plate exposed on February 28. An examination of other plates, on which the same object was found, showed that it could not be a star, having moved in the interval, and it was concluded that the object in question was either a planet or another satellite. The same object has since been identified by other independent observers, and, from subsequent investigations, no reasonable doubt remains that it is a new satellite: Jupiter's eighth. Elements calculated from the most recent observations agree well enough with those first found. The eccentricity comes out a little larger, and the first suggestion that the orbital motion was retrograde is confirmed. It will be interesting to see how far the present elements will require correction when the planet can be re-observed. It will be remembered that in 1779 Lexell's comet approached very near to Jupiter; so near as to entirely change its orbit, and Professor G. Forbes, in "Nature," queries whether this satellite may not be the long-lost comet captured by the great planet.

Mars.—Dr. Wallace, in his recent book, arguing against Professor Lowell's conclusions regarding the existence of water vapour in Mars, is answered by Lowell that Mr. Slipher has found lines on repeated spectrograms of Mars, indicating the presence of water vapour stronger than those of the moon at the same altitude. Other observers have found slight traces of absorption by aqueous vapour in the spectrum of Mars.

Mercury.—The transit across the Sun's disc on November 14, 1907, was spoilt for observation in England by clouds. It was seen at the Royal Observatory for a few moments only, through a break in the clouds. Observers in France were more fortunate. At Montpelier, Professor Moye observed in a clear sky. No luminous ring was seen round the planet, nor spot on its disc. The black drop was very conspicuous for quite half a minute. In Italy it was well seen at Spezzia and Florence. At the former place no ring was seen round the planet, but the black drop continued for fully a minute. At Florence the weather was most favourable, and it was remarked that the planet appeared slightly elongated at the first internal contact. At Athens the transit was observed through thin cloud. No trace of any ring, such as the same observer saw in 1891, was observable on this occasion. At Rio de Janeiro no black drop or any abnormal appearance was noticed. Similar observations were made at several other places. All observers seem to be pretty well agreed that the disc of the planet appeared blacker than the nuclei of the spots, visible at the same time, on the Sun. In one case the observer described the planet as of a violet hue, and surrounded by a greyish nebulous ring, appearances which may probably be put down to the effect of contrast in the observer's eye, or to some defect in the telescope used.

Saturn.—On October 3, 1907, the Earth passed through the plane of Saturn's rings, and these appendages were then presented edgewise to view, under which conditions they are generally invisible. The Rev. T. E. R. Phillips says that the rings never *certainly* disappeared in his 12½-inch Calver reflector, although theoretically invisible. On October 3 he noticed an extremely thin and delicate line of light extending the usual distance on each side of the ball; the following night the air was thick and murky and he did not see the rings at all, but, he adds, "the conditions at the time were by no means such as to justify the statement that they had really disappeared." On several subsequent nights, when Saturn was observed, he still had a strong impression that there was a faint luminosity in the plane of the rings, extending for a short distance on each side of the ball. On October 19, 23, and 25, the narrow line of light was easily visible. Dr. Hassenstein, of Konigsberg, says that the ring was clearly perceptible on October 1, but had disappeared on the 3rd, leaving its shadow on the planet's disc.

On October 19, Professor Aitken, of the Lick Observatory, saw two curious bright "knots" of light on both sides of the planet, almost like satellites, in the ring plane. On November 1, a third knot appeared on either side, each having apparently a slight oscillatory movement, but there was no certain evidence of motion. They were not appearances of any known satellites. The same phenomenon had been observed on several previous occasions by W. C. Bond as early as 1848.

On January 7, 1908, the plane of the rings again passed through the Earth, and on this occasion they appear to have completely vanished. Phillips examined the planet on January 3, 4, and 7, when the ring could not be recognised, although the dark shadow on the ball was quite conspicuous. On January 9 the ring had reappeared, and after this date was perfectly obvious with small apertures.

Mr. Innes, observing at Johannesburg, agrees generally with observers in Europe. He says that the ring was visible, though with some difficulty, up to $9h.\ 45m.$ p.m., Greenwich mean time, but at $10h.\ 30m.$ p.m. no trace of the ring could be seen. It would therefore appear that the earth must have passed through the plane of the ring soon after $9h.\ 45m.$ p.m.

Saturn's 9th satellite, Phœbe, was many times photographed at Greenwich with the 30-inch reflector in the months August to December, 1907. One to two hours' exposure was found necessary owing to the rather low position of the planet in the south. It happens that a plate taken on October 30 shows the satellite very near to the time of its elongation, and is important as affording data for a determination of the mass of the planet. From Geneva comes an announcement that an observer there has discovered a new ring outside the bright ones—some well-known observers do not confirm the observation, and we must await further investigation before the reality, or otherwise, of the new ring is established.

Comets.—(*e*) 1907. A new comet discovered by Mr. Mellish at Madison, U.S.A., on October 13. It was visible in an opera glass, and attained its maximum brightness on November 9, after which it rapidly declined, and on November 25 was about the same magnitude as on the day of discovery. The nearest approach to the earth occurred on November 10, being then distant 0·42. Many observations were made in this month. The comet was described as being faint and ill-defined, having a diameter of 6′, condensed in the centre, but showing no nucleus. At the end of the month it had become extremely faint.

(*a*) 1907. This comet, discovered at Nice on March 9, was re-observed by Dr. Wolf on December 4, distant 2·74 from the earth, of the 13½ magnitude, and was easily visible on December 24.

De Vico's Comet was carefully searched for by Dr. Metcalf at Taunton, Mass., in September, 1907; but though the photographic plate was exposed for 3½ hours to a good sky, no trace of an image was found on it.

Encke's Comet was re-discovered by Mr. Woodgate at the Cape Royal Observatory on May 27. At Melbourne some observations were made by Mr. David Ross, who found it a most difficult object. The deviation from the predicted place appears to be considerably larger than might have been expected, but the difference of motion in R.A., from day to day, agrees almost exactly with that given in the Ephemeris.

Tempel Swift. This comet was re-observed at Nice by M. Javelle on September 29 in R.A. 5*h*. 44*m*., and declination 32° 38′ N., magnitude 14. It is inferred from this observation, coupled with previous calculations, that the perihelion passage will occur on October 4. The comet, being so faint, could only be seen by the possessors of large telescopes.

Halley's Comet. In view of the shortly expected return of this famous comet, Messrs. Cowell and Crommelin, of the Royal Observatory, undertook an exhaustive examination of the perturbations by the major planets, and, on this basis, Dr. Cowell has computed a search Ephemeris for the first half of the year 1910. The perihelion passage is given as April 8, 1910. The comet will be an evening star till the middle of March. On May 12 it makes a near approach to the earth, and, at the time of the total solar eclipse, on May 9, it will probably be seen near to the sun. Dr. Wolfschek thinks that it might be re-discovered before the end of 1908 by the possessors of powerful photographic telescopes. It was searched for at Greenwich in the winter 1907–8 without success. In the autumn of 1909 it should certainly become visible.

(*c*) 1908. A new comet discovered by Morehouse, at the Yerkes Observatory, on September 3. Many most interesting photographs have been taken at Greenwich, which show a tail of considerable extent, subject to great and sudden changes both in form and brightness. Similar changes had been noted in the majority of the larger comets, notably in that of Donati (1858) and in the great comet (1882), but it was reserved for photography to show the almost inconceivable rapidity with which these changes were effected. The perihelion passage occurs on December 25, and, as the comet will increase in brightness up to the middle of November, it will probably be fairly conspicuous then. It could be just seen by the naked eye on September 28, and was plainly visible at the end of October.

Stars.—The relation between the colour and period of variable stars has been investigated by Von S. Beljawsky, derived from an examination of the Harvard Catalogue of 300 variables. He finds that the period of a yellowish-white variable is probably 10 days, of an orange-yellow variable 100 to 200 days, and that of a reddish-orange 400 to 500 days. There appears to be no marked tendency for colour to vary with declination, but there seems to be a relation between colour and brightness. A variable star of remarkably short period has been found on one of the plates taken at Paris for the astrographic charts, ranging from the 12·8 to 14·3 magnitude in 1*h*. 41*m*.; the complete period being either 7*h*. 54*m*. 26*s*. or 11*h* 51*m*. 43*s*.

A new southern observatory, authorised by the Carnegie Institution, is shortly to be located, in the southern hemisphere, at San Luis, some 500 miles west of Buenos Ayres, for the purpose of making meridian observations of all stars from the Equator to the South Pole, brighter than the 7th magnitude, and any others included in Lacaille's survey at the Cape (1750). Professor Lewis Boss will be charged with this work, which, it is estimated, will occupy him for some three or four years.

It appears that the meridian of Amsterdam has been adopted as the legal time for the whole of Holland instead of Greenwich time, as stated on page 93 of the Almanack.

In Peru the eastern standard time, 75° West, or 5*h*. slow on Greenwich, has been adopted as the legal standard.

After the lapse of many years, the Lalande Prize of the Paris Academy of Sciences has been awarded to an Englishman—on this occasion to Mr. Thomas Lewis, of the Royal Observatory, Greenwich, for his great work on "Measures of the Double Stars in the Mensuræ Micrometricæ of F. G. W. Struve," being Vol. LVI. of the Memoirs of the Royal Astronomical Society.

Obituary.—Professor Jules Janssen, born in 1824, died on December 23, 1907. M. Janssen early devoted himself to the study of the dark lines shown by the spectroscope when applied to the sun. From his observation of the total Solar Eclipse of 1868, he was led to the conclusion that it would be possible, by certain methods, to view the "prominences" without waiting for the occurrence of an eclipse. These methods proved successful, and have since been practised by other observers. In order to observe the eclipse of 1870, M. Janssen left Paris (then besieged by the Germans) in a balloon. The weather, however, proved unfavourable, and no observations were obtained. In the following year M. Janssen was more successful, detecting the sodium line in the con-

tinuous spectrum of the corona, a result confirmed at the eclipse in May, 1883. In order to help the solution of the question as to whether or not oxygen was present in the sun, M. Janssen had an observatory erected on the summit of Mont Blanc, and there carried on his observations on the spectrum, finally satisfying himself that the oxygen bands in the red end of the spectrum were of telluric origin. As director of the Physical Observatory at Meudon, near Paris, M. Janssen produced most beautiful photographs of sun-spots, faculæ, and granulations of the solar surface. He was appointed Hon. Vice-President of the International Union for Solar Research in 1905.

Lord Kelvin.—William Thomson, born at Belfast in June, 1824, died December 17, 1907. He graduated at Peterhouse, Cambridge, as Second Wrangler in 1845 and first Smith's Prizeman. Soon after he was appointed to the chair of Natural Philosophy at Glasgow University, which he held for 53 years, and in 1904 he was installed as Chancellor of the University. His contribution to astronomy formed but a very small part of the enormous field covered by his scientific work, and was more of an indirect than direct character. He was knighted in 1866, was one of the first recipients of the Order of Merit, and was made a member of the Privy Council. Lord Kelvin was buried on December 23, in a grave in the nave of Westminster Abbey, beside that of Newton.

Asaph Hall.—Professor Asaph Hall was born in 1829 and intended for the profession of an architect, only studying mathematics in his spare time. In 1856 he entered the University of Michigan and studied astronomy under Dr. Brünnow, serving as an assistant in the observatories at Harvard and Washington. In 1863 he was appointed Professor of Mathematics, and in 1875 took charge of the 26-inch Washington refractor. He made numerous measures of double stars, diameters of planets, &c., with drawings of Mars and Saturn. It was in August 1877 that he made the discovery of the two satellites of Mars, Deimos and Phobos, and was awarded the Lalande Prize of the Paris Academy of Sciences. Professor Hall took an active part in several expeditions to observe Eclipses of the Sun, as well as the Transits of Venus in 1874 and 1882. His death took place on November 22, 1907.

R. L. J. Ellery, born in July 1827, was originally brought up to the medical profession, and devoted much attention to astronomy and meteorology. He went to Australia in 1851. When, in 1862, the Melbourne Observatory was established, Mr. Ellery was appointed its Director, which appointment he held till his retirement in 1895. Besides the production of many volumes of astronomical and meteorological observations, Mr. Ellery was engaged on the geodetic survey of Victoria between the years 1856 to 1870. In 1873 he organised the Victorian Torpedo Corps, retiring from which, in 1889, he was given the rank of Lieutenant-Colonel, with the honour of C.M.G. He was elected a Fellow of the Royal Astronomical Society in 1859, and of the Royal Society in 1873. His death occurred on January 14, 1908.

Professor C. A. Young was born in December, 1834. In 1865 he was appointed to the Chair of Mathematics and Astronomy in Dartmouth College, and in 1877 to that of Astronomy at Princeton University, New Jersey, U.S.A. Besides his numerous works on astronomical subjects, he will be chiefly remembered for his discovery of the reversing layer, while observing the total Solar Eclipse of 1870 in Spain, and also for his excellent text-books on the Sun and general astronomy. His death occurred on January 3, 1908.

M. Lancaster was born on February 4, 1849, and joined the staff of the Royal Observatory at Brussels in 1866, under Professor Quetelet. He was appointed Chief of the Meteorological Department, and organised the network of stations throughout Belgium. In conjunction with M. Hoazeau he compiled a Bibliography of Astronomy, in three volumes, representing an enormous amount of work.

The Rev. Frederick Howlett died at Clifton, Bristol, at the advanced age of 87. After holding a cure at Hawkhurst, he was presented to the Rectory of East Tisted, Hants. For a period of 30 years he devoted himself to a long and valuable series of observations on Solar spots, with a view to disprove the Wilsonian theory that they were depressions in the photosphere. In very few instances did his drawings seem to favour Wilson's theory, and he concluded that in those cases the depression was exceedingly small.

The Earl of Rosse, who died after a long illness on August 30, early devoted himself to astronomy and physical science, devising, and, to a considerable extent, making his own instrumental appliances. He was among the first to measure, and (with reasonable probability) to prove, that the heat radiated from the Moon varied with her phases, and consisted of heat reflected from the Sun. By his death the Science of Astrophysics lost one of its chief exponents.

CONSUMPTION OF WHEAT AND FLOUR (UNITED KINGDOM), 1901–1906.

WHEAT FLOUR is expressed as wheat on the basis of 72 wheat flour = 100 wheat.

Year.	Home-grown Wheat. (1,000 bushels.)	Imported Wheat and Flour. (1,000 bushels.)	Total. (1,000 bushels.)
1901	47,873	187,243	235,116
1902	49,519	200,986	250,505
1903	49,863	217,536	267,399
1904	39,790	220,024	259,814
1905	38,290	212,341	250,631
1906	53,493	209,218	262,711

THE WORLD'S COTTON PRODUCTION.

The cotton production of the world in 1907 for mill consumption was, according to the United States Census Bureau, 16,512,185 bales of 500 lb. each, compared with 19,942,000 in 1906, 15,747,000 in 1905, and 18,803,000 in 1904. The details for last year's production are as follows:—United States, 10,882,385 bales; British India, 2,444,800; Egypt, 1,296,000; Russia, 620,000; China, 428,000; Brazil, 370,000; Mexico, 85,000; Turkey, 80,000; Peru, 55,000; Persia, 51,000; other countries, 200,000.

1 NOVEMBER, 1907, to 31 OCTOBER, 1908.

THIS summary has been compiled mainly from the data contained in the daily and weekly reports issued by the Meteorological Office.

MONTHS.	TEMPERATURE.		RAINFALL.			PRESSURE.		WIND.	SUNSHINE.

November, 1907.—The weather was mild, most so in the south, least in the east; the west had scanty rain, the north more than usual. The highest temperature was reported at Geldeston on the 9th, 64°; the lowest at Balmoral on the 29th, 15°. Large differences of temperature at 8 A.M., Greenwich time, occurred on 6th Jersey between 64° Birr Castle 34°; 7th Yarmouth 50°, Nairn 27°; 8th Jersey 53°, Birr 33°; 15th Jersey 52°, Birr 31°; 16th Blacksod Point 51°, Bath 28°; 25th Jersey 52°, Birr 28°, Nairn 25°; 26th Jersey 55°, Nairn 31°; 28th Portland Bill 53°, Sumburgh Head 32°; 30th Castlebay 47°, Nottingham 27°. Rain measured, at 8 A.M., 22nd at Stornoway 1·26 inch, Blacksod 1·03; 27th Castlebay 1·14. An electrical storm occurred in Ayrshire on 23rd, and in south England 27th. Atmospherical pressure was greatest on 18th and 30th, 30·4 inches; least on 26th, 29·35. Wind came from the east side on 10 days. Fog was noted in places on three days, in the south-east 7; mist also in the south-east 3, places 8. In London fog produced total darkness on 20th. On 25th snow fell over Wales, the west and north of England, four inches deep in places. Bright sunshine, estimated in percentage of possible duration, varied between 31 in north Ireland and 20 in east England.

Autumn was mild with much sunshine, and though much rain fell in October, the reckoning for the season was 10·3 inches, less by 1·4 than the average of 21 years as given in WHITAKER'S ALMANACK, a favourable indication for the harvest in 1908.

December, 1907. The weather was mild, damp, and windy. Much less than the usual rain fell in the north, a large excess in the west, about normal in England. There was frost and thaws and rain, and generally too much moisture and too little sunshine. The highest temperature was reported at Wick on 17th, 58°; lowest at Balmoral 25th, 18°. At 8 A.M., 1st while Portland had 47°, Leith had only 27°; 8th Bath 56°, Nairn 35°. A sudden cold snap came over the kingdom on 27th and continued into January. Large rainfalls occurred at Valentia on 20th 1·17, 27th 1·59; 28th Roche's Point 1·64 inches. Electrical storms were reported on 3rd in north-west England; 4th north-east Ireland; 8th at Llangammarch, 11th Portland, 13th Markree. Mist was noted in the south-east on 6 days. Wind came from the east side on 10 days. Stormy winds prevailed on 6 days. Atmospherical pressure was greatest on 1st and 24th, 30·3 inches: least 5th and 14th, 28·4. Bright sunshine ranged between 24 per cent. in the south and 11 in the north district.

January, 1908.—All kinds of weather were experienced in quick changes, cold and mild, dry with frost, damp with fog, rain and snow, thaw and storm. Nevertheless, the mean temperature was below normal in the east, much above in the west. Rain was only one-third the usual quantity in England, usual in other parts. A fortnight of more or less frost, or snow, or cold changed to sudden mildness on the 6th, the air so damp that cold walls streamed with wet, the temperature rising 20 or 30 degrees within 24 hours. The lowest temperature was reported at West Linton on 3rd, 10°; highest at Gordon Castle, 17th, 59°. On 4th, while Birr Castle had 18°, Castlebay 38°; 5th, Liverpool 16°, Stornoway 39°; 11th, Bath 18°, Dover 21°, Stornoway 46°; 12th, Oxford 21°, Castlebay 45°; 13th, Nottingham 19°, Valentia 50°; 24th, Oxford 29°, Valentia 51°. On 8th, 1·38 inch of rain was measured at Oxford, 1·15 London, 2·06 Heathfield, snow there 8 inches thick. A storm approaching Ireland on 7th was centred on north-west England at 6 p.m., and travelled to the mouth of the Thames by next morning. Atmospherical pressure was least on 8th, 28·8 inches, 28th, 28·9; greatest on 2nd and 24th, 30·5. At least 7 days were stormy, and 8 had wind from eastward. Mist was prevalent in the south-east on 3 days, and fog on 6, chiefly between 16th and 26th; mist was local on 7 days. Bright sunshine varied between 27 per cent. in the south and 14 in the north district.

February, 1908.—The air was very mild, four degrees above normal in the east and central parts; rainfall 1 inch in excess in the north, 2 inches in defect of average in the west, and generally frequent. The highest temperature was reported at Scarborough on 6th, 56°; lowest at Nottingham, 13th, 21°. At 8 A.M., 2nd, Valentia had 48°, Oxford 28°; 13th, Roche's Point 48°, Oxford 25°. Electrical storms occurred in north England on 22nd, north Ireland 27th. Aurora was seen in the north on several nights. The 22nd was extremely stormy. Atmospherical pressure was greatest on the 8th, 30·8 inches: least 22nd, 28·8. Nine days were stormy. Fog was charted in the south-east on 3 days, mist 7; mist in west Ireland 2, places 1. Snow or hail fell on various days in various parts of Great

Britain. Bright sunshine varied between 33 per cent. in east Scotland and 16 in north Scotland; the third week had very little generally.

Winter appears to have been mild, with moderate rainfall and 20 per cent. of sunshine, but was inclement from constant variations, especially short spells of frost and snow, and also of fog attended by damp.

March, 1908, had normal temperature, more than usual and frequent rain, and little sunshine. The highest temperature was reported at Raunds on the 18th, 61°; the lowest at Balmoral on 5th, 10°. At Valentia on 22nd, 1·25 inch of rain was measured; 25th, Leith 1·04. Snow was 9 inches deep at Marlborough on 3rd; on 24th and 25th some fell in Scotland. An electrical storm occurred in Kent on 1st. Aurora was seen from several stations on 26th and 27th. Winds were variable, 8 days strong, 4 from eastward. Atmospherical pressure was least on 9th, 28·5 inches, 31st, 28·9; greatest on 15th and 25th, 30·2. Mist was noted in places on 9 days, west Ireland 1, south-east England 5; also fog 1. Bitterly cold winds, frequent rain, snow, or hail rendered the weather severe, while many nights were frosty. Bright sunshine varied between 36 per cent. in south-west England and 23 in west Scotland; the Channel Isles had 46.

April, 1908.—The weather was excessively variable; 11 days had winds between N. and E., 4 S.S.E., 8 all round the compass. Blizzard-like conditions, with frequent showers of rain, snow, or hail, even 4 consecutive snowy days, culminating in a great snowstorm over southern England on 25th of unprecedented severity for April. The kingdom was colder than usual. England more so than Ireland and Scotland. The highest temperature was reported at Crieff on the 17th, 68°; lowest at Balmoral 24th, 10°. At 8 A.M. 24th, Sumburgh had 26°, Scilly 47°; at all stations temperature was below 40°, 22nd to 26th. The east had more than usual rainfall, the other coasts less. On 3rd, 1·87 inch of rain was measured at Glencarron; 26th, 1·66 at Oxford, or 16 inches of snow, Southampton 14, Marlborough 11; 30th, 1·14 rain at Roche's Point, 1·03 Valentia. Electrical storms occurred on 3rd in Kent, 5th in the south-east, 23rd at Holyhead. Aurora was seen in the north on 2nd, at Shaftesbury 26th. Atmospherical pressure was greatest on 16th, 33·65 inches; least 25th, 29·1. A wind system north of Scotland on 23rd travelled to Jersey by the 25th, whence across south England to the North Sea. It gave strong winds and the great fall of snow. Fog was noted on 2 days south of Ireland. There was little mist, but frequent gloomy skies, weeping rain, snow or hail, intermixed or in succession. Bright sunshine varied between 40 per cent. in south England and 28 in east Scotland.

May, 1908, came possessed with serious floods in various parts, and at a bound attained a high temperature and very fine weather, but this was not sustained until the 30th, when the highest temperature, 80°, was reported at Fort William; the lowest was 30° at Balmoral, 22nd. At 8 A.M. 2nd, Liverpool had 63°, Wick only 41°; 3rd, Bath 59°, Sumburgh 37°. On 2nd, 1·2 inch of rain was measured at Birmingham during a thunderstorm which extended into Wales. Such storms were numerous, on 3rd in Kent, 4th, north England, 5th north-west England, 6th north England and south Scotland, 11th south Ireland and north England, 13th east England, 22nd north England, 30th in various places. Winds were as frequent from the east as from the west side. Atmospherical pressure was least on 5th, 29·15 inches; greatest on 18th and 28th, 30·55. Mist was charted in places on 9 days, in east districts 2, south 1, south-east 3, west 1, north-west 1; fog in north 1, south 2. The weather of the 14th, for the opening of the Franco-British Exhibition, was as bad as it could be, gloomy, rainy, and boisterous. Gloomy, changeable weather, without rain, prevailed until the 22nd, when many places had heavy showers, much hail, strong, cold, westerly wind, and intermitting sunshine. Sunshine during the last week was more than twice the percentage in the first week; for the entire month it varied between 41 in east England and 32 in north Scotland.

The Spring.—March and May had normal temperature, excess of rain, south-westerly winds. April was cold with moderate rain and northerly winds.

June, 1908, began with heat and vivid display of flash lightning. The first five days were brilliant with sunshine, and splendid for the Derby on 3rd. The mean temperature of the month and the rainfall were below normal, but the weather was fair with good duration of sunshine, sufficient to give high solar radiation, but there were frosty mornings, 14th, 18th, 22nd, in the Midlands, and other parts of Great Britain. The highest temperature was reported at Southampton on 4th, 85°; lowest at Llangammarch 7th, 33°. On 3rd while Dover had 70°, Sumburgh had only 48°; 4th, Nottingham 70°, Sumburgh 50°. Birmingham, on 3rd, had 1·01 inch of rain, Cheadle 2·78, Dover 1·14 between 5.30 and 6 A.M. 4th; 13th, Bettws-y-Coed 1·12, Stonyhurst 1·20, Glencarron 2·60; 17th, Shrewsbury 1·1, Birmingham 1·2. There were electrical storms on 1st in northwest England; 2nd, Scilly Isles; 3rd, Wales; 4th, Dover; 30th, Ireland and South Wales. Atmospherical pressure was greatest on 10th and 24th, 30·45 inches; least on 16th, 29·3. Winds were gentle, from the eastward on 8 days. Fog appeared over east Scotland on 2 days, north Scotland 1, north Ireland 2, Irish Sea 1, south England 1, Dover 1, east coast 1; mist in places 2, south-east 1, Ireland 2, west Ireland other 3. London experienced dense darkness 10 A.M. to 2 P.M., 17th. Bright sunshine varied between 53 per cent. in the south-east and 27 in the north, a fair duration, though the week ending 13th was very deficient; the last had 57 for the kingdom.

July, 1908, came in very brilliant, but on 4th, 1.30 to 2.30 A.M., an electrical storm of great intensity burst over London, and in the evening another; afterwards the weather became cool till the latter part, which was very hot and fine. The highest temperature was reported at Dumfries on 2nd, 92°; lowest at Balmoral on 3rd, 32°. On the 11th, 1·26 inch of rain was measured at Pembroke; 14th, Clacton 1·25, same at Felixstowe and Tunbridge Wells, Broadstairs 1·38, Norwich 1·8; 16th, Clifton 1·37, Prestwich 1·39, Arlington 2·02, Armagh 1·52. Electrical storms occurred in the east district on 4th, 7th, 17th; in the south-east, 4th, 14th; in south Ireland and south-west England, 5th, 8th; at Dover, 18th; in north England, 13th. Atmospherical pressure was greatest 1st and 29th, 30·5 inches; least 10th, 29·2. A cyclonic disturbance passed over Scotland during the 16th and travelled S.S.E. down the North Sea to Holland. Fog was noted off Hull on 2 days, in places 2, south Ireland, the Channel,

south-east and south-west districts, off Dover, each 1 day; mist in south-east on 2 days. The week ending 4th gave the British Islands 59 per cent. of sunshine, 74 to north Ireland; afterwards there was a marked diminution to 17 for the kingdom during the week ending 18th, but a recovery to 52 for the last week. For the entire month bright sunshine varied between 48 in the south-east and 22 in north Scotland. During 1st to 5th the beautiful colouration and peculiar arrangement of cloud attracted much attention.

August, 1908, like June and July, commenced with beautiful weather, passing into ordinary, and rainy for the latter half, but rain was very deficient in amount in the north and west. The highest temperature was reported at Ramsis on 3rd, 84°; lowest at Balmoral, 12th, 30°. Rainfall measured on 21st at Liverpool 1·06 inch, Holyhead 1·40, Stonyhurst 1·42, Dublin 1·65, Kingstown 2·09; 23rd, Foynes 1·34, Yarmouth 1·04; 24th, Dover 1·03, Dungeness 1·08; 26th, Portalloch 1·77, Towyn 1·66, Southampton 1·69; 29th, Malin Head 1·52. Blacksod Point 1·17; 31st, Bristol 1·6, Cardiff 1·7; on 28th Raunds had ·45 in five minutes! Electrical storms occurred on 4th and 25th in Norfolk, 11th at Hull, 20th in the Midlands, 22nd in the south-east, 27th east Ireland, 28th, 29th and 30th in south England. Atmospherical pressure was greatest 3rd, 30·4 inches; least 28th, 29. Winds came from eastward on 8 days. About mid-month mist formed in places on 4 days, in Ireland 1; fog in the north-east of England 1. Bright sunshine ranged between 50 per cent. in south-east England and 29 in north Scotland.

The *summer* had a mean temperature less than normal, a deficiency of rain, a fair duration of sunshine.

September, 1908, came with rough weather, violent winds, electrical storms, enormous clouds interlaced with scant sunshine. A cyclonic system centred at the Isle of Man had a varied force of wind from a gentle breeze at Donaghadee to a hurricane at Portland, London was violently battered, and Dover 70 miles an hour. On 9th a cyclone, detected north of Ireland, was centred near Edinburgh at 7 A.M., maintaining a velocity of 60 miles an hour for some hours. The 11th was wintry in many parts of England. There were electrical storms in north Wales and in Kent. A ball of fire on Hayward's Heath spun round several times and burst with a loud report with coloured lights and discharges like pistol-shots. At Canterbury hail for two hours, rain before and after, flooded the district. At London, 17th, 6 P.M., a band of crimson cloud extended from N.W. to S.W. across the sky, which had become much clouded since 1 P.M., when all was blue; the afternoon 22nd was black as night, next day similar darkness preceded rain. The highest temperature was reported at York, 30th, 80°; lowest at Balmoral, 5th, 27°. Excessive rain fell in Ireland, moderate in Great Britain. On 1st at Malin Head was measured ·01 inch of rain, Blacksod Point 1·26, Pembroke ·05; 5th, Glencarron 1·9, Fort William 1·3; 8th, Kache's Point 1·1, Castlebay 1·05, Fort William 1·1, Rothesay 1·9, Blacksod Point, 1·73, Nairn 1·42, Wick 1·9, Stornoway 1·85, Glencarron ·9, Foynes 1·8, Markree 2; 12th, Canterbury 3·15; 20th, Pembroke 1·11, Birr Castle 1·13, Killarney ·72. Electrical storms occurred in the south-east on 1st, 2nd, 24th; north Island 8th; north-west England 10th, 24th; Kent 11th; northern counties 15th; Valentia 30th; aurora was seen from many stations 29th. Atmospherical pressure was greatest on 5th, 30·35 inches; least 1st and 9th, 29·1. A violent storm came over Ireland on 1st; its centre travelled to the Isle of Man, thence to Copenhagen by 7 A.M. 2nd. Mist was noted in places on 11 days. The 27th to 30th gave fog or mist to all the Atlantic coast from Land's End to north of Scotland; the s.s. *Argonaut* was lost in fog. Bright sunshine varied between 46 per cent. in the south-east and 20 in the north; the week ending Oct. 3rd had 46.

October, 1908.—A warm spell from 27th of last month lasted to the 5th; the air was damp, muggy, hot by day, warm by night, wind quiescent. Much similar weather prevailed during the rest of the month, except during the chilly days 21st to 27th, when snow and frost were experienced in many places, especially on 24th. Several districts had excessively large rainfalls. Aberdeen 1·74 on 20th; Roche's Point 1·15, 21st; Portland Bill 1·69, 22nd; Weymouth 4 inches 21st within 5 hours, with lightning and thunder, a temporary deluge. Otherwise the month was remarkable for small rainfall and high mean temperature. The soil was somewhat compensated by mist, fog, dew, and high humidity. The highest temperature was reported at Greenwich on 2nd, 78·5°; lowest at Balmoral 25th, 18°. Contrasts of temperature were exhibited on 22nd between Blacksod Point 57° and Leith 36°; 23rd, Castlebay 51°, Nairn 31°; 25th, Blacksod Point 52°, Bath 32°; 26th, Yarmouth 53°, Nairn 28°; 28th, Portland Bill 58°, Birr Castle 31°. Electrical storms occurred at Valentia 5th, Ventnor 18th. Aurora was seen from various stations on 5th, 12th, and 31st. Atmospherical pressure was least on 10th, 29·5 inches, greatest 22nd, 30·5. Only one day was stormy. Easterly winds prevailed on 22 days. Mist was general on 2 days, at many places 9, in south-east 3, over England and Ireland 2, mist and fog over England 2; fog over England 1, on east coast 1, in south-east 1. Bright sunshine varied from 35 per cent. in east district to 17 in west Scotland.

THE YEAR'S WEATHER AND THE CROPS.

In *October* the frequent rain was detrimental, though the mild temperature was beneficial for tillage. *November* was unfavourable, rain or frost or fog being too prevalent. Pastures flourished by warmth and moisture, whilst the sowing of wheat could only be done at intervals. Frost seemed to promise its usual good effect upon the moist soil between Christmas and *January* 5, but rain supervened and waterlogged the land and consequently prevented outdoor work. Keen easterly winds had a drying effect, but the air was too cold and sunless to hasten evaporation. Some snow, a short frost, followed by a sudden thaw made a variety of weather which was hurtful to health and vexatious to husbandmen. Frost in *February* benefited the land, and mild air with some moderate rains following, good progress was made in tillage and sowing. Similar conditions subsisted to mid-*March*, followed by cold and frosts not so severe as to prevent work. For the most part the weather of *April* was unsuitable for the progress needed in field work. The frequency of snow, though in large amount only on 25th over a limited area of England, had a protective influence against frost on young plants, but was too capricious to be otherwise than harmful for

agriculture. *May* came in with a burst of heat which as suddenly dropped on the 3rd to very variable conditions of cold, windy rains and thunderstorms right up to the 16th. The rest of *May* was not much better, drier and warmer winds were wanting; however, it was deemed a good month for fruit trees, the blossoms having been unaffected by wind or frost or hail. By *June* 5 much injury was done by hail. The month proved very good for hay-making and maturing of the cereals. The summer had two spells of drought, June 18 to July 3, and July 17 to August 14, especially noticeable in south-east England; which if not favourable for most crops were certainly so for cereals. A few hot days, warm nights and quiet winds rapidly ripened the cereals and improved potatoes. The latter drought led to an early harvest. The second half of August, having a good deal of rain, was suitable for root crops. During the summer the death rates were remarkably low. The first part of *September* had much chilly weather: and, though the intervals of sunshine were short, radiation was high. Over much rain as well as some violent storms wrought mischief with the crops, nevertheless they came through the turmoil better than was expected. Harvesting extended through September owing to varying conditions of weather in different districts, being preventive at some and suitable at others. According to the estimates of the crops made by *The Times*, potatoes form the best crop, next in succession being wheat, beans, barley and oats: fair crops of good quality, though under average as to quantity. Hops, though beaten down by storms, proved very good in yield. Grasses and root crops flourished by the alternate moisture and sunshine. The mild humid *October* was exceedingly good for pastures and green crops, and early sown wheat sprouted well. According to WHITAKER'S summary, autumn 1907 had a little over 10 inches of rain and a seasonable temperature. These were favourable indications for the harvest from the early sown wheat; and having been sustained by moderate rain during the cereal year, followed by a mild winter, cold spring, and seasonable summer, the crops, if not fully up to the averages, were fairly good.

Storms and Floods in 1907–1908.

1907. *November.*—Early in the month storms and floods prevailed in Herault, Var, the plains of Thor and L'Isle, and in Corsica. On the 25th east Kent suffered from a whirlwind; a violent squall wrecked a vessel at Folkestone, and damaged others in the Straits of Dover; while floods were reported to be spreading in Warwickshire. *December.*—By December 6th central and western England had extensive floods, and during the week ending 14th most of the rivers in England were brought to overflow. The Thames and the Brent were deeply spread abroad, at Molesey the water attaining 8 feet above ordinary level, and at Teddington 11 feet above summer level. The Feulands became involved, and also the valley of the Severn, where mines had to be closed. 1908. *March* 1st the Seine was in flood. On 2nd an inroad of the sea on the Yorkshire coast carried away masses of cliff, leaving roads in places five feet under water. On the 8th a snow-storm caused large breakage of wires and many shipping casualties; floods were again forming by the Thames. By the 11th the Rye, the Derwent, and the Clyde flooded. On 13th Newfoundland reported a succession of storms by which several sealing-ships were lost and their crews left on the ice; the Government sent a steamer to rescue them. On *April* 13th a sudden freshet at night at Hankow drowned 2,000 persons and wrecked 700 junks. On the 24th the southern of the United States were visited by a series of tornadoes, destroying or damaging several towns, killing 300 persons and injuring about 3,000. On 28th the upper Thames was in flood due to the large fall of snow followed by rain. Parts of Buckinghamshire became 5 feet under water. *May* 1st central Russia had extensive floods. On 4th the midlands of England were flooded to the depth of 4 feet at Buxton and the Trent caused great losses. All around Stafford and Blackpool crops were damaged; and floods extended into Huntingdonshire. During 11th to 13th tornadoes occurred in Arizona, Illinois, Nebraska, and Louisiana; numerous were the casualties, lives lost and injured. During the night of 25th, the Trinity river, Texas, rose 13 feet in 5 hours, drowning hundreds and rendering thousands homeless, with an estimated loss of property £1,000,000. *June* 2nd a tornado uprooted about 200 trees in Bushy Park, Hampton, and wrecked a wireless station at Newhaven, while desolating electrical storms were scattered about. These were again numerous on 5th in Great Britain, and floods resulted from their rain. In south-east England the conflict of the winds made electricity extremely active. By the 10th hundreds of miles were flooded in Montana, besides great loss of life; 7,000 became destitute. The eastern outskirts of Paris suffered immense damage by a storm on the 16th. About the same date 50 fishing boats and 350 of the crews were lost off Kagoshima. The 21st reported storms and floods over France. Four days of heavy rain previous to 28th raised the Yang-tsze-Kiang 20 feet above normal, destroyed railway embankment and bridges, and caused a thousand deaths. The valley of the Canton river was inundated. Early in *July* a storm in L'Orient ravaged vineyards, causing widespread suffering. By 19th electrical storms caused many deaths and extensive havoc in Galicia and Hungary; floods in Asia Minor were reported to have drowned 2,000 persons. On 27th at Hong Kong a typhoon, lasting for two hours, caused the loss of a steamer with 250 passengers, and damaged Government property there as well as shipping at Canton. A destructive storm occurred off Newfoundland on 29th. About this time floods prevailed in Galicia and Buckovina. *August* 8th a violent rain-storm destroyed a factory at Szegeden, Hungary, burying 100 men in the ruins. At the end of the month floods in New Mexico, Georgia, and Carolina were attended by enormous losses and rendered thousands idle. Early in *September* a violent storm caused disastrous damage in Ticino, and gave rise to a landslip at Lodrino. By the 9th floods were disastrous in the north of Ireland and in Scotland; on 11th the Spey swept through the grounds of Gordon Castle in a torrent 15 feet deep and a quarter of a mile wide. Devastation was made by a hurricane over the

Bahamas, 11–13th, which attained 100 miles an hour; vessels were wrecked at nearly all the islands, and at Clarence Town nearly all the houses were destroyed. By the 29th, 15 inches of rain in 36 hours at Haidarabad, Deccan, made a torrent 60 feet deep in the river, which two days after was a trickling stream. On *October* 2nd the damage caused by the Haidarabad flood was estimated at £13,000,000, and the deaths at 50,000. On 5th, a hurricane over the Philippines extended to the China Sea. The U.S. fleet rode out the storm, which attained 100 miles an hour. On 16th several towns in southern China were submerged by floods and numerous people were rendered homeless. On 19th, local rainfalls of exceptional volume produced sudden floods in South Wales, Monmouth, and Dorset.

Earthquakes and Volcanic Eruptions, 1907–1908.

In September, 1907, Vesuvius showed signs of activity, a shower of ashes falling near Naples, but no harm was done. On September 1 and 2 there was a volcanic eruption in the Aleutian Islands, accompanied by a hurricane which scattered the ashes over twenty villages. Professor Belar, of Laibach Observatory, recorded two distant shocks on September 15. The first began at 6.53 P.M., and lasted one and a half hours; its probable distance was from 3,750 to 4,380 miles. The second occurred at 8.30, and lasted three-quarters of an hour. In Russian Turkestan, at Tokand, there were four shocks between 10 P.M. on the 15th and 4 A.M. on the 16th. A sharp earthquake shock was felt at Redlands, California, on the 26th, at 5.45 P.M.; the vibrations travelled from north to south, but fortunately no damage was reported. On October 21 strong undulating shocks occurred in different parts of Central Asia, the worst at Samarkand, lasting at intervals from 1.47 to 10.30 A.M. Many public and private buildings were cracked, and the cornices and vaults of the Shiador Mosque and the whole Bibi Chanim Minaret collapsed. Shocks occurred in Tokand, Tashkend, Ciratube, and Kattykurgan. Earthquakes having an origin at a distance of about 3,125 miles were registered at the seismographic stations at Stuttgart, Potsdam, and Heidelberg at 5.30 on the morning of the 21st. A very violent earthquake, 5,000 miles distant from Albany (New York), was recorded on the seismographs of America on October 16. The shocks were so strong that they exceeded the registering capacity of the instruments in Albany. The first vibration was registered at 9.4 A.M. (American time), and the worst at 9.14 A.M., which lasted five minutes; the oscillations continued for an hour. Shocks were also felt at Washington and several cities in Massachusetts, where buildings were severely shaken. It was thought that the terrible explosion of a powder factory in Indiana was caused by these shocks. Professor Neuschner, of California, thought the first of the disturbance was about 1,000 miles south of Berkeley, in mid-ocean and between the Hawaiian Islands and the S. coast of Mexico. A shock of earthquake was felt at Accra, on the Gold Coast, on October 17; there have been over forty shocks in one year in this place. It was reported that an earthquake occurred during October in the island of Unalaska, and that Mt. Culloch Peak had sunk to almost nothing, from a height of 3,400 feet above the sea. On October 23, at 9.30 P.M., a most destructive earthquake visited Calabria. The village of Ferruzzano was completely destroyed, more than 200 people being killed and 400 injured by the falling buildings. The shock was felt at Monteleone, Pizzo, Tropea, Sant' Onofrio, and Branca Leone, where half the village was destroyed. A number of houses fell at Sinopoli, Sante Ufemia, and Sant' Ilario; the shocks were also very violent at Catanzaro, Rocella, Ionica, Reggio, and many other places. Gerace Cathedral collapsed, and a monumental tower fell in. Professor Milne registered a slight shock on October 24, which lasted from 10.53 A.M. to 12 noon. Another, recorded at 8.30 A.M., was apparently distant about 1,200 miles. Professor Belar, at Laibach, recorded a shock on the same date beginning at 9.30 P.M. (Central European time). On the 27th both Professors reported several shocks, beginning at 5.24 A.M. and lasting two hours. The first was thought to be distant 2,500 miles, and the second about 4,600. Fresh shocks were experienced at Ferruzzano on the 28th, which resulted in the opening out of a chasm in the rock-bed of the country. On that day Professor Milne recorded four disturbances—at 7.50, 9.11, and 11.39 A.M., and 1.35 P.M.; tremors continued to be felt on the 29th.

At the beginning of November Karatag, a town 300 miles from Novaya Bokhara, was reported destroyed. Karatag, which is situated in a narrow mountain valley, contained over 600 houses; these were completely destroyed by the moving mountain, and about 200 people were buried in the ruins. Professor Milne recorded shocks on November 3, at 8.42 P.M., lasting one and a half hours; he supposed their origin to be about 5,600 miles away from England, probably in some part of the Pacific Ocean. In the second week of November earthquake shocks were felt in Thursday Island, off the coast of Queensland; and on the 19th shocks lasting about forty-five minutes were registered by Professor Milne, the origin of which was probably 3,000 miles distant in Asia. Another was recorded on the same night by Professor Belar, which he estimated to be distant 5,625 miles. Towards the end of November Professor Belar reported violent shocks, occurring probably at Savaii, in the Pacific Ocean. They began at 9.15 (8.15 English time), and continued two hours; this earth unrest lasted some days, and shocks were registered on many seismographs. On November 29 a rather intense shock was registered at the Isle of Wight from 3.22 to 4 A.M.; its origin was probably 2,500 miles away.

In December Vesuvius was again active, emitting smoke and ashes from three mouths near the old crater; and a severe earthquake shock was felt at Siena, Italy. On December 23 there was an explosion in the crater of Vesuvius, and a fall of stones and cinders; and on January 4, 1908, lava flowed down the south-west side of the crater. Signor Coartino has pointed out that considerable danger might be averted if a tunnel were bored in the base of the volcano by which means the lava could be carried to the sea through a narrow channel. It would also be possible to let it flow into moulds to form blocks

for building and paving, thus turning the "terror of Naples" into a valuable possession! On the same date Professor Milne recorded an earthquake lasting twenty minutes.

There was a violent shock at Kingston, Jamaica, on January 1, 1908, at 8.10 A.M., which lasted fifteen seconds. Several old buildings were destroyed, and much terror prevailed. Towards the end of February earthquake shocks were felt in the Caucasus, and two sharp shocks at Johannesburg finished up a week of earth-unrest in this district. Professor Belar, at Laibach, Austria, recorded a distant earthquake about the middle of March. It was probably very violent at its origin, 3,750 miles away. Another between 565 and 625 miles distant was also recorded soon after. Professor Milne, at the Isle of Wight, reported two earth disturbances the origin of which was about 4,900 miles off, in the direction of N.W. India or the West Indies. On April 2 Chilapa, a town in the Mexican State of Guerrero, was destroyed by earthquake. It began at about 11 o'clock (Greenwich time), and continued for more than three hours, being at maximum at 11.53. After a short lull there was another shock, at 4 o'clock, which lasted until 7 o'clock. It caused a panic in Mexico City, and much fear in the West Indies. Mount Etna, in Sicily, was in eruption on April 29, throwing out a thick column of smoke from the central crater. On the same date, from 5.30 to 6.22, there were slight earth tremors locally; and later on severe shocks were felt at Zafferara and Santa Venerina, a new crater being formed in the Valle del Bore which emitted ashes, loud explosions and sharp shocks occurring at the same time. At 10.22 there was a violent explosion in the central crater of Etna, followed by an eruption of incandescent matter.

A terrible volcanic eruption took place on May 10 in the island of Savaii, in the Samoan Group. The lava from the crater flowed at the rate of between 2,000 and 3,000 tons a minute, forming a stream from 6 inches to 6 feet deep, and almost covering the country for a width of over eight miles. In its course it destroyed many native houses and threatened the town of Matatua, finally reaching the coast, where it fell over the cliffs into the sea, causing volumes of steam. The island had never before witnessed such a severe eruption.

In July Mount Etna, in Sicily, burst out into violent eruption, throwing up clouds of cinders and causing rumblings and earthquakes in its vicinity.

A shock of earthquake occurred at Constantine, Algeria, on Tuesday, August 4, about two hours after midnight, and lasted six seconds. Successive shocks followed up to about 8 o'clock. Great excitement was caused, people pouring out of the houses half-dressed and screaming with fright. For hours panic-stricken crowds filled the streets and squares, but later the people ventured back into the houses. Great material damage was done. The ceilings of the Zouave Barracks threatened to fall, and the Military Hospital had to be abandoned. The walls of the Crédit Minier building, the theatre, and market were cracked, and a fissure 200 meters long and 500 centimeters wide appeared in the Mansurah Plain. Many houses in the Arab quarter threatened to collapse. Nobody was injured in Constantine. Great damage was done in the surrounding districts.

The League of the Empire.

President: RT. HON. LORD TENNYSON, G.C.M.G. *Hon. Sec.*, Mrs. ORD MARSHALL, Caxton Hall, Victoria Street, Westminster, S.W.

THE League of the Empire was founded in 1901. Its work is entirely non-political and non-sectarian. Its objects are to further the friendly and educational union of schools and other institutions of the Empire, to bring knowledge of the conditions of the different parts of the Empire within reach of all at the smallest expense and trouble, and to promote co-operation between the different countries for their mutual service.

Schemes for reciprocal education between the schools of the Empire were submitted by the League in February, 1903, to the Colonial Governments, through the Agents-General, and later by means of a despatch issued by the Colonial Office, and they have received the approval of the Administrative Authorities in all countries of the Empire.

The League has a Federal Council of Representative members in all parts of the Empire, which includes His Excellency the Governor-General of Canada, with other Colonial Governors, Colonial Secretaries, and Directors of Education. Among the Vice-Presidents and Members of Committees are the Agents-General, the Earl of Meath, the Head Master of Eton College, Dr. S. H. Butcher, M.P. (*Chairman of Council*), Sir F. Pollock, Sir H. Craik, Professor Bury, the Principal of Trinity College, Oxford, Dr. Mahaffy, Principal Gregory Foster, Principal Reichel, Professor Ray Lankester, Sir John Bramston, Sir Philip Hutchins (*Chairman of Executive*), Sir Charles Lyall (*Hon. Treasurer*).

The League holds now a recognised position educationally, having obtained the co-operation of the Education Departments in all countries of the Empire, to a number of which it is the recognised Official Agent in all parts of the world. The work of the Society is sometimes conducted directly through the Education Offices, sometimes by Agents appointed by the Authorities for the purpose, and also by Branch Committees in the different Colonies, States, and Provinces. The work of the League permeates into the smallest Colonies, and the Individual Correspondence Branch of the Society numbers now over 13,000. Through its affiliated schools it already probably influences over 400,000 children. In South Africa the Society has forty local branches and two executive committees. In Adelaide it has over 4,000 members.

The League has a large staff of practised lecturers. Two courses of popularly written lectures on the "History of the British Empire," and also on the "Great Men of the Empire," fully illustrated by lantern slides, are published by Mr. John Murray, and are on sale or hire at the office of the League.

The education work of the League is directed by committees of experts. The History Section of the League (Chairman, Professor Bury) has undertaken the issue of a graded series of Imperial Text-Books in co-operation with committees and representatives appointed by the Education Departments throughout the Empire

In the first half of the seventeenth century (1633 has been cited as the best approach to a definite date) we meet with the earliest mention of the introduction of *rails* for the lessening of friction upon roads. Beams of wood, some six or seven inches in breadth, were about this time laid down to facilitate the draught of the waggons in the vicinity of some of the coal-mines at Newcastle; and as a matter of necessity the addition of "sleepers" had speedily to follow. In 1738, at Whitehaven, it is stated that iron was first substituted as the material of the rails; and in 1767 it appears established that this revolution was adopted at Coalbrookdale, being followed nine years later at the Sheffield Colliery. As yet, however, only thick plates of iron were fastened to the surface of the wooden rails, and it was not till 1789 that "edge rails" were introduced, the credit of their adoption being assigned to William Jessop, on the Loughborough and Nanpantan line. James Watt had conceived the idea of utilizing steam for locomotion, and there is a record of a model locomotive having been used in Cornwall in 1784. George Stephenson, however, in the year 1825, was the first to bring the project fairly into practical shape.

The first Act obtained for the construction of a railway was that of the Surrey Iron Railway Company in 1801, for a line 9½ miles long from Wandsworth to Croydon. In 1804 an Act was passed "for making and maintaining a railway or tramroad from the town of Swansea into the parish of Oystermouth, in the County of Glamorgan, and for the hauling or drawing of waggons or other carriages passing upon the said railway or tramroad with men, horses, or otherwise." On the 21st of February, 1804, Trevithick's patent locomotive steam engine was tried at Penydarran, near Merthyr, and conveyed along a tramroad 10 tons of bar iron, and about 70 persons, a distance of 9 miles. The application passed the third reading as a

railway or tramroad. The word "otherwise" was evidently intended to cover the use of Trevithick's engine, and this Act may therefore be considered the first in which steam was contemplated as the motive power. The line is now known as the Swansea and Mumbles Railway. Then followed the Kilmarnock and Troon, the Severn and Wye, the Gloucester and Cheltenham, Plymouth and Dartmoor, Stratford-on-Avon and Moreton, and other small undertakings, about twenty-five in number altogether, with an aggregate of 325 miles, and an authorized capital somewhat over a million. It is almost unnecessary to add that animal power only was contemplated in their working. The Stockton and Darlington Act was obtained in 1821, with a capital of £102,000; and it is remarkable that, while animal power was to be relied upon for working the line, the clause in the Act states "with men and horses *or otherwise*." George Stephenson came upon the scene immediately after this Act was obtained, and was appointed engineer of the line; and at his urgent request, Edward Pease, the promoter, applied for a new Act empowering the company to work the railway with locomotive engines. Great opposition was encountered, but the Bill finally passed in 1823, and the line, which was 25 miles in length, was opened on the 27th of September, 1825. The Monkland and Kirkintilloch Railway, a colliery line near Glasgow, opened in 1826, was really the first to follow the example of the Stockton and Darlington, and several other small lines—many of them worked partly by fixed and partly by locomotive engines—quickly adopted the new traction power. The inauguration of the Liverpool and Manchester line in 1830, attended as it was with a tragic result, was the first to impress upon the people that a revolution in travelling had really taken place. Leicester to Swannington came next, but that from London to Birmingham was the largest that had yet been projected. A great struggle took place with landowners and other influential personages, opposed not only to this Bill in particular, but to the introduction of railways generally. Undaunted courage and perseverance on the part of the promoters prevailed, and the Bill, which was rejected in 1832, passed in 1833, but not until landowners and others had been conciliated by having the price originally estimated for their land, &c., doubled and even trebled. The expenses of carrying this Bill, which was probably the most momentous Parliamentary campaign in the history of railways, were over £70,000. The line was opened throughout in 1838, and the first train accomplished the distance at an average speed of over twenty miles an hour. The tide of public opinion was now fairly turned, and ran as strongly in favour of railways as it had before been against them. The Grand Junction, the London and Greenwich, London and Southampton, the Great Western, Birmingham and Derby, Bristol and Exeter, Eastern Counties, Manchester and Leeds, Midland Counties, North Midland, South Eastern, London and Croydon, Birmingham and Gloucester, together with a large number of small Bills, were all passed in four years from the passing of the London and Birmingham Bill, and before that line was opened. Thus in four or five years was witnessed the laying of the foundations of nearly all the existing great trunk lines of railway in this country.

Up to 1840, inclusive, notwithstanding the delays and difficulties which surrounded railway projectors, even in the earliest stages of legislation, 299 Acts, authorizing the construction of 3,000 miles of line, had been passed. The inevitable reaction set in, and in 1841–2–3 only a few small Bills were passed by the Legislature; but as the Liverpool and Manchester, the London and Birmingham, and other leading concerns were paying 10 per cent. dividends, and some of the smaller lines were yielding even larger returns, attention was naturally drawn to the remunerative character of this class of property, and the supply of railway shares became far below the demand. A flood of new projects appeared before the public, and the Legislature even, labouring apparently under the general excitement, encouraged promoters by relaxing or withdrawing the general opposition which had previously been offered. In 1844, 797 miles were authorized; in 1845, 2,883 miles; and in 1846, the prodigious total of 4,790 miles, under no less than 272 Acts, obtained Parliamentary sanction. The succeeding years saw some abatement, but still there were 1,663 miles passed in 1847, and 300 in 1848. These figures illustrate the rise and fall of the great fever known as the "railway mania."

The Railways Regulation Act of 1840, the first of the General Acts, provided for a month's notice being given to the Board of Trade before opening; for returns of traffic to be made by the companies, as also of accidents involving personal injury;

for Government inspection of works, for the approval of bye-laws, &c. Afterwards were passed Acts for their better regulation, and for the conveyance of troops, 1842, the Railways Further Regulation Act of 1844, the Railways Clauses Consolidation Act, 1845, and the Canal and Railway Carriers Act of the same session. Then followed legislation on the leasing and sale of railways, on the gauge, on cheap trains, passenger duty, &c.

RAILWAYS IN 1907.

The number of persons employed in working the railways of the United Kingdom in 1908 was 621,341. The number dependent upon this large body must also be very great; and if we take into account the vast numbers besides who are employed in branches of trade which administer to the requirements of railways, the social dependence upon their existence must be something enormous.

At the close of the year 1907 there were in use upon the railways 23,520 locomotive engines, 51,772 carriages for the conveyance of passengers, 19,916 other vehicles attached to passenger trains, 743,995 waggons for the conveyance of live stock, minerals, and general merchandise, and 20,860 miscellaneous vehicles.

Capital embarked in Railways.—The total amount of capital authorized by Parliament to be raised for the construction of railways in the United Kingdom amounted on the 31st December, 1907, to £1,394,206,652. Of this sum, £1,294,065,662 (which includes £195,878,000 nominal capital caused by the consolidation or conversion of stocks) exists and forms the capital account of the various railway companies, and shows an increase over the year 1906 of £7,746,000, or 0·6 per cent. The £1,294,065,662 is composed of £121,944,913 guaranteed, £333,942,777 debenture, £336,935,816 preferential, and £489,188,782 ordinary stocks and shares, besides a sum of £12,053,374 raised by loans. The net receipts for the year amount to £44,939,729, equal to 3·47 per cent. on the total capital sunk, as compared with £44,446,077 in 1906, with a corresponding capital of £1,286,883,341, which gave a net receipt of 3·45 per cent. It may be seen, therefore, from the foregoing figures that the total amount of capital raised at the close of the year was over £1,294,000,000, of which more than £195,000,000, or approximately 15 per cent., was due to nominal additions. These nominal additions formed approximately 28½ per cent. of the ordinary stock, 13¼ per cent. of the guaranteed and preference, and 12¾ per cent. of the loans and debenture stocks. The total amounts of capital at the end of 1907 compared with 1906 show an increase of about £2,750,000

WHITAKER'S ALMANACK, 1909.

in the ordinary, £500,000 in the guaranteed and preference, and £4,500,000 in the loans and debenture stocks, making a total increase of £7,750,000—the smallest hitherto recorded in these returns. The proportions which the various classes of stock bore to the total paid-up capital differed but slightly from the year 1906, the ordinary stock forming 38 per cent., the guarantee and preference 35 per cent., and loans and debenture stock 27 per cent. of the total. The proportion of net earnings to capital, although slightly greater in 1907 than in 1906, shows a general tendency to decline. This, however, arises partly from nominal additions to capital on the conversion of stocks. Another cause of the decline is the increased wages and curtailment of the hours of labour of railway servants, and the rapid growth of local taxation, which is increasing in an alarmingly disproportionate ratio to the net profit and to the benefits which the companies derive from the expenditure of the rates. That this burden of taxation shows a constant tendency to grow heavier year by year is illustrated by the fact that during the last ten years there has been an increase of £1,438,316 in this item. It will be seen, however, that the increases under this head have been diminishing since 1903, and the year under review shows a decrease of £102,000—a decrease which will no doubt be noted by railway shareholders with satisfaction.

Gross Earnings of the Railways.—The earnings for the year 1907 amounted to £121,548,923, as compared with £117,227,931 for the year 1906, which gives an increase of £4,320,992, equal to 3·7 per cent. The increase in the passenger receipts is £897,025, made up as follows:—

	1907.	1906.	Inc. or Dec.
	£	£	£
1st Class	3,302,730	3,428,816	−66,086
2nd ,, ...	2,810,324	2,923,444	−113,120
3rd ,, ...	31,519,009	30,583,555	+935,654
Season & Peri-odical Ticket Holders	4,409,944	4,269,167	+140,777
	42,102,007	41,204,982	+897,025

The numbers carried were:

	1907. No.	1906. No.	Inc. or Dec. No.
1st Class.....	33,363,225	35,600,157	−2,236,932
2nd ,, ...	36,697,600	42,565,023	−5,867,423
3rd ,, ...	1,189,420,490	1,162,181,952	+27,238,538
	1,259,481,315	1,240,317,132	+19,134,183
Seas. & Peri-odical Tk. Holders	*715,598	*693,466	+22,132

* For 1906 and 1907 the equivalent number of holders of annual tickets is given. Previous to 1902 the returns were not wholly but only partially on this basis; they are, as regards the years 1902 to 1907, on a uniform basis.

These increases and decreases are very similar to those shown for the year 1906, there being in each case an increase of nearly a million pounds in the receipts from third class ordinary passengers, a substantial increase under the head of "season ticket holders," and small decreases in the receipts from first and second class ordinary passengers. With regard to numbers, some companies carried a greater and others a smaller number of third class ordinary passengers in 1907 than in 1906. The reduced numbers observable in the case of certain of the companies are no doubt largely due to tramway and motor omnibus competition. The increase on the total number of third class ordinary passengers appears to be mainly attributable to the passengers carried by two metropolitan "tube" railways, one of which was opened in 1907 and the other near the close of 1906.

The receipts from season ticket holders show a further considerable increase, following on those of previous years, the increase in the receipts from third class season tickets having been in 1903, £126,000; in 1904, £171,000; in 1905, £131,000; in 1906, £137,000; and in 1907, £26,009. The earnings for the conveyance of parcels, mails, and such other traffic as is generally carried by passenger trains, amounted in 1907 to £8,873,336, as compared with £8,677,794 in 1906, being an increase of £195,542, or 2·2. The total figures of traffic falling under the heading of "goods" are £61,202,831, as compared with £58,394,217 in 1906—an increase of £2,808,614, or 4·8. The aggregate is made up of £30,287,339 from merchandise; £29,414,870 from minerals; and £1,500,622 from live stock. The total quantity of goods carried in 1907 was 515,887,116 tons, as compared with 488,790,683 tons in 1906, showing an increase of 27,096,433 tons, or 5·5 per cent.; owing, however, to the revision of the list of articles included under the head of "minerals," the tonnages of minerals and general merchandise previous to the years 1903, 1904, 1905, 1906, and 1907 are not comparable with those for previous years.

Expenditure.—The total working expenses of the whole of the railways for the year 1907 amounted to £76,609,194, equal to 63 per cent. of the gross earnings, as compared with a total of £72,781,854 for the year 1906, equal to 62 per cent. The increase compared with 1906 amounts to £3,827,340, or 5·3 per cent. The total number of miles travelled by passenger and goods trains during the year 1907 was 428,379,922, or 14,144,678 more than in 1906. Analysing the expenditure, we find the item £21,555,678 for locomotive power; £6,230,639 for repairs and renewals of carriages, &c.; £11,264,278 for maintenance of permanent way, stations, &c.; and £21,828,870 for traffic expenses. The locomotive expenses in 1907 amounted to 12·09*d.* per train-mile.

Compensation. The amount paid for compensation for personal injuries sustained during the year 1907 amounted to £162,700, as compared with £262,507 for the year 1906, resulting in a decrease of £99,801. In the movement of goods the companies have paid for damages and losses £431,970, as compared with £386,231 in 1906—an increase of £45,739. We subjoin a statement showing the amounts paid by the principal companies under both heads:—

The Midland Railway Company took the initiative in passenger traffic reforms, having run third-class carriages by all trains from 1st April, 1872; afterwards, from 1st January, 1875, greatly reducing the first-class and abolishing second-class fares. From 1st November, 1891, the Great Northern Railway Company also abolished second class fares to all stations north of Hatfield; from 1st January, 1893, the Great Eastern abolished them in the provinces; the Cambrian followed on 1st May of the same year, but re-introduced them in 1899. They have also disappeared from all journeys between London and Scotland, and on the 1st of July, 1897, the Furness Company discontinued second-class accommodation. On July 1st, 1905, the Metropolitan District Company commenced to work their electric train service, the cars being first and third class only, and from 1st October, 1908, the Great Western issue first and third class tickets only on the South Wales branches.

Net Result of Working the Railways.—The gross receipts, compared with those of the preceding year, show an increase from passengers (which includes season ticket, carriage, horse, dog and post office mail traffic) of £1,092,567; from goods, an increase of £2,808,614; and an increase from rents, tolls, navigation and steamboats, &c., of £419,811; and a total increase from all sources of £4,320,992. The net receipts for 1907 on the capital outlay give a sum of 3·47 per cent., compared with 3·45 per cent. for the year 1906, and 3·42 per cent. for the year 1905. As may be seen, however, on page 739, over 7¾ millions additional capital has been raised during the year 1907, a large proportion of which is "locked up" in works either unfinished or only partly finished, therefore unproductive. Increased working expenses, caused by diminished hours of labour and a proportionate increase in the number of men employed, and increased wages, have largely operated on the net profit. The increase in the amount of wages has for some years been gradually getting larger. A few years ago the amount paid as wages was less than 20 per cent., but now the wages bill represents over 25 per cent. of the total. Rates and taxes are also yearly increasing in a disproportionate ratio to the net profit; for instance, some of the railway companies are paying an annual sum for rates and taxes equal to 1 per cent. on the ordinary stock of those companies or about 6½ per cent. of the gross receipts, and where this burden is due to the building of tramways by municipalities the position is of course exceptionally hard. In fact, since the County Councils came into existence thirteen years ago, many extra duties have been imposed upon railway companies. The Education Act alone has brought about an enormous increase in the rates. But even with these increasing expenses a percentage of 3·47 on the net receipts for the year must be viewed as a very favourable result.

RAILWAY ACCIDENTS.

To the public generally, one of the most interesting points in connection with the working of the railways is the immunity from accidents, as evidenced for a considerable number of years past in the amount paid by the companies by way of compensation for personal injury to passengers. In 1906 and 1907 the cost per passenger train-mile for personal injury was 0·24*d.* and 0·15*d.* respectively. In loss and damage of goods, the cost in 1906 was 0·58*d.*, and in 1907 0·64*d.* per goods train-mile. The general report to the Board of Trade for 1907 shows that although

accidents and collisions of a serious nature have occurred during the year to passenger trains, yet the numbers (particularly in the case of the number killed) are very low when compared with the millions of passengers carried by the companies during the year.

The number of personal accidents on railways to passengers, railway servants, and others, reported to the Board of Trade during the year, show a total of **1,211** killed and **25,975** injured (as compared with **1,252** killed and **20,478** injured in **1906**).

The increase since the year **1897** in the number injured is owing to an order recently made by the Board of Trade regarding the mode in which the returns are to be compiled by the railway companies. Hitherto some companies have only reported accidents of gravity, but they are now directed to report all accidents which prevent the servant injured from being employed for five hours on his ordinary work on one of the three working days next after the accident. We will now proceed to investigate under three distinct heads, viz., accidents to passengers, accidents to railway servants, and accidents to persons other than passengers or railway servants, and the various causes from which these accidents arose:—

1st. *Accidents to Passengers*—	Killed.	Injured.
1. From accidents to trains, rolling stock, permanent way, &c.	18	534
2. From falling between trains and platforms when entering or alighting from trains	33	1,145
3. From falling off platforms and being struck or run over by trains	12	12
4. While crossing the lines at stations	10	12
5. By the closing of carriage doors	—	633
6. From falling out of carriages during the running of trains ...	31	53
7. Whilst ascending or descending steps at stations	5	339
8. By being struck by barrows or falling over packages, &c., on platforms.....	—	122
9. From falling off platforms on to the ballast	—	110
10. By other accidents caused by the movement of trains	16	277
11. By other accidents on railway premises not due to train accidents or to the movement of trains	—	265

RAILWAY SPEED.

The Fastest Running, without Stoppage, is made by the Companies as under:—

Company.	Train.	From	To	Time. H.	Time. M.	Distance. Miles.	Average Speed.
North Eastern	1. 8	Darlington	York	0	43	44	61·5
Caledonian	10. 5	Forfar	Perth	0	32	32½	60·9
Great Central	8.11	Leicester	Nottingham	0	23	23½	60·6
Great Western	10.15	Paddington	Bristol, *viâ* Bath	2	0	118½	59·2
Great Northern	5.54	King's Cross	Grantham	1	50	105½	57·5
London and South Western	4.41	Andover	Vauxhall	1	8	65	57·4
Midland	6. 4	St. Pancras	Nottingham	2	11	123½	56·5
Glasgow and South Western	2. 4	Kilmarnock	Carlisle	1	43	91½	55·0
Lancashire and Yorkshire	11.30	Liverpool	Manchester	0	40	36½	54·8
London and North Western	4. 0	Euston	Birmingham	2	0	113	56·5
London Brighton & South Coast	11. 0	Victoria	Brighton	1	0	50½	50·7
Great Eastern	9.50	Liverpool St.	Trowse	2	17	114	49·9
Great Southern and Western	5.26	Ballyhrophy	Mallow	1	34	77½	49·6
Highland	2.30	Blair-Atholl	Perth	0	45	35½	47·0

Glasgow and South Western	2. 4	Kilmarnock	Carlisle	1	43	91½	53·3
London Brighton & South Coast	11.35	Clapham Junct.	Fratton	1	47	82½	46·1
South Eastern & Chatham	9. 5	Cannon Street	Dover Pier	1	39	75½	45·7
Lancashire and Yorkshire	10.52	Huddersfield	Poulton	1	42	66	38·8

2nd. *Accidents to Servants* in the employ of the railway companies or contractors.—The casualties under this head resulting from accidents to trains, or in which the movement of trains or vehicles used exclusively upon railways is concerned, show that 454 were killed and 5,813 injured during the year, the following being an analysis of such accidents :—

	Killed.	Injured.
1. While coupling or uncoupling vehicles	18	757
2. By coming in contact, whilst riding on vehicles, with other vehicles, &c., standing on adjacent lines	—	25
3. While passing over, under, or standing on buffers	1	16
4. When getting on or off, or falling off, engines, waggons, &c.	6	303
5. While braking, spragging, or chocking wheels	8	644
6. While attending to ground-points	1	128
7. While moving vehicles by capstans, turn-tables, props, levers, &c.	5	565
8. By other accidents not included in the preceding	40	712
9. From falling off trains, engines, &c., in motion	7	70
10. When getting on or off engines, vans, &c., during the running of trains	5	233
11. By coming in contact with over-bridges or erections on the sides of the line	2	76
12. While attending to the machinery, &c., of engines in motion	1	751
13. While working on the permanent way, sidings, &c.	68	102
14. While attending to gates at level crossings	1	—
15. While walking, crossing, or standing on the line on duty :		
(1) At stations	116	322
(2) At other parts of the line	55	56
16. From being caught between vehicles	22	102
17. From falling or being caught between trains and platforms, walls, &c.	14	69
18. While walking, &c., along the line to or from work	44	37
19. Miscellaneous	27	609
20. From accidents to trains, rolling stock, permanent way, &c.	13	236
Total	454	5,813

In addition to these accidents, other casualties, in which the movement of vehicles used exclusively upon the railways are not concerned, have occurred, viz., 5 killed and 2,899 injured whilst loading, unloading, or sheeting waggons, 8 killed and 304 injured while working at cranes or capstans, 11 killed and 400 injured by falling off platforms, ladders, scaffolds, &c., in addition to a large number of accidents from various other causes, either the result of want of caution or misconduct.

3rd. *Accidents to Persons other than Passengers or Servants.*—Under this head is classed casualties whilst passing over railways at level crossings; this caused 50 deaths and 30 injuries in 1907 (as compared with 76 deaths and 24 injuries in 1906). There were 278 deaths and 115 injuries resulting from persons trespassing on the railways, and 169 persons committed suicide upon the lines in 1907 (as compared with 181 in 1906).

The Cheap Trains Act, 1883, provides that fares not exceeding the rate of one penny per mile shall be exempt from duty, but fares for return or periodical tickets shall be exempt from duty only where the ordinary fare for the single journey does not exceed that rate. Duty shall be payable at a reduced rate of 2 per cent. on fares exceeding the rate of one penny a mile between stations within one urban district. Such district will contain not less than one hundred thousand inhabitants, and must be of a continuous urban as distinguished from a rural or suburban character.

Officers or men in the King's forces, regular, reserve, or auxiliary, or in any police force, when conveyed by railway on any occasion for the public service, are, when travelling in bodies under one hundred and fifty in number, to be charged three-fourths the rates for ordinary passengers; when over that number, at half rates. The Act does not extend to Ireland.

Hiring of Special Trains.—Although the majority of railway companies have no fixed charges for hire of special trains, the general charges are five shillings per mile, plus the ordinary fare for each passenger according to class of vehicle hired. The railway companies, however, reserve to themselves the right to make whatever charges they may think fit in accordance with circumstances of hiring special trains.

The Workmen's Compensation Act, 1897.—This Act, which received the Royal assent on August 6, 1897, and came into operation on July 1, 1898, is intituled "An Act to amend the law with respect to compensation to workmen for accidental injuries suffered in the course of their employment."

The Employers' Liability Act of 1880 only gives compensation in cases where the personal injury is caused by the negligence of the employer or his representatives, or by a defect in the works or machinery used in his business. The Act of 1897 entirely disregards the cause of the accident, with the exception of the wilful misconduct of the injured workman himself, and awards compensation to employees in all cases of personal injury by accident arising out of and in the course of their employment. It further provides that compensation for injuries received whilst performing duties involving considerable personal danger shall become a charge upon the profits of the undertaking, thus throwing a serious burden upon Railway Companies and other employers specifically enumerated in the 7th section of the Act. The new Act will in time cause the entire extinction of the companies' accident insurance societies, by whatever title they may be known. The amount paid for compensation under this Act to railway employees during the year 1905 was £173,148.

The Railway (Prevention of Accidents) Act, 1902.—By this Act, where the Board of Trade consider that avoidable danger to persons employed on any railway arises from anything done or omitted to be done by the companies, or from want of proper appliances or plant, they may, after giving a reasonable opportunity of removing the danger, make rules for that purpose, by compelling them to use plant or appliance to the satisfaction of the Board, or the disuse of any plant or appliance which involves danger. The Act also empowers the Board to make rules in order to minimise danger generally. The penalties for non-com-

pliance with these rules is a fine of £50, or in the case of a continuance of the offence (after conviction) a fine of £10 for every day during that continuance. The Board of Trade may appoint such persons as appear to them to be required for carrying this Act into effect, and may hold such inquiries and make such experiments as they think expedient for that purpose.

The "Railway Fires" Act.—The "Railway Fires" Act of 1905 came into force on January 1, 1908; the interval between the passing of the Act and its coming into operation was lengthened in order to allow the railways time in which to introduce an efficient method of preventing the locomotives emitting sparks. The clause is as follows:—"When damage not exceeding £100 is caused to agricultural land or crops by fire arising from sparks or cinders emitted from any locomotive engine used on a railway, the fact that the engine was used under statutory powers shall not affect the liability in an action for such damage."

THE RAILWAY CLEARING HOUSE.

This Institution was opened in Jan. 1842, and in addition to the work of clearing through bookings of passenger and luggage traffic, is the medium through which agreements relating to rates and fares, &c., are arrived at. *Chairman*, Charles Mortimer; *Secretary*, Frank Mansfield; *Offices*, Seymour Street, N.W.

* Includes conductors and gatemen on electric trains.

† Boys and girls: persons under 18 years of age.

Indian Railways.

THE construction of Railways in India, which commenced in 1853, has been conducted on three different systems: first, the employment of companies under a system of guarantee; secondly, by the State through its own officials; and thirdly, by assisted companies either with or without guarantee or subsidy from the State, and working with capital wholly raised by themselves or partly with capital provided by the State.

The total length of Railway open in India on 31st December, 1907, was 30,010 miles. This mileage includes tramways working outside municipal limits, which are treated as light railways. The capital outlay was £265,621,000. The gross receipts for 1907 amounted to £31,512,467; the working expenses to £16,190,601, or 51·38 per cent. of gross receipts. The net revenue amounted to £15,321,866, which gave a return of 5·77 per cent. per annum upon the capital invested. The number of passengers carried in the year was nearly 306 millions. The Indian Railways have in their service 516,756 employees, of whom 7,180 are Europeans, 9,982 Eurasians, and 499,594 Natives. The number of servants killed and injured during the year from all causes was 445 killed and 666 injured; passengers, 195 killed and 609 injured; other persons, 1,194 killed and 390 injured; total, 1,834 killed and 1,665 injured. The Railways of India have up to the end of 1899 involved a yearly loss to the Indian revenues, but the working of the year 1900 resulted for the first time in their history in a net gain to the State, and the result of the working for the year 1907 was a gain to the Government of £2,551,947.

There is to be a "battle of the gauges" in India in the near future, the question at issue being the metre *versus* the 5 ft. 6 in. gauge. At present there are 11,562 miles of 3 ft. 3½ in. gauge, 14,733 of 5 ft. 6 in. gauge, 942 of 2 ft. 6 in. gauge, and 328 miles of 2 ft. gauge. In addition, it seems from a report on Indian railways that the present vehicular width makes the railways work at 22½ per cent. under power, the vehicles on the broader gauge being 9 ft. 6 in., and on the metre gauge 7 ft. 9 in. The 5 ft. 6 in. width might, it is stated, be increased to 12 ft. 3 in.

The principal recent event was the constitution of a Railway Board, consisting of a chairman and two members—with the necessary clerical establishment—to whom is entrusted the general control and administration of the railways in India, hitherto exercised by the Government of India in the Railway Branch of the Public Works Department.

The chairman of the Board is Mr. F. R. Upcott, C.S.I., and the two members are Mr. W. H. Wood and Mr. T. R. Wynne, C.I.E. These gentlemen assumed office in March, 1905.

STATEMENT OF CAPITAL, REVENUE, DIVIDENDS, &c.

In the year 1894 an Act was passed making it legal for Indian Railway Companies to pay interest out of capital during construction, subject to the Secretary of State's specific sanction, and to certain other conditions.

Railway.	London Office.	Date of Opening of Line.	Year ending December, 1907.						Total paid up Capital of Company excluding Debenture Stock and Annuities A, B, and C, to Dec. 31st, 1907. Shipbuilding at Home and Abroad.

We have been supplied with the following information by "Lloyd's Register of British and Foreign Shipping":—

MERCHANT AND OTHER VESSELS (not Warships) LAUNCHED IN THE UNITED KINGDOM DURING RECENT YEARS.

Year.	No.	Gross Tonnage.
1896	696	1,159,751
1897	591	952,486
1898	761	1,367,570
1899	726	1,416,791
1900	692	1,442,471
1901	639	1,524,739
1902	694	1,427,558
1903	697	1,190,618
1904	712	1,205,162
1905	795	1,623,168
1906	886	1,828,343
*1907	841	1,607,890

* In addition, there were launched in the United Kingdom during 1907 36 Warships of 134,475 tons displacement, of which 33, of 133,405 tons, were for the British Government.

Of the merchant steamers (752 in all) launched in the United Kingdom during 1907 7 vessels were over 10,000 tons, the largest being the *Asturias*, of 12,200 tons, and the *Avon*, *Corsican*, and *Pericles*, each of about 11,000 tons; 24 were between 6,000 and 10,000; 114 were between 4,000 and 6,000 tons each; and 261 were between 1,000 and 4,000 tons.

Only two sailing vessels of over 1,000 tons were launched in the United Kingdom during 1907, one of which was an oil barge of 7,700 tons gross.

MERCHANT AND OTHER VESSELS (not Warships) UNDER CONSTRUCTION IN THE UNITED KINGDOM AT VARIOUS DATES. (Vessels *not* to be classed by Lloyd's Register are also included.)

30th September.	No.	Gross Tonnage.
1890	406	652,248
1891	475	702,114
1892	385	678,780
1893	326	616,560
1894	327	653,331
1895	356	716,575
1896	355	659,641
1897	455	884,336

1907	450	1,080,087
1908	319	733,378

DESCRIPTION OF VESSELS BUILDING IN THE UNITED KINGDOM IN 1875 AND 1908 RESPECTIVELY.

Date.	Steel.				Iron.				Wood.				Total.			
	Steam.		Sail.		Steam.		Sail.		Steam.		Sail.		Steam.		Sail.	
	No.	Tons Gross.	No.	Tons Gross.	No.	Tons Gross.	No.	Tons Gross.	No.	Tons Gross.	No.	Tons Gross.	No.	Tons Gross.	No.	Tons Gross.
*30 Sept. 1875	...	...	...	...	144	162,325	110	105,081	6	1,065	173	36,103	150	163,390	283	141,184
30 Sept. 1908	294	730,122	14	2,320	...	...	...	...	2	75	9	861	296	730,197	23	3,181

*The figures for this date include vessels preparing, but not actually commenced.

These figures show that the average size of vessels building at the present time is over 3¼ times that of vessels built thirty-three years ago. Then, steel was not used for shipbuilding purposes; now, it has entirely supplanted iron. Then, the tonnage in hand was equally divided between steamers and sailing vessels; now, the proportion of sailing to steam tonnage is insignificant.

MERCHANT AND OTHER VESSELS (not Warships) LAUNCHED IN EACH OF THE PRINCIPAL SHIPBUILDING DISTRICTS OF THE UNITED KINGDOM DURING 1907.

District.	Steam.		Sail.	
	No.	Gross Tons.	No.	Gross Tons.

* Wooden Vessels trading on the Great Lakes of North America are not included in the Register Book.

† In the absence of satisfactory information the records of numerous small sailing vessels (belonging chiefly to Greece, Turkey, Southern Russia, and the Dutch East Indies) have been omitted from the Register Book.

‡ Japanese sailing vessels of under 100 tons net are not recorded in Lloyd's Register Book.

Ocean Mercantile Fleets—British and Foreign.

FIRST STEAMBOATS—EARLIEST LINES—HISTORICAL SKETCHES EVOLUTION FROM STEAM PACKET TO STEAM PALACE ON THE ATLANTIC—OWNERS OF THE LARGEST FLEETS. STEAM AND SAIL—BIGGEST AND FASTEST STEAMERS.

In the early part of the 18th century numerous inventors propounded schemes for applying steam power to vessels to be run upon rivers and canals, but only their names can be given in the chronological list of the first steamboats (*vide* page 753).

1824 witnessed the birth in England of the railway system. With the introduction of the "iron horse" the General Steam Navigation Company arose to champion the adoption of steam. The national benefits calculated to result from steam power, enabling vessels to enter and quit harbour regardless of wind and tide, were emphasised by the directors in the prospectus. Ocean trade was then carried on with sailing ships, mostly under 500 tons each, and all the steamboats in the United Kingdom only numbered 109.

Since the beginning of the last reign, steam-propelled vessels have vanquished the time-honoured "clippers." Iron for building purposes, being stronger, supplanted wood, but had itself to yield to steel as soon as that lighter material could be produced cheaply.

The "auxiliary screw" only stayed long enough to enable the unobtrusive "propeller" to make sure of superseding, for ocean services, the unwieldy "paddle-wheels." "Compound engines," which largely reduced coal consumption, paved the way for "triple-expansion" ones. These were next duplicated to drive "twin screws," with which all steamers of the highest class are fitted, and now steam turbines, having been tried successfully, have been adapted to the largest and fastest liners, increased speed per indicated horse-power, diminished coal consumption, and reductions in weight of machinery, engine-room staff and vibration being obtained.

Space being so limited, the evolution "from steam packet to steam palace" in the North Atlantic trade is presented in tabular form (page 754).

To Canada belongs the credit of having built and engined the first steamer to cross the Atlantic. This was the *Royal William*, launched at Wolfe's Cove, Quebec, 1831. In 1833 she went from Pictou, N.S., to Gravesend, arriving Sept. 11th, after 22 days' passage.

The pioneer steamer from the Old World to the New was the Cork packet *Sirius*. Leaving Cork April 5th, 1838, she reached New York April 23rd, having been compelled to burn everything available. On the same day the *Great Western*, the first specially built for the Atlantic service, paddled in, having left Bristol April 8th—a wonderfully quick passage of 14½ days. A third company started with the *Royal William*; she was the earliest steamer with watertight compartments, and the first to cross from Liverpool, July, 1838, taking 19 days.

The *Royal William* had been chartered from the City of Dublin Steam Packet Company, now the oldest steamship company in the world.

The Irish company was practically the godfather of the Peninsular and Oriental Company, so called when the mail services upon this side of Egypt were combined in 1839 under the time-honoured flag of the "P. & O.," which received its charter in 1840.

The failure of the earliest Atlantic companies did not deter the establishment and development of the Cunard Company. Samuel Cunard, to the discomfiture and astonishment of the Great Western Company, secured the subsidy of £80,000 a year for a monthly Atlantic service of 4 steamers. The gun-brigs were thereupon superseded as mail carriers, and a brighter era was auspiciously commenced by the despatch of the *Britannia*, 1,139 tons, on July 4th, 1840.

In 1839, the Royal Mail Steam Packet Company undertook the conveyance of mails to the West Indies at a time when a steam passage of even a fortnight's duration was to many a subject of wonder, and in 1840 the Pacific Steam Navigation Company was formed to run a service between Panama and Valparaiso.

Owing to the revolution mechanical science caused in the carrying trade of the sea, antiquity by itself counted gradually less even in the conservative kingdom of the sailor, and as the old order changed, shipowners who neglected to advance with the growing wants of the times fell out or dropped behind. As the size of steamships increased, the heavy cost of construction necessitated the establishment of corporations with great strength of capital, which control the principal ocean routes. The origin of each leading company is briefly outlined in a series of "Historical Sketches," and the largest British and foreign owners are referred to.

The *Great Britain* was 322 × 40 × 31; tonnage 3,270; h.p. 1,500.

The *Great Eastern* was 680 feet long, paddle engines 1,710 h.p. and screw engines 1000 h.p.; tonnage, 18,918; 14 knots speed; daily coal consumption, 300 tons; longest day's run, 333 knots.

Some homeward runs by clippers were of sufficient interest to be chronicled here. The *Red Jacket* in 1854 crossed from New York to the Mersey in 13 days; the *Dreadnought*, 1413 tons, 220 × 45 × 26, eclipsed all previous runs in 1862, when she reeled off between Sandy Hook and Queenstown the enduring record of 9 days 17 hours. The *Thermopylæ's* maiden voyage in 1868, of 60 days between London and Melbourne, remains the fastest ever known. In 1869 the *Patriarch*, 1339 tons, made for the same owners (the Aberdeen Line) the record passage of 68 days between London and Sydney.

In 1814 the steamboats of all kinds registered in the United Kingdom amounted to less than 1,000 tons, increased to nearly 8,000 tons by 1820. There were 766 British steamers afloat in 1838, in all just short of 150,000 tons. The invaluable Register Book which is published by the Committee of Lloyd's Register of British and Foreign Shipping shows that on June 30th, 1908, nearly every other steamer upon the high seas was under the British ensign, the steamship empire-builders of Greater Britain owning 9,680 vessels, 17,499,542 gross tons, exclusive of 1,883 ships (1,209,995 tons) belonging to the dwindling disciples of time-honoured canvas.

The British flag still flies over nearly one-half of the entire shipping tonnage of the world, but this preponderance is steadily decreasing, and a perusal of the statistical tables which are appended evidences the ever-increasing activity of foreign nations for the carrying trade of the seas.

FIRST STEAMBOATS, PIONEER SAILINGS AND EARLIEST LINES.

1707. Denis Papin experimented on River Fulda with paddle-wheel steamboat.

1736. Jonathan Hulls patented designs similar to modern paddle boat.

1769. James Watt invented a double-acting side-lever engine.

1783. Marquess of Jouffrey made experiments in France.

1785. James Ramsey, in America, propelled a boat with steam through a stern-pipe.

1785. Robert Fitch, in America, propelled a boat with canoe-paddles fixed to a moving beam.

1787. Robert Miller, of Edinburgh, tried primitive manual machinery.

1788. Miller, with Symington, produced a double-hull stern-wheel steamboat.

1802. *Charlotte Dundas*, the first practical steam tugboat, designed by Symington.

1804. *Phœnix*, screw-boat designed by Stephens in New York; first steamer to make a sea voyage.

1807. *Clermont*, first passenger steamer continuously employed; built by Fulton in U.S.A.

1812. *Comet*, first passenger steamer continuously employed in Europe; built by Miller in Scotland.

1818. *Rob Roy*, first sea-trading steamer in the world; built at Glasgow.

1819. *Savannah*, first auxiliary steamer, paddle wheels, to cross the Atlantic; built in New York.

1821. *Aaron Manby*, first steamer (English canal boat) built of iron.

1823. City of Dublin Steam Packet Co. was established.

1824. General Steam Navigation Co. was established at London.

1824. George Thompson & Co. (Aberdeen Line) were established.

1825. *Enterprise* made the first steam passage to India.

1825. *William Fawcett*, pioneer steamer of the P. & O. S. N. Co.

1830. T. & J. Harrison (Harrison Line) were established at Liverpool.

1832. *Ethiopiah*, iron steamer, took a private exploring party up the Niger.

1834. Lloyd's Register for British and Foreign Shipping established.

1836. F. Green & Co. established at London.

1836. Austrian Lloyd Steam Navigation Co. established at Trieste.

1837. *Francis B. Ogden*, first successful screw tugboat; fitted with Ericsson's propeller.

1838. *Archimedes*, made the Dover-Calais passage under two hours, fitted with Smith's propeller.

1838. *R. F. Stockton*, built for a tugboat, fitted with Ericsson's propeller, sailed to America: first iron vessel to cross the Atlantic; first screw steamer used in America.

1839. *Thames*, pioneer steamer of the Royal Mail Steam Packet Co.

1839. George Smith & Sons (City Line) were established at Glasgow.

1840. *Britannia*, pioneer steamer of the Cunard Line.

1840. *Chile*, pioneer steamer of the Pacific Steam Navigation Co.

1845. *Great Britain*, first iron screw steamer, precursor of modern Atlantic steamer.

1845. Thos. Wilson, Sons & Co., Ltd. (Wilson Line) established at Hull.

1847. Pacific Mail Steamship Co. established in America.

1849. Houlder Brothers & Co. established at London.

1850. Bullard, King & Co. (Natal Line) established at London.

1850. Messageries Maritimes de France established.

1850. Inman (now American) Line, established at Liverpool.

1851. *Tiber*, first steamer of the Bibby Line, established 1821 at Liverpool.

1852. *Forerunner*, pioneer steamer of the African Steamship Co.

1853. Union Steamship Co. was established (now Union-Castle Line).

1853. *Borussia*, first steamer of the Hamburg-American Packet Co., established 1847.

1854. *Canadian*, first steamer of the Allan Line, established 1820.

1855. British India Steam Navigation Co. was established.

1856. *Tempest*, first steamer Anchor Line.

1857. *Waldensian*, first steamer of J. T. Rennie, Son & Co. (Aberdeen Line).

1858. *Bremen*, first Atlantic steamer of the Norddeutscher Lloyd, established 1856.

1858. *Great Eastern* launched into the Thames, Jan. 31; commenced, May 1, 1854.

Historical Sketches.

For other large Steamship Owners, see p. 756.

ABERDEEN LINE, between London and Australia *viâ* South Africa, is managed by the owners, Messrs. George Thompson & Co., Ltd. (founded at Aberdeen, 1824), who have long occupied a prominent position in the Australian cargo and passenger trades, due to the "runs" of their noted clippers to Melbourne and to Sydney, the general high standard of their fleet, and its exceptional immunity from loss over more than half a century. Their ss. *Aberdeen*, built in 1881, was the earliest ocean steamer to demonstrate decisively the superior merits of triple-expansion engines. The tonnage does not include any sailing vessels, but the reputation of the line is well sustained by modern steam favourites bearing such time-honoured names of former "flyers" as *Miltiades*, *Marathon*, and *Salamis*. The two twin-screw steamers, *Miltiades*, 6,793 tons, and *Marathon*, 6,794 tons, each 15 knots, were recently added to the company's fleet, while the new twin-screw steamer *Peridot*, 11,000 tons gross register, is the largest vessel. This vessel will be the largest British-owned passenger ship trading to Australian ports.

Fleet, 6 vessels: 37,400 tons.
London Office, 7, Billiter Square, E.C.

AFRICAN STEAMSHIP COMPANY, the earliest African line, originated from a private expedition of the *Elburkah* up the Niger in 1832, its success leading to others for opening up the West Coast of Africa or suppressing the slave trade. This company received its charter in 1852, with an annual subsidy of £30,000 for a monthly mail, passenger, and freight service performed continuously ever since, the pioneer boats *Forerunner*, *Faith*, *Hope*, and *Charity* rendering valuable aid in the Crimean War. In 1891 the company came (*see* p. 760) under the management of Messrs. Elder, Dempster & Company, of Liverpool, and now maintains seven distinct services from Liverpool, Hamburg, Rotterdam, and Antwerp to West and South-West Africa, the one from the last-mentioned port being under contract with the Congo Free State.

Fleet, 31 steamers; 90,543 tons.
London Office, 17, Leadenhall Street, E.C.

ALLAN LINE.—The Allan Line of Steamers was originally called the Montreal Ocean Steamship Company, formed by the Allan Brothers, who, as sailing-ship owners, had been connected with Canada since about 1820. The first steamer of the line, the *Canadian*, 1,700 tons, was despatched from Liverpool to Quebec and Montreal Sept. 20, 1854. It was intended to inaugurate at that time a fortnightly mail service, but owing to the Crimean War, during which the steamers were engaged as transports, the mail service did not begin until April, 1856, with the sailing of the *North American*. The line has since continued to meet and promote the postal, commercial, and passenger requirements of the now vast Dominion, and has carried the mails nearly the whole of the time and is still doing so. Since 1859, sailings have been weekly. The steamers go to Halifax and St. John, N.B., when the St. Lawrence is closed. The itinerary includes Glasgow, Liverpool, Londonderry, and London, embracing on the other side, in addition to several Canadian ports, Boston, New York, Philadelphia, and the River Plate. In 1905 the *Virginian* and *Victorian* (540′×60′×40′ 6″: 17½ knots), the first turbine-propelled Atlantic steamers, successfully augmented the service; both have beaten all records, the passage of *Virginian* (10,754 tons) in August, 1908, between Rimouski and North of Ireland in 5 days 4 hours being the fastest. The largest steamer is the *Corsican*, 11,436 tons. *Hesperian* and *Grampian* are the latest additions.

Fleet, 28 steamers; 160,569 tons.
Head Office, 25, Bothwell Street, Glasgow.

AMERICAN LINE (*see* International Mercantile Marine Co.).—The International Navigation Co., the proprietary organisation, established in Philadelphia, 1871, started between Philadelphia and Liverpool (calling at Queenstown), 1873, with the four American-built, brig-rigged screw steamers *Pennsylvania*, *Ohio*, *Illinois*, and *Indiana*, which, supplemented by the British steamers *Abbotsford* and *Kenilworth*, formed a regular weekly line. In 1886 the Company acquired the Inman Line—which had been running in Liverpool-New York trade since 1856—then composed of the passenger steamers *City of Montreal*, *City of Berlin*, *City of Richmond*, *City of Chicago*, and *City of Chester*, and continued to employ these steamers under the name of the Inman & International Steamship Co., Ltd. In 1887 a contract was entered into with Messrs. J. & G. Thomson, Clydebank, to build the *City of New York* and *City of Paris*, each 10,500 tons, the pioneers of twin-screw passenger ships in the Atlantic trade, and the largest steamers then afloat. In 1893 the Inman & International Steamship Co., Ltd., was merged into the American Line, the mail steamers exchanging Liverpool for Southampton, their names being shortened to the bare titles of cities. The *New York* and *Paris* (the latter since re-named *Philadelphia*) were, under special Act of Congress, naturalised into United States register. In 1895 the William Cramp & Sons Ship & Engine Building Co., Philadelphia, delivered the steel twin-screw steamships *St. Louis* and *St. Paul*, each 11,629 tons. These, with the *New York* and *Philadelphia*, did good service as fast cruisers in Spanish-American War. The four steamers named perform weekly mail service between Southampton and New York, calling at Cherbourg West-bound, and Plymouth and Cherbourg East-bound.

The Liverpool–Philadelphia service of the American Line is now maintained by the twin-screw steamers *Haverford* and *Merion*, each 11,635 tons, *Friesland*, 7,110 tons, *Westernland*, 5,665 tons, and *Noordland*, 5,129 tons, forming a regular weekly line from Liverpool Wednesdays, from Philadelphia Saturdays, calling at Queenstown on both the West-bound and East-bound voyages.

Fleet, 9 steamers; 85,432 tons.
London Offices, 1, Cockspur Street, S.W.; and 38, Leadenhall Street, E.C.

ANCHOR LINE.—In 1852 a service was established from the Clyde to Portuguese and Spanish ports extending later to upper Mediterranean ports. Some years later additional services between Glasgow and New York *viâ* Moville; Mediterranean and New York; and Glasgow and Liverpool to Bombay, and to Calcutta were inaugurated, which trades have since been

vigorously prosecuted with fine steamers, the sizes increasing with the development of the trades. *Columbia*, 8,500 tons, *Caledonia*, 9,222 tons, and *California*, 8,662 tons, are latest additions to New York service; a sister ship to the latter is building. *Olympia*, 5,124 tons, *Massilia*, 5,091 tons, *Circassia*, 6,716 tons, and *Castalia*, 6,388 tons, and *Elysia*, 6,500 tons, have recently been added to Indian service. About 90,000 passengers are carried annually.

Fleet, 23 steamers; 124,502 tons.

London Office, 4, St. Mary Axe, E.C.

THE ANGLO-SAXON PETROLEUM COMPANY, Ltd., which was founded in 1907 to carry on the combined business relative to the tank steamers and oil installations of the "Shell" Transport and Trading Company, Ltd., the Royal Dutch Oil Company, and the Asiatic Petroleum Company, Ltd., has, in addition to the already enlarged fleet, two new vessels, each with a capacity of 7,750 tons and a speed of 11 knots, in course of construction on the Tyne, and one powerful tug and two tank-lighters of the capacity of 1,500 tons each in course of construction in Holland. The trade in which these craft are engaged is the transport of petroleum and its products in bulk all over the world, and the special trade of conveying benzine in bulk from Sumatra and Borneo to Europe, which previously to March, 1907, had to be performed *viâ* the Cape of Good Hope owing to the stringent rules of the Suez Canal Company affecting benzine steamers. Since that date however the Suez Canal Company have permitted vessels laden with benzine to transit the Canal, thus considerably reducing the time of the voyage. The steamers belonging to the Company are so constructed as to be speedily converted from coal to oil fuel burning, or vice versa as circumstances require.

The total tonnage of the Company's fleet is about 115,000 tons, of a capacity varying from 350 to 10,500 tons.

London Office, 20 Billiter Street, E.C.

ATLANTIC TRANSPORT CO., Ltd. (*see* International Mercantile Marine Co.), originated in London in 1886. In 1889 the boats were all transferred to the Atlantic Transport Co., Ltd., registered in London for the purpose, the prime movers and principal stock-holders being Americans. The company in 1896 purchased the controlling interest in the National Steamship Co., a line which dated back to 1863 and, after flourishing into front rank, declined by degrees. When the Atlantic Transport Co. commenced, a line was run from London to Baltimore, *viâ* Swansea; soon Philadelphia was added to the itinerary, subsequent growth leading to a service to New York, necessitating large steamers built specially for the carriage of cargo, refrigerated meat and live stock, together with only first-class passengers. Saloon accommodation has increased from 50 to 250, which can be carried by the new twin-screw steamers *Minnehaha*, *Minneapolis*, *Minnetonka*, and *Minnewaska* (building), each 13,400 tons.

Fleet, 18 steamers: 135,832 tons.

London Office, 38, Leadenhall Street, E.C.

AUSTRIAN LLOYD STEAM NAVIGATION COMPANY, established in 1836, belongs to Trieste, whence services are kept up to and from Adriatic, Mediterranean, and Levant ports, served by three branch lines. Besides a line to the West as far as Brazil, there is an accelerated fortnightly mail service between Trieste and Bombay; also an ordinary monthly service as between Trieste, Bombay, China, and Japan. The itinerary now includes a monthly line to Calcutta. The largest steamers are the *Austria*, 7,588 tons, and *Erzerzog Franz Ferdinand*, 6,046 tons, *Nippon*, 6,350 tons, and *Vorwaerts*, 5,590 tons.

Fleet, 72 steamers; 230,732 tons.

London Agents, M. Samuel & Co., 104 and 105 Bishopsgate Street Within, E.C.

BIBBY LINE.—This line was founded in 1807 by Mr. John Bibby, the grandfather of the present representatives, the fleet at that time consisting of small sailing vessels. In 1851 the steam fleet was commenced with the *Tiber* and the *Arno*. In 1891 the *Lancashire*, whose passage of 23 days 20 hours, in July, from Liverpool to Rangoon stands the fastest, started the present service, which runs to Colombo and Rangoon, *viâ* Marseilles, from which port of call Ceylon is 18 days' passage, and Burmah 23. The fast and modern steamers of this line, which belong chiefly to the Bibby family, are all built by Harland & Wolff, and authorised by the Indian Government for officers returning on expiry of furlough, it being the recognised route to Burmah; easy connections being made with Southern India generally by a daily steam service between Colombo and Tuticorin. Largest steamer, *Warwickshire*, 7,966 tons.

Fleet, 8 steamers; 54,509 tons.

London Office, 10 & 11, Mincing Lane, E.C.

THE BOOTH LINE was founded in 1866 by Messrs. Alfred Booth & Co., of Liverpool. In 1869 Messrs. R. Singlehurst & Co.'s Red Cross Line was founded. These two lines have since been closely identified with the rapid progress of the Amazon ports of Pará and Manaos. A further service between North Brazil and New York was started in 1882. In 1901 the Booth and Red Cross Lines were amalgamated in The Booth Steamship Co., Ltd., under the management of the former owners. The steamers sail at frequent intervals from New York, Liverpool, Havre, Virgo, Leixões, and Lisbon to Pará, Manaos, Maranham, and Ceará, and a large passenger business is done between the Portuguese ports and the Amazon. The twin-screw steamers *Antony*, *Lanfranc* and *Hilary*, of about 6,400 tons each, have a speed of 14 knots and carry 200 saloon and 350 third-class passengers. The Company is interested in and manages The Iquitos Steamship Co., Ltd., whose steamers trade from Liverpool more than 2,000 miles up the river Amazon to Iquitos, in Peru. The *Manco*, of 3,000 tons, and carrying 60 saloon passengers, is the latest addition to this service. The Company carries the royal mails to Pará and Manaos; also the mails between New York and Brazil; and the combined fleets include 18 passenger steamers.

Combined fleet, 35 steamers; 110,335 tons.

London Office, 11, Adelphi Terrace, W.C.

Tel. Addresses: Booth, Liverpool; Lusiad, London.

BRITISH AND AFRICAN STEAM NAVIGATION COMPANY (1900), Ltd., established in 1858 a mail, passenger, and cargo service of steamers, named after various ports, trading stations, and rivers on the West Coast of Africa, to which they run from Liverpool, Rotterdam and Hamburg. Waterways have been discovered, explored,

and brought into prominence by their captains; one, the *Jones*, being so called after Sir A. L. Jones, K.C.M.G., the presiding genius of the firm of Messrs. Elder, Dempster & Co., of Liverpool, who acquired this company in 1900, and considerably enlarged its fleet. Owing to the head of the firm's extraordinary energy, Messrs. Elder, Dempster & Co. are now established at Liverpool, London, Manchester, Bristol, Cardiff, Hamburg, Antwerp, Grand Canary, Santa Cruz, Teneriffe, New Orleans, Montreal, Mobile and Galveston. Their rapidly extending trade enterprises are upon a comprehensive and enormous scale, but space only admits of the following summary of the lines controlled by this wonderful firm:—

Name of Company.	No. of boats.	Gross tonnage
African Steamship Co.	24	69,629
British & African S.N.C. (1900) Ltd.	36	92,010
Elder, Dempster Shipping, Ltd. ...	25	84,120
Imperial Direct W. India Mail Serv.	6	25,152
Cie. Belge Maritime du Congo	3	11,966
Elder, Dempster & Co.	13	37,347
Building	2	10,000
	109	330,224

Fleet, 36 steamers; 92,010 tons.
London Office, 4, St. Mary Axe, E.C.

BRITISH INDIA STEAM NAVIGATION COMPANY.—In 1855 the founder of this company, the late Sir William MacKinnon, arranged to establish the Calcutta and Burmah Steam Navigation Company for the performance of mail services for the East India Company, with which object it was incorporated in 1856, the *Baltic* and *Cape of Good Hope* being sent out in 1857 to start the business. In 1862 a fresh mail service was entered into which included additional routes, and the name of the company was officially altered to its present title—more in keeping with its business, which strikingly benefited from the opening of the Suez Canal, through which the company's steamship *India* conveyed the first cargo of Indian produce. The Aden-Zanzibar mail service was put on in 1872, and from then until now new routes have been constantly added to its itinerary, the extent of which will not admit of more than a bare outline. The company is under contract with the Home and Indian Governments for mail services to Arabia, Persia, India, Burmah, East India, the Mauritius, and also runs other services to Batavia, Queensland, &c. In 1899 a three-weekly line from Calcutta to Manila was established, which has since been extended to Yokohama, Kobe, and Moji. This important undertaking, with its far-reaching organisation and connections, supplies over 100 ports with commercial facilities; it is under the management of Messrs. MacKinnon, MacKenzie & Co., in India; Messrs. Gray, Dawes & Co. having represented the company in London since 1866. The s.s. *Quiloa*, 7,703 tons, is the largest. Latest additions, *Rewa*, 7,267 tons (turbine steamer), and *Rohilla*, 7,365 tons (twin-screw).

Fleet, 109 steamers; 437,747 tons.
London Office, 23, Great Winchester Street, E.C.

THE BUCKNALL STEAMSHIP LINES, Ltd., managed by the founders, Messrs. Bucknall Bros., was formed in 1900 to take over and extend the British and Colonial Line from London to S. and E. African ports, established in 1892, for passengers and cargo; also lines between N. York and S. Africa, N. York and Australia and New Zealand, and N. York and India, London and other English ports to ports on the Red Sea and Persian Gulf ports *vid* Marseilles. A further line has recently been established between New York and Manchurian and other Far East Ports.

Fleet, 28 steamers; 115,210 tons.
London Office, 23, Leadenhall Street, E.C.

CANADIAN-AUSTRALIAN LINE was established in 1893, and runs in connection with the Canadian Pacific Railway. The steamers *Aorangi*, 4,268 tons, *Manuka*, 4,505 tons, and *Moana*, 3,925 tons, are under contract with the Canadian, New South Wales, Queensland, and Fijian Governments for a four-weekly mail service between Vancouver, Victoria (B.C.), Honolulu, Brisbane, and Sydney, N.S.W.
London Office, 138, Leadenhall Street, E.C.

CANADIAN PACIFIC RAILWAY.—The rail mileage, about 13,000, extends from Atlantic Ocean to Pacific Ocean, including branch lines north and south. THE EMPRESS LINE, a three-weekly service between Vancouver and Japan and China, was established 1891. A contract exists between the British Government and the Canadian Pacific Railway under which mails are carried from Liverpool in the following time: To Hong Kong, summer, 818 hours; winter, 853 hours. Mails and passengers are carried in "Empress" Atlantic steamers from Liverpool to Quebec, where close connection is made with the "Imperial Limited," one of the fastest long-distance trains in the world, which runs daily and covers the distance between the two oceans in about 100 hours. During 1903 15 large Atlantic steamers, aggregating 94,026 tons, were purchased from Messrs. Elder Dempster & Co. The steamers in the Atlantic Ocean services include the R.M.S. *Empress of Britain* and *Empress of Ireland*, 14,500 tons, 18,000 H.P. (largest and fastest to Canada). The *Empress of Ireland* made a record westbound passage, Liverpool to Quebec, of 6 days 2 hrs. 47 mins., and the *Empress of Britain* made a record eastbound voyage from Rimouski (Newfoundland) to Liverpool of 5 days 6 hrs. 26 mins. There is also an Upper Lake Service (Fort William–Owen Sound Route), a British Columbia Coast Service, and a British Columbia Lake and River Service.

Fleet, 63 steamers; about 193,000 tons.
London Office, 62 to 65, Charing Cross, S.W.

CHARGEURS RÉUNIS of Paris (Port of Registry, Havre) was established in 1872, and is the third largest shipping company in France. Services are maintained to Indo-China, West Africa, Brazil, River Plate, Gulf of California, China, and Japan. The fleet consists of 34 steamers from 3,000 to 10,000 tons. Four 15-knot twin-screw vessels have been recently added, also six of the smaller boats.

Fleet, 34 steamers; 180,000 tons.
London Agents, Hackett, Ausender & Co., 123, St. Dunstan's Hill, E.C.; Gellatly, Hankey & Co., Dock House, Billiter Street, E.C.

CHINA MUTUAL STEAM NAVIGATION COMPANY, Ltd. *See* Ocean Steam Ship Co., page 760.

CITY LINE.—Messrs. George Smith & Sons, who sold their line and fleet in 1901 to Mr. J. R.

Ellerman, celebrated their jubilee at Glasgow in 1889, fifty years after their *Constellation*, 344 tons, sailed thence for Calcutta. Sailings are from Glasgow and Liverpool to Calcutta and back to London; as well as to Bombay and Karachi, returning to Liverpool; all the steamers carrying passengers regularly to and from Malta and Egypt, in addition to the above ports. Large extensions have been made in the passenger fleet, over £1,000,000 having been spent in recent years upon new steamers.

Fleet, 20 steamers; 115,000 tons.

London Agents, Montgomerie & Workman, 36, Gracechurch Street, E.C.

CLAN LINE began a fortnightly service from Glasgow and Liverpool to Bombay and Karachi in 1878, adding one to South and East African ports in 1881, and another to Colombo, Madras, and Calcutta in 1882, a joint service from N. York direct to South and East African ports appearing in 1893. Since then a direct service has been added to the principal South African ports, Malabar Coast, and Chittagong. Twenty-nine turret-deck steamers figure in the fleet, of which the *Clan Colquhoun*, 5,856 tons, is the largest. The line is under the management of Messrs. Cayzer, Irvine & Co., Limited, of Glasgow, Liverpool, Manchester and London, whose chairman, Sir Charles Cayzer, Bart., was the founder.

Fleet, 50 steamers; 206,000 tons.

London Office, 115, Leadenhall Street, E.C.

COMPAGNIE GÉNÉRALE TRANSATLANTIQUE, established 1862, is the second largest company in France, and is heavily subsidised by that Government. With its fine fleet of mostly fast boats, the company maintains important connections between Havre (its head port), St. Nazaire, Bordeaux, Marseilles, &c., and various Mediterranean, African, West Indian, and North, Central, and South American ports. *La Provence*, 14,744 tons, 22 knots, *La Lorraine*, 11,869 tons, and her sister ship *La Savoie*, are now in the service, having been built on French soil, according to terms of mail contract, at the company's own shipyard. They are the largest ever constructed in France, and have a speed of 21 knots. Four steamers building are included in the total.

Fleet, 71 steamers; 257,596 tons.

London Office, 36, Leadenhall Street, E.C.

COMPANIA TRASATLANTICA of Barcelona and Cadiz is the leading company in Spain, the largest steamers in the fleet being *Alfonso XII.*, 6,748 tons, *Antonio Lopez*, 5,975 tons, and *Manuel Calvo*, 5,617 tons.

This company in 1881 succeeded Messrs. A. Lopez & Co., who were established in 1860. Regular mail and passenger services are maintained to New York, Antilles, Canary Islands, Mexico, Colon (for Pacific ports), River Plate, North Africa, Philippines, &c. Liverpool agents, Messrs. Larrinaga & Co.

Fleet, 23 steamers; 86,370 tons.

THE CUNARD STEAMSHIP COMPANY, Ltd., completed 68 years of successful Atlantic service on July 4, 1908. Starting in 1840 with the *Britannia*, a wooden paddle steamer, which made her first voyage between Liverpool and New York in 14 days 8 hours at the rate of 8½ knots per hour, which was a wonder of her time, the Cunard Company's steamers have steadily advanced in size and speed, till their Atlantic fleet contains steamers crossing from Liverpool to Boston (the *Ivernia* and *Saxonia*) with 2,000 passengers and 10,000 tons of freight, and others to New York (the *Campania* and *Lucania*) which make the passage in a little over 5 days at an average speed of more than 21 knots (25 miles) an hour. The *Ivernia* and *Saxonia* have also earned a reputation for remarkable steadiness, which confers the greatest possible immunity from sea-sickness. The *Carpathia* (1903) is a twin-screw steamer of 13,603 tons constructed on similar lines to the *Ivernia* and *Saxonia*, and equally steady, all three providing unrivalled accommodation. The New York and Mediterranean service is conducted with the *Carpathia*, *Ultonia*, *Slavonia*, and *Pannonia*, and conveys passengers at moderate rates to Gibraltar, Naples, Palermo, Venice, Trieste and Fiume, with the option of crossing Europe by train and returning to New York or Boston by Cunard steamer from Liverpool. There is a freight service to Boston from Liverpool, also one to Havre, Portugal, Mediterranean and Black Sea ports. All the passenger ships of the Cunard Company are fitted with Marconi's system of wireless telegraphy. The *Lucania*, Oct., 1903, with Signor Marconi on board, was the first vessel to hold communication with both sides of the Atlantic. The *Cunard Daily Bulletin*, a thirty-two page illustrated paper published on board these boats, records news received by wireless telegraphy, and is the first real ocean newspaper. In August, 1903, an agreement was made with the British Government by which the Cunard Co. were to build two new steamers, to be, with all other Cunard ships, at the disposal of the Admiralty for hire or purchase whenever they may be required, the Government lending the company £2,600,000 to build the ships and granting them a subsidy of £150,000 a year. One, the *Lusitania*, 31,550 tons, was launched on June 7, 1906, and the *Mauretania*, about 31,937 tons, on Sept. 19. (*See* p. 750.) They are quadruple screw turbine steamers, about 70,000 horse-power, the largest, fastest, and most palatial steamers in the world. The *Lusitania*, Sept., 1907, on her maiden voyage to New York, broke all records for maiden trips with a passage of 5*d.* 0*h.* 54*m.*, or an average of 23 knots, 593 knots being the highest day's run. The safety and comfort of passengers is the especial care of the Cunard Company, and every precaution is taken to ensure the best possible ships, the most capable officers, and the most reliable crews to worthily uphold the honourable traditions of the company. The total given includes the *Caronia*, 20,000 tons, fitted with reciprocating engines, and the *Carmania*, 20,000 tons, turbine steamer. In 1908 a bi-weekly service was established between Liverpool and New York.

West.	East.	Average Sea Speed.	Highest Day's Run.
d. h. m.	d. h. m.	Knots.	Knots.

Fleet, 23 steamers; 244,466 tons.

London Offices, 93, Bishopsgate Street Within E.C.; and 29 & 30, Cockspur Street, S.W.

Head Office, 8 & 12, Water Street, Liverpool.

DOMINION LINE. — (*See* International Mercantile Marine Co.) In 1870 some Liverpool and New Orleans cotton merchants formed the Mississippi and Dominion Steamship Company, Ltd. Since 1894 the proprietary company has been the British and North Atlantic Steam Navigation Company, Ltd. A weekly passenger service between Liverpool and Quebec and Montreal in the summer, and Halifax and Portland (Maine) in the winter is maintained, as well as a regular weekly freight service from Liverpool to Portland throughout the year. There is also a fortnightly freight service between Avonmouth and Quebec and Montreal in the summer, and Portland in the winter. The largest steamer is the *Norseman*, 9,546 tons.

Fleet, 14 steamers; 88,650 tons.

London Office, 38, Leadenhall Street, E.C., and 1 Cockspur Street, S.W.

DONALDSON BROTHERS (Donaldson Line) began business at Glasgow in 1854. The twin-screw steamers *Athenia* and *Cassandra* are the latest additions, fitted with very superior and excellent accommodation for passengers and regularly engaged in Canadian trade. The principal trade of the firm is between Glasgow and Montreal, steamers sailing every Saturday from Glasgow and every Thursday from Montreal during the open navigation of the St. Lawrence. In winter-time the service is a weekly one to St. John, N.B. The steamers are fitted with cold storage, also with mechanical ventilation. The St. John, N.B., service in the summer months is fortnightly, and the other regular services of the firm are Glasgow to Baltimore and Glasgow to Newport News and Norfolk, Va., and a fortnightly service of steamers between Montreal and Rotterdam.

Fleet, 14 steamers; 64,726 tons.

ELDER, DEMPSTER & CO.—*See* p. 761.

ELDERS & FYFFES, Ltd. This company, which was formed in 1901, is the outcome of the immense development of the West Indian banana trade. The service began in 1902 with 4 steamers adapted for the carriage of fruit; the company have since had built 9 steamers with special arrangements for the safe conveyance of fruit and accommodation for a limited number of first-class passengers, the vessels being fitted with all the latest appliances, the largest being the *Reventazon*, *Chirripo*, and *Barranca*, each 5,000 tons. Regular services are maintained between Jamaica and Costa Rica from Manchester; and from Bristol (Avonmouth). In the coffee season large consignments are brought from Costa Rica. In 1904 the company was entrusted by the British Postal authorities with the carriage of parcels mail to Costa Rica. The small inter-insular steamers employed at the Canary Islands are not included below.

Fleet, 13 steamers, 48,873 tons.

London Office, 9, Bow Street, W.C.

ELLERMAN LINES, Ltd. — The Ellerman Lines of steamers comprise the following:—The *Ellerman Line*, which trades between Liverpool and Portugal, Italy, Sicily, Adriatic, Alexandria, Gibraltar, Malta, Syra, Smyrna, Constantinople, and Odessa, was founded in 1840, and was conducted by Messrs. John Bibby, Sons & Co. under the style of the "Bibby Line" until the year 1870, when it passed into the hands of Messrs. Frederick Leyland & Co., and was thereafter known as the "Leyland Line" until the Leyland Line was acquired by the Morgan combination, who sold the Mediterranean portion of their business to (now) Sir J. R. Ellerman, Bart., then chairman of the Leyland Line, the line in January, 1902, passing into the ownership of the Ellerman Lines, Ltd.—The *City Line*, see p. 753.—The *Hall Line*, which traces its history back for about forty years, has a regular service of passenger and cargo steamers between Liverpool and Bombay and Karachi, calling at Marseilles on the homeward passage. Also in conjunction with the Harrison and Clan Lines from Glasgow and Liverpool to South and East African ports.—The *Papayanni Line*, which was acquired from Messrs. Papayanni & Co., was established in the early 'forties, trading between Liverpool and the Mediterranean, touching at Tangiers, Algiers, Malta, Syra, Smyrna, Constantinople, Odessa, and Alexandria. In May, 1901, the business was sold to Sir J. R. Ellerman, Bart., and in January, 1902, passed into the ownership of the Ellerman Lines, Limited.—*Westcott & Laurance Line.* This business, established in 1866, was in December, 1901, acquired by the Ellerman Lines, Limited, the services consisting of lines between Antwerp and London to Malta, Alexandria, Smyrna, Odessa, Constantinople, Batoum, Novorossisk, &c.—*Coverley and Westray Line.* This line runs its service of steamers between London and Oporto, taking both passengers and cargo.

Fleet, 80 steamers; 301,479 tons.

London Registered Office, 12, Moorgate Street, London, E.C.

FEDERAL STEAM NAVIGATION CO., Ltd.—Upon the retirement of the noted firm of Messrs. Money Wigram & Son, Mr. Allan Hughes (the chairman of the company), who had been connected with them, organised the above line in 1885, the steamers of which fly a similar flag and bear names similar to the well-known Money Wigram's Blackwall packets, some of which were early to the fore in the adoption of the screw as an auxiliary. The fleet consists of large steamers engaged in conveying general merchandise to Australia and New Zealand, returning to South Africa and London with wool and frozen produce, being fitted with very large capacity for refrigerated cargoes. The twin-screw steamers *Dorset*, 7,630 tons, and *Suffolk*, 7,573 tons, are the largest.

Fleet, 11 steamers; 68,965 tons.

London Office, 2, Fenchurch Avenue, E.C.

FORWOOD BROTHERS & CO. This line, running to Morocco, Canary Islands, and Madeira, was established in 1872, and during 1908 was taken over by the Royal Mail Steam Packet Co. The sailings are now fortnightly from London, the voyage usually occupying 25 days, and the line specially caters for those desiring short sea trips for health or pleasure. Two new steamers, the *Agadir* and *Arzila*, each of 3,000 tons, have been added to the service.

Fleet, 5 steamers; 11,000 tons.

GENERAL STEAM NAVIGATION COMPANY, Ltd., established 1824, incorporated by Act of Parliament 1834, and incorporated under the Companies Acts 1862 to 1900 in 1902, is essentially a London institution. Besides East Coast services to Scotland, Continental trades are served between Hamburg in the north and Bordeaux in the south; other lines extend to the Mediterranean, Adriatic, Levant, and Black Sea. The sea-going services include the *Sheldrake*, 2,697 tons; *Adjutant*, 2,392 tons; the *Ortolan*, 1,800 tons, *Grive*, 2,037 tons, and *Drake*, 2,267 tons. The turbine *Kingfisher*, the fast paddle steamer *Eagle*, and five similar popular pleasure boats run during the summer season to seaside resorts in Essex, Kent, Suffolk, and Norfolk.

Fleet, 55 steamers; 55,148 tons.

London Office, 55, Great Tower Street, E.C.

GLEN LINE of steamships, which began about 35 years ago to run from London to the Straits, China, and Japan, belongs to Messrs. McGregor, Gow & Co., whose service for cargo and passengers is one of the most important of the few lines now owned privately, and has superseded the famous racing tea-clippers. *Glen Logan* is 5,723 tons, and *Glenroy* 4,910 tons.

Fleet, 9 steamers; 40,624 tons.

London Office, 1, East India Avenue, E.C.

HAMBURG-AMERICAN LINE, in point of carrying capacity, owns the largest fleet in the world, with the exception of the International Mercantile Marine Co. (Morgan Combine). The packet company began its Transatlantic service in 1847 with sailing vessels. The ss. *Borussia*, 2,026 tons, appearing in 1855, was followed by other steamers, monthly departures being kept up from 1856 until 1860, when the ships were sold, and enough steamers purchased to make fortnightly departures to New York, the sailings being increased to weekly ones in 1866. In 1888 the company decided upon twin-screws, and the *Columbia*, *Auguste Victoria*, *Normannia*, and *Furst Bismarck* successively joined the ever-swelling fleet. The *Deutschland* (16,502 tons, built at Stettin, 1900) held for some years the record for ocean steaming with an average speed on a homeward passage of 23·51 knots. The "P" ships are noticeable for their size as cargo and passenger ships, being each over 13,000 tons, with accommodation for 350 cabin and 2,400 'tween deck passengers, and very large cargo space. The Company's largest and best equipped Transatlantic steamers are the new leviathans *Amerika*, 22,250 tons, and *Kaiserin Auguste Victoria*, 25,000 tons. Both represent the latest developments in ocean travel, and are fitted with every comfort and luxury. The routes of the weekly twin-screw express steamers carrying the American and European mails are: Hamburg, Southampton, Cherbourg to New York, returning *viâ* Plymouth and Cherbourg. Other services leave Hamburg every Thursday for New York *viâ* Boulogne-sur-Mer and Plymouth, returning *viâ* Plymouth and Cherbourg, in addition to which there are regular services from Hamburg to Montreal, Halifax, Boston, Philadelphia, Baltimore, New Orleans, Galveston, West Indies, North, Central, and South Brazil, River Plate, Panama, Mexico (4 lines), Venezuela, Colombia and West Coast of S. America. There is also a service to Eastern Asia, to the West Coast of Africa, and to Persia; and others from New York to China and Japan, from New York to West Indies, New York to Brazil, and Stettin *viâ* Helsingborg, Gothenberg, and Christiansand to New York, returning *viâ* Christiania and Copenhagen. Mediterranean Steamship Lines run from Genoa *viâ* Palermo and Naples to New York. In 1908 services were started from Hamburg to West Africa and New York to Brazil. This company also manages the passenger business of the Union Line to New York, the Hamburg South American Company to Brazil and the Argentine Republic. Winter and summer cruises are conducted by the specially designed twin-screw steamers *Oceana*, 7,859 tons, the fine ocean pleasure yacht, and the steamer *Meteor*, 3,613 tons. In April, 1908, there were 8 steamers building (91,600 tons), counted in the total tonnage given, but 47,063 tons of river steamers, lighters, &c., are not included; 470,290 passengers were carried, in 1,228 voyages (miles traversed, 7,755,000), in 1907, and 6,312,930 cubic meters of cargo.

Fleet, 168 steamers; 908,679 tons.

London Offices, 22, Cockspur Street, S.W.; 81, Strand; 78, Gracechurch Street, E.C.

HAMBURG SOUTH AMERICAN STEAMSHIP COMPANY was established at Hamburg in 1871, the largest steamers being *Cap Arcona*, 9,955 tons; *Cap Vilano*, 9,467 tons. Regular passenger services are maintained from Hamburg *viâ* Belgium, France, Portugal, and Spain, to Brazil, Uruguay and Argentine. A new service has been established from New York to Brazil. There is also a Patagonian coasting line from there down to Punta Arenas and the Terra del Fuego.

Fleet, 44 steamers; 212,000 tons.

HANSA COMPANY, of Bremen, established in 1881, maintains regular cargo services from Bremen, Hamburg, and Antwerp fortnightly to Bombay and Karachi; fortnightly to Colombo, Madras, and Calcutta; thrice-weekly to Rangoon; a fortnightly service between Bremen, Antwerp, and the River Plate. Lines have also been established from New York to Calcutta and to South African ports, Savannah to Bremen and Hamburg, and Middlesbrough to India (four weekly). The *Drachenfels*, 7,217 tons, is the largest steamer; the total is exclusive of 12 lighters (4,581 tons), 2 tugs, and 2 launches.

Fleet, 51 steamers; 238,727 tons.

London Agents, J. H. Wackerbarth & Co., 26, Billiter Buildings, E.C.

HARRISON LINE was established in 1830, and is managed by Messrs. Thos. and Jas. Harrison, of Liverpool, under the name of the Charente Steamship Company, Limited, regular services being maintained to and from West Indies, United States, Mexico, Brazil, East Indies, South and East Africa, and South of France.

Fleet, 42 steamers; 212,000 tons.

London Agents, J. B. Westray & Co., 138, Leadenhall Street, E.C.; Gellatly, Hankey & Co., Billiter Street, E.C.

HOLLAND-AMERICA LINE, of Rotterdam, was established in 1872, and maintains a regular passenger and freight service between that port and New York *viâ* Boulogne-sur-Mer, as well as

a direct line between Amsterdam and Newport News. The twin-screw steamers *Potsdam*, 12,606 tons, *Rijndam*, 12,527 tons, *Noordam*, 12,531 tons, have been surpassed in size by the *New Amsterdam*, 16,967 tons, and the *Rotterdam*, 24,200 tons. The quickest passages between New York and Boulogne-sur-Mer are about nine days.

Fleet, 9 steamers; 108,542 tons.
London Agents, Browne, Geveke & Co., 102, Fenchurch Street, E.C.

HOULDER BROTHERS. & CO., Ltd., which became a public company in 1898, was established in 1849 by the late Mr. Edwin Houlder. Regular steamship services for passengers and cargo are maintained between England and Australia and New Zealand, England and River Plate, England and South and East Africa, New York and Australia and New Zealand, River Plate and South Africa, Australia and New Zealand and South Africa. The steamers of the "Grange" Fleet, under the company's management, are specially fitted for the conveyance of live-stock and frozen meat, in which an important trade is carried on between this country and Australia and River Plate. The two twin-screw steamers, *Drayton Grange* and *Oswestry Grange*, are respectively 6,664 tons and 7,367 tons. The twin-screw steamer *Everton Grange* is 8,095 tons.

Fleet, 12 steamers; 61,724 tons.
Head Office, 146, Leadenhall Street, London.

THE HOUSTON LINE was formed in 1883 by the senior partner of the firm of R. P. Houston & Co., of Liverpool. Regular services of freight steamers are maintained to and from United Kingdom to River Plate and South Africa; United States to River Plate and South Africa; Corunna and Vigo to River Plate; also Galveston to Liverpool and Continental ports; and from Australia to U.K. and Continent; River Plate to United States; also to Antwerp and Hamburg. The *Hyacinthus*, 5,756 tons, heads the list. 500 tons of harbour craft are not included in the total given.

Fleet, 24 steamers; 90,803 tons.
London Office, 16, Leadenhall Street, E.C.

IMPERIAL DIRECT WEST INDIA MAIL SERVICE COMPANY, Ltd., from Bristol to Kingston, Jamaica, W.I.—The *Port Morant*, 2,900 tons, opened this service from Bristol, Feb. 16, 1901, followed by *Port Antonio*, 4,455 tons; *Port Royal*, 4,455 tons; *Port Maria*, 2,900 tons; *Port Kingston*, 7,584 tons, and *Port Henderson*, 5,167 tons, with a capacity for 40,000 bunches of bananas, all new steamers. The *Port Kingston* accommodates 160 first and 60 second class passengers; the *Port Antonio* and *Port Royal*, 100 first and 50 second class; and the *Port Henderson*, 80 first and 40 second class. They are subsidised for the carriage of H.M. Mails, and specially fitted up for conveying fruit, being expected to bring home 20,000 bunches of bananas every voyage. The *Port Kingston*, sailing every six weeks, also calls at Bermuda outward bound. This praiseworthy effort to foster the West Indian-Bristol trade was promoted by (now) Sir Alfred L. Jones, K.C.M.G., whose firm (Elder, Dempster & Co.) manage the company.

Fleet, 6 steamers; 25,152 tons.
Head Office, Colonial House, Liverpool.

INTERNATIONAL MERCANTILE MARINE COMPANY.—A company formed in 1902, embracing the American, Atlantic Transport, Dominion, Leyland, Red Star, and White Star lines, together representing, with vessels building, a total of 132 steamers and 1,159,704 tons.

JOHNSTON LINE gradually entered the Mediterranean, Black Sea, Danube, and American trades, and keep up regular lines from Liverpool, London, and Antwerp. *Quernmore*, 7,302 tons, and *Rowanmore*, 9,456 tons—amongst the finest freight and live-stock carriers in existence—head the well-built, well-kept, and well-managed steamers belonging to Messrs. Wm. Johnston & Co., Ltd., of Liverpool.

Fleet, 18 steamers; 74,440 tons.
London Office, 1, St. Mary Axe, E.C.

KOSMOS COMPANY, of Hamburg, performs a direct service from Hamburg, Antwerp, and London, to the West Coast of South, Central, and North America, *viâ* Straits of Magellan. The line was begun in 1873 to Chile and Peru, and afterwards extended to various other Central American ports, the service having recently developed to the inclusion of Mexican ports, 'Frisco and Seattle. There are fortnightly departures to Chile and Peru from Hamburg and Antwerp, also a sailing from London every four weeks to Chile, Peru, Ecuador, Central America, Mexico, 'Frisco, and Seattle. The steamers range from the *Pentaur*, 3,060 tons, to the *Rhodopis*, 6,975 tons, and the *Rhakotis*, 6,982 tons.

Fleet, 36 steamers; 174,265 tons.
London Agents, Browne, Geveke & Co., 102, Fenchurch Street, E.C.

LAMPORT AND HOLT LINE.—The Liverpool, Brazil, and River Plate Steam Navigation Company, Limited, was formed in 1865, being popularly known as the Lamport and Holt Line, after its first and present managers. The steamers are run at regular intervals from Glasgow, Liverpool, Manchester, London, Antwerp, Havre, and New York to Bahia, Rio de Janeiro, Santos, Montevideo, Buenos Ayres, and Rosario; also to the ports of Chile, Peru, and Ecuador, on the West Coast of South America. There is also a line from New York to Manchester. All the steamers are fitted with telescopic masts. Those running between New York and South America form an excellent passenger and mail line, while many of the ordinary cargo steamers have first-class accommodation for a limited number of passengers. Others have been specially constructed to carry large numbers of horses, cattle, and sheep. Among the largest are the *Velasquez*, 6,988 tons; *Veronese*, 7,022 tons; *Voltaire*, 7,000 tons; *Rossetti*, 6,508 tons; *Raeburn*, 5,183 tons; and *Canning*, 5,366 tons. The *Verdi*, 7,000 tons, is the latest addition to this firm's large fleet, and a still larger vessel, the *Vasali*, is building and will be ready in February, 1909. In addition to their own fleet, 15 vessels, with a total tonnage of 55,000 tons, run regularly under the "L. & H." flag.

Fleet, 30 steamers; 130,000 tons.
London Office, 36, Lime Street, E.C.

LEYLAND LINE.—This old-established business was converted into a public company in 1892, after the death of its founder, Mr. F. R. Leyland. The company's fine fleet now includes the *Devonian*, 10,418 tons; *Winifredian*, 10,405 tons; *Bohemian*, 8,548 tons; *Canadian*, 9,302 tons, and *Cestrian*, 8,823 tons. In 1900 the company acquired by purchase the busi-

ness of the West India and Pacific S.S. Co., an old-established concern, with a fleet consisting of 22 steamers with a gross tonnage of 111,183 tons, and maintaining services from Liverpool to St. Thomas, Colon (for ports on West Coast of America), Kingston (Jamaica) and Mexican ports; also Barbados, Trinidad, and Spanish Main ports, returning to Liverpool from Galveston or New Orleans. Special attention has been paid to the cotton trade, and the steamers of the company engaged in it have the largest cotton-carrying capacity of any entering the port of New Orleans. In addition to the Liverpool and Boston weekly service, the company maintain a line between Liverpool and New Orleans for both passengers and cargo, as well as one between London, Antwerp, and New Orleans. Lines for cargo only are run between London and Boston, Antwerp and Montreal, and Manchester and Boston.

Fleet, 43 steamers; 249,014 tons.
Head Office, 27 James Street, Liverpool.
London Offices, 1, Cockspur Street, S.W., and 38, Leadenhall Street, E.C.

WILLIAM LUND commenced in the sail-making business in 1861, and in 10 years ably carved his way to the ownership of a fleet of sailing ships. After the Suez Canal was opened he changed to steam, and in 1880 he began his Blue Anchor Line of passenger steamships from London to and from Adelaide, Melbourne and Sydney with the ss. *Delcomyn*, 1,818 tons, this being the first regular direct steam cargo service between England and Australia; the *Narrung*, *Wakool*, and *Wilcannia* are each about 5,000 tons, and steam 13 knots. Recently, the twin-screw steamers *Commonwealth*, 6,611 tons, *Geelong*, 7,954 tons, and *Waratah*, 9,500 tons, have been added to the line. They are all first-class passenger steamers and carry H.M. mails between South Africa and Australia. The *Geelong* has gone from London to Adelaide, *viâ* Cape of Good Hope, in 36½ days. The average passage to Cape Town is 21 days, and to Australia 42 days.

Fleet, 6 steamers; 39,110 tons.
London Office, 3 & 5, East India Avenue, E.C.; *West End Office*, 21, Cockspur Street, S.W.

MANCHESTER LINERS, LIMITED (first and present chairman, Sir Christopher Furness, M.P.), was formed in 1898 to work steamship lines of modern cargo carriers to and from the port of Manchester, &c. Itinerary includes Canada, Philadelphia, and New Orleans, and back to Manchester. Largest is *Manchester City*, 7,696 tons.

Fleet, 14 steamers, 63,295 tons.
London Office, 4, Fenchurch Avenue, E.C.

MESSAGERIES MARITIMES DE FRANCE.—From a concern for inland mail carriage, the present noted company developed. In 1851 an over-sea contract was entered into for the French mails to Italy, Egypt, Syria, the Levant, and Greece. There are five services to Mediterranean and Black Sea ports, the last two trades being taken up in 1857. The India and China mail contract was secured in 1861. There is a service every 28 days to Australia and New Zealand, *viâ* Aden, Bombay, and Colombo; connecting at Colombo with the China main lines. A fortnightly service is maintained to Aden or Jibouti, Colombo, Singapore, Saigon, China, and Japan, with monthly connections for Pondicherry and Calcutta, and fortnightly for Java and the Tonquin ports. There are departures on 25th of every month to Aden, Jibouti, Mahé (Seychelles), Madagascar and Mauritius, connecting at Diego-Suarez for West Coast, and on 10th of every month to Jibouti, Mombasa, Zanzibar, Madagascar and Mauritius. The foregoing, with a weekly cargo line to London *viâ* Havre, sail from Marseilles. The mail service from Bordeaux to Brazil and River Plate, commenced in 1861, now leaves fortnightly, with a steamer once a month for cargo only. Cargo steamers are run from Antwerp to the Far East every two months, and from Marseilles every month to the French Possessions in Indo-China. The largest passenger steamers are the *Atlantique*, 6,446 tons; *Armand-Behic*, 6,385 tons; *Ville de la Ciotat*, 6,378 tons; *Australien*, 6,365 tons; *Polynesien*, 6,363 tons.

Fleet, 70 steamers; 306,818 tons.
London Office, 97, Cannon Street, E.C.

THE MOOR LINE of steamers, which trade to all parts of the world, was commenced in 1885 by Messrs. Walter Runciman & Co., of Newcastle-on-Tyne; the fleet is composed of modern-built vessels. The *Castlemoor*, 3,732 tons, and *Pearlmoor*, 4,119 tons, are the largest.

Fleet, 27 steamers; 92,809 tons.
London Office, 55 and 56, Bishopsgate St., E.C.

NATAL LINE.—In the middle of the last century, the firm of Bullard, King & Co. established a line of clipper ships between England and Natal, and in 1879 inaugurated the present service with the *Pongola*. Steamers are despatched every 10 days from London *direct* to Natal, Delagoa Bay, Beira, and East African ports, which offer special facilities for passengers and cargo for those ports. Besides a through service at regular intervals between South African ports and China and Japan, another fortnightly one, under contract with the Natal Government, from Cape Colony and Natal *viâ* East African ports to Madras and Calcutta, calls at Ceylon. The *Umzumbi* is 3,379 tons and 13 knots, and the *Umhlali*, the latest addition, is the same size and speed. Quickest passages: Outward, *Umvoti*, 22 days, 23 hours; Homeward, *Umtata*, 21 days, 12 hours.

Fleet, 15 steamers; 37,000 tons.
London Office, 14, St. Mary Axe, E.C.

NAVIGAZIONE GENERALE ITALIANA.—Under this title were united the lines which formerly belonged to Florio, of Palermo, and Rubattino, of Genoa, having the head office at Rome. There are lines from Italy to India, China, New York, Brazil, and River Plate, in connection with the company's Mediterranean, Adriatic, and Levant services. In 1901 this company joined La Veloce Navigation Italiana Co. in making the services weekly (instead of fortnightly), Genoa and Naples to New York, and from Genoa to Monte Video and Buenos Ayres. The total given includes eight steamers building, aggregating 50,800 tons. The largest is the *Lazio*, 9,396 tons.

Fleet, 109 steamers; 289,000 tons.
London Agents, A. Laming & Co., 8, Leadenhall Street, E.C.

THE NEDERLAND LINE, of Amsterdam, is subsidised by the Government of the Netherlands

to maintain a mail service between Holland and Java. The Nederland Steam Navigation Company was established in 1870, and now maintains three separate services, *viz.*, two from the Netherlands to the Dutch Indies, one carrying the Royal Mails, passengers, and goods, and the other cargo only. The third is a cargo line between Java and Bengal. *Mail Line.*—The nine mail steamers sail every alternate Tuesday from Southampton to Colombo, Sabang Bay, Singapore, Batavia, Samarang, and Sourabaya, *vid* Lisbon, Genoa, Port Said, and Suez. Colombo is, however, not to be touched by those homeward bound mail steamers leaving Batavia between June 1 and Aug. 15. Only the outward bound mail steamers call at Southampton and Lisbon. The steamers employed in the mail service are continually being replaced by more modern ships. The three newest-built steamers, the sister-ships *Rembrandt*, *Vondel*, and *Grotius*, are of 5,800 tons each. The connections with ports in Netherlands India are made with the steamers of the Koninklyke Paketvaart Maatschappy. Two boats of 5,900 tons each are being built for the cargo services, which employ 12 steamers.

Fleet, 21 steamers; 94,671 tons.
London Agents, Keller, Wallis & Co., 2 King William Street, E.C.

NEW ZEALAND SHIPPING COMPANY, organised at Christchurch, New Zealand, in 1873, carried on business for ten years with sailing ships specially built for passengers and the trade. The first direct steamer, *Stad Harlem*, conveyed in 1879 600 emigrants to the enterprising colony; four years later the *British King* began the Government mail contract, for which five steamers were built. Of the present fleet, seven are twin-screw steamers, the largest being the *Turakina*, 8,210 tons, and *Ruapehu*, 7,801 tons. New Zealand emphasises its British characteristics by sending here nearly all its produce, which the development of the frozen industries has multiplied. This company's *Mataura* sailed from Port Chalmers in 1882, with 150 tons of mutton prepared on board in the absence of the necessary plant ashore. The passenger steamers sail from London every fourth Thursday *vid* Plymouth, Teneriffe, Cape Town, and Hobart, returning round Cape Horn *vid* Montevideo. Rates are low compared with the conveniences and table supplied to all classes. This Company's new steamer *Otaki* was the first vessel fitted with turbine engines in combination with the usual reciprocating engines.

Fleet, 25 steamers; 104,222 tons.
London Office, 138, Leadenhall Street, E.C.

NIPPON YUSEN KAISHA.—In 1868 steamship communication was opened between Tokyo and Osaka by a company which gave way to a Mail Line under Imperial control in 1871. In 1882 the Union Navigation Company was started, but in three years the proved inexpediency of having two State-aided concerns resulted in amalgamation, and the above, known as the Japanese Mail Steamship Company, was established in 1885. Regular services were kept up from Kobe to Vladivostock, Tientsin, and Corean ports; a line between Japan and Bombay being put on in 1892. The importance of the company rose with the size of its fleet owing to the war with China in 1894, fifty of its steamers being engaged at one time transporting the 120,000 fighting men with their 100,000 attendant coolies. Independent of a complete Japanese coastal system, extending to all the principal ports in Japan, as well as to Keeling from Kobe, and to Bonin Islands from Yokohama, the European passenger line runs fortnightly from Japan to Antwerp and London, starting from Middlesbrough on the return journey; the American line is a fortnightly service connecting at Seattle with the Great Northern Railway for inland United States points. There is also a monthly line to and from Australia, and other services to China, Corea, Asiatic Russia, Hawaii, Straits Settlements, and India. By continually adding boats like *Tango Maru*, 7,463 tons, the fleet which hails from the kingdom of the Mikado has made such phenomenal progress that it now takes a prominent place amongst the first companies in the world. Steam launches (1,138 tons), 4 hulks, and 241 lighters, and 40 steam launches and tugs are not included in the total given. Six steamers are building (6 each, 8,600 tons).

Fleet, 95 steamers; 349,869 tons.
London Office, 4, Lloyd's Avenue.

NORDDEUTSCHER LLOYD sprang into existence in 1856, initial operations taking the form of lines to Hull and to London. On 19th June, 1858, the *Bremen*, 334 × 42 × 28, sailed to New York *vid* Southampton with 22 cabin passengers, 92 steerage, and 150 tons of cargo, followed by the *Weser*, the service being made fortnightly in 1866. Extensions to Baltimore 1868, New Orleans 1869, West Indies 1871, Brazil and River Plate 1876, evidenced the growth towards front rank which was assumed in 1881 with fast mail-boats built for an express Atlantic service, now maintained weekly from Bremen to New York *vid* Southampton and Cherbourg. The Imperial German Mail Service from Bremen and Hamburg *vid* Antwerp, Southampton, and Genoa to Eastern Asia and Australia, with various branch lines, began in 1885, and was followed in 1891 with an express line between Italy and New York in conjunction with the Hamburg-American Line. In 1892, the first twin-screw steamer, *H. H. Meier*, joined the fleet, which from that date has been completely reorganised and doubled. In 1897 the *Kaiser Wilhelm der Grosse* promptly won and for a time held the palm for ocean speed: in March, 1900, she crossed from Cherbourg to Sandy Hook in 5 days 20 hours 58 minutes, averaging 22·33 knots per hour over 3,148 miles distance run. In 1900 the steamers and trade were acquired of the Scottish Oriental Co. and the East Indian Ocean S.S. Co., and extensions made between Penang and Belawan (Deli) and between Singapore and Palembang, Asahan, and Sandakan (Borneo). The line from Singapore to Labuan has been extended one way to Sulu and the Archipelago, and the other way to Manila. Steamers have been built for the development of the company's Chinese coasting business, and which now carry the German postal flag far into the interior of China up the Yangtsze. A branch line has been established between Hong Kong and Sydney *vid* Mariana Islands, Carolines, New Guinea, and Queensland. In 1901 sailings were resumed from Bremerhaven to Cuba. In 1904 the Singapore and Sydney line *vid* Batavia, &c., was superseded by a new line from Sydney to Yokohama *vid* New Guinea, Manila, and Hong Kong; additional lines being also established between Genoa and New York, and between Marseilles and Alexandria, *vid* Naples. In 1906 the company started a weekly service to

the Levant. The *Kronprinz Wilhelm*, 14,900 tons, 35,000 H.P., joined the stately N.D.L. fleet in 1901, followed by the *Kaiser Wilhelm II.*, 19,361 tons, 45,000 H.P., built by the Vulcan Works at Stettin, and *Kronprinzessin Cecilie*, 19,503 tons, 46,000 H.P., all magnificent monuments to German shipbuilding and industrial art. The fleet includes 59 twin-screw ocean steamers (15 over 10,000 tons each), also 65,071 tons of river steamers and lighters, and 2 training ships, 5,823 tons, not included in total given below. The *George Washington*, 27,000 tons, now building will be the largest steamer. River craft, 65,071 tons; 661,258 passengers carried in 1907; 6,254,700 miles traversed; 4,390,051 tons cargo carried.

Fleet, 137 ocean steamers; 694,726 tons.
London Agents, Keller, Wallis & Co., 2, King William Street, E.C.

OCEAN STEAM SHIP COMPANY, Ltd., and CHINA MUTUAL STEAM NAVIGATION CO., Ltd.—The Ocean Steam Ship Company was formed in 1865 by Mr. Alfred Holt. The *Agamemnon* began the line on April 19th, 1866, sailing from Liverpool for Singapore and China *vid* Mauritius. The Cape route was given up on the opening of the Suez Canal. The company maintains (in conjunction with the China Mutual S.N.C., Ltd., which was formed in 1882, and of which Messrs. Alfred Holt & Co. acquired the control in 1902) a weekly service of cargo steamers from Glasgow, Bristol Channel ports, and Liverpool to the Straits Settlements, China, and Japan, with a four-weekly extension across the Pacific to British Columbia and Puget Sound; a three-weekly one from Amsterdam *vid* Liverpool to Sumatra and Java, and another between Singapore and West Australian ports. In 1901 a monthly line was begun from Glasgow to Australia. The *Antilochus, Bellerophon, Cyclops, Keemun, Ningchow, Oanfa, Teucer*, and *Titan* are from 8,900 to 9,000 tons each.

Fleet, 62 steamers; 343,342 tons.
London Agents, J. Swire & Sons, 8, Billiter Square, E.C.

ORIENT-ROYAL MAIL LINE are the contractors with the Commonwealth Government for the carriage of mails between England and Australia. The managers of the line are the well-known firms of F. Green & Co. and Anderson, Anderson & Co. The steamers, which have to make uniformly quick passages, sail from London on alternate Fridays, calling at Plymouth, Gibraltar, Marseilles, Naples, Port Said, Suez, Colombo, Fremantle, Adelaide, Melbourne, Sydney, and Brisbane, returning homewards in the reverse order. The comfortable accommodation afforded by this line to long-distance travellers, able to pay only the cheapest fares, testifies to the benefits conferred by steam navigation. When the Orient-Royal Mail Line began to carry passengers the passage from England to Australia occupied about 50 days; now it takes about 33 days. The outward and homeward steamers are timed to connect at Marseilles, so as to provide a sea voyage from London and back of 14 to 15 days, with not more than one day on shore. The Orient-Royal Mail Line are noted for their excellent system of pleasure cruises by large ocean steamships, varying in length from two to ten weeks to various parts of the world, according to season. In 1901 the *Ophir* was selected and specially fitted for H.R.H. the Prince of Wales when, with the Princess, he visited Australia to open the first Parliament of the Commonwealth. Five new twin-screw steamers, each 12,000 tons, are building.

Fleet, 10 steamers; 74,278 tons.
London Office, 5, Fenchurch Avenue, E.C.

PACIFIC MAIL STEAMSHIP COMPANY.—This well-known American line, which was established at San Francisco in 1847, maintains services to Central America, Japan, China, Honolulu, &c. The *Korea*, 11,276 tons, and *Siberia*, 11,284 tons, recently built in the United States, steam 18 knots, and the *Manchuria*, 13,638 tons, and *Mongolia*, 13,639 tons, each 16 knots.

Fleet, 18 steamers; 98,711 tons.
London Agent, Rudolph Falck, 49, Leadenhall Street, E.C., and 22 Cockspur Street, S.W.

PACIFIC STEAM NAVIGATION COMPANY, incorporated by Royal Charter in 1840, began business with the *Chile* and *Peru*, receiving a small subsidy. A bi-monthly service between Valparaiso and Panama necessitated four more steamers in 1852, the Pacific trade developing and fresh branches of commerce being opened up. Compound engines were welcomed and adopted in 1856, thereby reducing the costly consumption of coal, the scarcity of which article had been the earliest difficulty. The company's powers were enlarged in 1865 to run as far as the River Plate. In 1867 the capital was increased for the onerous performance of a monthly mail service from Liverpool, through the Straits of Magellan to Valparaiso, the *Pacific*, 1,630 tons, sailing from that port May, 1868. The success of the new line resulted in three sailings a month, and an extension to Callao by 1870. Again, two years later, the capital was added to, the *Sorata*, 4,038 tons, starting in 1873 a weekly service from Liverpool to Callao *vid* France, Spain, Portugal, Brazil, and River Plate, but trade with South America falling off, fortnightly departures were reverted to, and the requisite employment for some of the boats presented itself in 1877, when the *Lusitania* led the way to the Orient-Pacific Line. The fleet owned by the company contains a long list of noble vessels (called after South American places), with which its reputation is well sustained for safety, speed and comfort. The *Orcoma*, 11,532 tons, and the *Oriana, Ortega*, and *Oronsa*, each 8,000 tons, all twin-screw steamers, are the latest additions to the fleet.

Fleet, 50 steamers; 187,183 tons.
Head Office, 31–33, James Street, Liverpool.

PENINSULAR & ORIENTAL STEAM NAVIGATION COMPANY.—Mr. Brodie McG. Wilcox began to sow the seeds in 1825, and from the *William Fawcett*, 206 tons: 60 h.-p.: 74×15×8, blossomed the Peninsular Company, subsequently ripening into the above institution, which was

incorporated 1840 (see p. 743), and celebrated its Jubilee 1887. Universally known as the "P. & O.," it glories in the motto, "Quis separabit."

Mails were conveyed by Post Office sailing packets from Falmouth to Lisbon before the contract was given to the Peninsular Company. The Indian mails were at that time taken in Government steamers from Bombay to Suez. Prior to the completion of the railway, 1857 (followed by the Suez Canal, 1870), everybody and everything had to take the caravan route across the desert to Cairo, intimately associated with the name of Lieut. Waghorn, who organised quicker and better facilities, Nile steamers afterwards superseding the sailing boats between Cairo and Alexandria. From Alexandria, Home Government steam packets carried the mails to Gibraltar, where the Peninsular Company received them. They soon suggested and pressed a better service than this upon the Government, and eventually a line from England *vid* Gibraltar and Malta to Alexandria was begun by the *Oriental*, 1,610 tons, and *Great Liverpool* 1,540 tons, for which purpose the above company was constituted. The P. & O. Company secured the contract for the mails between Suez and Calcutta, in 1842, the first sailing being the *Hindustan*, 1,800 tons; but the East India Company obstinately refused to hand over their inferior Bombay-Suez Line until 1854, by which period the P. & O. had engaged to run to China and Singapore. The first service to Australia was interrupted by the Crimean War, 11 P. & O. boats being employed for the transport of troops. The necessity growing for an independent Australian mail line, the Government called for tenders in 1856, but the P. & O. declined the onerous conditions, which were swallowed by the European and Australian Steam Navigation Company, who soon failed. The Royal Mail Company stopped the breach but temporarily, and the Government, having learnt a lesson, accepted the tender of the P. & O. Company in 1859.

The mails are invariably ahead of the contract times, which for 1908 have been reduced to the following:—

Indian	mails: Bombay,	13¼	days from Lond.
China	,, Shanghai	30½	,,
Australian	,, Adelaide	28½	,,

The *Caledonia*, 7,558 tons, has landed the mails at Bombay within 12¼ days from London *vid* Brindisi, and the steamer's own passage between Bombay and Plymouth has been less than 17 days. The *Isis* and *Osiris*, running in the Brindisi-Port Said Express Service, have delivered the Egyptian mails within four days from the Metropolis of the Empire. The *Macedonia*, *Marmora*, *Moldavia*, *Mongolia* and *Mooltan*, each about 10,000 tons, and 18 knots speed, are the newest and largest mail steamers in the company's service, and the Company have under construction three additional steamers of the *Mooltan* type, but of larger tonnage, *viz.*, the *Malwa*, *Mantua*, and *Morea*. The *Salsette*, a 19-knot steamer of 6,000 tons for the Bombay-Aden Mail Service, has recently been completed. In 1907, 3,100,000 miles were traversed.

Fleet, 61 steamers; 425,000 tons.
London Office, 122, Leadenhall Street, E.C.

THE PRINCE LINE is the substantial handiwork of Mr. James Knott, of Newcastle-on-Tyne, since he despatched the *Saxon Prince* in 1881 as the pioneer of his present big fleet of ubiquitous steamers, of which the largest are the *Spanish Prince* (6,505 tons) of nearly 10,000 tons carrying capacity, and the *Norse* and *Royal Princes*, each of 9,500 tons capacity, and with a speed of 12 knots. The line has regular services from Manchester, Middlesbrough, Antwerp, London and Dunkirk to Tunis, Malta, Alexandria, Syrian Coast, Cyprus, Levant, and Smyrna, with return services to Manchester, Liverpool, Dunkirk, London, and other ports in the United Kingdom and Continent. Other lines maintained are those from Antwerp and London to the River Plate, and returning to the United Kingdom; New York to the Brazils and River Plate, and back to New York; New York to the Brazils, thence New Orleans, and from the latter port to the United Kingdom and Continent; Italian ports and Greece and the Levant to New York, with a return service to Italy, Greece and the Levant, carrying on the said line emigrants and cargo, New York to China, Japan, Philippines, Straits, and back to New York; New York to South African ports and back. During last year the steamers of the company carried 15,000 emigrants from Grecian and Italian ports to New York.

Fleet, 44 steamers; 136,220 tons.
London Office, 128, Fenchurch Street, E.C.

THE RED STAR LINE was established in 1872, and at first maintained a service between Antwerp and Philadelphia with the steamers *Nederland*, *Switzerland*, &c., but since then has developed and now maintains regular services between:—

1. Antwerp and New York with the powerful twin-screw steamers *Vaderland*, *Kroonland*, *Finland*, and *Zeeland*, each of 12,000 tons register, and with up-to-date accommodation for first, second, and third class passengers.

2. Antwerp, Boston and Philadelphia by a triangular service with the steamers *Menominee*, *Marquette*, *Manitou*, &c., these steamers having accommodation for cabin passengers only.

3. Antwerp and Baltimore by a regular service of cargo steamers.

Moreover, the line, when occasion requires, has a supplementary service between Antwerp and New York carrying third-class passengers and cargo by steamers of the *Samland* type.

The New York steamers call, West and East-bound, at Dover during the summer season for landing and embarking first and second class passengers only.

The Company has building at Messrs. Harland & Wolff's Yard, in Belfast, the steamer *Lapland*, 605 feet long, and 17,000 tons register, with most luxurious arrangements for about 700 cabin passengers on five decks. This steamer is expected to make her maiden trip in April, 1909.

Fleet, 14 steamers; 122,521 tons.
London Offices, 1, Cockspur Street, S.W.; and 38, Leadenhall Street, E.C.

JOHN T. RENNIE, SON & COMPANY, ABERDEEN DIRECT LINE.—The steamers of this line leave the West India Dock every ten days for Natal, Delagoa Bay, Beira, and Chinde, calling at Portland and the Canary Islands (Las Palmas and Teneriffe alternately); they also take passengers for East African ports as far as Mombasa. The line was inaugurated in the year 1856 with sailing ships which traded regularly between London and Natal. Steam was first tried in 1857 with the *Waldensian* and *Madagascar*, which were the first steamers on the South African coast, and carried

the mails from Cape Town as far as the port of Durban. The present service was commenced in 1882 with the *Dabulamanzi*, 1,679 tons. In 1886 the *Matabele* was the first steamer in the South African trade to be fitted with triple expansion engines, and steamed nearly 7,000 miles from London to Port Natal, without a single stoppage. The East African service was commenced in the year 1892, and the steamers of the Aberdeen Line now maintain a regular service as far north as Beira, calling at Delagoa Bay and Inhambane, and carrying goods also to the British concession at Chinde and Quilimane, these ports forming the best and cheapest routes for passengers for Rhodesia, Matabeleland, Nyassaland, British Central Africa, and the African Lakes District. Steamers carry British Parcels, Mails from London to Rhodesia and Nyassaland, and the British and Portuguese mails from Durban to the various ports they serve. The passenger fares are moderate and the accommodation, especially on the newer steamers, superior. The ss. *Inkosi*, 3,576 tons, 13 knots, has gone from London to Natal in 23 days 10½ hours' steaming time, and the *Insizwa* has completed the return passage in 22 days 2½ hours. The *Induna* (4,400 tons, 13 knots, latest addition) and *Inkosi* were the first ocean-going steamers outside transatlantic boats to be fitted with Marconi's system of wireless telegraphy.

Fleet, 9 steamers; 26,700 tons.

London Office, 4, East India Avenue, E.C., and 21, Cockspur Street, S.W.

ROTTERDAM LLOYD line of steamers to Java, *vid* Suez Canal, is under special mail contract with the Netherlands Government. The service was established in 1883 by the present managers, Messrs. Wm. Ruys & Sons, one of the oldest and most important shipowning and shipbroking firms in Holland. The steamers are despatched from Rotterdam, *vid* Southampton, fortnightly, for Padang, Batavia, Cheribon, Samarang and Sourabaya, calling at Lisbon, Tangier and Marseilles, from which last port passages of 20 days have been made to Batavia. The largest are the *Sindoro*, 5,468 tons, and *Goentoer*, 5,894 tons, both twin-screw steamers, 15 knots speed; one mail steamer is building of 5,700 tons; and one cargo steamer, of 9,000 tons dead-weight; 44 voyages in 1907; about 850,000 miles traversed;

Fleet, 19 steamers; 83,880 tons.

London and Southampton Agents, Escombe, McGrath & Co.

THE ROYAL MAIL STEAM PACKET COMPANY was incorporated 1839 by Royal Charter with a subsidy of £240,000. In 1857 the company temporarily took over the carriage of the Australian mails *vid* Suez. In 1868 the West Indian Mail Line was extended to Colon. In 1869 the South American main line was continued to Buenos Ayres (doing away with branch steamers from Brazil), developing by 1872 into a fortnightly service, and later into a weekly service. Services have recently been established from Glasgow, Avonmouth, Cardiff, Hull, London and Antwerp to the West Indies; and from Newport, Swansea, and Antwerp to Brazil; also a line to Cuba and Mexico from Newcastle, Antwerp, and Southampton, *vid* Bilbao, Santander, Vigo, Corunna and the Canary Islands. The West Indian Mail subsidy, which had dwindled to £85,000 a year, was allowed by the Government to lapse in 1905, much against the expressed wishes of the Colonies. The company availed themselves of the freedom to extend their West Indian Main Line service to New York *vid* Jamaica, maintaining their communications with the West Indian and British Guiana Colonies. In August, 1907, a contract was signed with H.B.M. Government Agents of the Colonies for a fortnightly inter-colonial service from and to Barbados—quite distinct from the West Indies and New York transatlantic service (run without subsidy). During 1904, 6 new cargo steamers joined the fleet. The *Aragon*, 9,795 tons, which sailed on her maiden voyage July 14, 1905, is the first of a series of similar vessels for the Brazil and River Plate route. The *Amazon*, 10,036 tons, and *Araguaya*, 10,537 tons, were launched in 1906, the *Avon*, 11,072 tons, and *Asturias*, 12,500 tons, in 1907. The R.M.S.P. service to Australia (carried on for a short time in 1857) was resumed at the end of 1905, the Company then acquiring a half-interest in the Australian mail service, which is now carried on by them jointly with the Orient Company under the title of the "Orient-Royal Mail" Line. In 1907 the company acquired a half share in the "Shire" Line, thus extending their operations to Japan, China, and the Far East. From London (Albert Dock), the ports of call including Port Said, Suez, Penang, Singapore, Hong Kong, Shanghai, Nagasaki, Kobe, and Yokohama. In 1908 the Company acquired Messrs. Forwood, Bros. & Co.'s line to Gibraltar, Mexico, Canary Islands and Madeira (see p. 755). Several steamers of 13,000 tons are building for the Australian mail service.

Fleet, 48 steamers; 205,554 tons.

London Office, 18, Moorgate Street, E.C.

SHAW, SAVILL AND ALBION COMPANY, LIMITED.—This company, successors to Messrs. Shaw, Savill & Co. and The Albion Co., established over 50 years ago, maintain a regular service of fast steamers between London and New Zealand. Their passenger steamers are despatched from London to New Zealand every four weeks, calling on the outward journey at Plymouth, Teneriffe, Cape Town, and Hobart (to tranship Australian passengers), and on the homeward journey, *vid* Cape Horn, they call at Monte Video and or Rio de Janeiro, Teneriffe, and Plymouth. The company also despatch fast direct cargo steamers monthly from London to various ports in New Zealand, while in addition a service of cargo steamers from Glasgow and Liverpool to New Zealand is maintained at regular intervals. The company own 13 steamers, including the twin-screw steamers *Kia Ora*, 6,558 tons, *Mamari*, 7,062 tons, and *Matatua*, 6,488 tons. The more recent additions to the passenger fleet are the twin-screw steamers *Arawa*, 9,372 tons, and the *Tainui*, 10,500 tons, which were launched in November, 1906, and September, 1908, respectively. All the steamers are fitted with patent refrigerators for the conveyance of frozen meat, as well as butter, cheese, and fruit, from New Zealand, and aggregate a total carrying capacity equal to about 3,000,000 carcases of sheep annually. Messrs. Ismay, Imrie & Co. have associated with this line their ss. *Athenic*, ss. *Corinthic*, ss. *Ionic*, and ss. *Delphic*, with a gross tonnage of 44,970 tons, which is not included in the total tonnage shown below.

Fleet, 13 vessels; 83,345 tons.

Head Offices, 34, Leadenhall Street, London, E.C.

THE UNION-CASTLE LINE.—Early in 1900 the two well-known steamship companies, the Union Steamship Company, Limited, and the Castle Mail Packets Company, Limited, the former company having been formed in 1853 and the latter one in 1872, who for many years had performed the mail service between England and S. Africa, were formally amalgamated, under the title of the Union-Castle Mail Steamship Company, Limited, the joint concern being managed by Messrs. Donald Currie & Co., who were the managers of the Castle Line. The Royal Mail steamships of the line, under contract with the Colonial Governments, are despatched from Southampton every Saturday for the Cape of Good Hope and Natal, calling at Madeira. The Intermediate steamships are despatched every Friday from London, calling at Southampton on the following day, for the Cape Colony, Natal, Delagoa Bay, Beira, and Mauritius, taking passengers at lower rates than the Mail steamers. These steamers proceed alternately *vid* Las Palmas or Teneriffe, and call once a month for mails at Ascension and St. Helena under contract with His Majesty's Government. At intervals, as the trade requires, extra steamships are despatched from England to the South African ports; steamers also call at Lobito Bay as required. Special tourist fares are arranged for the spring and summer to Madeira and the Canary Islands; also to Hamburg and Antwerp all the year round. The steamers of the fleet are amply furnished with every contrivance for the safety, comfort, and convenience of all classes of passengers. The largest steamers in the fleet are:—*Kenilworth Castle*, 12,975 tons; *Armadale Castle*, 12,973 tons; *Walmer Castle*, 12,546 tons.

Fleet, 44 steamers; 260,634 tons.

London Office, 3 & 4, Fenchurch Street.

UNION STEAM SHIP COMPANY OF NEW ZEALAND.—This company, established in 1875, is now the most important shipping concern in the Southern Hemisphere, and testifies to the expansion of both colony and company. In 1901 the company established a four-weekly mail service from Sydney to Vancouver, and discontinued running a steamer on the San Francisco mail route. The *Apurima*, 5,700 tons, the *Moeraki*, 4,400 tons, and *Manuka*, 4,400 tons, are twin-screw steamers added recently, and *Makula*, 8,075 tons, with a speed of 14 knots; the turbine steamer *Maheno*, 5,500 tons, is 17 knots. The *Loongana*, an 18-knot turbine steamer of 1,000 tons, is in the service between Melbourne and Launceston, a distance of 276 miles; the first steamer of this kind in the Southern Hemisphere. Four steamers are building.

Fleet, 65 steamers; 155,848 tons.

London Office, 34, Leadenhall Street, E.C.

DET FORENEDE DAMPSKIBS SELSKAB (The United Steamship Co.) of Copenhagen celebrated its 40th anniversary in 1906. It is the largest maritime undertaking in Denmark. The company's far-reaching operations cover services with Russia, Germany, Norway, U. Kingdom, Belgium, France, Spain, Italy, the Levant, also North and South America, 20 of the fastest steamers being fitted with refrigerating machinery for the transport of dairy produce. The Scandinavian Amerika Passenger Line is maintained between Copenhagen and New York, *vid* Christiania and Christiansand, for which service 4 twin-screw steamers, each over 10,000 tons, have recently been built, with a speed of 16 knots, each with accommodation for 1,500 passengers. The largest steamer is the *United States*, 10,101 tons. One ice-breaker and salvage steamer, 14 sea-going lighters, and 7 tug-boats belong to the company (6,116 tons). In 1907 3,553,046 miles were traversed.

Fleet, 135 steamers; 152,867 tons.

London Agents, The United Shipping Co., Ltd., 108, Fenchurch Street, E.C.

ANDREW WEIR & CO. were established in 1885 by the senior partner, when the barques *Willowbank*, 862 tons, and *Francis Thorpe*, 1,343 tons, were acquired. Starting building for themselves in 1886, the size of the fleet, known as the Bank Line, grew to 43 clippers, which gradually diminished as the number of steamships increased, the first belonging to the firm being the ss. *Duneric*, 1,878 tons, in 1896; now the ss. *Kumeric*, 7,000 tons, heads a list of 22 steamers grossing 86,036 tons. The *Cedarbank*, 2,825 tons, is the biggest of the 17 sailing ships, representing a further 32,911 tons, this being still one of the largest sailing fleets in the world. Both fleets are mostly employed in general trades. They have the following lines of steamers: New York to the Far East; New York to the River Plate; Calcutta to the River Plate; Calcutta to the West Coast of South America; Calcutta to Durban and South African ports; Puget Sound and British Columbia to China and Japan; and an Australian mail line from San Francisco to New Zealand and Australia. Since 1896 a regular service has been conducted between the Tees and the Forth.

Fleet, 39 vessels, steam and sail; 118,947 tons.

Head Office, 6, Lloyd's Avenue, E.C.

WHITE STAR LINE.—(*See* International Mercantile Marine Co.) The Oceanic Steam Navigation Company, Ltd., better known as the White Star Line, was founded in 1869 by the late Mr. T. H. Ismay. The *Oceanic* (3,807 tons, 430 feet long) sailed from Liverpool on her first voyage to New York on 2nd March, 1871. The *Britannic*, 5,004 tons, *Germanic*, 5,070 tons (1874-5), *Teutonic*, 9,984 tons (1889), *Majestic*, 9,965 tons (1890), were followed by *Oceanic II.*, 17,274 tons. In August, 1890, the *Medic*, 12,000 tons, inaugurated a service from Liverpool to South African and Australian ports. In 1903 the four largest steamers of the Dominion Line were taken over and renamed, a regular service being inaugurated from Liverpool to Boston *vid* Queenstown and from New York and Boston to Mediterrancan ports. Early in 1907 the Wednesday Royal United States Mail service was transferred from Liverpool to Southampton. The new service was auspiciously inaugurated by the palatial new twin-screw steamer *Adriatic*, 25,000 tons. The New York mail steamers of the White Star Line now leave Southampton each Wednesday morning, call at Cherbourg the same afternoon, and then proceed to Queenstown to take the mails on board. Homewards the steamers leave New York every Wednesday, and steam direct to Plymouth (where the mails and such passengers as so elect are landed); from thence to Cherbourg, and end the voyage at Southampton. As a consequence of this change, the White Star Line's passenger steamers from Liverpool for New York now sail each Thursday, and this service is maintained by the magnificent twin-screw steamers *Baltic*, *Cedric*, *Celtic*, and *Arabic*, the average gross register of which is over 20,000

tons. The Boston steamers are now despatched from Liverpool on Saturdays, instead of Fridays as heretofore; and in addition to the foregoing the White Star Line also has services between Liverpool and New York (cargo and live stock), Liverpool, South Africa, and Australia (passengers and cargo), Liverpool and Australia (cargo), Liverpool and New Zealand (cargo), New York and Mediterranean ports (passengers and cargo), Boston and Mediterranean (passengers and cargo). For the London and New Zealand passenger and cargo services, under the auspices of the Shaw, Savill & Albion Co., Ltd., the White Star Line has had built the *Athenic*, *Corinthic*, and *Ionic*, each 12,230 tons, the largest vessels in the New Zealand trade. The *Celtic II.* (20,904 tons) sailed from Liverpool for New York on her maiden voyage July 26, 1901. She has been surpassed in size by the *Cedric*, 21,035 tons, by the *Baltic*, 23,876 tons, and by the *Adriatic*, 25,000 tons. *Olympic* and *Titanic*, which in point of size will eclipse everything afloat, are building. Early in 1909 the White Star Line will enter the Canadian trade, maintaining a weekly service between Liverpool, Quebec, and Montreal, in conjunction with the Dominion Line. For this new service the *Laurentic*, a triple-screw steamer, 14,500 tons, was launched last September. She will be propelled by a combination of turbine and reciprocating machinery, from which interesting results are anticipated. The *Laurentic* and her sister-ship, *Megantic*, now building, will be the largest steamers trading to Canada; but the latter will be a twin-screw steamer driven by reciprocating machinery alone. All the services are maintained entirely with twin-screw steamers, and the average size of the White Star steamers is the largest in the world (13,020 tons per steamer), including some of the largest cargo and live-stock carriers in existence.

Quickest crossings to date:—

Steamer's Name.	West.	East.	Average Sea Speed.	Highest Day's Run.
	d. h. m.	d. h. m.	Knots.	Knots.
Oceanic	5 16 34	5 18 30	20·7	524

Majestic	5 17 56	5 23 16	20·4	520

Fleet, 29 steamers; 386,000 tons.

London Offices, 38, Leadenhall Street, E.C., and 1, Cockspur Street, S.W.

WILSON LINE.—The firm of Beckinton, Wilson & Co., founded at Hull, about 1835, by Mr. Thos. Wilson, became a private company in 1891 (Messrs. Thos. Wilson, Sons & Co., Ltd.), and has since been conducted by Messrs. Charles and Arthur Wilson. Mr. Charles Wilson was created Lord Nunburnholme in 1906, and died in 1907. The company is now the largest private ship-owning concern in the world. Ever since 1845, the firm has held the foremost position in the Baltic trade. In 1850 the present mail service between England and Sweden was started with the *Courier*, 400 tons, and soon developed into a large mail passenger service to the principal Swedish and Norwegian ports. The St. Petersburg, Riga, and Stettin trades were next included, the *Dido*, 1,409 tons, in 1869, being the first departure to the Adriatic, the same year operations being extended to the Black Sea. In 1875 the New York and Boston trades were entered, and have been developed into employing the most tonnage, the *Toronto*, 6,035 tons, a twin-screw steamer being the largest. In 1878 the steamers of Messrs. Brownlow, Marsden & Co. were purchased, and the Hamburg, Antwerp, and Dunkirk trades taken up. Connection with India, which had been maintained from 1870 to 1875, was resumed in 1883, with a line between Hull and Bombay, and in 1896 a service between London and Boston, U.S., was established in association with the Furness and Leyland Lines. In 1903 the fleet was acquired of Messrs. Bailey & Leetham, Ltd., numbering 22 steamers, with a total gross tonnage of 32,497 tons. In 1906 the firm amalgamated with the North-Eastern Railway Co., and Wilsons, and North-Eastern Railway Shipping Company was formed for Hamburg, Antwerp, Ghent, and Dunkirk trades, employing 9 steamers with an aggregate tonnage of 7,780 tons. The latest additions are the *Galileo*, 4,768 tons, *Rinaldo*, 4,280 tons, and *Hidalgo*, 4,270 tons.

Fleet, 80 steamers; 185,478 tons.

London Agents, The United Shipping Co., Ltd., 108, Fenchurch Street, E.C.

Our thanks are due to the owners and agents who have furnished us with information, and also to the Secretary of *Lloyd's Register of British and Foreign Shipping*.

HATCH, MANSFIELD & Co LTD

WINE MERCHANTS.

Telegraphic Address:
"LUSCIOUS, LONDON."

Telephone No:
GERRARD, 5325.

By special appointment to His Majesty King Edward VII.

47, PALL MALL, LONDON, S.W.

DIRECTORS:

SIR ERNEST F. G. HATCH, Bart., *Chairman.*

EARL OF DENBIGH.
Hon. SIDNEY GREVILLE.
LORD HYDE.
J. H. G. LANG, Esq.
(Bell, Rannie & Co.)
Hon. J. MANSFIELD.
A. ROSS MITCHELL, Esq.
C. W. HUGHES, Esq.
C. G. RAYNE, Esq.
(Newcastle-on-Tyne).

HOME DEPARTMENT.

THE extent of the Company's business has been largely augmented by the purchase of those of

BELL, RANNIE & CO. (Established 1715),
LONDON, EDINBURGH, PERTH, DUNDEE & AYR.

BARTON & CO. (Established over 100 years),
Late of St. James's Street, LONDON, S.W.

C. G. RAYNE & CO. (Established 1868),
NEWCASTLE-on-TYNE

DREMEL & CO. (Established 1856), LONDON.

JENNER & CO. (Established 1837), SANDGATE (Kent).

TATHAM, HUGHES & EARLE (Established 1820),
21, Philpot Lane, LONDON, E.C.

The extensive stocks of the Company, together with those of the above Firms—which were taken over *en bloc*—afford a selection of Wines and Spirits which, whether in point of quality or quantity, is not to be surpassed.

THE Company is also represented by the following Branches:

MANCHESTER...16, Albert Square. **LIVERPOOL**...16, Berey's Buildings, George St.

The Company's quotations are the lowest anywhere obtainable.

The Company pays carriage to any railway station in Great Britain, to any port in Ireland, and on quantities of 2 dozen bottles or their equivalent to any port in the world.

The Company only deals in wines of approved vintages.

The Company publishes the fullest particulars of every wine and spirit they quote, and affords every possible guarantee for authenticity.

[103

HATCH, MANSFIELD & Co. LTD

WINE MERCHANTS.

AGENCIES ABROAD.

TO meet the requirements of Englishmen resident abroad the Company has adopted the policy of establishing a series of agencies throughout the world, whereby customers may obtain in either the smallest or largest quantities the identical Wines and Spirits as supplied to leading Families and Clubs in England, and at the same time have the benefit of all the guarantees for quality and authenticity which the system of the Company affords.

The following are the Company's Agencies Abroad:—

INDIA	BOMBAY	Greaves, Cotton & Co.
	MADRAS	Oakes Brothers & Co.
	ADEN	Pallonjee, Dinshaw & Co.
CHINA	SHANGHAI	Ilbert & Co.
	FOOCHOW	M. W. Greig & Co.
	TIENTSIN	Wilson & Co.
E. AFRICA & UGANDA	MOMBASA	Allidina Visram.
W. AFRICA	GOLD COAST	F. & A. Swanzy, Ltd.
SIERRA LEONE		The Sierra Leone Coaling Co.
ZANZIBAR		Smith, Mackenzie & Co.

CIGAR DEPARTMENT.

Particular attention is drawn to our separate list of Cigars and Cigarettes, all of which have been selected with the utmost care and are in perfect condition for immediate use.

COMPLETE PRICE LIST, INCLUDING CALENDAR OF VINTAGES, AND CONTAINING OVER 400 VARIETIES, FREE ON APPLICATION.

THE STUDENT'S ENGLISH DICTIONARY.

Literary, Scientific, Etymological and Pronouncing. By JOHN OGILVIE, LL.D. New Edition, thoroughly Revised and Greatly Augmented. Edited by CHARLES ANNANDALE, M.A., LL.D., Editor of the New Edition of "The Imperial Dictionary." Extensive and useful Appendices. Nearly 800 Engravings on Wood.

"Leaving out of account the unwieldy and expensive recent editions of Webster and Worcester, we have no hesitation in saying that this is by far the most useful one-volume English dictionary at present existing."—*Athenæum.*

In one Vol., fcap. 4to, cloth, 3*s.* 6*d.*; half-roxburgh, 5*s.* 6*d.*; half-morocco, 7*s.* 6*d.*

THE CONCISE DICTIONARY OF THE ENGLISH LANGUAGE.

Etymological and Pronouncing, Literary, Scientific and Technical. By CHARLES ANNANDALE, M.A., LL.D. New Edition, Revised and Extended.

"Stands towards other dictionaries of the smaller character in the relation of the 'Imperial' to rival lexicons in other words, it holds the 'premier' place."—*Spectator.*

In Four Vols., imperial 8vo, half-roxburgh, £1 net; or half-morocco, £5 net.

THE IMPERIAL DICTIONARY OF THE ENGLISH LANGUAGE.

A Complete Encyclopædic Lexicon, Literary, Etymological, Scientific, Technological and Pronouncing. By JOHN OGILVIE, LL.D. New Edition, carefully Revised and greatly Augmented. Edited by CHARLES ANNANDALE, M.A., LL.D. Illustrated by above 300 Engravings on Wood.

"So far as vocabulary and treatment are concerned, we should not wish for anything better than the new 'Imperial.' The etymology is clear and concise, and the illustrations are copious, appropriate, and well executed."—*Times.*

London: BLACKIE & SON, Limited, 50, Old Bailey, E.C. [271

Stanford's Compendium of Geography and Travel.

New Issue. Revised and in great part re-written. 13 Volumes. Large Crown 8vo. Cloth, with numerous Maps and Illustrations. Price 15*s.* each.

"The new issue of 'Stanford's Compendium of Geography and Travel' is a publication of great value, and contains, in convenient form, the latest geographical results of travel and research adequately treated. Not only is the information accurate, but the form in which the work is produced is admirable, and English Geography may be proud of such a series. It is useful for educational purposes and for reference, and pleasant to the general reader."—*Athenæum.*

HAYDN'S DICTIONARY OF DATES

AND UNIVERSAL INFORMATION.

24th (1906) Edition.

For more than Sixty Years **HAYDN'S DATES** has been firmly established in public favour as a book which is indispensable in every office, library, and home and as **a Work which has no rival.**

The SPECTATOR: "Haydn's Dictionary is so complete, was so carefully constructed at first and has been so well kept up to date, that a little self-assertion is justified."

The DAILY MAIL: "Nowhere else in the world is to be found a work so universal and up-to-date."

Haydn's Dates is Indispensable to Everyone.

MESSRS. GABBITAS, THRING & CO.,

36, Sackville Street, Piccadilly, W.,

have a Department specially organised for **advising** Parents and Guardians as to the best **Educational Establishments** for **Boys** and **Girls** in the United Kingdom or on the Continent. The Firm have had experience as Educational Agents for more than thirty years, and can give information and advice as to: (1) Public and Endowed Schools; (2) Preparatory Schools; (3) Schools or Tutors' Establishments adapted specially for preparing Boys for Engineering, Agricultural, Scientific, or Commercial Careers; (4) Private Tutors preparing for Army, Civil Service, and University Examinations, or receiving backward or delicate Pupils requiring special attention; (5) Finishing Schools; (6) Schools for younger Girls; (7) Girls' Schools giving a thorough general education and preparing for Examinations; (8) Professors, Pasteurs, and Private Families receiving Pupils wishing to study abroad. To enable the Firm to advise efficiently it is necessary that *full particulars should be given*; especially as to the age of the Pupil, previous education, and present standard of attainments, special subjects of study, locality, whether a large or small establishment is preferred, and the fees it is intended to pay.

The Firm also can assist in procuring the services of Private Tutors, Resident, Travelling, Non-Resident, or Visiting, of whom they always have a large number on their Lists.

The Firm during their long career have been instrumental in sending Masters and Tutors to the leading Schools and Tutors' Establishments, and are in the closest touch with all Educational matters.

Masters and Tutors seeking Posts can have a Prospectus on application, free of charge.

CONTINENTAL.

NAPLES.

The sanitary condition of Naples has been so much improved that it can now rank as one of the healthiest and most agreeable cities in Europe. There is an abundant supply of excellent water, and wide streets have been opened through the most densely populated parts of the town.

INSTITUTO MACKEAN-BENTINCK.

INTERNATIONAL PROTESTANT SCHOOL FOR GIRLS.

The Bentinck Bequest enables the Committee to offer great advantages to resident pupils. Unusual facilities for acquiring modern Languages, Music, and Drawing. Sound General Education. School building and Garden exceptionally fine. Sanitation and water perfect. Excellent Health Record. Established 30 years. Specially from climate and location for Indian and Colonial pupils. Highest English and Foreign references. Apply The Principal.

WHITAKER'S SCHEDULE REGISTERS

OF

BOYS' and GIRLS' SCHOOLS.

Whitaker's system of Schedule Registers has been established in order to enable Parents and Guardians, in search of a suitable School, to ascertain all those particulars which cannot be contained in an advertisement in Whitaker's publications except at too great expense to the Principals.

Two pages in each Register are allotted to every School. The Schedules are most comprehensive, and the particulars are classified under five headings, viz., *General Information*, *School Buildings*, *Education*, *Special Features*, and *Domestic Arrangements*.

Only one form of Schedule is used, consequently all essential points can be obtained at a glance from the Register more quickly and easily than by reading through the ordinary prospectuses. Schedules are supplied free to advertisers to be type-written by them.

See pages 813 *and* 849.

METROPOLITAN SECTION.

BUSHEY HEATH.

With its vast stretch of open common, bracing air, and healthy climate, this high-class residential district enjoys a high reputation.

GIRLS.

WHITAKER'S LIST OF SCHOOLS AND CLIMATES

(SEASIDE AND INLAND).

In the selection of a SCHOOL, the climate to meet individual requirements is often of primary importance to Parents and Guardians, and Educational facilities must generally be considered when deciding upon a locality for residential purposes. A decision is difficult where so many districts in England, Scotland, Ireland, and Wales have evenly balanced claims and diversity of advantages. In "British Holiday and Health Resorts" (*vide* page 863) a uniform method has been adopted of presenting the natural characteristics and salient features of the principal health resorts in the United Kingdom. Many other places as well are noted for the number, variety, and excellence of the PRIVATE COLLEGES and SCHOOLS which flourish under favourable hygienic conditions. Isolated efforts of individuals to draw attention to the special advantages of their local surroundings having proved disappointing, Whitaker's List of Schools and Climates (Seaside and Inland) was established, and now constitutes the special educational supplement to "Whitaker's Almanack."

Terminal Fees (*inclusive*):—Day Boys, 7 to 9 guineas; Boarders, 27 guineas.

ASHFORD.

Ashford, in Kent, has a dry, bracing climate. Rainfall, low; prevailing winds, W. and S.W. Educational facilities splendid, there being the Ashford Grammar School, Ashford County School, and Ashford School for Higher Education.

BOYS. *Established* 1635.

ASHFORD GRAMMAR SCHOOL.

Principal - - JOHN EVANS, M.A.

Modern Education qualifying for Professional, Mercantile Life, or University. Preparatory all examinations, especially London Matriculation and Cambridge Locals. 75 pupils (8 to 19). Specialities: French, Science, Mathematics, English, Drawing, Natural History. Specially built. Detached grounds (5 acres). High elevation. S. aspect. Sanatorium. Gymnasium. Carpenters' Shop. Laboratory. Large Playing-field. Fives Courts. Tennis, Cricket Grounds. Domestic arrangements under Headmaster's life. Periodically inspected.

Entire charge Foreign, Colonial Pupils.

ASHTEAD.

A healthy, elevated Surrey village and rural residential district between Epsom and Leatherhead, 16 miles from London. Ashtead Woods, once a Saxon forest, are common lands. Surroundings are similar to Leatherhead, 2 miles.

GIRLS. **PARSONS MEAD.**

Principal - - - Miss ELLISTON,
Assisted by competent Mistresses and Visiting Professors.

HOME SCHOOL FOR DAUGHTERS OF GENTLEMEN. To prepare girls for HOME LIFE; cultivate interest in Literature, Music, Art; to play games energetically without losing interest in quiet, useful occupations.

School Course.—Comprehensive, embracing all usual subjects for modern education.

Healthily situated in own grounds (6 acres). Hockey Field, Tennis and Croquet Lawns, Riding, Swimming. PERFECT SANITATION.

Kindly recommended by Dr. Eustace Smith.

AYR.

The Medical Officer of Health writes:—"Ayr, due to its sheltered position and its maritime situation, has a very equable climate. Rainfall averages about 40 ins., but rain does not lie long. Safe, sandy shore makes Ayr a good resort for children."

GIRLS. **WELLINGTON SCHOOL.**

Principals—Miss CAY and Miss SMITH.
Carefully selected efficient Staff.

Private Boarding and Day School for Girls.

Course of Study: All usual subjects; Modern Languages taught (excellent results); many distinctions gained in Music; Art Department comprehensive, practical: Kindergarten division, certificated mistress; Physical Culture, speciality.

Public Examinations prepared for. Religious, moral and social training studied. Outdoor games, summer and winter.

School Premises specially erected; every essential; sanitation perfect.

Resident pupils enjoy comfort and refinement of home life.

Special arrangements for Pupils from Abroad.

BARNSTAPLE.

Barnstaple, situated on the Taw, is noted for its mild and equable climate. It is exposed to the sea breezes from the W. Has a rainfall below the average. There are no fogs, and the winters are particularly mild.

BOYS.

THE NORTH DEVON SCHOOL.

Headmasters { **W. O. TURNER, B.A.**
C. A. HALLET.

Assisted by fully qualified Masters.

Course of Instruction is arranged to fit pupils for Professional and Mercantile careers.

Boys specially prepared for Universities, Civil Service, and Cambridge Local Examinations.

Special Preparatory Classes for boys about to enter Public Schools.

Cricket, Football, &c. Drill.

BASINGSTOKE.

Is 240 ft. above sea-level, and one of the most bracing places in Hampshire. Has exceptionally good water supply and sewerage. Good train service; two packs of hounds; an excellent cricket ground; a golf links.

GIRLS. *Established* 1896.

GREENBANK HOUSE.

Principal - - Mrs. RUTH SMITH.
Assisted by Certified Governesses and Visiting Masters.

Modern Education.—Thorough preparation for Home and Business life. *Specialities.*—Music, Drawing, Painting. *Examinations.*—Cambridge Locals and Musical. Passed all candidates entered. *Modern Premises.*—Detached, well ventilated. Sanitation good. S.W. aspect. Large garden. Isolation ward. Library, Croquet. Tennis. Little boys (5–10) received. Domestic arrangements under Principal's supervision. Special provision for delicate, backward pupils.

Entire Charge, Parents Abroad.

BATH.

The Medical Officer of Health writes:—"Bath City and County Borough. Health resort Somerset. Pop. 50,000. Only Hot Springs in British Isles. 'Most perfectly equipped modern bathing establishments in Europe.' Extensive Roman remains. Subsoils. freestones, clay, sand and gravel. Elevation, 60 to 750 ft. Climate: where sheltered, similar to southern marine climates; where exposed, good range of temperature and bracing winds. Sunshine (1907) 1677 hrs. and rainfall, 32·3 ins. Water supply, pure and abundant springs."

Bath stands alone in Great Britain as a City of considerable size, and much reputation, the beginnings of which have been determined by the existence of Thermal Springs. Traditions assert that the first discovery of the Spring and acquaintance with their healing virtues was made in primitive times before the advent of the Romans.—Vide: *Climate and Baths of Great Britain and Ireland.*

BOYS. **HAMILTON HOUSE,**

LANSDOWN, near BATH.

F. E. ROGERS, M.A.

(ETON AND TRINITY COLLEGE, OXFORD).

Assisted by Two Resident Tutors.

Prepares about 28 boys for the Public Schools and Royal Navy. Very bracing, 800 feet above sea level. Connected by telephone with Bath. Playing Fields adjoin the house. Gymnasium; Workshop. A regular service of motor omnibuses runs from the Guildhall to the house.

GIRLS. **THE HERMITAGE HOUSE,**

BURLINGTON STREET.

Principal - - Miss GRACE WEBSTER.

School for the Daughters of Gentlemen.

Aim.—To give good sound education combined with advantages of home life. Studies based upon preparation for usual examinations. Great care taken with backward and delicate children. Every attention given to physical exercise. Entire charge of children where parents are abroad.

The School stands on high ground in one of the healthiest parts of Bath.

Sanitary arrangements thoroughly modern. Drainage certified.

BECKENHAM.

Population, 26,330. S.E. & C. Rly. One of the select residential suburbs within 8 miles of London. It still retains many attractive rural characteristics. There are excellent social and educational advantages, and the low death rate testifies to the healthiness of the district.

GIRLS. **ETON HALL.**

(Recognised.)

Principal - Miss McLEAN, B.A. *(Lond.)*

Assisted by large Staff highly-qualified English and Foreign Resident Mistresses, Visiting Professors.

Receives Daughters of Gentlemen. Thoroughly sound education, careful Social, Moral Training.

Preparation—All Examinations. Over-pressure avoided.

Specialities — Drawing, Painting, Music, Modern Languages.

Situated in healthy neighbourhood (London 9 miles). Gravel soil. Light rooms.

Large Garden, Riding, Bicycling, Hockey, Tennis, Swimming, Gymnastics (Certificated Professor). *Special arrangements where Parents abroad.* Inclusive Terms if desired.

GIRLS. **GROSVENOR COLLEGE.**

Principal - Mrs. LOCK.

School Course includes Religious Instruction, French, Natural Science, Class Singing, Needlework and usual English Subjects, Lectures for Advanced Pupils, Shorthand and Typewriting, Domestic Economy, Cooking.

Specialities: MUSIC, PAINTING & SOLO SINGING.

All Examinations prepared for.

Premises.—Situated on high ground, near Cotswold Hills. Large, well-ventilated rooms. Modern sanitation. Pleasant Garden attached (Lawn Tennis Court).

Swimming, Medical Drill, Riding.

Health and hygiene first consideration.

Preparatory department for children under 9.

GIRLS. **OLDFIELD LODGE,**

WELLS ROAD.

Principal - - - - Miss ELLIS, L.L.A.

The School provides thorough instruction and careful training under personal direction of Principal. Preparation for principal Examinations if desired.

Special care given delicate and backward girls; all undue strain avoided.

The House is situated in a high and healthy position. Good garden. Tennis ground. Well lighted and airy class-rooms. Separate cubicles.

Domestic arrangements under superintendence of Principal.

Every attention paid to health and comfort of pupils.

BIDEFORD.

The Medical Officer of Health writes:—"Is built on the side of a hill, chiefly of shale, and sheltered from east winds. Drainage and quality of water supply good. Death and sick rates low. Ideally healthy centre for visitors to Kingsley Country, and to the famous Westward Ho! golf links. Rainfall medium."

GIRLS. **EDGEHILL GIRLS' COLLEGE.**

Headmistress and Lady Superintendent:

Mrs. WOOLDRIDGE REED.

Assisted by fully qualified Staff.

The Buildings, standing on an estate of 12 acres, are spacious and convenient. Internal arrangements on most modern approved principle. Excellent systems of heating and ventilation.

Aims: To ensure thoroughness and afford pupils a thoroughly practical and useful education, together with advantages of a pleasant and comfortable home. Outdoor games and healthful recreation strongly encouraged.

BEDFORD.

The Medical Officer of Health writes:—"Bedford on the Ouse. Estimated population, 39,000. Railways, Midland, London 47½ miles; L. & N.W. to Oxford and Cambridge. Drainage modern. Water supply constant. Death rate, 10·7 per 1,000. Two Parks and several smaller recreation grounds. River-side Promenade more than a mile in length. Two Open-air Swimming Baths. Noted for its educational advantages; numerous good Private Schools. Soil, gravel and clay. Climate mild, very healthy. General and zymotic death rates very low. Surrounding country is pretty, and, with the river, affords unlimited opportunities for out-of-door exercise and sports. Bedford has made its modern reputation as a place for educational establishments, schools of every sort, for boys and girls of all ages, from kindergarten children to young men and young women preparing for their vocations."

BOYS.

ORKNEY HOUSE.

Headmaster—A. H. BLAKE, M.A. (Cam.)

Boys (6 to 14) prepared all usual subjects for Public Schools. Special Class for Royal Navy.

EXCELLENT LIST OF SUCCESSES.

Four Form Masters (each Form about 12). Visiting Masters for FRENCH, MUSIC, CARPENTERING, DRILLING, GYMNASTICS.

HOUSE built for School. Highest situation; in own grounds. Sanitation perfect. Large well-ventilated CLASS-ROOMS. All Games, Bathing, Swimming.

Mrs. BLAKE has entire charge of many boys (parents abroad) from 7 until Public School life begins.

BOYS.

AVENUE SCHOOL.

PREPARATORY SCHOOL FOR SONS OF GENTLEMEN.

BOGNOR—*see p.* 820

BOURNEMOUTH.

SOUTHBOURNE—*see p.* 853.

The Medical Officer of Health writes:—"For the past 50 years, Bournemouth has been adding to its reputation as one of the most perfect sanatoria in the United Kingdom. From early days it had gained a reputation with eminent men in the medical faculty, who found that a residence here for their patients for a few months in the spring, summer or winter gained lasting benefit, and in many cases the climate was curative in its effects, more especially to those suffering from diseases of the respiratory organs." The town is one of the most beautiful seaside and health resorts in the kingdom. Its verdant beauty is largely contributed to by pine woods, which have a peculiar health-giving influence in the spring, summer and winter months especially. The public gardens are very extensive and excellent facilities are provided for golf, bowls, croquet and tennis. Sunshine (1907), 1,790 hrs.

HARLEY SCHOOL,
WEST CLIFF.

Headmaster - - E. D. HAKE, M.A.

MISS BRAIDWOOD.

BOGNOR.

The Medical Officer of Health writes:—"Aspect, S. The air is remarkably pure, balmy, and bracing having mildness of southern and dryness of eastern coast. Very beneficial to persons sufferin from diseases of the chest. Exceptionally good water supply; unrivalled sands and safe se bathing, and an ideal winter health resort, protected from N. and N.E. winds by the South Down The atmosphere of Bognor is clear, dry and exhilarating. Fog, winter or summer, is almost a unknown quantity. In the summer few days occur on which there is not a slight breeze temperi the heat. In the winter the prevailing wind, being S.W., is warm. Snow is hardly ever see here. At high-tide the sea reaches right up to the parade, the shore getting well washed twi daily." Sunshine (1907), 1,808 hrs.; London, 1,234 hrs.

BOYS.

MANOR HOUSE SCHOOL.

Cricket, Football, Tenn Country Excursions, Swimming. Sole charge pupils by arrangement.

BRIGHTON.

The Medical Officer of Health writes:—"Brighton has the bracing qualities of places on the East Coast with a larger amount of sunshine and more shelter during unfavourable weather. Its rainfall is moderate; the roads dry rapidly after rain. The sunshine is 18 per cent. in excess of that of London, and the superiority is especially great in winter. Brighton is 7 per cent. warmer in winter and 10 per cent. cooler in summer than London. It has an unlimited pure water supply and perfect sanitary arrangements."

Brighton combines with the advantages of a seaside position some of the peculiarities of a large town, and extending as it does some distance inland, it presents great varieties in the individual aspect, in the altitude, and in the distance from the sea of particular sites. It may be almost divided into three towns, viz., Kemp Town at the east, Hove at the west (*see* Hove, page 835), and Central Brighton. Brighton is favoured in the possession of an aspect south and south-west, and with the advantages arising from the slope of the chalk downs and the open valley dividing the latter. The Brighton sky is famed for its clearness and brightness, and the air for its bracing quality. Sunshine 1907), 1,692 hours; London, 1,234 hours. Pop. 123,478. L. B. & S. C. Rly.

BOYS.

SEA-BATHING, CRICKET, AND FOOTBALL.

Private Ground. Morris Tube Range.

Games used as a means of inculcating honour and manliness. Experienced Matron.

BROADSTAIRS.

The Medical Officer of Health writes:—"Broadstairs is built on the cliffs half-way between Ramsgate and Margate. Aspect, S.E. The town, which is built upon high land on a subsoil of chalk, thus enjoying the advantages special to this geological formation, has no northerly aspect and is sheltered from cold winds. It is peculiarly fortunate in climatic fluctuations. Remarkably free from fogs and mists. Unusually high record of bright sunshine. The climate is equable and dry, bracing in summer, and mild in winter, suitable for invalids and delicate children throughout the year. The drainage system is excellent, and the water supply pure and abundant." Sunshine (1907), 1,799 hrs. London, 1,234 hrs. Death-rate (1907) 10.5.

BURNHAM.

Burnham (Somerset), on the east side of Bridgewater Bay, 7½ miles N. of Bridgewater, occupies a very healthy situation amidst fine coast scenery, with a dry sandy soil and excellent water supply. The climate of this part of the Bristol Channel possesses special recuperative properties, and is beneficial to pupils of delicate constitution, who generally show a marked improvement in health. The late Ven Archdeacon Denison in describing its attractions, said that it was the "healthiest place in the world."

BOYS. **ST. DUNSTAN'S SCHOOL,**
Headmaster: K. H. BIRD, M.A. (Camb.)

Boys from 6 to 14 prepared for Public Schools and Royal Navy. Thorough grounding in all subjects, with special attention to the modern side of education. Very young boys under a Lady. Nature Study and Science encouraged

BUXTON.

The Medical Officer of Health writes:—"Buxton is famous for its magnificent scenery, baths, &c.; in centre of Peak district, 1,000 ft. above sea-level—the highest in England—and nowhere is the air purer or more bracing. Water supply exceedingly good and soft. Epidemics are unknown. Prevailing winds, west and south-west. Buxton has a drier atmosphere than the great majority of other resorts; difficult to find a more healthy place or one more suitable for growing boys and girls." Situated at a great elevation among the high lands of the Peak district of Derbyshire, the town of Buxton lies in a deep valley built upon the junction of the mountain limestone and the millstone grit, and is surrounded by bold and picturesque hill and moorland scenery. This valley is approached by a ravine, through which the River Wye flows to its junction with the Derwent.

BOYS.

HOLM LEIGH PREPARATORY SCHOOL.

Headmaster: STEPHEN L. PETTITT, M.A.
(University College, Oxford).

Situated on side of Corbar Hill, overlooking Buxton, 1,000 feet above sea-level.

Instruction includes English, French, Latin, Greek, Natural Science, Mathematics. Preparation for Royal Navy and Public Schools.

Large Cricket and Football Field, Golf Links, Rifle Range; large Gymnasium; special interest taken in School Games; Library.

The charge of Indian and Colonial children can be undertaken during the holidays.

Established over 35 years.

BOYS.

BUXTON COLLEGE.

Headmaster: R. A. LITTLE, M.A., LL.D.

A SUCCESSFUL PUBLIC SCHOOL.

Situation.—Outskirts of Buxton, 1,000 ft. high. Suits delicate and healthy Boys. Prepares for Universities and all the higher branches of Civil Life.

Premises continually extended and improved to meet constant growth of School. Now include *Large Hall, Chemical Laboratory, Gymnasium, Workshops, Sanatorium*, and Laundry.

Play-fields very extensive; three Football fields and Cricket ground.

Sanitary arrangements perfect.

CHICHESTER.

The Medical Officer of Health writes:—"Population 12,244 Possesses high reputation for convenience (London, 1¼ hours), interest (Cathedral City), and healthfulness (death rate, 12 per 1,000) gravel soil; excellent water-supply and drainage; climate very mild; sunshine about normal; rainfall, 28.30."

BOYS.

THE GRAMMAR SCHOOL.

Established 1797.

Its aim is to provide a Sound Education on Modern Lines.

Special attention is given to the health and comfort of resident pupils.

Under the present headmastership 80 per cent. of boys entered for Public Examinations have passed.

Out-door exercise forms part of the school life, and a large field is provided near the school where cricket, &c., is played.

For terms and prospectus, apply Headmaster.

GIRLS.

Excellent accommodation for Boarders, who are under the care of Headmaster's wife.

SPECIAL ARRANGEMENTS MADE TO TAKE ENTIRE CHARGE OF BOYS WHOSE PARENTS RESIDE ABROAD.

Day boys, £20. Boarders, £60-£70.

CHELTENHAM.

The Medical Officer of Health writes:—"Cheltenham is a beautiful residential town, the chief present interest of which centres about its great colleges and schools. Of these the Cheltenham Boys' College and the Cheltenham Ladies' College are best known, the latter being the leading institution of its kind in the country. The Boys' College is noted as a preparatory college for the military and civil services. There are also the Dean Close School, Pates' Grammar School, the Training Colleges for School Teachers, &c. Latterly a considerable revival of the use of the Cheltenham medicinal waters has taken place, and patients are being ordered here for the cure. The climate of Cheltenham is similar to the rest of West Central England in being mild with a moderate rainfall, humidity and degree of bright sunshine. The effect is soothing and somewhat somnolent. There is no disease which occurs to above an average extent. On the other hand acute rheumatism is very rare, and bronchitis and other catarrhal diseases are well suited. Children of school age appear to do remarkably well here. Within a mile of the Borough boundary are the Cotswold Hills, which rise to an altitude of about 1,000 feet, and these very bracing heights are rendered easily accessible by a tramway. Sunshine (1907) 1,602 hours.

BOYS.

BRANDON HOUSE.

CHELTENHAM.

Mr. E. R. GURNEY, B.A. (St. Edmund Hall, Oxford).

Assisted by University men (Brandon House), and 4 Resident Governesses (Suffolk Hall).

Recommended by the Bishops of Calcutta and Colombo.

CLACTON-ON-SEA.

Pop. 7,453. G.E. Ry. 15 m. S.E. of Colchester, on the Essex coast. Clacton-on-Sea faces nearly due south, and is protected by cliffs. The town is built upon a gravel subsoil. The air is bright, clear, and bracing, and much brilliant sunshine is experienced. Fogs are very rare at Clacton, and rainfall small. The prevailing wind is from the south-west. The chief peculiarity is its dryness, due to small rainfall, porous nature of the soil, and well-made roadways. Clacton-on-Sea is especially suitable to chest cases which require a bracing climate. Sunshine (1907), 1,729 hrs., shone on 312 days. London, 1,234 hrs. Rainfall, 16.66 inches.

GIRLS. **OXFORD COLLEGE.**

Principals - - - The Misses MUIR.

Assisted by Certificated (English, Foreign) Resident and Visiting Teachers.

HIGH-CLASS SCHOOL FOR GIRLS.

Hockey, Tennis, Cricket, Gymnastics, Cycling, Swimming.

Entire charge where parents abroad.

GIRLS. CLACTON HIGH SCHOOL FOR GIRLS.

ST. PAUL'S HOUSE.

Headmistress - Miss F. M. SMITH

(*Certificated, Reg. Col. B.*)

And highly-qualified Staff.

BOARDING AND DAY SCHOOL. KINDERGARTEN.

Aim.—Thorough development of Mental and Physical Powers and training of Character.

Curriculum.—Usual subjects preparatory for Public Examinations and Musical Examinations Royal Academy and Royal College. Physical Culture. Nine consecutive years' preparation—Cambridge, Oxford Locals—without one failure.

Premises.—On cliffs. Close Sea. South aspect. Spacious, well-lighted rooms. Large garden. Library. Sanitation perfect.

Sea Bathing. Tennis. Hockey. Cricket.

BOYS. **GRAMMAR SCHOOL.**

Established 1890.

Principal, Rev. F. W. HILLE, B.A. (Lond.).

To provide sound education and comfortable home for boys, aged 7–16. Delicate boys individually studied.

Curriculum.—Modern University basis for Thorough COMMERCIAL and PROFESSIONAL career. Spelling, Writing, special features. Conversational French, German.

Drill (Sergeant-Instructor).

Premises.—Commodiously built for 35 Boarders. Playground.

Football, Cricket, and usual games encouraged, but delicate lads not pressed. Sea Bathing.

Domestic arrangements under Mrs. Hille.

SEPARATE BEDS.

CLIFTON (BRISTOL).

The Medical Officer of Health writes:—"Educational centre and health resort. Clifton College and many private schools. Population (1908), 44,539. Means of access, G.W.R. main line (2 hrs. from London), Midland and other railways. Excellent train services. Situation: On sides and summit of carboniferous limestone hills, open Downs of 442 acres at elevation of 300 ft., commanding views of Somerset, the Severn, and the South Wales hills. Suspension bridge at height of 245 ft. above river spans Avon Gorge. Climate mild and equable; air bracing, especially on slopes facing Bristol Channel; the mean temperature during the winter is rather lower than the south coast, but in March and April somewhat higher. The rainfall is not excessive, and does not differ much from that of the south coast. Water supply pure and constant. General death rate of Clifton for past three years averages 12·0.

BOYS. **"AVONDALE,"**

COLLEGE ROAD.

Mr. ADAM CLARKE ROWLEY

(B.A. Oxon.).

Prepares Gentlemen's Sons from 7 years of age for the Public Schools and Royal Navy. Entrance Scholarships gained at Public Schools. Headmaster's Wife personally looks after boys' health and comfort. Games on Downs (400 acres) close to house. Liberal Diet. Swedish Drill, Swimming in Summer. Indian and Colonial Children arranged for during holidays. Special care of delicate boys. Excellent health record.

BOYS. **THE DOWNS SCHOOL,**

CLIFTON, BRISTOL.

Headmaster - HUGH C. KING, M.A.

(ORIEL COLLEGE, OXFORD).

Preparatory School for Boys of the age of from 7 to 15, who are prepared and thoroughly trained for the Public Schools, Navy, &c. Modern house in the most healthy part of Clifton, immediately facing Durdham Downs. Great attention given to physical development by Swedish Drill, Gymnastics, &c. Special care taken of young and delicate boys. Fees very moderate.

GIRLS. **ROYAL PARK HOUSE.**

SCHOOL FOR GIRLS AND KINDERGARTEN TRAINING COLLEGE.

Principal - Miss BLANCHE WORKMAN

(B.A. London).

House pleasantly situated near the Downs, with Gardens and Tennis Lawn; commands sunny aspect. Ventilation and drainage perfect. Few strict rules enforced—purpose being to make the life as homelike as possible. Health record excellent. Every care and home comfort. Sound modern education. Entire charge of children from India and Colonies. Pupils from 7 to 19 years old.

COLCHESTER.

The Medical Officer of Health writes :—"Essentially a bracing place on elevated ground receiving air fresh from the sea nine miles away. Air very pure and free from mists and fogs, but cold in spring. Sunshine above the average. Rainfall low, averaging 18 inches."

A market and garrison town situated on the Colne, 17 miles S.W. of Ipswich, and supposed to have been built on the site of the Roman station Camalodunum.

BOYS. **THE CEDARS,**
STANWAY.
SCHOOL FOR THE SONS OF GENTLEMEN
(Resident Pupils only).

Principals - - Mrs. and Miss MANLEY
(Assisted by Resident Governesses and Visiting Tutors).

Situated within 1½ miles of Mark's Tey Station (G. E. Main Line). Pupils are prepared for the Public Schools and may remain to the age of 14 years. Home comforts. Delicate boys receive special attention. Constant supply of Alderney milk and butter from School dairy.

Entire charge taken of boys whose parents are abroad.

GIRLS **PEMBROKE HOUSE,**
OXFORD ROAD.

Principal - - - Miss C. STERNE.

The School provides a thorough, sound, up-to-date education for the daughters of officers, professional men and nobility only. All public examinations prepared for if desired. Special attention given to refinement of tone and careful training of individual character.

The School stands on high ground. Sunny aspect, open position, with well ventilated and bright rooms. The sanitary arrangements are modern and perfect.

Special arrangements for Anglo-Indian and foreign children.

COLWYN BAY.

The Medical Officer of Health writes :—"As stated in the standard work, 'The Climates and Baths of Great Britain and Ireland,' Colwyn Bay has become one of the most important health resorts of the north. It owes its rapid rise to its exceptional situation. The town is well protected from the prevailing winds and enjoys a large amount of sunshine. Number of hours of bright sunshine during 1907 was 1,573 on 312 days. Rainfall 22·33 ins., and mean temperature 54·5°. Climate in winter remarkably mild and equable. Water supply of excellent quality. Sewerage system perfect.

GIRLS. **NANT-Y-GLYN ROAD.**
PLAS-TIRION.
HIGH-CLASS FOR GIRLS.

Principals . { Miss WHITEHOUSE, A.C.P.

Outdoor Games.—Hockey, Tennis, Cricket.

House.—Large and pleasantly situated within five minutes of shore.

Reduction for Sisters and Clergymen's Daughters. Highest References.

CROYDON.

Croydon owes its prosperity and progress to its being within 10 miles of London, with an excellent train service, and to various natural advantages. It is one of the largest as well as one of the healthiest towns in the country, its advantages in this respect being due to its sanitation, subsoil and the pure air from the North Downs, on the northern slopes of which it is situated with attractive rural surroundings.

BOYS. **OXFORD HOUSE,**
BIRDHURST RISE, SOUTH CROYDON.
PREPARATORY SCHOOL
FOR BOYS UNDER 14 YEARS.

Day and Boarding School. Limited to 50 Pupils.

Spacious Premises, including Playground and large Cricket Field.

Pupils under the immediate care of the Principal and his wife, who have considerable experience with boys from our various Colonies.

Premises.—Expressly designed; all arrangements as perfect as possible. Sanitation annually tested and certificated. Grounds, 13 acres. Open-air Fives Court and Swimming Bath.

Mrs. BURGESS assisted by Lady Matron.

EDINBURGH.

For nearly 200 years the Metropolis of Scotland, apart from its historical associations, has been famous as an educational centre. The town is built on several hills, and the altitude of different portions varies considerably. Its University dates from 1582. In the matter of climate this beautiful city has been well endowed by Nature, influenced in the matter of its bracing properties by the city's proximity to the sea. Strong south-westerly winds blow during 119 days of the year, coming with unbroken, ozone-bringing force from the North Sea. Winter temperature same as London; summer temperature lower. Public parks, gardens, and meadows occupy 1,180 acres, 150 of which are suitable for games. Sunshine (1907), 1,178 hrs. London, 1,234 hrs.

GIRLS.

CRAIGMOUNT.

The education provided by the Misses GOSSIP is that of a high-class Ladies' School. The instruction, which is thorough and on modern lines, has for special aim the mental growth and the individual progress of the pupils.

While preparation for home life rather than for a University career is the end kept in view, the course of study includes all the usual branches of an English Education. Modern languages taught by Resident Foreign Mistresses.

The School has its own Gymnasium and Swimming Bath, and its Tennis Courts are within its own grounds.

The situation is exceedingly healthy.

The tone of the School is carefully guarded.

GIRLS.

ST. HILDA'S SCHOOL,

LIBERTON, near EDINBURGH.

The House, which is large and airy, stands within its own grounds on a hill to the South of Edinburgh. The climate is dry and bracing, and has been found especially beneficial to delicate girls. A sound curriculum is provided, and much is done for Literature, Music, and Art. Languages are taught on modern methods. Health is carefully studied. There is a large Recreation Hall fitted up with apparatus for Swedish Gymnastics. Field for Hockey, &c. 3 Tennis Courts. Riding and Swimming.

Headmistress—**Miss STOLTZ, M.A.**

GIRLS.

ST. BRIDE'S SCHOOL,

ETTRICK BANK, MERCHISTON.

(Established 40 years.)

Principals - - - { Mrs. MUIRHEAD, A.Mus. / Miss BIRD, M.A.

Assisted by a large Staff of Qualified Assistants.

School Premises situate in one of the highest and healthiest parts of Edinburgh.

Curriculum embraces usual subjects. Special attention paid Modern Languages, Music, Art, Science, Needlework, Gardening, Hand and Eye Training. Physical training under qualified Mistress. Special class for Remedial Gymnastics. Cricket, Tennis, Croquet, and Hockey. Swimming and Riding lessons if desired.

EASTBOURNE,

Sussex. Municipal Borough. Population, about 50,000. L.B. & S.C. Rly. 62 miles from London. Elevation, from sea level to 140 feet above; the districts of Mead and Upperton stand upon very high ground. Climate mild, invigorating, moderate rainfall. Bathing excellent.

The Medical Officer of Health writes: "Its advantages as a health resort are much sunshine, pure air, absence of fog, clean, quickly drying roadways, large parks and gardens with many trees, a plentiful and good water supply from wells sunk in the deep chalk, and the proximity to the breezy, health-giving South Downs. The climate is generally beneficial in anæmia, scrofula and tubercular diseases, and skin diseases; and its effects are especially beneficial in the case of convalescent children. Death-rate 1907, inclusive, 10·9 per 1,000; of residents, 10·4. Full benefit of winter sun is secured. Warm, sunny shelter always obtainable in centre of town. Beachy Head breaks S.W. winds, and diverts much rain, dryness of soil being promoted by great porosity of chalk." More sunshine recorded than in any other place in England for two years following 1906 and 1907.

GIRLS.

EASTBOURNE LADIES' COLLEGE.

HIGH-CLASS PRIVATE SCHOOL.

HOUSE built for school; near Sea and Downs; large Class-rooms. Sanitary certificate.

PHYSICAL CULTURE—Calisthenics, Swimming, Riding, Tennis, Cricket, Hockey.

Liberal education combined with comforts an refinements of home. Every attention paid t health and moral training.

Special care given to delicate Girls.

Entire charge taken of Wards in Chancery and those whose parents are abroad.

FOLKESTONE.

The Medical Officer of Health writes:—"Aspect, S. & S.E. The town is one of the best planned seaside resorts. The comparatively very healthy and dry climate is due to the porous nature of the geological formation, and, in addition, the facilities for drainage make mists, damp and fogs almost unknown. The water supply is constant, and the water exceedingly pure. The sanitation of the town is carefully guarded, and precautions taken from time to time to maintain its efficiency. For an educational centre it is particularly adapted." Sunshine (1907), 1,582 hours.

GIRLS. **ST. HILDA'S.**

HOME SCHOOL FOR GIRLS.

MISS ABBOTT receives a limited number of Resident Pupils for home care and education, assisted by highly-qualified English, French, and German Mistresses. Religious instruction in strict accordance with the teaching of the Church of England.

HARROGATE.

The Medical Officer of Health writes :—"Harrogate is the most important centre in Yorkshire for thoroughly equipped private secondary schools. The enterprise and educational zeal of highly qualified teachers, aided by the salubrity of the climate, have made these schools famous in every part of England. Harrogate is known as the 'Queen of English (Inland) Watering Places,' and is world-renowned for the medicinal properties of its waters and its magnificent baths, which are acknowledged to be the finest in Europe. The distinguishing features of the climate of Harrogate are its bracing atmosphere, low humidity, and abundant sunshine. The mortality is and always has been remarkably low. During the last 10 years the average death-rate has been 12·62 per 1000. The incidence of disease amongst the resident population is low. Epidemic diseases are uncommon, and when they occur they are most frequently from imported cases. Respiratory diseases are infrequent and rheumatic fever is seldom seen. Harrogate is undoubtedly one of the best-drained towns in the kingdom. Sunshine records, average for 6 years, 1796 hours."

Harrogate, M.B. Population, 32,000. North Eastern Rly. Location, 18 miles N. of Leeds, 30 miles W. of York. Elevation, 320 feet to 600 feet above sea-level. Neighbourhood, open moorlands. Principal - - R. REYNOLDS, M.A.

Very comfortable and successful School in bracing Seaside Resort.

Climate highly recommended for young or delicate children.

Sound education by Cambridge Graduate in First Class Honours.

Domestic arrangements under direct superintendence of Principal's Wife.

Fees 42 and 48 guineas per annum.

ST. HILDA'S.

Principal - - Miss L. M. GREENLAND, B.A.

A School for Daughters of Gentlemen, providing a sound, broad education, with special attention to French and German.

Preparation for Music Examinations, University Locals and London Matriculation.

School premises on the Promenade, facing the Sea. Soil, gravel.

Climate, bracing.

Sanatorium apart from School.

Tennis Courts and Hockey Fields a few minutes walk from School.

Entire charge taken of children whose parents are abroad.

HOYLAKE.

The Medical Officer of Health writes:—"Situated facing the sea, at the extreme point of the Wirral Peninsula. Sub-soil sandy. Rainfall average 27 ins. Very equable temperature—mean daily range 11° F. Average sunshine 1,466 hrs., average relative humidity 77 per cent. Prevailing winds S.W. Climate is excellent for convalescents, for growing boys and girls; the air is bracing and very pure. District is entirely residential, no manufactories of any kind. Winter climate is comparatively mild and well suited to elderly people. Average sunshine for Jan., Feb., and March is 214 hrs. An excellent place for those who suffer from debilitating diseases. Golf links one of the best in England." Sunshine, 1,493 hours, 1907.

BOYS.

KINGSMEAD SCHOOL.

Principal - - A. T. WATTS, M.A., B.Sc.

Assisted by J. H. WATTS, B.A., H. WATTS, M.A., and others.

Health, Outdoor Exercise, Diet, greatly studied.

Care of delicate children a speciality.

Special arrangements for Indian Children and others during holidays.

HOVE.

The Medical Officer of Health writes:—"The climate of Hove is singularly dry and fresh, being open to the bare Downs on the north, and the sea on the south. There is nearly always a good breeze, which in fine weather blows off the sea by day and off the Downs at night, thus preventing any feeling of oppressive heat or intense cold. London's foggy days are generally fine and sunny at Hove. It is specially recommended for those suffering from overwork or too active life in a busy town, and as a bracing change from the damper climate of the south-west of England. The humidity of the air is as low as 50 to 60 per cent. in the summer; the ground dries rapidly after rain. Rheumatism is rare. The death returns show that almost half of the persons who die reach the age of 60, and several live to be 90."

Health Statistics, &c.—Elevation, 22 ft. to 190 ft. Aspect, nearly south. Rainfall (1906), 26·84 ins. Climate mild, generally dry and equable. Water supply, constant, fairly soft. Drainage, modern. Soil, chalk, brick earth, or clay; very variable. Beach, shingle, clean, and slightly sloping; sand at low tide. Bathing, mixed.

BOYS.

HOLLAND HOUSE,

CROMWELL ROAD.

PREPARATORY FOR PUBLIC SCHOOLS AND NAVY.

Headmaster: W. B. C. CAWOOD, M.A. (Keble Coll., Oxford).

Swimming, Riding, and Driving Lessons. Continental tours arranged during vacations. Special arrangements made for pupils from India and Colonies.

HUNSTANTON-ON-SEA,

Norfolk. U.D.C. Pop., 1,893 in winter. G.E. Ry. Location on coast between Cromer and King's Lynn. Within 8 miles of Sandringham, the Norfolk residence of H.M. the King. Aspect, westerly. Soil, chalk. Beach, sand. Climate, bracing. Water, pure and plentiful. This little East Coast watering-place, situated on the Wash, presents the remarkable peculiarity of facing due west. Owing, moreover, to its being much protected from the north, and to a considerable degree from the east, the air here, although bracing, is not so keen as on the great majority of East Coast health resorts, while in the spring the piercing east winds are much less severely felt.

The Medical Officer of Health writes :—"Hunstanton shares with all the East Coast watering-places a great reputation for convalescents. Apart from this, Hunstanton seems specially adapted for children. The rapidly-drying soil, the absolutely safe bathing, the magnificent sands for exercise in wet or dry weather, perfect drainage, and splendid water combine to make it an ideal place for them. The number of schools and the wonderful physical progress of weakly children bear testimony to these advantages."

BOYS.

THE GLEBE HOUSE.

PREPARATORY SCHOOL FOR THE PUBLIC SCHOOLS, AND FOR THE R.N. COLLEGE, OSBORNE.

Headmaster, Mr. H. CAMBRIDGE BARBER, M.A.
(late Hastings Exhibitioner of Queen's College, Oxford).

Good Gymnasium Mistress for physical culture.

Junior department Kindergarten (children, 5 to 8).

Specially adapted for Children whose parents are abroad.

ILFRACOMBE.

The air is moist and unirritating; there is a large average amount of sunshine. The range of temperature is comparatively small. Climate is therefore favourable to all forms of respiratory trouble; peculiarly suited to children affected with catarrh.

GIRLS.

OXFORD PARK LADIES' SCHOOL.

Principals - Mrs. and the Misses WARE.

SOUND MODERN EDUCATION.

Careful training under Christian influence, with home comforts. Preparation for Camb. Locals, Associated Board of the R.A.M. and R.C.M., and other Exams., as required. List of successes supplied on application. Attention given to physical development.

Young Children carefully watched over, and entire charge taken.

The House is most healthily situated on high ground, overlooking the Sea.

ILKLEY.

The Medical Officer of Health writes:—"A health resort of high reputation due to its invigorating moorland air, the beauty of its scenery, and the purity and healing qualities of its waters, an ideal resort for convalescents, whether influenzal, gouty, tubercular, or surgical. The moorlands rise on either side to heights of 1,260 to 1,340 ft. One of the most attractive and healthy of our inland watering-places; situated among the noted bracing "dales" of Yorkshire and the valley of the Wharfe. Generally admitted to be pre-eminent for its beautiful scenery of exceptional variety. The death-rate average only 9 per 1,000. Children and flowers thrive vigorously. First-class golf courses, tennis, cricket, fishing, stabling, bathing, &c. Ilkley is noted for its beautiful, high-spirited, well-grown children." Garages, hockey, and rifle range.

BOYS.

ILKLEY GRAMMAR SCHOOL.

FOUNDED 1607.

House comfortable, beautifully situated in own grounds overlooking Sea. Tennis Lawn, Playing Fields. Farm attached. Own laundry. Excellent sanitation. Exceptionally healthy climate. References to parents at home and abroad. Apply—PRINCIPALS.

LITTLEHAMPTON—*see* p. 840.

LOWESTOFT.

The most easterly point in England, on coast of Suffolk. Population, 35,655. Means of access G.E. Rly., Midland and G.N. Joint Rly. Has long enjoyed a great reputation as a health resort, and is one of the most bracing places on the East Coast. Town is open to breeze direct from the North Sea, laden with invigorating ozone. Water pure and supply constant. Drainage modern. Sunshine (1907), 1,729 hrs. London, 1,234 hrs.

Therapeutical Effect of the Climate :—"The climate of Lowestoft is bracing and it seems well-adapted for anæmic and delicate children and at certain times of the year for early cases of phthisis. An attempt has been made of late to urge its claims as a Winter Resort."—*Climates and Baths of Great Britain.*

BOYS.

LOWESTOFT COLLEGE.

Headmaster - Rev. JOHN CLEGG, B.A.

Location.—College House stands 150 feet above sea level in the most healthy and bracing part of Lowestoft, overlooking the North Sea.

Sanitary arrangements have been submitted to the test of the Municipal Authorities.

Objects.—To furnish liberal education, principally of a modern character, but provision is made for Boys whose parents wish them to proceed to the Universities.

All games under supervision.

GIRLS.

ARDMORE,

NORTH PARADE.

GIRLS.

PELLEW HOUSE.

SCHOOL FOR GIRLS.

Principal - Mrs. BRAITHWAITE ARNETT

Assisted by first-class Visiting Professors and Resident Mistresses.

The House stands in its own Grounds, and there is a Playing Field attached. A High-class School in every way. The aim of the Principal is to give her Pupils a thoroughly good Modern Education, combined with careful Social and Moral Training, and the advantages of a Refined Home.

Entire charge taken of Colonial Boarders.

LYTHAM.

Dr. Andrew Wilson describes it as "the town of room and space and free air." An all-round-the-year health resort. Known as "the Garden of the Fylde" on account of its number of trees and rich greenery. The climate less bracing, and also quieter, than Blackpool, but somewhat more exhilarating than Southport. It is essentially a residential district suitable especially for patients affected with lung, heart, and rheumatic complaints.

BOYS.

LYTHAM COLLEGE, ANSDELL.

Principal—JOHN H. WATTERSON, F.R.G.S.

(Registered Column B.)

Resident and Visiting Masters.

MALVERN.

Malvern is picturesquely situated on the eastern and western slopes of the range of Malvern Hills, with extensive and magnificent views on both sides. The Hills, which rise to an altitude of 1,400 feet. are easily accessible for delicate persons, either on foot or by carriage. The climate has a most beneficial effect on invalids. The houses are so placed as to receive more than the ordinary amount of sunshine. Weakly children, especially those suffering from tubercular glands or continually recurring catarrhs, in nearly all cases do remarkably well here. The rainfall is low, and the soil dries with remarkable rapidity. The water supply is bountiful and of great purity, and the sanitary state of the district generally of a high standard. Persons having houses to let can obtain "Sanitary Certificates" from the Urban Council, and these are not granted unless the sanitary arrangements are thoroughly up-to-date. The average annual (corrected) death-rate for the past five years is as low as 9·9 per 1,000 of the population. Outbreaks of infectious diseases are few and quickly suppressed, as the Malvern Urban District Council are provided with every means for promptly dealing with any case that may arise. No trouble or expense is spared in making Malvern the "Queen of Health Resorts." Pop. 17,500.

BOYS.

THE SCHOOL, MALVERN LINK.

Mr. Wm. DOUGLAS, M.A. (Classical Honours),
Late Scholar of Keble College, Oxford,

Five years Assistant Master at Rossall School, and Mr. E. H. DOUGLAS, M.A. (Mathematical Honours), late Scholar of Eton and King's College, Cambridge, ten years Assistant Master at Glenalmond, receive a limited number of Boys between the ages of 8 and 14 to prepare for PUBLIC SCHOOLS and NAVY.

They are carefully grounded in Classics, Mathematics, English, and French.

Entire charge is undertaken of Boys whose parents are abroad.

Cricket (professional coach), Tennis and Football Grounds, Covered Playground, Fives Court, 9-hole Golf Course, Gardens, Conservatory 150 ft. long. Tele., 10 Darley Dale.

MARGATE AND CLIFTONVILLE.

M.B. Population, 26,000. Means of access, S.E. & C.D. Rly. Location on N.E. corner of coast Kent, 76 miles from London. Elevation from a little above sea-level to 105 feet. Water sup constant, from the country district of Wingham, 14 miles from Margate. Four miles west of t North Foreland, Margate has a world-wide reputation for the dryness of its climate, and t health-giving sea breezes to which it is exposed possess exceptional qualities.

The Medical Officer of Health writes:—"Nearly three thousand children are sent yearly Margate for their education. The chief reasons for the world-wide reputation of Margate a health resort appear to be: Its dry, bracing climate, the town is exposed to the sea bre from all quarters except the west; it has the smallest rainfall in England; there is a nota absence of fog; the subsoil is chalk, and the roads rapidly dry even after the heaviest rain. addition to a large expanse of firm, dry sands there are promenades extending along the and the sea-front for more than three miles, and a sheltered park in the Dane Valley. above exceptional advantages combine to make Margate a specially desirable residence for grow children during their school days." Sunshine: Margate, average for 16 years, 1,613 hours. Mar stands on two hills separated by the Dane Valley. The East Hill district is called CLIFTONVIL it is the highest part of the town. Hours of sunshine (1907), 1,626; London, 1,234 hours.

BOYS.

PLYMOUTH.

Plymouth, with Devonport and Stonehouse, on a promontory which projects into Plymouth Sound, is separated from mainland by the Tamar, forming the harbour called the Hamoaze, around which Devonport is built, 2 miles N.N.W. of Plymouth, standing very high. The three towns combine all the attractions of an arsenal, a mart, and a place of pleasure, with all the interests of one of the most historical sites in the kingdom. The average yearly temperature is 51 degs.; the prevailing winds are from the W. and S.W. Climate mild and equable; abundant supply of pure soft water. Aspect due south. Continuous snow and severe frost are rarely met with. The celebrated Hoe is a magnificent promenade. The Corporation has a Free Library, Baths, Museum, and Art Gallery, and maintains the Hoe and bowling green, where the famous game of bowls was played. The chief library contains 50,000 volumes. There are several parks and recreation grounds. Sunshine (1907), 1,655 hours. London, 1,234 hours.

RAMSGATE.

The Medical Officer of Health writes:—"The climate of Ramsgate is equable, invigorating, bracing, unmarred by sudden change. In the summer the sun's rays are deliciously tempered cool sea breezes. Fogs are practically unknown. The year 1907 was characterized in the dist by a rainfall somewhat below the average, only 20·31 inches. The amount of bright sunsl was 1,794 hours; this gives a daily average throughout the whole year of 4 hours and 54 minu During the six summer months, April to September, the daily average was 6 hours and 29 minu During the six winter months it was 3 hours and 19 minutes."

The Archbishop of Canterbury, speaking at Ramsgate on January 28th, 1907, said:—"He that England owed to Ramsgate a considerable debt, for there were scattered throughout land a large number of people who owed their good health to the holidays they were able to sp year by year at Ramsgate, and who were strengthened by its splendid air to continue their lab for another year. He congratulated them upon being among those who were able to confe large a benefit on their country."

Domestic arrangements under Principal's Mother. Health and home comforts studied. Kindergarten Class.

Entire charge where parents abroad.

WHITAKER'S SCHEDULE REGISTERS

OF

BOYS' AND GIRLS' SCHOOLS.

Whitaker's system of Schedule Registers has been established in order to enable Parents and Guardians, in search of a suitable school, to ascertain all those particulars which cannot be contained in an advertisement in Whitaker's publications except at too great expense to the Principals.

Two pages in each Register are allotted to every School. The Schedules are most comprehensive, and the particulars are classified under five headings, viz., *General Information*, *School Buildings*, *Education*, *Special Features*, and *Domestic Arrangements*.

Only one form of Schedule is used, consequently all essential points can be obtained at a glance from the Register more quickly and easily than by reading through the ordinary prospectuses. Schedules are supplied free to advertisers to be type-written by them.

See pages 813 and 849.

ST. ANNE'S-ON-SEA.

The Medical Officer of Health writes:—"The climate is of a medium character, being milder, less boisterous and bracing than Blackpool, but more bracing than Southport or Lytham. It is built entirely on sand, which immediately absorbs all moisture, and this fact, together with the exceptionally small rainfall it enjoys, gives the atmosphere a feeling of dryness, lightness, and vigour. The sunshine, moisture, and temperature compare favourably with other neighbouring seaside resorts, the last being warmer in winter and cooler in summer than inland towns." St. Anne's-on-Sea lies south of Blackpool and west of Lytham, connected with both these places by railway and electric tramway. It is a quiet little town of recent growth, and has been designed very much on the "Garden City" principle.

GIRLS.

ST. ANNE'S HIGH SCHOOL.

RESIDENTIAL FOR GIRLS.

Principals—

Miss HALL and Miss FULSTOW.

Spacious Premises, facing Sea, North Promenade. Large Playing Field.

J. WHITAKER & SONS, LTD., 12, WARWICK LANE, LONDON, E.C.

SEAFORD.

Population, 4,300. On the Sussex Coast, 58 miles from London, between Brighton and Eastbour L.B. & S.C. Rly. Climate of Seaford is equable, but bracing for south coast health resort. Ne very cold in winter, and summer heat always tempered by cool sea breeze, so that hottest days summer are not relaxing. It is a climate eminently suited to convalescents. The air has a t tonic effect on sick patients and produces a really marvellous improvement in a short time. T climate is dry, rainfall being small and, owing to chalky sub-soil, quickly absorbed. There large amount of sunshine enjoyed, and nothing to intercept it. There are no high hills to west to cut off the evening light, and in the winter the sun sets in the ocean. The prevailing w are south and west. From the north and east winds the town is considerably protected by h downs. The death rate has always been remarkably low, and the great age to which many inha tants live is quite proverbial. The Seaford Convalescent Home claims to have been the first of kind established in the county.

BOYS.

NEWLANDS,

SEAFORD, SUSSEX.

Mr. WILLIAM A. WHEELER, B.A.
(*Keble College, Oxford*),

SEVENOAKS.

The Medical Officer of Health writes :—"The main part of the town of Sevenoaks is built on high ground. The principal part of the High Street is situated at an elevation of over 500 feet above the sea level. The district is essentially of a good-class residential character, and, from absence of manufactories, is clean and attractive. The air is bracing. Soil, dry and gravelly. Excellent public water supply from deep wells, and main drainage to the Darenth Valley main sewer. The character of the soil and the altitude combine to render the views very attractive, the surrounding county being hilly and remarkably well wooded."

BOYS.

AVENUE HOUSE SCHOOL.

Principal - Mr. S. E. SYMES.

Boys prepared for Public Schools, Professional and Business Life. Number of Boarders limited.

Healthily situated, at an elevation of 450 feet above sea level. Sanitary arrangements in perfect order.

Many years' experience. A good mo English education given with Drawing, Nee work, Physical Training, Pianoforte. 10 Board only. Home comforts. Special attention Health. Oxford or Cambridge Local Exam tions if desired. Sheringham, in the midst pleasant country, Pine Woods and Sea, of healthy surroundings in the renowned "Pop land." Full care of Colonial pupils.

SOUTHAMPTON.

County borough. Pop. estimated 117,312. L. & S.W. Rly. London, 75 m.; Cowes, 12 Portsmouth, 26 m.; Bournemouth, 30 m. *Aspect:* South. *Water supply:* Constant. *Drainag* Modern. *Soil:* Gravel. *Front:* Southampton Water, western esplanade. Pier with pavili *Beach:* Shingle. *Bathing:* Mixed; in large open-air salt-water baths. *Annual fixtures:* Flow shows, regattas.

The Medical Officer of Health writes:—"Southampton enjoys one of the mildest climates in t British Isles, the mean temperature during the ten years 1897–1906 being 51·5 degrees. Mean maximum temperature in air, ten years (1897–1906), 58·7; mean of minimum, 44·3. The warm of the climate is probably due to the nature of the soil and the contiguity of the New Forest to t south-west of the town, across which the prevailing winds blow. The average rainfall is 3 inches, the number of rainy days being low. Southampton is also favoured in the matter of s shine, the annual average duration of sunshine being 1,717 hours." Sunshine (1907), 1,709 hours.

GIRLS.

NEW COLLEGE,

British Holiday and Health Resorts.

The figures at the end of the notices refer to the Educational Supplement, pp. 814–861.]

EVERYBODY, however good his constitution, needs more than ever in these wear-and-r times to renew his health-springs periodically by a holiday amidst fresh scenes and agenial surroundings. The choice of a suitable resort for pleasure or health, recreation or ose, is often difficult; there are so many places to select from in England, Scotland, land, and Wales whose claims are as evenly balanced as their attractions are diversified. lividual tastes and temperaments greatly vary, but the love of change is universal. Cheap lway fares, steamboats, motor cars, and bicycles have all contributed to extend the area hin reach of every holiday-maker from which to choose a fresh source of interest. To ible a preliminary opinion to be formed with as little trouble as possible a uniform thod of presenting the chief characteristics of each place has been adopted.

ABERDEEN,

rdeenshire. Pop. 174,579. A city and royal Burgh of great antiquity. Has a fine harbour numerous industries, including granite and fishing. STRATFORD-ON-AVON,

Warwickshire. Pop. 8,310. 8 m. S.W. of Warwick (G.W. Ry. and G.C. Ry.) stands on the right bank of the Avon in a beautiful agricultural county. The climate is mild, moderate rainfall, suits particularly children and elderly people. The chief object of attraction is naturally the birthplace of Shakespeare, with the adjoining wool-shop, the combined houses forming a half-timbered structure of two stories with dormer windows and wooden porch, a portion being used as a museum of relics connected with the poet and his times. They were acquired by the nation in 1874, and it is estimated that over 20,000 people annually make a pilgrimage to this literary shrine (*see* p. 854).

"AVONHURST," John Street. Private Apartments or Board-Residence. Well-appointed. Every home comfort. Few minutes' walk from Church, River, Theatre, and Station. Garden. Cycle accommodation. Sanitation perfect. Special arrangements for lengthened period or winter.

MRS. OLNEY, Proprietress.

Cheshire. Pop. 13,200. Wirral Ry., L.N.W. Ry., Gt.C. Ry. *Location:* 12 m. from Liverpool, 18 m. from Chester. *Elevation:* 280 ft. *Aspect:* S.W. *Climate:* Mild, well sheltered, little frosts. *Water:* Constant and abundant. *Soil:* Sandy, *Drainage:* Modern. *Beach:* Sand. *Season:* June to September. Noted golf centre, Hoylake. 18 holes; boating; driving; lawn tennis and bowling-greens. Yachting; bathing; boating. *Sunshine:* 1907, 1,493 hrs. (*see* pp. 859 and 834).

BOARDING HOUSE, Miss M. H. ROBERTS, 3, Park Road. Oldest Established. Best position. Liberal Table. To Parents and Guardians of those of Weak or Late Mental Development. A Lady, no family, most successful with such cases, is desirous to receive a case into her most pleasant Home. Highest references.

MRS. LITHERLAND, c/o above address.

WALMER (*see* DEAL, p. 881).

U.D.C. Pop. 5,715. Adjoins Deal. Also a Cinque Port, its castle being up till recently the residence of the Lord Warden, but now open to public inspection (*see* p. 857).

WHITBY,

Yorks. U.D.C. Pop. 11,755. G.N. Ry. An ancient port and fishing town between Saltburn and Scarborough, on each side of the mouth of the River Esk, surrounded by hills, dales, woods, rivers, and moorland; extensive sands. two free piers at harbour entrance. It now attracts large numbers of visitors in the summer, Promenades along West Parade, bordering extensive sands, the Harbour piers, and the W. bank of the river. *Aspect:* Due north. *Climate:* Bracing. *Drainage:* Modern. *Water supply:* Good. *Soil:* Clay. *Beach:* Sandy. *Bathing:* Mixed, from machines and tents. Golf links (9 holes), sea and river fishing, excellent facilities for yachting and boating, tennis (*see* p. 860).

YORK HOUSE BOARDING ESTABLISHMENT, Royal Crescent. First-class House, facing Sea. Best position on West Cliff. Close to Tennis Courts and Bathing Ground. Private Sitting Rooms. Particulars from

MISS DOUGHTY, Proprietress.

CRESCENT BOARDING HOUSE. Full Sea View. Private and Public Rooms. Smoking Room facing Sea. Terms on application.

MRS. PATTISON.

WESTON-SUPER-MARE,

Somerset. U.D.C. Pop. 22,500. *Means of access:* G.W. Ry., Midland Ry.; steamers from S.Wales. On the Somerset coast, opposite Cardiff. *Climate:* Equable, dry, bracing. *Sunshine:* 1,572 hrs., 1907. *Soil:* Sandy. *Front:* 2 m.; promenade and carriage drive on sea-wall. *Piers:* 2. *Sea-bathing:* Mixed. *Baths:* Swimming, seawater, electric, Turkish, and general establishment. A prominent and popular summer and autumn watering-place, open to Atlantic breezes, largely resorted to by people from the Midlands and inland parts of West of England; built on the well-wooded slopes of Worlebury Hill, and at its base protected from N. and E. Municipal pavilion and opera house and grand pier pavilion (concerts, military bands, dramatic entertainments), 4 public parks, 400 acres woods, golf links (18 holes), hunting, coaching, tennis, bowls, hockey, boating, free library, museum, reading-room, gymnasium, school of art, sanatorium, convalescent home, and electric trams (*see* p. 858).

LEETE'S PRIVATE HOTEL. Southerland and Addington Houses. Highly recommended. Old established. Special winter terms. Trams to Golf Links pass the door.

Telegrams, "Leete's." Telephone, 0297.

HOUSE AND ESTATE AGENTS, REMOVAL CONTRACTORS. Illustrated Property Register of Furnished and Unfurnished Houses free on application. Valuations for Probate; Mortgages arranged. Auctioneers and Surveyors.

WANSBROUGH SONS & GARNER,
Telephone, No. 9. High Street.

WEMYSS BAY.

An attractive watering-place on the Forth of Clyde, 6 m. S.W. of Greenock. Has excellent facilities for short sea trips. Good golf links (12 holes).

WEYMOUTH—*see* p. 825.

WHITLEY BAY,

Northumberland. U.D.C. Pop. 14,000. N.E. Ry. A growing watering-place on the cliff coast, connected with Newcastle by electric tramway service. Golf links, bathing, boating, fishing.

WHITSTABLE.

Pop. 8,000. On the Kentish coast. Famous for its oyster fishery. Church is of considerable antiquity, and there is a good literary institution, with a marine aquarium. The sea front is being developed, and there is a pier.

WEYMOUTH.

WEYMOUTH AND MELCOMBE REGIS, Dorset. M.B. Pop. 19,831. *Means of access:* G.W.Ry. and L. & S.W. Ry. *Location:* Divided by the River Wey, on Weymouth Bay, opposite Isle of Portland. They form one combined borough. *Temperature:* Equable. Seaport town and popular watering-place. *Climate:* Bracing, but mild during winter. Boating and fishing; also steam-boat and *char-à-banc* excursions. Mixed bathing allowed, also visitors' private bathing tents on foreshore. Noted for number and standing of its private schools. G.W.R. Service to the Channel Islands (*see* p. 859).

HUNT'S COMMERCIAL AND FAMILY TEMPERANCE HOTEL, 29a and 30, St. Thomas Street. Two minutes' walk from Sea Front. Five minutes' walk from Railway Station. Special attention given to the convenience and comfort of Commercials, Visitors, and Cyclists. Terms very moderate.

W. THOMAS, Proprietor.

BELVIDERE HOUSE. Board and Residence. Beautifully situated, facing the Sea and Esplanade. Best part of Weymouth. Five minutes from the Railway Stations.

CLARENCE HOUSE BOARDING ESTABLISHMENT. Facing the Bay and Alexandra Gardens. Close to Pier. Drawing, Dining, Smoking, and Recreation Rooms. Home Comforts.

MISS TUCKER, Proprietress.

HOUSE AGENT, AUCTIONEER, & VALUER. F. W. FULLER, F.A.I., 33, St. Thomas Street, Weymouth.

WINDSOR,

Berks. Pop. 13,958. *Means of access:* G.W. Ry. and L. & S.W. Ry. A Royal and ancient city of world-wide interest. Its famous castle, founded by William I., has been for many centuries the seat of British Royalty, and, with Windsor Park and Virginia Water, claims the attention of tourists and visitors. These advantages, added to the proximity to Eton and its famous college, have attracted many residents to the district, and a new town has grown on the outskirts of Old Windsor (*see* p. 860).

SOUTH-WESTERN. Family and Commercial Hotel. Close to both stations.

RIVERHOLM PRIVATE HOTEL. Garden and Landing Stage adjoining Windsor Bridge. Bath (h. and c.). Electric Light. Good accommodation for River Parties. Moderate Tariff.

MISS OUTLAW, Proprietress.

WINCHESTER,

Hampshire. Cathedral city. Pop. 20,929. *Means of access:* L. & S.W. Ry. and G.W. Ry.; 60 m. from London; 12 m. from South Coast. *Climate:* Mild. *Baths:* Open, swimming. *Annual fixtures:* Several fairs; cricket week; golf links (3 courses, 18 holes); fishing. Winchester cathedral is the largest and one of the oldest in England, its nave being considered the finest. Other attractions are the County Hall, the Hospital of St. Cross, the Thrupp Gallery, the museum, and numerous institutions, ancient and modern. In the city is the famous Winchester College.

WINDERMERE—*see* p. 897.

WIMBLEDON,

Surrey. L. & S.W. Ry. 7 m. S.W. of London. Noted for its open, breezy common of 628 acres, which is 200 feet above sea level. It is a healthy, bracing, residential town. *Soil:* Gravel. Well supplied with all the essentials of a modern district as regards facilities for amusements, recreation, and education. The opportunities for riding and cycling afforded by Richmond Park and the Common are exceptionally good. Wimbledon is now connected with New Malden, Kingston, Hampton Court, and Tooting by a service of electric trams connecting with the L.C.C. systems to the City (*see* p. 859).

AUCTIONEERS, &c. THOMAS HOLLOWAY, successor to PARSONS & TOWNSEND, Auctioneers, House & Estate Agents, Valuers for Probate. List of Houses and Furnished Apartments to Let (near the Common) forwarded on application. 25, High Street, Wimbledon Common. Telephone, 53 Wimbledon.

BUILDERS, DECORATORS, &c. THOMAS HOLLOWAY, Successor to PARSONS & TOWNSEND, Builders, Decorators, Plumbers, and Sanitary Engineers, &c. A special staff of Experienced Men for Jobbing Work, Electric Lighting, &c. Drains Tested. 25, High Street, Wimbledon Common. Telephone, 53 Wimbledon.

WINCHMORE HILL.

Is a pretty and healthy suburban residential district in Middlesex, at an elevation of 180 feet, on gravel soil, 7¼ miles N. from London, with which it is connected by good travelling facilities (*see* p. 860.)

WELSHPOOL.

Pop. 6,121. A town of Montgomeryshire, North Wales, near the Severn's left bank, 20 m. W. by S. of Shrewsbury. Parish church (restored by Street), town hall, and market (with a clock tower 90 feet high), Powysland Museum. Powys Castle (with a fine picture gallery and park) is one mile distant.

WOODHALL SPA,

Lincolnshire. U.D.C. Pop. 1,100. G.N. Ry., 18 m. from Lincoln, 5½ m. from Horncastle. *Elevation:* 50 ft. *Neighbourhood:* Flat and woody. *Climate:* Dry and bracing; small rainfall. *Soil:* Ironstone sand. *Drainage:* Modern. *Water supply:* Constant. *Mineral waters:* Bromo-iodine. The baths and pump-room contain all modern improvements. They are encircled by a tiled and covered promenade, and stand on extensive pleasure grounds, where the band plays. Massage. Tennis, croquet, bowls, and golf (18 holes) in adjoining grounds. Angling. *Season:* March–November. The bromo-iodine water, which has made Woodhall famous, is the most powerful of its kind in Europe, and many dangerous and distressing diseases give way before its curative virtues. This inland watering-place stands on a plateau some 50 feet above sea level; the neighbouring country is flat, but the town is surrounded by extensive pine-woods, moorlands, and cultivated fields (*see* p. 860).

EARLHAM. Comfortable Boarding House. Near Baths, Station, Pine Woods, and Golf Links. Terms moderate. Special terms for winter.

E. FORD.

AUSTRAL HOUSE. Visitors may here obtain First-class Furnished Apartments. This fine residence is pleasantly situated in a central position near to the Baths, Station, Church, Woods, and New Golf Links.

MRS. STUBBINGS.

P.O. Telephone, 35.

STANHOPE HOUSE. First-class Apartments for Visitors. Every home comfort. Pleasantly situated in own Grounds. South aspect. Five minutes' walk from Station, Church, and Baths. Terms moderate.

MRS. POWELL.

MOORHAVEN. Has a south-west aspect, is close to the Baths, and not far from the Station. Special terms are made for Winter Residents.

MISS M. A. WRIGHT,
(Late of St. Mary's Hospital, London.)

HOUSE AND ESTATE AGENTS. For Furnished and Unfurnished Houses and Land to Let and for Sale, also Apartments to Let, apply for List free. OVERTON & SONS, The Broadway. Telegrams, "Overton, Woodhall Spa."

WOOLACOMBE,

Devon. Pop. 350. 1½ m. from Morthoe Station, 12 m. from Barnstaple. *Sunshine:* 1906, 1,739 hrs.

WORCESTER,

C.B. Pop. 48,000. G.W. Ry. and Midland Ry. 120 m. from London; on the left bank of the Severn. *Aspect:* West. *Climate:* Mild. *Water supply:* Constant. *Water:* Soft. *Drainage:* Modern. *Soil:* Sand and gravel. *Excursions:* To Malvern and other places of interest. Steamers to Holt Storuport, Tewkesbury, Gloucester, &c. Boating on river; cathedral, promenade. One of the most ancient of our cathedral cities. The cathedral, built in the Early English style, dates from the eleventh century. For beauty and distinctive character Worcester china is famous all the world over. Golf links (18 holes). Surrounding district, traversed by the Severn, affords tourists a great variety of typical English rural scenery.

STAR HOTEL. Leading County and Family Hotel. Near Cathedral. Perfect Sanitation. Electric Light. Ladies' Drawing Room. Billiard and Smoking Rooms. Table d'Hôte, separate tables. Grill Room. Garage. Inspection Pit. Headquarters A.C.G.B. & I. and Motor Union.

MISSES E. and A. DIXON, Proprietresses.

McNAUGHT & CO., Motor Works and Garage, also 7 and 8, Broad Street, Birmingham, and 213–223, Knightsbridge, London. Official repairers to the Automobile Club. Inspection Pit, Petrol, Accessories. Specialists in Motor Design. Highest class workmanship. Catalogue on application.

WOLVERHAMPTON,

County Borough. Stands on a gentle eminence amid a network of railways and canals, 13 m. N.W. of Birmingham and 126 m. N.W. of London. The town stands on the western edge of the great coal and iron mining district of South Staffordshire. There is a pleasant green country north and west of the town, which is very well supplied with facilities for outdoor and indoor amusements all the year round (*see* p. 860).

WHITAKER'S PEERAGE FOR 1909

CONTAINS

AN EDUCATIONAL SUPPLEMENT.

WORTHING,

Sussex. M.B. Pop. 25,809. L.B. & S.C. Ry., 61 m. from London. *Location*: On coast between Beachy Head and Selsey Bill, 12 m. W. of Brighton. *Elevation*: Slightly above sea-level. *Neighbourhood*: Flat; background South Downs 3 m. distant from town hall. *Aspect*: South. *Climate*: Soft, mild, equable. *Rainfall*: 30·442 in. *Sunshine*: 1,781 hrs., 1907. *Water supply*: Constant, from the hills. *Drainage*: Modern. *Soil*: Loam and marl. *Front*: Asphalted promenade, 1¼ m., level with top of beach, slightly raised above carriage drive, road between it and houses; bandstand. *Pier*: 900 ft., pavilion; excursion steamers call in summer. *Beach*: Shingle, shelving to hard sands as tide recedes. *Bathing*: From tents, machines, and pier-head; mixed bathing. *Baths*: Large salt-water, swimming, and general establishment for ladies and gentlemen, with tennis courts adjoining. *Excursions*: Arundel, 10 m.; Bramber Castle, 9 m.; Goring Woods, 3 m.; Broadwater, 1 m.; 13th century church, Chanctonbury, 7 m. (800 ft.); Cissbury and other remains of Roman encampments. *Season*: Winter and summer. *Annual fixtures*: Regatta, horse show, cycle and athletic sports, poultry show, summer and autumn flower shows, swimming carnival, tennis and croquet tournaments, sailing regatta. A select and growing watering place, residential town, and winter resort for invalids; much foliage and sylvan surroundings. Theatre Royal: library; school of art; choral societies; sports ground (county cricket, football, tennis, and hockey); Homefield Park, 16 acres (cricket, tennis, bowls): Steyne Gardens, 3 acres; tennis (promenade concerts); hunting; boating; electric light; golf links (18 holes) close to town, reached by a service of motor omnibuses (*see* p. 861).

YARMOUTH, GREAT.

C.B. Pop. 53,000. *Means of access:* G.E. Ry., Midland & G.N. Joint Ry., steamboats from London. *Location:* Coast of Norfolk, 20 m. E. of Norwich. *Elevation:* From little above sea-level to 50 ft. above. *Neighbourhood:* Norfolk Broads. *Aspect:* East. *Climate:* Bracing. *Soil:* Dry sand. *Front:* 4 m. marine drive, separates houses from concrete promenade (which fringes sands), with ornamental gardens, bandstands, and winter gardens. *Piers:* 2. *Beach:* 7 m., sands in borough. *Bathing:* Separate and mixed. *Excursions:* To Broads by rail, boat, and road; also marine trips. *Season:* June-Sept. *Annual fixtures:* Regatta, Aug. Race meeting, Sept. Golf meetings, Easter, Whit week, and 1st week in Nov. (closed to members); open golf tournament, Aug.; tennis tournament, Aug. A sea-port; important herring fishery station; ga; and popular holiday resort, in county of Norfolk. The town possesses unequalled sands and a fine stretch of quays lined by Elizabethan houses. The old parish church is the largest in the country. The toll-house, a 13th century relic, is now a museum and a free library; and the celebrated Nelson Room is still preserved at the Star Hotel. The sands extend to Gorleston. Assembly rooms; Aquarium Theatre; Theatre Royal; Hippodrome; Wellington Pier Gardens (military band daily); winter gardens. Recreation grounds, 40 acres (cricket, croquet, bowls, tennis, cycling). golf-links (18 holes); good cycling roads; boating and fishing on sea and Broads; revolving observation tower, 130 feet high; pavilion; switchback railway; Hotchkiss bicycle railway; beach concert rings; minstrels; market covers 2½ acres; marine museum.

HOUSE AND ESTATE AGENT. The Crescent, Kimberley Terrace (near Wellington Pier). Special List of Furnished and Unfurnished Houses and Businesses sent free on application. Rents Collected, Valuations for Probate, &c. Telegrams, "Smith, Kimberley Terrace, Great Yarmouth."

S. R. SMITH.

YELVERTON,

South Devon. Pop. 1,500. *Means of access:* G.W. Ry. and motor 'bus from Plymouth. A breezy moorland village, considered a good natural sanatorium all the year round; especially busy Aug.-Sept. Angling, hunting.

YEOVIL,

A municipal borough of Somersetshire, 40 m. S. of Bristol, and 123 m. W.S.W. of London. (L. & S.W Ry.). Is a busy, handsome place, built of red and brick stone, situated on a hillside facing south, sloping to the Yeo. The climate is mild and warm, beautiful undulating country all around, and easily accessible. The restored church of St. John's (the "Lantern of the West") contains some 15th and 16th century brasses.

SANDRINGHAM HOUSE, Boarding Establishment, 74 and 75, Marine Parade. Redecorated. Enlarged. Moderate terms. Excellent cuisine. Opposite Pier and Gardens. Telephone, 0171.

MRS. FARRINGTON.

YORK,

Yorkshire. C.B. Pop. 85,861. *Means of access:* All principal English and Scotch lines; 188¼ m. from London. *Sunshine:* 1,260 hrs., 1907. The cathedral possesses three features in which it is not matched in England—the size of its east window, the flowing tracery of its west window, and the beauty of its chapter house. The city is very rich in antiquities and full of interest. There are golf links (9 holes) and plenty of arrangements for outdoor and recreative sports both in and near the city (*see* p. 861).

HOUSE AGENTS, AUCTIONEERS, AND VALUERS. RICHARDSON & TROTTER, Auctioneers, Valuers, House and Estate Agents. List of Properties to be Let or Sold on application. The Estate Sale Rooms, 4, Lendal. Telephone, 335.

THE PRINCIPALS OF THE SCHOOLS,

OR TO

J. WHITAKER & SONS,

12, Warwick Lane, London, E.C.

IMPORTANT NOTICE.

The HOLIDAY 'WHITAKER' will appear April 1st, 1909,

AS AN

ILLUSTRATED A B C TRAIN GUIDE

TO THE

Principal Holiday and Health Resorts of the United Kingdom.

To be PUBLISHED MONTHLY during the Summer Months.

Price **6d.** net.

THE HOLIDAY 'WHITAKER' PRESS OPINIONS, 1908.

DAILY MAIL.—"The publication, indeed, is one that should be in the hands of every prospective holiday-maker."

THE FIELD.—"The attention of those who require the assistance of a guide to holiday and health resorts in the United Kingdom may be called to the summer edition of the Holiday 'Whitaker.'"

OXFORD CHRONICLE.—"The Holiday 'Whitaker' may be heartily commended both to those who have determined where to go, and want confirmation about the place of their choice, and to those who have their choice still to make."

TORQUAY TIMES.—"In a short space one is able to learn just what one wishes to know."

HARROGATE HERALD.—"The Holiday 'Whitaker' is a complete answer to the questions, where to go; how to go; where to stay; what to see; and what to do."

THE ABERDEEN DAILY JOURNAL.—"The scrupulous accuracy that marks the more familiar 'Whitaker's Almanack' is evident in the notices of the places to visit, brief though these notices are, while a similar comprehensiveness is also visible."

THE AFRICAN WORLD.—"The Holiday 'Whitaker' is a complete guide."

YORKSHIRE GAZETTE.—"An extraordinary wealth of valuable information is compressed within its 400 pages; the Holiday 'Whitaker' is really indispensable to the holiday-maker."

SPORTSMAN.—"The thoroughness and wide reach that 'Whitaker's Almanack' is famed for are attained in another field in the Holiday 'Whitaker,' which has 250 illustrations."

CHRISTIAN LIFE.—"From Aberdeen to Adelaide, from Banbury to Bombay, and so on with all the other letters of the alphabet, the summer Holiday 'Whitaker' pilots us with zeal and with discretion."

NEWMARKET JOURNAL.—"The Holiday 'Whitaker' is well printed, profusely illustrated, and is decidedly cheap at a shilling."

ATLANTIC TRANSPORT LINE.

LONDON to NEW YORK every Week.

The only Passenger Line from London to New York direct.

Current Accounts are opened with, and the usual Banking facilities granted to, persons properly introduced. The Bank takes the Agency of Private Country Banks, Joint Stock Banks, and other Public Companies in England or the Colonies. Attends to the purchase and sale of British and Foreign Stocks without charge, except participation in Brokers' Commission. Collects Dividends on Government Funds, Railway Stock, Foreign and other Securities, payable in England or abroad. Acts as agents for the receipt of Military and other Pay and Allowances, and generally transacts every description of Banking business.

The Bank is prepared to act as Custodian Trustee under the provisions of the Public Trustee Act, 1906, but no liability attaches to the Consolidated Fund of the United Kingdom in respect of any act or omission of the Bank.

Sums of £10 and upwards may be deposited, subject to seven days' notice of withdrawal or repayable at call. Interest is allowed thereon, according to the class of Deposit, but subject to alteration by public advertisement in the *Times* newspaper. A receipt is given for each deposit, which is not transferable, and must be surrendered on repayment of the amount, according to the conditions printed thereon.

Circular Notes of £10, £25, and £50 are issued for the use of Travellers, payable in the principal towns of Europe, Asia, Africa, America, and Australasia. They are issued free of expense, and are payable by the Agents abroad, at the exchange of the day, without any deduction whatever for Commission.

Letters of Credit are also granted on the chief Towns and Cities abroad. They may be obtained at the Bank in Lothbury, or any of its Branches.

The officers of the Bank are bound not to disclose the transactions of any of its customers.

London, *November*, 1908. A. A. KEMPE, *Secretary*. [28

The National Provincial Bank of England, Limited, having numerous Branches in England and Wales, as well as Agents and Correspondents at home and abroad, affords great facilities to its customers, who may have money transmitted to the credit of their Accounts through any of the Branches, free of charge.

At Head Office and Metropolitan Branches, Deposits are received and interest allowed thereon at the rates advertised by the Bank in the London newspapers from time to time, and Current Accounts are conducted on the usual terms.

At the Country Branches, Current Accounts are opened, Deposits received, and all other Banking business conducted.

The Bank undertakes the Agency of Private and Joint Stock Banks, also the Purchase and Sale of all British and Foreign Stocks and Shares, and the collection of Dividends, Annuities, &c.

Circular Notes and Letters of Credit, payable at the principal towns abroad, are issued for the use of Travellers.

The Officers of the Bank are bound to secrecy as regards the transactions of its customers.

Copies of the Annual Report of the Bank, Lists of Branches, Agents and Correspondents may be had on application at the Head Office, and at any of the Bank's branches.

J. W. REACHER & CO.

Stock and Share Brokers,

Mansion House Buildings,

4, QUEEN VICTORIA STREET, LONDON, E.C.

ESTABLISHED AT THIS ADDRESS SINCE 1884.

We invite correspondence with Investors, to whose interests and needs special attention is devoted.

GOOD INVESTMENTS.

For permanent Investment the following may be named:—English Government, Corporation, and Colonial Stocks; English Railway Stocks; Mortgage Debenture Bonds in Foreign and American Railways, *which yield Dividends on Ordinary Stock:* Shares in first-class Banks, such as London and Westminster, London and County, Union Bank of London, London Joint Stock, London City and Midland, Parr's, Lloyds, Bank of Egypt, Agricultural Bank of Egypt, &c.

A careful selection of the foregoing will provide an investment yielding an average return of about 5 per cent.

Investors desiring a larger percentage may turn their attention to the better class of Industrial Companies, such as Harrods' Stores, Carreras, Aërated Bread, Lyons, D. H. Evans, Van den Berghs, Brunner Mond, Weldons, J. & P. Coats, and Bolckow Vaughans, &c. The Preference Shares and Debentures of the above named appear to us well worthy of attention, even on the part of the most careful investor, and the Ordinary Shares yield a good return. We make sound Home Industrial Shares a special feature, and are able to deal at closest quotations. Upon our advice many investors bought Slaters at under par (now £1⅛); Harrods at £1 (now £1¼); Aerated Breads at £2 (now £5); D. H. Evans at £1 (now £3⅜); English Sewing Cottons at 12*s.* (now £1⅛); J. & P. Coats at £2 (now £8⅛). Van den Berghs at £1 (now £2).

MINES.

Mining Shares are, of course, speculative. Our Notes, carefully prepared each month, and based on most recent information, should be seen by those interested in Indian, Australian, and African (Gold or Diamond) and Broken Hill Mines.

Dealing at close prices. Prompt delivery.
Cover business not entertained.
Stocks delivered to any London Banker against cash.
Foreign Correspondents will receive every attention.

Monthly Investment List free on application.
References can be given in every large town in England.

This Company (established in 1836) PURCHASES or grants LOANS upon—
REVERSIONARY INTERESTS, vested or contingent, in well-secured *Property*.
LIFE INTERESTS in *Possession*, or in *Expectation*, and POLICIES OF ASSURANCE upon Lives.
LOANS UPON REVERSIONS may be obtained either at an Annual Interest, or in consideration of redeemable deferred charges, payable upon the *Reversions* falling in, and free from the payment of interest in the meantime.
PRESENT INCOMES are likewise granted upon the latter principle to persons entitled to Reversionary Interests, who may thus obtain the means of support until their property falls into possession, without being called upon for any payment until that event.
Prospectuses and Forms of Proposal may be obtained from
ROBERT R. TILT, F.I.A., *Actuary and Secretary.* [230

WILLIAM ARTHUR PHILPOTT.

Bankers.

LLOYDS BANK LIMITED, 72, LOMBARD STREET, E.C.

Offices.

1, FREDERICK'S PLACE, OLD JEWRY, E.C.

This Trust was established in 1893 to acquire Freehold and Long Leasehold Shop Properties solely for investment purposes. Properties of a speculative nature are studiously avoided.

The Capital is divided into "A" and "B" Shares.

The "A" Shares are fully subscribed and paid up.

The "B" Shares carry a cumulative dividend of 5 per cent. per annum, and are issued as required. Only fully-paid Shares are issued, so that they involve no liability.

Both classes rank equally for priority as to Capital and Dividends.

All Dividends have been regularly and fully paid since establishment.

The present Rental Income, arising from lettings on full repairing Leases, amounts to upwards of £23,500 per annum, more than half of which is derived from freeholds.

The growth of the Trust is shown by the following Statement:—

Year.	Investments at Cost.	Annual Rent Roll.	Reserve Fund.	Subscribed Capital.
	£	£	£	£
1893	3,074	220	27	1,050
1896	43,280	3,321	275	12,860
1899	118,112	8,571	930	41,945
1902	200,964	13,375	1,976	69,610
1905	296,948	19,094	3,148	107,280
1908	**372,345**	**23,500**	**4,650**	**124,880**

The Reserve Fund is invested in Consols.

A copy of the 16th Annual Report and Balance Sheet, giving full details of all investments, can be obtained on application.

EDWARD WELSH, *Secretary.*

PURCHASES.—The Society purchases Reversions and Remainders, whether absolute or contingent; Life Interests, whether in possession or deferred, and generally all Interests (in approved property) that depend upon the duration of human life.

LOANS.—The Society also grants Loans on the security of such Interests, either on Ordinary Mortgage or by way of Reversionary Charge. The latter mode meets the convenience of borrowers who do not wish to make any payment for either principal or interest until their Reversionary Property falls into possession. The amount to which the Society will then be entitled is fixed at the outset, and does not depend on the time elapsing between the grant of the Loan and its repayment. The option of redeeming the Charge during the first three or five years can usually be combined with this form of Loan.

Forms of Proposal and full information can be obtained at the Society's Offices.

"HOW TO SELECT A LIFE OFFICE."

By G. M. DENT, F.S.S.

Extracts from a few Press Opinions.

MORNING POST.—"Mr. G. M. Dent, who is a Fellow of the Royal Statistical Society, has written a valuable pamphlet on Life Assurance, in which all the more important questions connected with the subject are discussed by a firm of merchants and an insurance broker. . . . There are two carefully-prepared tables."

PALL MALL GAZETTE.—"Deals very clearly with the main points to be borne in mind in selecting an office, and the tabular matter is very useful. Armed with this pamphlet, and blessed with a little commonsense, the ordinary man cannot go very far wrong."

DAILY CHRONICLE.—"Cannot fail to be instructive."

STATIST.—"The form of question and answer relieves the work very much from the heavy character of a statistical inquiry." "To those who may contemplate insurance, the expenditure of 1s. on this pamphlet will be a judicious outlay."

FINANCIAL TIMES.—"Carefully and skilfully compiled."

POLICY-HOLDER.—"Life Assurance as an investment, and Endowment Assurance, are both explained in a very attractive way."

UNITED SERVICE GAZETTE.—"The fact that this pamphlet has now reached its third edition amply demonstrates the value of its contents. Illustrations, proving the great value of life assurance as an investment, accompany the pamphlet, which also shows how to determine the relative merit of Offices which are not altogether 'much of a muchness' as is generally believed."

BRADFORD OBSERVER.—"The remarks on Life Assurance as a paying investment, apart from its protection against the misfortune of premature death, deserve to be widely read."

CARDIFF TIMES.—"In terse and lucid fashion, Mr. Dent not merely emphasises the utility of Life Assurance as an investment, but also explains how the assurer may obtain the maximum of security and the largest return for money."

GLASGOW HERALD.—"The pamphlet takes the form of a dialogue, which, together with a series of tables, shows the features to which an intending assurer should direct his attention before selecting a company."

LIVERPOOL COURIER.—"The dialogue is smartly written, and touches on many of the most important elements that have to be considered before a policy is taken in any office. Appended are illustrative tables showing how widely different offices vary in their mode of doing business."

Price **1s.** By post, **1s. 1d.** (under four ounces).

PROGRESS OF THE COMPANY

During the past Twenty Years to 31st December, 1907.

Years.	New Business.		Net Premium Income.	Invested Funds.
	Sums Assured.	New Premiums.		
1887	£578,890	£21,026	£131,997	£534,832
1897	912,489	35,600	231,750	1,238,849
1907	740,579	31,407	320,050	2,287,855

It will thus be seen that in ten years the Net Premium Income shows an increase of nearly £100,000, whilst the Funds during the same period have been increased by more than £1,000,000.

Special Features.—Low Rates of Premiums—Liberal Conditions—Immediate Payment of Claims—Policies Non-forfeitable, and World-wide.

Distribution of Profits.—Special attention is called to the fact that new policy holders participate in the large proportion of Ninety per cent. of the entire Profits of the Company.

Moderate Rates. Liberal Conditions. Undoubted Security. [81

MINIMUM PREMIUMS.

The London Life Association Limited is not a company trading for profit, but a society of persons mutually assuring each others' lives at the lowest possible cost. It has no shareholders to provide for, no branch offices to keep up, and it never employs travellers or pays commission to agents or solicitors to get new business. The expenses of management are thus reduced to a minimum, but £4 10*s.* 1*d.* per cent. of the Premiums, or £2 18*s.* 5*d.* per cent. of the Income from premiums and interest—ratios less probably than those of any other office, and in fact less than those of most for commission alone.

The Association's system of charging a full premium for seven years and then allowing large reductions during the rest of life is well known, but there are those to whom the higher early premiums are inconvenient, even when the office lends one-half of each at 4 per cent. The Directors, therefore, knowing that the Association can rightly be content with smaller payments than are necessary elsewhere, have introduced tables of "MINIMUM PREMIUMS" which, although they are lower than the non-profit rates of most companies, will yet be subject to some reduction as life is prolonged; but whatever happens, the sum assured is fixed (without being liable to any diminution or debt), and the renewal premiums specified in the policy is the most which the Assured can be called upon to pay. These premiums are applicable to assurances covering death only, or endowment assurances receivable at a selected age or previous death; the policies are free for the whole world; a surrender value of at least one quarter of the ordinary complete premiums paid, even of the first alone, is guaranteed; and all claims are receivable immediately on proof of death (or maturity) and title.

It is impossible to set forth here the details of this scheme, but they are to be found in a prospectus which may be obtained on application by post or otherwise, for there is not the least difficulty in effecting assurances without the intervention of any middleman.

"HOW TO SELECT A LIFE OFFICE."

By G. M. DENT, F.S.S.

EXTRACTS FROM A FEW PRESS OPINIONS.

"Those who are seeking an office for the purpose of assurance will do well to peruse this 'dialogue' before deciding upon any particular company."—*Bullionist.*

"The statistics as to Endowment assurance policies as investments are highly interesting and convincing."—*Citizen.*

"To those who contemplate taking out life policies, the expenditure of a shilling on this pamphlet may be recommended as about the wisest step they could take. Everyone should read it."—*Fairplay.*

"There is no doubt Mr. Dent has expended a vast amount of research on his pamphlet, and the elaborate tables which he publishes are distinctly valuable."—*Financial Times.*

"An interesting study of the dialogues and tables given will more than repay the shilling outlay."—*Dundee Advertiser.*

"All who intend to insure their lives will find much useful information in this pamphlet."—*Belfast News-Letter.*

"The publication is of value to the insurance broker and other professional men, but of more value still to the intending insurer."—*Halifax Courier.*

"A cleverly-written dialogue. Both tables are explained with great lucidity."—*Law Journal.*

"All who contemplate insuring their lives should read, mark, learn, and inwardly digest this able and interesting treatise."—*Leeds Times.*

"A well-written pamphlet. Anyone proposing to insure his life will easily find from the author's 'three interviews' how to spend his money to the best advantage."—*Liverpool Mercury.*

"Cannot fail to be instructive."—*Daily Chronicle.*

"A valuable pamphlet on life assurance. . . . There are two carefully prepared tables No. 1, 'exhibiting in a concentrated form the more essential points to be considered in the selection of a Life Office,' and No. 2, 'showing the different results to policy-holders produced by the payment of the same money to the various offices.'"—*Morning Post.*

"A most valuable and exhaustive pamphlet."—*Nonconformist.*

"One special branch of the question, which is most lucidly treated, is the value of life assurance considered simply as an investment."—*Southport Guardian.*

"An instructive pamphlet. Insurers in search of knowledge might advantageously expend a shilling on this book."—*Statist.*

Price 1s. By post, 1s. 1d. (under four ounces).

Matron:
Miss E. C. LAURENCE, R.R.C.

CHELSEA HOSPITAL FOR WOMEN.

The Hospital has 50 Beds, and was founded for the reception and treatment of respectable poor women and gentlewomen in reduced circumstances, suffering from those many distressing diseases to which the female sex is liable. A great proportion of women thus afflicted are those upon whom the numberless misfortunes of ill-health most heavily fall—the poor gentlewoman, the governess, the wife of the ill-paid clerk, the artisan, and the very poor. Their homes are altogether unsuited for the performance of a critical operation, nor can they there have the special nursing and care which their condition demands. It is therefore obvious that the work of this Charity, in restoring Mothers, Wives and Daughters to that health upon which the maintenance of families so frequently depends, is one of real value and importance.

FREE IN-PATIENTS

are admitted on recommendation of Subscriber, one Letter being sufficient for each Patient's entire stay.

CONTRIBUTING IN-PATIENTS

are received upon payment Weekly of 10*s.* 6*d.*, 21*s.*, or 42*s.*, according to means.

OUT-PATIENTS

attend daily at 2.15 o'clock (except Saturdays), with Subscriber's Letter, or on payment of 1*s.*

THE CONVALESCENT HOME

at St. Leonards-on-Sea contains 22 Beds, and is not reserved for hospital patients.

The Hospital is mainly dependent on voluntary contributions. It has recently suffered severe loss through the death of old friends, and further assistance, especially regular support, is greatly needed.

CHARING CROSS HOSPITAL

STRAND, W.C.

Treasurer—W. R. MALCOLM, Esq., 440, Strand.

The Council earnestly appeal for Donations, New Annual Subscriptions, and Legacies. The Annual Income from Invested Property is only **£2,500**, while the Expenditure (including that of the Convalescent Home) is **£23,000**, the Balance being derived from Voluntary Contributions. Average number of Patients treated yearly, **24,000**.

WALTER ALVEY, *Secretary*. [127

EVELINA HOSPITAL —FOR— CHILDREN

SOUTHWARK, LONDON, S.E.

Patron: HIS MAJESTY THE KING.

Supported entirely by Voluntary Contributions.

Only large **CHILDREN'S** Hospital in South London, situated in its poorest District (76 cots, and extensive Out-patient Department.)

FUNDS GREATLY NEEDED.

£8,000 wanted **ANNUALLY** for Ordinary Working Expenses.

Please help this Charity, "not only because it is a Hospital, but because it is a Hospital for Children."

President—THE RT. HON. THE EARL OF ANCASTER. *Treasurer*—SIR J. MURRAY SCOTT, BART.
Chairman—CHARLES WIGHTMAN, ESQ. *Secretary*—H. C. STANILAND SMITH. [126

GENERAL LYING-IN HOSPITAL

York Road, Lambeth, S.E. ESTABLISHED 1765.

Patrons—**H.M. Queen Alexandra, H.R.H. the Princess of Wales.**

This Hospital is situated in one of the poorest parts of London, in the district South of the Thames, with a population of nearly two millions.

Married women, in indigent circumstances, especially the wives of Soldiers and Sailors, are certain single women (with their first child, after investigation by the Committee), are admitted to the Hospital from all parts of the kingdom, but mainly from the immediate neighbourhood, from which, owing to its poverty, little pecuniary help is obtainable.

Subscriptions and Donations thankfully received by the Treasurer, or Miss ROSE E. WHYTE, *the Secretary, at the Hospital.* [1

THE GIRLS' FRIENDLY SOCIETY

Patroness—HER MAJESTY QUEEN ALEXANDRA.
Presidents and Vice-Presidents—THE ARCHBISHOPS AND BISHOPS.

The G.F.S. is a National Society which links together in friendly bonds over 300,000 women of all ages and of all ranks of society in all parts of the world for mutual help. Its aim is to set before its members a high ideal of purity of thought, word, and deed; to help them to be true to that ideal; to be a standing witness to the possibility of purity of life and conduct for every woman and girl in the land; to guard the hundreds of thousands of girls who are growing up to womanhood from acknowledged dangers, and to extend to them the priceless boon of loving Christian fellowship and of fellowship in Christian work.

The various Departments of G.F.S. work include help for Sick Members, the care of Working-house Children, Registry Work address of Central Employment Office is **14,** Victoria Street, S.W., protection in Emigration and in Travelling, the provision of Homes of Rest, Lodges and Recreation Rooms, Industrial Training, and the encouragement of Temperance and Thrift.

The Publications of the Society, Price Lists of the Needlework Depôt, and all further information, can be obtained from THE SECRETARY, G.F.S. Central Office, 59, Victoria Street, Westminster, S.W.
Telegrams: "AUGUST, LONDON." *Telephone:* 2521 VICTORIA. [

ASSOCIATION FOR PROMOTING THE
GENERAL WELFARE OF THE BLIND.

Patrons—THEIR MAJESTIES THE KING AND QUEEN.

OBJECT: To Teach Trades to the Adult Blind, and to provide them with Employment, Materials, and a Market for their Manufactures.

The amount realised by goods sold is not sufficient to meet all the expenses, and in addition there is a Pension Fund for the benefit of Aged Blind People past work.

Funds to supply that which is lacking are earnestly APPEALED FOR.

HOWARD E. MULLINS, Secretary and Manager.

258, TOTTENHAM COURT ROAD, LONDON, W.

THE GORDON BOYS' HOME

(THE NATIONAL MEMORIAL TO GENERAL GORDON).

Patron—THE KING. *Vice-Patron*—H.M. QUEEN ALEXANDRA.

President—H.R.H. THE PRINCE OF WALES, K.G.

Chairman of Committee—General Sir GEORGE W. A. HIGGINSON, G.C.B.

THE HOME IS SITUATED AT WEST END, WOKING, NEAR BROOKWOOD.

OFFICES—5, YORK STREET, ST. JAMES'S, S.W.

The Home is constructed to accommodate 250 Boys, chosen from the homeless and destitute, between the ages 14 and 16, and give them a training, up to the age of 18, which will fit them alike for civil life in this country its Colonies, and for service in the Army, Navy or Mercantile Marine.

CONDITIONS OF ADMISSION.—1. None are admitted below 13½ years of age or above 15¼. 2. A boy must, in the inion of the Committee, be really necessitous. 3. He must be free from such physical or mental infirmity as uld disqualify him for service in the Army or Navy, or for civil employment in the Colonies or elsewhere, which uld require active bodily exertion. 4. Boys of known bad character are ineligible.

Free admission is given to such number of boys as above as can be provided for out of the general income of the me. A guaranteed payment of £22 annually during his stay at the Home will give a right of nomination for a l fulfilling the conditions of admission. There are now 250 Boys in the Home. Subscriptions and Donations are gently needed in order that this number may be maintained.

Subscriptions are received by THE LONDON AND WESTMINSTER BANK, 1, St. James's Square, S.W.; by the easurer, General the Right Hon. Sir DIGHTON PROBYN, G.C.B., V.C., Buckingham Palace, S.W.; and by the cretary, at the Office, 5, York Street, St. James's, S.W., from whom any further information can be obtained.

G. A. BEATY-POWNALL, Lt.-Colonel, *Secretary.*

GUY'S HOSPITAL

LONDON BRIDGE, S.E.

EDS, 608. IN-PATIENTS (1907), 8,733. OUT-PATIENTS, 131,138.

Ordinary Expenditure, 1907—£64,954.

ncome from Endowments, 1907—£39,353.

For the large difference between assured income and ordinary outgoings, the Hospital is n year to year dependent on **VOLUNTARY SUPPORT.**

Governors earnestly appeal for:—1. New Annual Subscriptions and Donations to meet this deficency; 2. Donations to the Re-endowment and Re-building Funds.

THE TEMPORARY

Home for Lost and Starving Dogs,

Battersea Park Road, South Lambeth, London, S.W.,

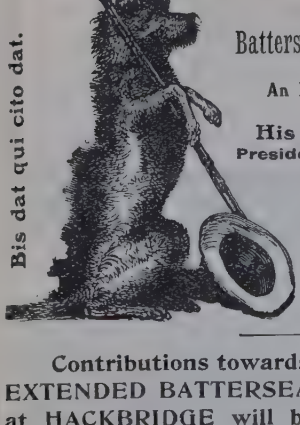
And HACKBRIDGE, SURREY.

An Institution for the Protection of Dogs and Cats.

PATRON:

His Most Gracious Majesty the King.

President: His Grace the DUKE OF PORTLAND, K.G.



OBJECTS:

1. To provide shelter and food for the lost, deserted and dangerous dogs of London.
2. To restore lost dogs to their rightful owners.
3. When good dogs are unclaimed, to find suitable homes for them at nominal charges.
4. To destroy, by a merciful and painless operation, all valueless and diseased dogs.

Contributions towards the Maintenance of the RECENTLY EXTENDED BATTERSEA HOME and the COUNTRY HOME at HACKBRIDGE will be thankfully received by

HENRY J. WARD, *Secretary.*

HOME MISSIONS OF THE CHURCH

(Additional Curates Society).

THE ADDITIONAL CURATES SOCIETY exists to help poor parishes to obtain the assistant Clergy they require, and could not have without money assistance from outside their own borders.

The Society's work now reaches over the whole of England; it also deals with Wales, the Channel Islands, the Isles of Scilly, and the Isle of Man. It touches the slums in the centre of large cities, the poorer suburbs outside the cities, and also the mining and other industrial towns and villages. Its help is now given to more than **1,000** parishes, and helps to maintain **1,300** additional Clergymen. The Christian work in these parishes touches **eight millions** of people. But this help will necessarily have to be curtailed in 1909, unless the Society's income be materially increased.

Churchmen who do not as yet subscribe to A.C.S. are earnestly asked to do so. The A.C.S. Office is at 39, Victoria Street, Westminster. Secretary: Canon Petit.

[197

INFANT ORPHAN ASYLUM,
WANSTEAD.

Patron—HIS MAJESTY THE KING. | *Bankers*—Messrs. WILLIAMS DEACON'S BANK.

This Institution maintains and educates the Orphans of persons once in prosperity, from all parts of the Empire, from their Earliest Infancy until Fifteen years of age.

It has received 4,762 Fatherless Children already. Forty-four were admitted last year.

About 450 are in the Asylum now.

Elections will be held in May and November this year.

Forms of nomination can be obtained at the Office.

Nearly the whole of the Yearly Income arises from Voluntary Contributions. *Assistance is therefore urgently needed*, and will be thankfully acknowledged.

HOMES OF HOPE,
Nos. 4, 5, & 6, Regent Square, Gray's Inn Rd., London, W.C.
(Established 1860.)

For the **restoration** of the **First** fallen and the **Protection** of **Friendless** young omen.

Young women are admitted on any day, and coming from any quarter whatever, **if there e room** in the Homes, and **funds.**

This Society does **valuable maternity** work for the poor **betrayed** and **deceived oung women** who have **taken** the **one false step,** who are really the **most hopeful** ass **of the fallen,** and generally **to be pitied.**

In **every** case, **if** it be **possible,** the **men** are **compelled** to **pay** the sum allowed by w **for** the **child's support.**

While inmates of the Homes, the young women **are trained** in household and domestic ties, with a view to their **becoming good** and **useful members of society.** The eat object, however, kept most anxiously before the Committee is to afford them opportunities religious instruction.

The applications for admission are **painfully urgent,** and the charity is wholly dependent voluntary contributions. It is hard to witness **the anguish and sorrow** of those who ply, and **pass them over** for lack of funds.

This best of all Rescue work is **hampered** and **hindered** by **debt,** and the Committee quire **more Subscribers,** as the **work** is **limited** for lack of more money. Had they e means, **many more young lives** could be **snatched from sin,** and—**mark is!—nearly every case** that comes into the Homes **is a rescue.**

The Secretary will be happy to forward the last Annual Report.

LONDON FEVER HOSPITAL,

ISLINGTON, N.

Patron: HIS MAJESTY THE KING.
President: The Rt. Hon. LORD BALFOUR OF BURLEIGH, K.T.

84,000 persons have been received and treated here since 1802. The Diseases admitted are Scarlet Fever, Diphtheria, Measles, and German Measles; and Typhoid when accommodation can be made available. The general ward fee is three guineas for the whole term of treatment. Private rooms, three guineas a week. Patients' payments amount to about a fourth of the annual outlay, the other three-fourths falling upon the funds of the Institution. This system encourages people who are willing to pay a part at least of the cost of their illness to do so rather than remain for treatment at home or cast themselves upon the rates. No help is received from the rates by this Hospital.

Annual subscribers of a guinea and upwards for more than one year are Governors, and donors of ten guineas and upwards in one sum are Life Governors. Domestic servants of Governors, and certain employés of subscribing business houses, clubs, and hotels, are promptly received and treated free of charge. Application to the Secretary with a medical certificate will ensure prompt admission. The application can be made personally, or by letter, telegram, or telephone; 637 North.

President—THE DUKE OF GRAFTON, K.G.

Honorary Secretaries—Messrs. GEORGE POCOCK and PERCY R. POCOCK.

This Society grants Pensions to the Blind Poor at their own homes in sums ranging from 10*s.* to 25*s.* per month.

There are at present **1,258** pensioners, residing in various parts of the Kingdom, among whom nearly **£9,000** is annually distributed in pensions, paid monthly, through the kind agency of Honorary Almoners.

Elections take place in May and November in each year.

In addition to those elected by the votes of Subscribers, not less than two are added at every election by rotation. Others are nominated from time to time to receive the "Queen Victoria," "Thomas Pocock," "James Templeton Wood" and other Memorial Pensions.

To be eligible, applicants must be totally blind, above 21 years of age, of good moral character, and in receipt of an income not exceeding £20, if single, and £30 if married. No distinction is made in regard to sex or creed; nor is the receipt of parish relief a disqualification.

Application must be made on the printed forms provided by the Society.

Subscribers of 10*s.* 6*d.* annually, or Donors of Five Guineas, are entitled to One Vote at every election, and multiples thereof in proportion. They can also assist in the Nomination of a candidate.

The payment of a Legacy to the Society confers upon each Executor the privilege of One Life Vote for every £25 bequeathed.

The yearly report, containing the rules, accounts and all information, will be forwarded on application.

Contributions will be gratefully received by the Treasurer, or by the BANK OF ENGLAND, or Messrs. Barclay and Co.

237, SOUTHWARK BRIDGE ROAD, LONDON.

ROYAL SOCIETY For the Prevention of Cruelty to Animals,

105, JERMYN STREET, ST. JAMES'S, LONDON.

PATRONS—{ HIS MAJESTY KING EDWARD VII.
{ HER MAJESTY QUEEN ALEXANDRA.

PRESIDENT—HIS ROYAL HIGHNESS THE PRINCE OF WALES, K.G.

Treasurer—Sir GUILLUM SCOTT. *Bankers*—COUTTS & Co., London.

Upon this Institution, founded in 1824, rests a heavy responsibility. It is earnestly and respectfully submitted that it has in consequence a strong claim upon the benevolence of the humane and charitable.

The Council respectfully appeal to the Public to extend a hearty assistance—

I. By supplying early information of all acts of cruelty witnessed.

II. By increasing the revenue of the Society by annual subscriptions, by donations, by testamentary gifts, and particularly by inducing their friends to become members.

Trained Officers are despatched to all parts of the Kingdom. Nearly 7,000 convictions annually.

The increased operations of the Society necessitate a continual drain on the funds of the Society on account of the inadequacy of the yearly Subscription. The Council need much greater assistance, and unless such additional support be extended to them, this most righteous cause of humanity must suffer from insufficiency of means to carry out those many urgent measures which every well-wisher of this Society has so deeply at heart.

SUPPORTED ONLY BY VOLUNTARY CONTRIBUTIONS.

SUGGESTION TO PERSONS MAKING THEIR WILLS.

"I give and bequeath the sum of . . . to be paid to the Treasurer for the time being of THE ROYAL SOCIETY FOR THE PREVENTION OF CRUELTY TO ANIMALS, established 1824; to be at the disposal of the Council for the time being of the said Society; and I direct that the same be paid free of legacy duty." The United Kingdom Beneficent Association.

Secretary—F. Burton Osborn, Esq.

Office: 7, Arundel Street, Strand, W.C.

Under the Patronage of H.M. THE KING and H.M. THE QUEEN.

President: His Grace the Duke of Abercorn, K.G., C.B.

The Association grants Annuities to Widows and Daughters of Clergymen, Medical Men, Officers of the Navy and Army, members of the Legal Profession, landed proprietors, and others of the upper and middle classes of gentle birth, above forty years of age, free from any unsoundness of mind, and medically certified to be unable, from age or bodily infirmity, to earn their own livelihood. Persons in possession of more than £50 per annum are not eligible for the benefits of the Association.

Since the foundation of the Association in 1863, annuities have been granted to 2,331 persons, of whom 1,113 are now living. Over 470 Candidates, many of them absolutely without income, are waiting to receive annuities. Waiting Candidates are assisted from time to time from the Temporary Relief Fund, and Candidates and Annuitants share alike in the benefits of the Clothing Department and the Department of Visiting Friends.

Permanent Memorial Annuities can be established. The cost and conditions may be ascertained upon application. [121

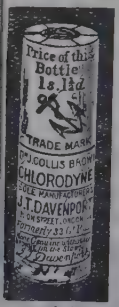
Dr. J. Collis Browne's

Chlorodyne

ADMITTED BY THE PROFESSION TO BE THE MOST VALUABLE REMEDY EVER DISCOVERED.

COUGHS, COLDS, ASTHMA, and **BRONCHITIS** are always prevalent in our fickle climate. Relief is invariably afforded by DR. J. COLLIS BROWNE'S CHLORODYNE. The beneficial effects of this reliable medicine are immediately felt. Slight attacks yield to a single dose, while in severe cases, where rest is broken owing to continuous coughing, the judicious use of CHLORODYNE will at once tranquillise the sufferer as will no other medicine.



CHLORODYNE never fails to relieve pain, and its soothing and restoring effects are equally marked in **NEURALGIA, TOOTHACHE,** and **RHEUMATISM,** rapidly giving relief when all other remedies have failed.

CHLORODYNE acts like a charm in **DIARRHŒA** and other complaints of the Bowels, its controlling and curative effect being truly remarkable, and it is strikingly efficacious in **CROUP, FEVER,** and **AGUE.**

CHLORODYNE is taken in drops, graduated according to the malady. The doses are small, so that a bottle is not soon exhausted, but remains ready to meet emergencies. No more reliable and generally useful medicine can be kept at hand. It is agreeable to take, pleasant in action, and has no bad after effects.

There is no GENUINE CHLORODYNE other than DR. J. COLLIS BROWNE'S and no SIMILAR MEDICINE — having the same VALUABLE PROPERTIES. —

Convincing Medical Testimony with each bottle. Of all Chemists, 1/1½, 2/9, 4/6.

COLEMAN'S

"WINCARNIS"

THE FAMOUS WINE TONIC.

AWARDED GOLD MEDAL FRANCO-BRITISH EXHIBITION, 1908.

The Strongest Tonic, Coleman's "Wincarnis"—at once a food, a tonic, and a stimulant. The man in perfect health requires four essential constituents to maintain his well-being—proteids, carbohydrates, hydrocarbon, and salts. The digestion and assimilation of these products is called "metabolism"—"Wincarnis" is rich in these valuable factors, thus constituting a perfect food. But the business man (or woman) may still be short of the motive power to enjoy the full benefit of his wants, and again "Wincarnis" comes to aid Nature by supplying the missing links in the chain which is to hold one fast to robust health—"the tonic and the stimulant."

TRY A BOTTLE GRATIS.

If you write to Coleman & Co., Ltd., Wincarnis Works, Norwich, mention WHITAKER, and enclose three penny stamps to pay the cost of carriage, you will receive a bottle of the restorative free of charge. "Wincarnis" is now sold by the glass at all the refreshment buffets of the Gt. Eastern and Gt. Northern Railways. "Wincarnis" is also sold medicated with Iron, Celery, Pepsine, or Quinine.

COLEMAN & CO., LTD., WINCARNIS WORKS, NORWICH.
